Budget Message

BY

GOVERNOR EDMUND G. BROWN

To the Senate and Assembly of the Legislature of California:

I present to you a $2,592,304,521 budget for the 1961-62 fiscal year.

It is the third consecutive soundly balanced budget transmitted to you by this Administration.

It shows the lowest percentage of annual increase of any comparable budget since 1943.

It meets the drastic demands of California's vaulting growth—566,000 more citizens this year again, 209,000 more students in our publicly supported educational institutions. It calls for no new taxes.

It recognizes the honest needs of the aged and the afflicted without resort to philanthropic excess.

It submits to the most stringent tests of economy in government without damage to the fundamental concepts of responsible liberalism.

This budget was prepared in a time of economic uncertainty, but it is presented with firmness and resolution.

Its makers were aware both of the pressing needs of today and the certain demands of tomorrow. Needs were matched against resources, demands against dollars.

I submit the result to you with pride and with confidence.

Together we have restored California's State Government to fiscal responsibility in the last two years. Together we will continue our joint record of achievement and responsibility.

Your own task now is to evaluate this budget, reviewing the complex factors and judgments involved in its preparation.

In submitting the 1961-62 Budget for your consideration, I want to make one declaration with absolute clarity.

The budget I present today is honestly, but narrowly balanced.

The budget I sign will also be balanced. If I must use my power of item veto, I will do so.

That pledge applies not only to items which may be added or altered in the legislative process. It applies with equal force to items I have included in my own budget proposals.

I also promise that if, in the months intervening between presentation and passage, conditions make it necessary or possible to reduce the total amount of this budget, I will not hesitate to recognize the change in circumstances.

Further, if, in your wisdom as legislators, you find it possible to make still more economies that do not damage essential services or leave honest needs unmet, I will be genuinely appreciative.

In this concern for fiscal integrity, we must not deceive ourselves. Some worthy projects are being delayed. Some important objectives remain on the distant horizon.

Postponement must not become cancellation, however. The objectives on the horizon must not fade into the unreality of mirage.

When we have met this year's priorities, we must press on to the new priorities. We cannot do everything at once, but all necessary things must ultimately be done.

Ours is a joint fiscal responsibility. Let us work together as we meet it.

The 1961-62 Budget proposal was arrived at by a method basically new and different for the State Government, although common enough to households everywhere.

An allocations system was devised to help stretch our limited fiscal resources over the whole expanding framework of State Government and its services to an exploding population.

Under this system, no agency or department was ever asked how much it would like to spend.

The budget process began instead with an estimate of funds available for the 1961-62 fiscal year.

Tentative allocations were then made on the basis of past experience and known growth requirements in such areas as education, mental hygiene, correctional institutions, social welfare, recreation and public health.

A small contingency reserve was also established to meet hardship problems or to provide for vital new programs. Some augmentations were permitted on direct appeals to me, and they exhausted this small reserve. In the great majority of cases, however, departments worked successfully under their allocations, and major savings were achieved without sacrifice of essential services.

You should also know something about the revenue estimates upon which this budget is based.

It has become the fashion among a few partisans unconcerned with the fiscal facts to disregard or disparage Department of Finance estimates, estimates made without political coloration by a group of civil service experts who have served all administrations alike with equal skill and integrity.

Their record over the years matches the best in the nation, private or public.

During the current fiscal year, for example, General Fund income is expected to be about $10 million less than was anticipated during last year's budget session. That is approximately ½ of 1 percent difference in a total of $1.7 billion in General Fund revenue.

That performance speaks for itself, and it argues eloquently that these expert estimates offer far stronger support for fiscal responsibility than the slender reeds of partisan prediction.

In a quite different way, the Administration also approached a fiscal ideal in the current budget year.

The State was able to finance not only current expenditures, but almost all of our long-term capital outlay, without major bond financing in 1960-61. This was true for the first time in many years.

The surpluses which permitted this signal achievement have dwindled rapidly in the current recession, however, and this budget marks a return to bond financing for long-range building needs, particularly on our college and university campuses.

It remains true that whenever feasible, California finances should be on a pay-as-you-go basis.

Very few growing families can afford to buy a larger, new house except on a long-term mortgage, however, and the State is in the same position, especially with respect to educational facilities and institutions.

The necessity of long-term financing carries with it an obligation to be frugal so that interest costs can be kept to an absolute minimum.

This Administration is meeting that obligation.

In 1959-60, $20 million was saved by insistence on economy although the budget had anticipated only $7 million in savings over the year.

Continuing tight regulations this year are expected to produce an additional $13 millions in savings by July 1.

Without such economies and without the new revenue program sponsored by this Administration in 1959, California would be $444 million in the red on July 1, of this year and would now be issuing warrants to carry on its basic activities.

I ask those heedless partisans who disparage the 1959 revenue program to ponder that fact. And, to those who are now advocating massive reductions in state revenue, I make an additional request.

Will you please read this budget carefully? Will you then please tell the people of California what state services should be abolished or reduced? Will you please explain how we can get better education, including better teachers, for less money?

The people of California would be grateful for such information—and so would I.

Before I turn to a general summary and the specific major areas of concern in the budget, I offer one other observation.

The nation is in a recession. Although California traditionally weathers periods of national economic distress better than most of our sister states, we too are feeling the sharp decline in business and industrial activity.

Of most concern are areas where unemployment is reaching new 10-year highs.

These islands of distress in a State still generally prosperous deserve our immediate attention, not only for their own sake, but to halt the otherwise inevitable spread of distress to their neighbors.

Unemployment and low income are contagious diseases, and they must be so handled.

This Administration has already begun anti-recession measures. Just 10 days ago we moved to free $30 million in state bond money to speed vital local school construction projects. More unemployment benefits are about to enter our economic bloodstream.

And we are working out new state construction priorities to give preferences to distressed areas.

This is a national recession, and California cannot meet the challenge singlehanded. Federal assistance fortunately is in sight, and we can properly hope for a turn for the better later this year.

We must not gamble, however, for what we do affects not only the 16,000,000 present citizens of this State, but the millions more to come.

What follows will tell you what I specifically propose in the 1961-62 Budget.

I submit this budget and this message to you with the greatest respect—and with full confidence in the ultimate result.

SUMMARY

The total 1961-62 Budget amounts to $2,592,304,521. This includes the expenditure of $100 million by bond financing of essential state building needs.

With state income lagging behind outgo in the current fiscal year, it has been necessary to plan to draw upon the accumulated surplus. The total surplus will decline from $129.3 million on June 30, 1960, to $32.5 million by June 30, 1961.

Revenues for California government in 1961-62 are estimated at $2,428,324,332. Most of this gain will occur in the General Fund, which is expected to reach $1,694.3 million, or approximately $73.3 million more than is now estimated for the present year.

The expenditure program which I recommend for 1961-62 will require a further draft on surplus. This will be true despite the fact that I am submitting one of the tightest operating budgets in the State's history and despite the heavier use of bond funds for capital outlay.

Under the 1961-62 Budget, the $32.5 million General Fund surplus expected at the close of this fiscal year will be reduced to $468,000 by June 30, 1962.

Realizing even this fractional surplus will depend heavily upon an improvement in the business climate during 1961, and improvement which has been anticipated in the tax revenue estimates on which this budget is based.

GENERAL FUND CONDITION

(In Millions of Dollars)

	1960-61 Estimated	*1961-62 Proposed*
Beginning Surplus, July 1	$129.3	$32.5
INCOME:		
Revenues and Transfers	1,621.0	1,694.3
EXPENDITURES:		
State Operations	554.0	610.1
Capital Outlay (current funds)	138.6	14.9
Capital Outlay (bond funds)	(10.8)	(99.9)
Local Assistance	1,025.1	1,101.4
Total Expenditures (current)	$1,717.7	$1,726.4
Current Year Deficiency	—$96.7	—$32.1
Ending Surplus, June 30	$32.5	$0.4

IMPORTANT ASPECTS

These are some of the major areas of concern in the proposed budget for 1961-62:

Education

It is the continuing policy of my Administration that California have the best program of public education in the United States.

In the 1961-62 Budget, we have devoted $1.04 billion to all levels of education. This represents 41.5 percent of the total budget exclusive of bond funds, and 60 percent of the General Fund into which we all pay our taxes.

The vital importance of public education in California results from this fact: To Americans, democracy has always meant more than equality at the polls. More and more, it has come to mean equality of opportunity in every respect.

In the American catalogue of equal opportunity, access to education has the highest place. This gives us a particular obligation. Close to one-quarter of our total state population is now enrolled in the elementary and secondary grades through junior college.

You have already approved my recommendation that maximum state bond fund allocations for local school construction aid be increased from $10 million to $12 million a month. I have further recommended the allocation of $30 million more in bond funds immediately to pick up the entire backlog of approved allocations for school construction and site acquisition.

But the schoolrooms are only the shells. They can become monuments to ignorance if they are not occupied by gifted teachers, equipped with excellent tools.

We share, with other states, guilt for the major fault of American education—failure to expect of our students all of which they are capable, failure to offer all they are ready to use. We should never assume that only a small minority of our youth are capable of high standards of performance, if they are taught with vigor and inspiration by outstanding teachers.

Because California must face this challenge with honesty, I have put before you a number of excellent proposals to improve public education in our State. These changes will equip our children, and our State, for the future. They are critically needed. They will also cost further substantial sums.

You will note that no budgetary provision has been made for these proposals for improvements which range from state aid for programs for gifted or emotionally handicapped children to state support for junior colleges.

The reason is simple. There are no more funds available.

That does not mean that these proposals cannot be financed, however.

In my legislative message, I called for equalization of state aid in relation to the countywide tax base, rather than on a district-by-district basis.

This would prevent the rich segment of a county escaping from its proper share of supporting schools throughout the county.

It would also free approximately $21 million of state aid for such other purposes as this Legislature may direct. This is the only method of financing I can now see for any of the proposals to enrich our school programs which require funds beyond those included in this budget.

I also propose that we appropriate $200,000 to speed reorganization of our present school district structure itself. Here again, economies could lead to substantial program enrichments.

Higher Education

Believing that the Master Plan must move forward as rapidly as possible, I propose a budget of $249,000 for the Co-ordinating Council for Higher Education, and $1,009,000 for the Trustees of the State College System. I am asking you to extend the state scholarship program once again, in the amount of $1.8 million, a 44 percent increase over this year.

This year, the University will add 4,400 students, the largest annual enrollment increase in a decade. We propose to increase the University's General Fund budget from $121 million to $132 million, which is 9.4 percent more than the budget in the current year. We have allocated $220,000 for academic and physical planning staffs at the three new university campuses: In Orange County, San Diego County, and the unselected site now known as South Central Coast. I further recommend the sum of $250,000 for initial planning and staffing at the new medical school at San Diego, which is to be developed with the planned University campus.

State colleges in 1961-62 will increase enrollment from 69,000 to 77,000 students, an 11.5 percent jump. To meet that need, I propose a 13.5 percent budgetary increase, from $69 million in the current year to $78.3 million in 1961-62. We have proposed $134,000 each for academic and physical planning staffs at two new state colleges: San Bernardino-Riverside, and South Bay State College in Los Angeles County. To further assist the state colleges, the sum of $230,000 is provided for educational television.

Water

This document marks the first full commitment to two of the greatest water projects in California history—the State's Oroville Dam on the Feather River, and the joint state-federal San Luis dam and reservoir. Of the $18.9 million allocated for construction of the Oroville Dam in the 1961-62 Budget, $9.7 million is earmarked for the dam itself, and related facilities. Our plan commits the State to proceed to build the entire high-level project, complete with power production facilities. No staging is contemplated. We are proceeding too with plans for San Luis. Using current funds, we have almost completed arrangements with the United States Bureau of Reclamation which will make $400,000 of state funds available to the United States for advance planning studies at San Luis. In addition, the new budget allocates $3.6 million to be spent on the project. Of this, some $800,000 will be used for departmental engineering and right-of-way expenditures. We have also budgeted the balance of $2.8 million for a further advance to the United States Bureau of Reclamation for preliminary design.

Social Welfare

Public conscience is the duty of every citizen but it is the particular obligation of those who conceive and shape the laws under which we live. Social welfare, taken literally, means the well-being of our fellow citizens. You are as aware as I am that thousands of our fellow Californians are in distress resulting from unemployment, infirmity, or old age. I particularly direct your attention to the justified needs of the aging, most of whom have in the past been tax-paying, law-abiding citizens. They have made many contributions to all of us in the past. Today, we are the richer for their wisdom and experience.

I include a number of recommendations which affect them. It is primarily for their benefit that I recommend the exemption of prescription drugs from the sales tax in 1961-62.

The major upward revisions in the 1961-62 Budget also concern the aged and others in social welfare programs. Changes are requested in our programs of old age security and aid to the needy blind; aid to the needy disabled; the foster care of children; the chronically ill aged; administrative assistance for county welfare departments; and grants for county services to older citizens. The total increase in General Fund costs for 1961-62 for these new programs is $11.4 million. I call to your attention the fact that these figures are in addition to increases called for by growth projections for existing programs. Except for the recommended changes affecting administrative assistance for local departments, and grants for county services for older citizens, these programs would not go into operation until January 1, 1962. The figures for the increase in costs thus cover a six months period only.

Beaches and Parks

The 1961-62 Budget provides for operating our state beach and park program at a cost of $9.1 million. In addition, a capital outlay program is proposed in the amount of $8.1 million. Of this, $3.7 million is for acquisition and $4.4 million for development. I urge that we devote increasing emphasis to developing our resources in the future, without neglecting our program of acquisition.

Corrections

Heartening progress is being made in our program of conservation camps. By the end of the 1961-62 fiscal year, we plan to have 2,357 inmates in the camps. Construction is proceeding on schedule for activating centers in Lassen and Tuolumne Counties and the North Coast area. With the four new camps coming into operation in 1961-62, we will have a total of 34. The proposed operating budget of the Department of Corrections is $45.4 million, an increase of $3.9 million, or 9.5 percent, over the current year. This will provide for custody and rehabilitation of an average of 22,100 inmates, an increase of 1,145 over 1960-61. For operating the Youth Authority, $21.4 million, an increase of $3 million, or 16.5 percent, is recommended. It will furnish custody and rehabilitation for an average of 4,341 wards, close to 1,000 more than in the current year.

Mental Health

Research and treatment are bringing about dramatic changes in rehabilitation of the mentally ill. Here is a striking example. During the new budget year, there will be 27,100 admissions to state mental hospitals, an increase of 1,100 over the current year.

Even with increased admissions, resident population has been remaining approximately constant because of new and enlightened treatment. We further recommend $450,000 for the new day treatment center program, which is already working successfully in San Diego. Two new centers would be established during 1961-62. Finally, despite our limited funds, we must upgrade the positions of psychiatric technicians, and make them attractive to skilled workers in this sensitive field. I recommend a salary increase in the amount of $2.4 million.

Public Health

California's nationally respected program of public health will go forward in 1961-62 under the proposed General Fund budget of $35 million, up $1 million from the current year. We propose $9.1 million for support of the department, and $25.9 million for aid to local governments. I commend to your attention the need for health services for migrant labor—a long-neglected field in which California should be the pioneer. A $110,000 appropriation is proposed to meet this need.

Agriculture

The total budget for the Department of Agriculture is up from $17.4 million to $17.8 million in 1961-62, an increase of $400,000. Research in pear decline, one of agriculture's most vexing current problems, is continued with an allocation of $37,000. We further recommend expenditure of $88,000 for closer inspection of weights and packaging of goods. The Consumer Counsel is co-operating in this program.

Employee Benefits

I urge your approval of a plan for state contribution to a health program for state employees. This will be the State's first action in providing this important benefit for its employees. The recommendation includes $4.8 million from the General Fund and $1.8 million from special funds. Except for the salary increases recommended for psychiatric technicians, no general or other special salary increases for state employees are recommended at this time.

Capital Outlay

Expenditures of $422.3 million is proposed for capital outlay covering the programs for state building construction, beach and park acquisition and development, water resources, state highways, fish and game and the district agricultural fairs.

A state building construction program will provide for the construction requirements for the 4,400 new students at the University of California, at a capital outlay cost of $48 million. The same need will be met for the 8,000 new students at our state colleges, through expenditure of $40 million in capital outlay funds.

Additional capacity for the mentally retarded is provided with a budget item of $2 million for the Department of Mental Hygiene. For the Youth Authority, $3.2 million is allocated. This includes the start of a new 400-bed Northern California Youth Center at Stockton. Facilities for the State's forest maintenance and fire prevention programs are provided in the amount of $3.5 million.

The use of bonds in the amount of $99,920,000 is proposed. Our limited General Fund resources in 1961-62, resulting from the current recession, make the use of bonds essential.

Capital outlay for beaches and parks is proposed in the amount of $8.1 million from the General Fund to pay for new acquisitions and further development of existing properties. In 1961-62, expenditures of state funds for highways are expected to exceed $250 million. A wildlife and fish and game capital outlay program is proposed in the amount of $1.8 million from special funds available in the Fish and Game Preservation Fund and the Wildlife Conservation Fund.

In conformity with Section 34, Article IV of the Constitution, I submit to you the budget for the State of California for the fiscal year commencing July 1, 1961, and ending June 30, 1962.

Respectfully submitted,

Edmund G. Brown

Governor

Letter of Transmittal

HONORABLE EDMUND G. BROWN
Governor of California
State Capitol
Sacramento, California

DEAR GOVERNOR BROWN:

Transmitted herewith are the summary tables and detailed statements for the Budget of the State of California for the Fiscal Year July 1, 1961 to June 30, 1962, compiled in conformity with your policies and instructions.

The revenue estimates presented in this budget are predicated upon a slowdown in the rate of California's economic growth during 1961, with expected recovery starting about midyear which will become substantial in 1962. The amounts shown have been determined after a careful appraisal of trends, and after consultation with National and State economists.

The expenditures proposed in this budget were based upon a new system of preparing prior allocations to the various State agencies and entering into close consultation with them regarding their program needs within such allocation. The cooperation of the department heads has been outstanding in carrying out your policy of controlling expenditures without sacrifice of essential services and increasing needs.

The staff of the Department of Finance is always available to furnish other information and otherwise assist in the budget consideration.

Respectfully yours,

John E. Carr

Director of Finance

January 25, 1961

SURPLUS

Accumulated Surplus		129,252,173
TOTAL LIABILITIES, RESERVES, AND SURPLUS		$1,860,213,221

---

[1] This statement was prepared by the office of the State Controller. The revenues and expenditures as reported in this budget for the 1959-60 fiscal years are in accordance with the accounts that produced this statement of financial condition.

[2] Although the San Francisco Harbor Improvement Bonds, in the amount of $22,445,000, and the Veterans' Farm and Home Building Bonds, in the amount of $1,070,890,000, are general obligation bonds, they are not included in the above amount. The payments of interest and redemption on these two items are made from the operating revenue of the San Francisco Harbor Improvement Fund and from the interest and principal payments on loans made from the Veterans' Farm and Home Building Fund.

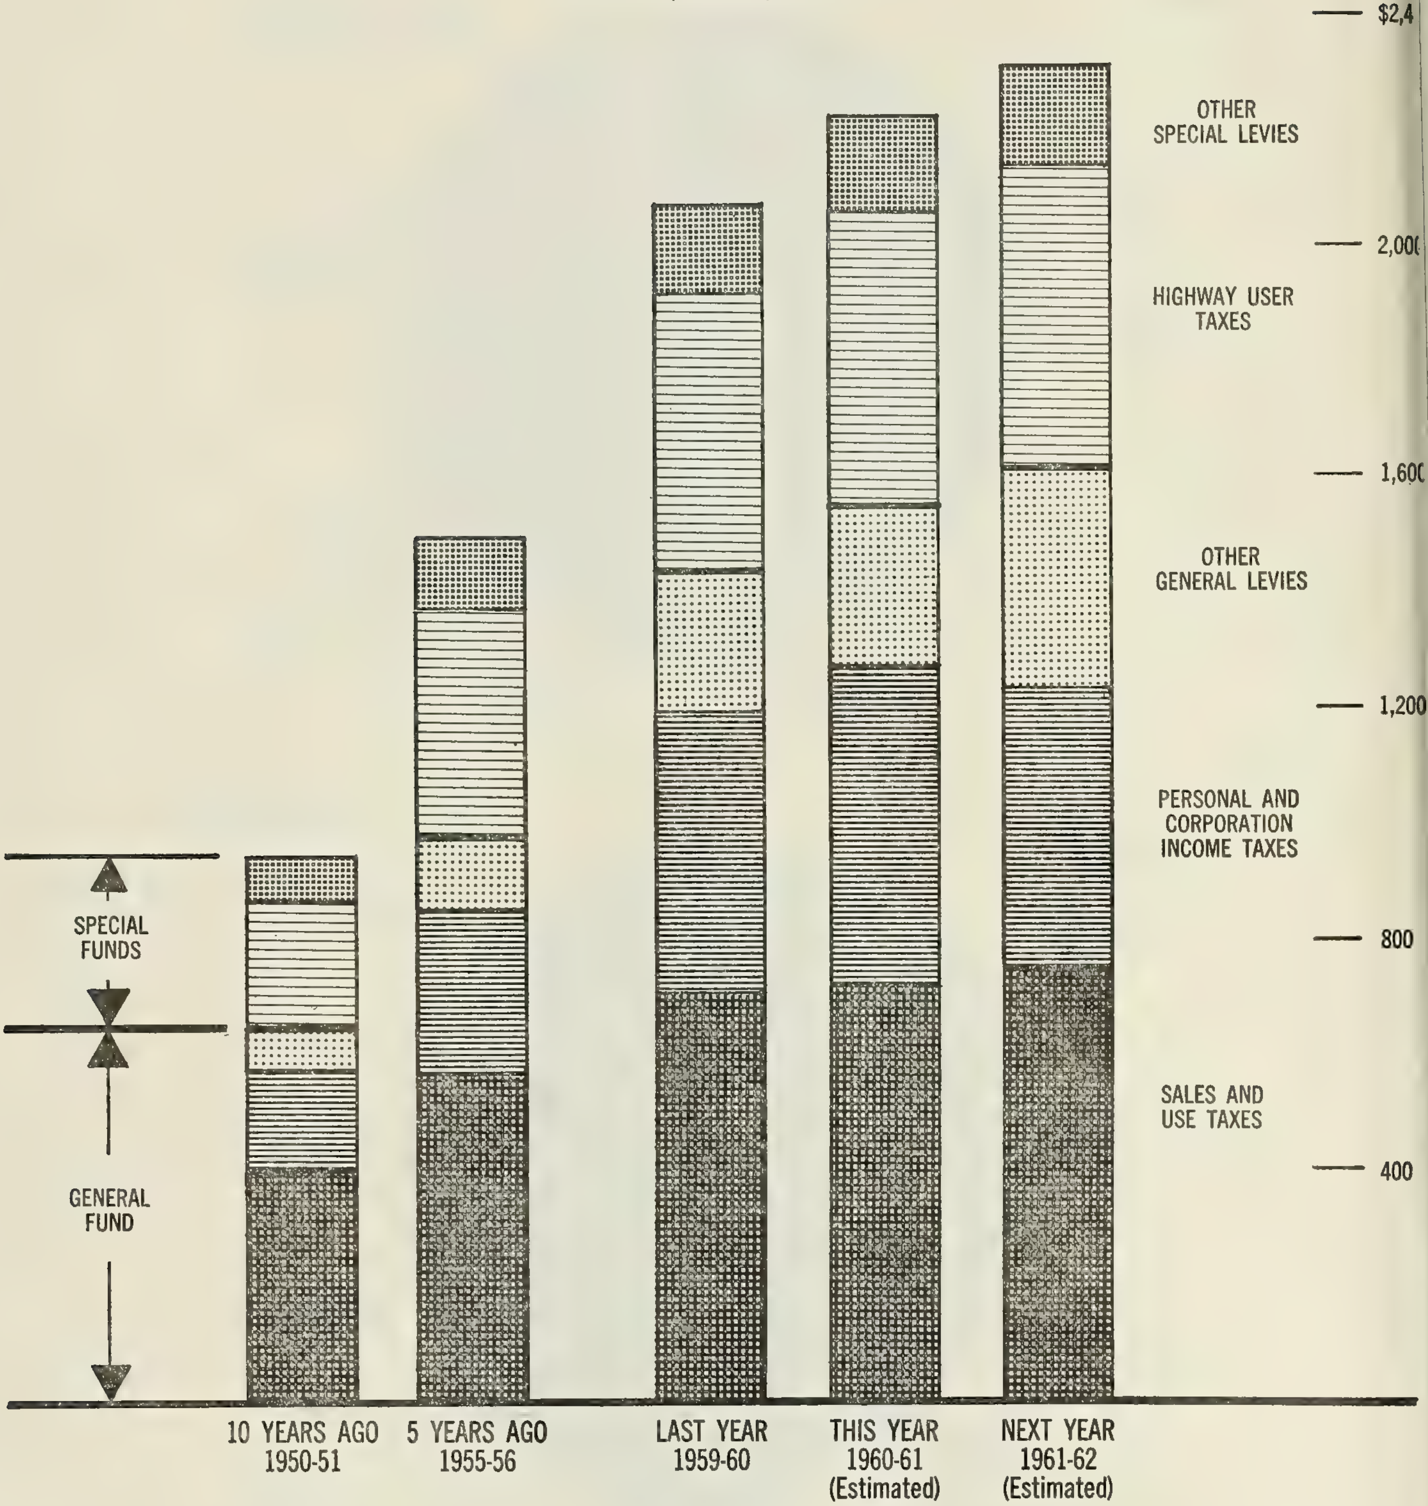
STATE TAX COLLECTIONS

BY FUNDS AND SOURCES

(In millions)



Budget Revenues

State receipts from all sources are estimated to reach the record level of $2,428,324,332 during the 1961-62 fiscal year. This represents an increase of $85,138,315, or 3.6 percent, over the revised estimate for the current year and $229,965,925 above actual receipts of last year. The increase over 1959-60 is due partly to the fact that the tax program enacted at the 1959 legislative session was not fully effective in that fiscal year. As indicated in detail below, these estimates are predicated upon a slow-down in the rate of California's economic growth during 1961, with a recovery starting about mid-year which will become substantial in 1962.

General Fund revenues in the budget period are estimated at $1,680,718,000,* or $73,698,000 more than is now expected in the present fiscal period. Compared with actual receipts in the last completed fiscal year, 1959-60, General Fund income will be up $189,626,000, of which about one-fourth is due to the greater impact of the tax revisions effected two years ago and three-fourths to economic growth.

Special fund receipts will total $747,606,000, an increase of $11,440,000 over the current fiscal year and $40,340,000 above actual collections in 1959-60. Seven out of eight special fund dollars are generated by tax levies on motor vehicles, and receipts from these sources will increase at about a 4 percent annual rate, diminished only slightly by the increasing popularity of compact cars. However, there will be a $14,403,000 decline in nontax receipts for special funds due principally to the elimination of the beach and park funds and the deposit in the State General Fund of oil royalty money formerly accruing to these accounts.

A summary of principal revenue items for each of the three years covered in this budget is given in the accompanying table.

Table 1

COMPARATIVE REVENUE

(In millions)

Taxes, fees, etc.	*1959-60 Actual*	*1960-61 Estimated*	*1961-62 Estimated*

Totals, Special Funds	$707.3	$736.2	$747.6
Grand Totals	**$2,198.4**	**$2,343.2**	**$2,428.3**

* Including General Fund share of liquor license fees.
† Excluding transfers of horse racing revenue from the fair and exposition fund to the General Fund, amounting to approximately $12 million a year.

‡ Excluding General Fund share of revenue from this source.
In this and subsequent tables differences between the sums of the detail and the totals are due to rounding.
See Schedule 2 for additional details.

The sales and use tax is the principal source of state revenue and the levy which most immediately reflects changes in economic activity. Under the current conditions, sales tax receipts are expected to show very little change from the previous year's total. With a resumption of growth rates in 1961-62, an increase in sales tax collections can be anticipated, and the total is expected to reach $752,000,000, a gain of $37,500,000 over 1960-61. Allowance has been made in these estimates for the recommended exemption of prescription drugs, in the coming year.

Personal and corporate income taxes have increased in importance in California's tax system as a result of the 1959 adjustments. The personal income tax is expected to produce $293,300,000 in the coming year, against $285,000,000 currently and $246,585,000 in 1959-60. The levy upon net profits of banks and corporations derived from operations in this State is estimated to return $285,000,000 in the budget year, compared with $273,000,000 in 1960-61 and actual collections of $240,735,000 in the last completed year.

Among the other General Fund sources, collections under the insurance tax, gift tax, cigarette tax and the excises on beer, wine and distilled spirits will show about the normal year-to-year advances. Liquor license fee receipts will rise sharply as a result of the adjustment in the number of licensed establishments to the new population totals shown by the 1960 decennial census. Inheritance tax receipts in the current year will be augmented by a carryover of $7,900,000 from 1959-60, as remittances from three of the large counties did not clear into the treasury before June 30. A return to the usual clearance pattern is anticipated which will effect an apparent decline in receipts from this source despite normal growth in the tax base.

Highway user taxes on motor vehicles, motor vehicle fuels and for-hire transportation over state highways are estimated to yield $522,550,000, an increase of $20,400,000 over the projected total for the current year. Motor vehicle license fees (imposed in lieu of local ad valorem taxes on this type of property) will reach $132,700,000, of which $1,574,000 is dedicated to debt service on highway bonds and is treated as General Fund revenue. Vehicle license fee receipts will be $4,100,000 above the indicated total for the present year.

---

* This and subsequent dollar amounts rounded to nearest thousand.

Revenue Revisions

Total revenues in the current fiscal year will be extremely close to the amount indicated in the budget estimates prepared twelve months ago—an indicated $2,343,186,000 as now revised, compared with $2,345,366,000 originally projected, a difference of 0.1 percent. There will be several changes in the "product mix," however. General Fund receipts will be $10,126,000 below the forecast of last year, due to a sharp drop in sales tax revenue from predicted levels offset to a considerable extent by overages in personal income, bank and corporation and inheritance taxes. The shortfall in sales tax collections is traceable to the increase in sales of lower priced cars; the decline in residential building; and the somewhat disappointing rate of expenditures by business and industry on plant and equipment.

Special fund receipts from motor vehicle taxes and fees are narrowly below expectations, with a slight excess from vehicle license fees more than offset by underages in the highway user levies. However, bonus payments from oil companies in connection with bids for the right to drill for oil and gas on state-owned lands and interest received on investments held for special funds were both above expectations. As a result, the revised estimate of aggregate special fund revenue is $7,946,000 above the amounts shown in the computations made last year.

A comparison of the original and revised figures is given in Table 2.

ECONOMIC CONDITIONS

A little more than a year ago the national economy was caught between the two counteracting forces of recovery from the 1957-58 recession and a prolonged labor-management dispute in the basic steel industry. Following settlement of the strike, restocking of inventories by steel and steel-using industries caused a resumption of upward trends in many businesses during the early months of 1960, but the underlying recovery movement had apparently run its course. Weaknesses which became apparent at midyear gave way to definite recession in the closing months. Although economic activity in the year as a whole did not reach anticipated levels, the deficiency at most points was relatively small.

The accompanying revenue estimates are predicated upon a decline in economic activity during the first half of 1961, with a recovery starting about midyear and leading to a strong upward movement in 1962. In terms of the broadest economic terms, gross national production during 1961 is forecast at $507.5 billion, up $3.9 billion from the year just closed. Personal income is projected at $412 billion, compared with $404.4 billion indicated for 1960. Income of California residents is estimated at a record level of $44.5 billion, an increase of $1.13 billion over last year. Price levels are expected to remain relatively stable, with a slight upward tilt in prices paid by consumers.

Many forces are interwoven in this outlook pattern. The most important of these is government, which will contribute both direction and substance to business developments. The Federal Government and such affiliated agencies as the Federal Reserve System will make every effort to minimize the recession and stimulate recovery through the use of monetary and fiscal policy. This action will have a cumulative effect in coming months. In addition, the expenditure levels of all major governmental units—Federal, state and local—will rise, stimulated both by the growth in number of persons to be served and by expanded activities in the fields of education, national defense, space exploration, resource development, and such public works as highway construction and air transportation controls. In total, it is estimated that governmental purchases of goods and services will reach $105.5 billion, an increase of $5.8 billion.

A second factor in the outlook is the absence of critical excesses in 1960. While such items as business inventories, commercial loans and consumer credit showed moderate increases, the changes were not sharply out of line with the growth in business volume. The ratio of inventories to sales was increasing after mid-year, but was still well below the 1957-58 level and the change was traceable to the decline in manufacturers' sales of primary metals, as the shortages engendered by the steel strike were eliminated. Commercial loans were up moderately compared with 1959, both in dollar amounts and in relation to business volume. However, the rise was considerably less than the increase in available funds, with the result that shortterm interest rates were reduced in the early fall. Similarly, the ratio of consumer credit to disposable income rose somewhat, but as the year drew to its close, criticisms of the consumer related more frequently to his excess savings than to his use of credit.

While consumer expenditures increased last year, they did not keep pace with aggregate income. As a result, personal savings exceeded $26 billion, and advance of more than 10 percent over the 1959 total. With income at record levels and a larger backlog of savings, consumers as a group entered the new year in a strong financial position. Population growth, coupled with the longterm increase in expenditures for services, should carry personal spending to nearly

$335 billion in 1961, despite an anticipated decline in purchases of automobiles and relatively little change in the demand for furniture and household appliances.

The dollar volume of residential building has been estimated to continue at approximately the same level as last year, notwithstanding an increase in available funds and more liberal credit terms. Pressure for residential units has eased considerably during the last few years. Vacancy ratios have risen moderately and the number of families in the home-buying age bracket is declining—a reflection of the drop in birthrates thirty years ago.

Business Investment

Business investment in inventories and in plant and equipment * is expected to be less this year than during 1960. Some inventory liquidation is probable, chiefly a correction of the imbalance in manufacturers' stocks of durable goods. This is likely to occur in the first half-year, with a reversal and an inventory accumulation in the last six months as the recovery movement gets underway. A decline of $1 billion is estimated for the year—a minor change in the $93 billion inventory total, but sharply different from the $4 billion inventory build-up which contributed to 1960's economic output.

While there is substantial agreement that business investment in plant and equipment will decline in 1961, there is a difference of opinion regarding the extent of that decline.** With excess capacity in many lines and a disappointing level of corporate profits, an easing in the need for additional plants is to be expected. However, the pressure for improvements in processes and products will continue, and expenditures for these purposes will be supported by the larger depreciation allowances taken in recent years. Although the volume of business investment may decline, the drop during 1961 should not be as sharp as that which took place during the 1958 recession. Total expenditures for plant and equipment this year is estimated at $45 billion, compared with $48.5 billion in 1960.

Employment and Income

The level of employment in the current year will depend heavily upon the number of hours worked per week and productivity per worker. Neither of these factors can be projected accurately for the economy as a whole, but presumably hours of work will shorten somewhat and productivity will increase. Due to the increase in productivity, it is likely that the $507.5 billion of gross production will provide slightly less employment and that unemployment will increase. Despite the likelihood of some further rise in wage rates, aggregate wage and salary payments are not expected to change materially. Receipts from these sources are estimated to reach $274 billion, an increase of only a billion dollars over 1960. However, there will be more retirements from the labor force, producing a rise in pension payments, and larger outlays will be required for unemployment, with the result that transfer payments should total $33 billion, or $4.2 billion above the 1960 figure. Total receipts in the form of wages, salaries, other labor income and transfer payments are estimated at $318.3 billion for 1961, compared with $312.9 billion last year.

Proprietorship income may decline slightly as a result of stability in the net income of farmers, a fractional gain for professional groups, but a reduction in the profits of store and shop owners and other small business. Income from property (dividends, interest, and rents) is projected at $55.5 billion, an increase of $2.4 billion from 1960, mainly the result of greater savings. While corporate profits are expected to remain at last year's $44.5 billion level, dividends should increase a bit because there will be less need to retain a part of current earnings to finance capital investment.

Personal tax rates, both Federal and states, are not expected to change; hence, tax payments will absorb $50.9 billion of the aggregate personal income, leaving disposable income of $361.1 billion—approximately $6.7 billion above the volume indicated for 1960.

CALIFORNIA SITUATION

This State is continuing to grow at a rate fully equal to that of the last few years. The census enumeration of April 1, 1960, showed a total population of 15,717,204 and by midyear the number had increased to 15,860,000. The estimate for July 1 of the current year is 16,430,000, a 12 months gain of 570,000 persons. California's increase of 3.6 percent compares with 2 percent for the nation. This growth must be reflected in more homes, stores, schools and the variety of other items essential to a major community of more than half a million people, a growth which should assure California a level of business activity moderately above that prevailing in the nation as a whole.

In some respects population growth has been a mixed blessing. In addition to bringing larger markets, a greater volume of business and a broader tax base, it has produced problems for business and government. One of the most pressing has been that of providing jobs for a rapidly expanding labor force. Unless economic expansion produces approximately 250,000 job opportunities a year, California does not merely stand still—it drops behind by whatever number is added to the unemployed.

Including self-employed and unpaid family workers, civilian employment in California last year averaged approximately 6,072,000. This represented an increase of 179,000 over the 1959 average. Amounts for the

---

* Including stores, office buildings, warehouses, etc.

** The F. W. Dodge survey indicates a 6.2 percent decrease in dollar volume of private, non-residential construction in 1961; *Newsweek's* survey suggests a 5 to 10 percent drop; the McGraw-Hill report shows a 3 percent decrease in capital spending for plant and equipment; and the U.S. Dept. of Commerce estimates a 5 percent increase in the value of new, non-residential buildings put in place during 1961.

SOURCE: State Depts. of Employment and Industrial Relations.

Largest gains were reported by the trade, service and government groups. Manufacturing industries, with a total of 1,375,000 employees, scored a gain in spite of declines in the aircraft industry. From an average of 244,000 wage and salary workers in 1959, aircraft plants dropped to 213,000 last year. It is probable, however, that the greatest part of this readjustment has been completed and that further cuts will be relatively small. Against the 31,000 drop in aircraft, employment in the ordnance, electrical machinery and instrument factories increased nearly 27,500, making these the strongest of California's growth industries. This trend should be maintained in the new year, since California is likely to fare as favorably as, or more favorably than, the rest of the nation in the continuing shift of defense expenditures from aircraft to missiles.

As usual, farm operations in the coming year will depend primarily upon weather and production patterns, but at this point there are significant indications of stable aggregate income. These include a further expansion in deciduous fruit and grape acreages; a record number of cattle on feed, with the increased numbers likely to offset a possible decline in prices; and larger sugar beet production. The only foreseen weakness is a cut in allotments for cotton planting which will decrease income from this important crop.

The construction industry has traced a better record in California than in the nation, and a repeat performance is likely for 1961. Residential construction is expected to improve on last year's 195,000 units, utility construction will rise and public works should hold, or exceed, recent levels. Government employment, which is about one-seventh State, two-sevenths federal and four-sevenths local, can be expected to expand moderately as population growth increases the workload of schools, police and fire protection agencies and other governmental units.

Personal income of California residents is estimated to reach a record of $44.5 billion next year, an increase of $1.13 billion (2.6 percent) over last year. Taxable sales to individuals and businesses are projected at $23.9 billion, against $23.5 billion in the year just closed. Corporate profits of $4.47 billion are forecast—an increase of $243,500,000 over the amount indicated for 1960 by a sample study of earnings taken for purposes of the budget revenue estimate. These and other data for the nation and the State of California are summarized in the accompanying table.

* Disposable income of California residents represents personal income less federal and state personal income taxes. Other personal tax and nontax payments have not been deducted.

** Spendable resources of California residents represents disposable income adjusted for estimated change in short-term consumer credit and estimated change in liquid asset holdings of individuals—e.g., money, bank accounts, savings bonds, etc. Amounts are estimated by the State Department of Finance for use in connection with the analysis and projection of sales tax revenue.

† Index for California has been computed by the California Department of Industrial Relations, Division of Labor Statistics and Research, as the weighted average of the Los Angeles and San Francisco indexes.

SOURCE: National data for 1959 from reports of the Office of Business Economics, U.S. Department of Commerce; preliminary figures for 1960 based on Department of Commerce reports for the first three quarters with fourth quarter estimated by the State Department of Finance; estimates of national data for 1961, estimates of California's population, personal income, personal taxes, disposable income, etc., are based upon studies by the Financial and Population Research Section, Budget Division, State Department of Finance.

GENERAL FUND REVENUE

More than two-thirds of the aggregate State revenue will accrue to the General Fund. This includes receipts from such general levies as those on sales of tangible personal property, personal income, corporate profits, alcoholic beverages and cigarettes, insurance premiums, inheritances and gifts. For the most part, these taxes are geared directly to business conditions in the State and Nation. The aggregate volume of trade, personal income, corporate profits and other similar economic considerations determine the bases. Hence, the estimate of revenue from each source flows directly from the economic assumptions explained above. The influence of these economic factors upon the several taxes and the methods used in preparing the budget revenue estimates are outlined below.

Sales Tax—$752,000,000

The statement has often been made that the retail sales tax has a direct correlation with income and business conditions in this State reflecting almost immediately each period of hestitation, decline or resurgence. This dependence has been amply demonstrated by the behavior of this tax during 1960 and has been reflected in the estimates for 1961 and the first half of 1962.

During the first quarter of 1960 taxable sales were about 8.4 percent above the same quarter of the preceding year but as the economy leveled, the gain became less and less. At the end of the second quarter, sales were only 3 percent greater and for the third quarter the gain was just a bare one-half of one percent. Data on the volume of sales for the fourth quarter are not yet available but in the estimate, prepared about the middle of December, an allowance was made for an overall growth of approximately one percent, with greater purchases of automobiles offsetting some decline anticipated in sales of building materials and household durables. For the most part, the disappointing sales volume for 1960 occurred in household durable goods, building materials, and motor vehicles.

The estimate of taxable sales for 1961 and 1962 has been based largely on a detailed analysis of trends in per capita sales by more than 50 types of businesses, with particular attention to changes in volume during periods of economic readjustment. On this basis, taxable sales of non-durable goods have been forecast at slightly more than $10 billion for 1961 and $11 billion for 1962, gains of 1.9 percent and 10.2 percent, respectively, over volumes in the preceding years. Consumer durables, excluding automobiles, are expected to reach $1.94 billion in 1961, a gain of 1.7 percent. This is somewhat greater than patterns in previous recessions but sales were depressed last year and a slight improvement appears probable for 1961. A substantial gain of 14.6 percent to $2.22 billion is anticipated next year.

Motor vehicle sales are estimated to decline in 1961 under the assumption that fewer units will be marketed during the year. In addition, a greater proportion of sales are expected to be in compacts, with a further decline in the average selling price of vehicles. A drop in the average tax per vehicle was apparent for 1960, undoubtedly the result of the introduction of the compact cars and the lower cost of extra equipment of this type of vehicle. A substantial gain (10%) was used in projecting total vehicle sales volume in 1962. Sales of motor vehicle supplies are expected to parallel changes in registrations and the patterns disclosed by the detailed analyses described earlier.

Sales of building materials this year have been estimated to rise about 2 percent in accordance with the expectation that residential building will be relatively better in this State than in the rest of the country. Outlays for plant and equipment have been related to anticipated decline in capital expenditures by industry and the California sales patterns during similar declines in previous years. For some industries, indications of anticipated capital expenditures in California were available and these were used in preference to any other basis of projection. In the aggregate, these expenditures have been estimated to decline 2 percent in 1961 and rise again by 14 percent in 1962.

As a check on anticipated taxable sales, other estimates were prepared using the correlations established between total taxable transactions and spendable resources of California residents. These estimates, while ranging on either side of those resulting from the detailed analyses, were generally higher. Under the assumption that disposable income—adjusted for savings and the use of credit—determines spending, adjustments were made reconciling the two estimates. These amount to about 1.5 percent of the total and have been shown as unallocated amounts in the table below.

Table 5
TAXABLE TRANSACTIONS IN CALIFORNIA
(In millions)

	1960	*1961*	*Percentage change over 1960*	*1962*	*Percentage change over 1961*
Consumer nondurables	$9,840	$10,030	1.9	$11,050	10.2
Consumer durables excluding autos	1,904	1,937	1.7	2,220	14.6
Motor vehicle sales	3,524	3,398	—3.6	3,740	10.1
Motor vehicle supplies	986	1,000	1.4	1,075	7.5
Building materials	2,588	2,640	2.0	3,030	14.8

Unallocated	--	345	--	450	--
Totals	$23,483	$23,900	1.8	$26,750	11.9

Receipts for the budget year reflect the recommendation by Governor Brown to the Legislature that an exemption be enacted eliminating the sales tax on medicines and drugs sold on prescription. Based on anticipated drug store sales for 1961 and 1962, such an exemption would reduce taxable transactions in 1961-62 by an estimated $6,275,000. Since an effective date of July 1, 1961 has been assumed and allowing for the lag between sales and receipt of taxes by the State, the effect of this exemption on 1961-62 collections has been estimated at $4,700,000.

Taxable transactions were allocated by quarters on the basis of seasonal patterns conforming to the economic outlook. Appropriate adjustments were also made for an early Easter in 1961 and the fact that June 30, 1962, will fall on Saturday, thus delaying clearance of a part of the end-of-month collections beyond the 1961-62 fiscal year. After these adjustments, the retail sales tax is estimated to provide $752,000,000 in revenue in 1961-62, compared with $714,500,000 for the current year and actual receipts of $709,648,000 in 1959-60.

Personal Income Tax—$293,300,000

Personal income of California residents is, of course, the primary source of the revenue derived from this levy. As stated in the foregoing analysis of economic conditions, personal income is expected to increase in both the State and the Nation this year, despite the anticipated slackening of business activity in the first half of the year.

In 1959, the people of this State received a total of $40.78 billion in personal income from all sources—10.64 percent of the national total. Last year the figure reached $43.37 billion, representing 10.72 percent of all personal income in the Nation, and in the current year a new record of $44.5 billion is anticipated—10.8 percent of that forecast for the country as a whole. Personal income of Californians during 1959, as reported by the United States Department of Commerce, and the estimates for 1960 and 1961, as prepared by the Department of Finance, are shown below.

Table 6
ESTIMATED CALIFORNIA PERSONAL INCOME
(In millions)

Source	*1959*	*1960*	*1961*
Wages and salaries	$27,482	$28,978	$29,500
Proprietors' income	5,084	5,365	5,32
Property income	5,464	5,927	6,
Other income	3,723	4,246	4,
Less: Social insurance contributions	970	1,146	1,2
Totals	$40,783	$43,370	$44,500

Over 90 percent of the self-assessed tax is attributable to income from the above sources. The remainin 10 percent arises from such items as capital gains, alimony and annuities. Because of the tendency for certain kinds of income to be concentrated in different brackets and the progressive tax rates, the type of income as well as the amount received is important in preparing the estimate of revenue from this tax. In general, wages and salaries concentrate in the lower and middle income groups, proprietors' income in the middle tax brackets, and property income in those subject to the upper tax rates. Analysis of tax receipts by income sources over a period of several years shows the stability of these relationships and allows computation of correlations between income and the resulting tax payments.

That part of the tax which rests upon capital gains, alimony and the like — not considered personal income within the Department of Commerce definition —requires different and less elaborate estimating procedures. The estimate of tax on capital gains is based primarily on the stock market activity, and the estimate of tax generated by the miscellaneous group upon past trends.

After adding collections from the audit program of the Franchise Tax Board and converting calendar year data to fiscal years, revenue from the personal income tax during 1961-62 is expected to total $293,300,000, compared with $285,000,000 in 1960-61 and actual returns of $246,585,000 in 1959-60. It should be noted that the latter figure is not strictly comparable with the first two, since the 1959 amendments were not fully operative in 1959-60.

Bank and Corporation Tax—$285,000,000

Bank and corporation tax receipts during 1961 will depend primarily upon corporate earnings in 1960. Similarly, 1962 revenue will depend on 1961 profits. According to information obtained from a carefully selected sample of corporations in all the important fields of activity throughout California, corporate profits in 1960 subject to the California levy totaled $4.23 billion, down 3 percent from the record $4.36 billion set in 1959. This 3 percent decline compares with a 5.4 percent drop nationally. A summary of earnings in this State by major industry group for 1959 and 1960 is given below.

Table 7
CORPORATE PROFITS BY MAJOR INDUSTRY, CALIFORNIA, 1959 AND 1960
(In thousands)

	1959	*1960*	*Percent change*
Agriculture	$49,810	$49,000	—1.6
Mining and oil production	209,500	226,050	+7.9
Construction	136,750	109,000	—20.3

Trade	627,300	625,000	—0.4
ervices	204,263	191,500	—6.2
nancials subject to bank tax	418,757	480,500	+14.7
ublic utilities	660,149	704,000	+6.6
Other financials	315,900	267,750	—15.2
Other	29,060	34,000	+17.0
Totals	$4,355,439	$4,226,500	—3.0

In contrast with the national outlook, corporate profits in California during 1961 are expected to show a moderate increase over last year. There are two basic reasons for this difference: First, California's growth pattern has resulted in the allocation of a larger proportion of corporate profits of national corporations to this State, and this trend is expected to continue. Second, the pattern of industry is significantly different from that of the United States. As can be seen from the following table, only 39 percent of total profits in California is attributable to the volatile manufacturing group, as compared to more than 53 percent for the Nation. Conversely, California has a greater percentage of its tax base in trade, finance, service establishments and utilities, which are likely to show more stable earnings.

Table 8

Miscellaneous	--	3.9
	100.0	100.0

SOURCE: U.S. data, Survey of Current Business, July, 1960, Page 30, Table 56. California data based upon state tax returns.

Nationally, corporate profits in 1961 are expected to hold at 1960 levels, with increased earnings of nonmanufacturing industries offsetting a decline in manufacturing. However, in this State, the greater ratio of the profit-increasing industries to the profit-declining manufacturing group will result in an overall gain in corporate profits to $4.47 billion, up 5.8 percent.

After allowance for collections under the audit program of the Franchise Tax Board, and conversion of calendar year data to fiscal years, revenue from the bank and corporation tax for the budget period is estimated to total $285,000,000, compared with $273,000,000 during 1960-61 and actual receipts of $240,735,000 in 1959-60. Again, it should be noted that part of the 1959-60 collections were at the former 4 percent tax rate and are not strictly comparable to those of subsequent fiscal years.

Insurance Tax—$70,900,000

The estimate of gross premiums subject to tax in 1960 was based on replies to a questionnaire sent to principal companies transacting two-thirds of the insurance business in California. These sampled companies were asked to indicate for their major lines of insurance the percentage change in total premiums in 1960 compared to a year ago. The replies, when weighted and applied to 1959 premiums, indicated an overall gain of 7.9 percent. On this basis, taxable premiums in 1960 reached a record of $3.2 billion, generating net tax collections of $66,500,000 for the current fiscal year.

In preparing the estimate for 1961-62, life and disability insurance, the combined lines of automobile coverage and other lines of insurance were analyzed and projected separately. Life and disability business was related to population growth, taking into account the fact that these types of insurance are rising more rapidly than population. Automobile insurance was projected on the basis of estimated motor vehicle registrations, and the combined figure for other types of insurance was extrapolated from growth trends.

After establishing the premium base, deductions were made for dividends paid or credited to policyholders and exempt coverage under qualified pension and profit sharing plans. Application of the tax rate and adjustments, including the principal office deduction and the retaliation provision enacted in 1959, completed the estimates. Anticipated collections in 1961-62 amount to $70,900,000. This compares with this year's $66,500,000 and actual receipts of $61,530,000 for 1959-60.

Cigarette Tax—$68,000,000

Gross revenue from the cigarette tax during the 1961-62 fiscal year is estimated at $69,390,000. The 2 percent discount allowed distributors on their purchases of stamps or meter impressions, along with minor refunds, will reduce the gross revenue to a net of $68,000,000, compared with $64,900,000 in the current fiscal year and $64,805,000 received during 1959-60, the first year of this levy.

It must be pointed out that the latter two amounts are not strictly comparable: (1) The floor tax on retail stocks added $2,673,000 to the 1959-60 total; (2) It was necessary for dealers to acquire an estimated $700,000 initial inventory of stamps in 1959-60; (3) There was some avoidance of the tax through advance purchase on the part of consumers.

Moreover, only eight months of discount were taken by distributors in 1959-60, whereas 13 months will be taken in 1960-61. These last differences are due to changes in the method of collecting the tax and granting the discount.

Because of the limited period for which California collection data are available, the estimates were prepared, in part, by the use of a correlation involving cigarette consumption, income, population and the degree of urbanization in 29 other states. Results obtained by this method were checked by an analysis and projection of current trends in collection of the California tax.

Inheritance and Gift Taxes—$66,500,000

Inheritance and gift tax revenues depend primarily upon the number and size of bequests and upon the relationship between the decedent or donor and the beneficiary. In general, the rates of tax vary directly with the size of the inheritance or gift and with remoteness of the relationship. Exemptions are scaled down as the relationship recedes. General business conditions and property values also influence the volume of collections, but there is a lag between changes in property values and the resultant change in tax receipts. In general, somewhat more than half the tax base represents securities, chiefly corporate stocks, and the proportion of securities increases with the size of an estate. Hence, inheritance tax collections during coming months may be influenced to a considerable extent by the weaker security markets of the last year to 18 months.

Data showing trends over the last decade in number and size of California estates subject to the inheritance tax have been recently compiled by the State Controller's office, allowing an approach in the forecasting of revenue from this source not available heretofore. These figures, supplemented by data on per capita collections over the course of many years, have been used in projecting 1961-62 receipts at $62,500,000. This compares with $66,500,000 estimated for the current year, including $7,900,000 carried forward from 1959-60 as a result of a delay in receipt of remittances from some of the large counties. Actual collections during 1959-60 amounted to $43,706,000. It should be noted that the latter total is not comparable to the estimate for the current and budget years because of substantial amendments to both the inheritance and gift tax laws in 1959 and the lag in remittances mentioned above.

Gift tax revenue reached $3,483,000 during the last fiscal year. The growing tendency toward better estate planning, exhaustion of personal exemptions and application of higher rates to successive gifts to the same donee, should result in further revenue increases. For these reasons, receipts from this source are estimated at $3,750,000 in the current year and $4,000,000 in 1961-62.

Alcoholic Beverage Taxes—$53,930,000

Beverage tax receipts totaling $53,930,000 are estimated for 1961-62. Of this amount, $43,300,000, or approximately 80 percent, is attributable to the $1.50 per gallon distilled spirits excise tax. The four cents per gallon beer tax is expected to provide $9,814,000, with the remaining $816,000 coming from the tax on wines which varies in rates from 1 cent per gallon on dry wine to 30 cents on sparkling wines.

Consumption of distilled spirits is expected to decline to 2.833 gallons per adult this year from 2.852 gallons in 1960 because of dampened business conditions. With the restoration of a high level of economic activity, the consumption ratio should increase to 2.94 gallons in 1962, significantly above that of 1960. With normal population growth, total consumption will reach 28,100,000 gallons in 1961 and 30,000,000 gallons next year. On a fiscal year basis, revenue is estimated at $41,200,000 in 1960-61 and $43,300,000 in 1961-62, compared with actual receipts of $40,369,000 in 1959-60.

Beer consumption per adult has followed an upward trend since 1954. It is anticipated that this will continue and with an increase in the number of adults, consumption is expected to rise to almost 242,900,000 gallons in 1961 and 252,000,000 gallons in 1962, compared with 231,000,000 last year.

After a relatively steady upward trend, consumption of dry wine jumped significantly in 1960, increasing from 1.277 gallons per adult in 1959 to 1.556 gallons last year. Although further increases of this magnitude are not anticipated, consumption is expected to reach 1.614 gallons in 1961 and 1.677 gallons in 1962. On the other hand, per capita consumption of sweet wine has been following a long-term down trend, and it is expected to decline slightly further.

Sparkling wine has become increasingly popular in the last several years. Consumption has increased from 659,000 gallons in 1958 to 935,000 gallons in 1960. While this rate of increase is not expected to continue, total consumption should reach nearly 1,000,000 gallons this year and go on to 1,120,000 in 1962.

The table below sets forth the revenue expected from each source by fiscal years, compared with actual collections during 1959-60.

	(In thousands)		
	1959-60 Actual	*1960-61 Estimated*	*1961-62 Estimated*
Distilled spirits	$40,369	$41,200	$43,300
Beer	10,016 *	9,431	9,814
Sweet wine		330	341
Dry wine		153	165
Sparkling wine		286	310
Totals	$50,385	$51,400	$53,930

* Cannot be distributed to source due to audit adjustments and other factors.

Horse Racing—$36,775,000

Under legislation adopted in 1959 more than 75 percent of all receipts from horse racing is now either initially deposited in or later transferred to the General Fund. For this reason, the horse racing licenses are now treated as a general levy, despite the fact that a little more than half of the revenue is initially deposited in special funds.

Three major factors dominate the amount of parimutuel wagering; the particular tracks racing during the year, the number of days alloted to each track, and the general economic level of the State as measured by total disposable income of Californians. On the basis of relationships established between income and average daily handle at each track, taking into account the effect of the 1959 law changes, the total parimutuel pool for each meet was estimated. Application of statutory fees and ratios between unclaimed parimutuels and breakage to total handle provided the estimates of revenue from this source.

The aggregate pool for 1961-62 has been estimated at $489 million, compared with an apparent $479 million in the current fiscal year and an actual total of $481 million last year. The slight drop in handle currently is accounted for by a decline in the volume of betting at Del Mar and the rotation among the Bay Area tracks of fall, late fall and spring racing meets.

Sources of revenue from horse racing and the disposition of receipts between the various funds is shown in the following table. Also shown for information only are the actual and estimated transfers from the fair and exposition fund to the General Fund. In this statement and in Schedule 2 revenues are shown as initially deposited. The transfers have been reflected on Schedules 1 and 4.

	(In thousands)		
	1959-60 Actual	*1960-61 Estimated*	*1961-62 Estimated*
Tax on parimutuel pools	$31,011	$30,688	$31,338
Breakage	4,985	5,046	5,123
Unclaimed wagering tickets	243	250	260
Licenses, fines and penalties	49	51	54
Totals	$36,288	$36,035	$36,775
General Fund	16,235	16,075	16,440
Fair and exposition fund	19,303	19,210	19,585
Wildlife restoration fund	750	750	750
Transfers to the General Fund	$16,509	$12,141	$11,711

Private Car Tax—$1,700,000

Under this levy, railroad cars owned by companies other than railroads are taxed by the State rather than by the various local governments. Assessd valuations are determined by the State Board of Equalization and the average statewide property tax rate during the preceding fiscal year is applied against the assessment roll.

There was an increase in the tax rate applicable to this type of property in the current fiscal year, but the number of cars assessed and the average assessed value per unit remained relatively constant. As a result, there has been only a slight increase in the total tax assessment for 1960-61. Allowing for a moderate further increase in tax rates, receipts from this source during the budget year have been projected at $1,700,000, compared with $1,668,000 currently and $1,613,000 in 1959-60.

Other General Fund Revenue—$72,948,000

Revenues from other tax and nontax sources during 1961-62 are estimated to $72,948,000. These comprise five general types of income: (1) a share of receipts from liquor and motor vehicle license fees; (2) departmental collections, such as the charges for care and treatment of pay-patients at State hospitals; (3) interest income; (4) a share of oil and mineral royalties; and (5) miscellaneous receipts, such as the proceeds from sale of property and the surcharge on fines for violation of traffic laws.

Principal development in this segment of State revenue is the revised accounting for oil and mineral royalties from State-owned lands. For many years past, 70 percent of the net revenue from this source has been earmarked for beach and park purposes. In this budget, these special funds have been abolished, the revenue will be credited to the General Fund and expenditures for beach and park operation, acquisition and improvement will be made from the General Fund. As a result of this change, approximately $11 million are shown as other General Fund receipts which formerly were credited to special accounts.

Other developments of importance include a substantial increase in receipts from liquor license fees outlined below; a reduction in interest income due chiefly to the utilization of General Fund surplus; and a drop in departmental revenues traceable to the fact that unneeded real property to be sold in the current year will have no counterpart in the 1961-62 program.

SPECIAL FUND REVENUE

Provisions of the State Constitution, codes and statutes restrict the use of certain revenue to specified purposes, and under California's financial procedure these receipts are separately accounted in various special funds. In general, they comprise three categories of income: (1) receipt from broad tax levies which are dedicated to specific functions; (2) charges for special services to specific groups; and (3) certain rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees illustrate the first of these classes. License fees for the regulation of businesses and professions are typical of the second, while oil and gas royalty revenue dedicated in part to water resource development is an example of the third group. Interest earned by the investment of special fund money accrues to the fund for which the investments are held.

Motor vehicle taxes and fees account for 87 percent of all special fund revenue, and under provisions of the Constitution and statutes these receipts must be used for highway purposes—including maintenance and construction of roads and streets, traffic control and motor vehicle regulation. Principal sources of this income are the levies upon motor vehicle fuel, registration and weight fees, transportation tax and the vehicle license fee which is levied in lieu of local taxes on this type of personal property. During the 1961-62 fiscal year $655,250,000 will be derived from motor vehicle taxes and approximately 40 percent of this revenue will be returned to local governments. Regulatory fees and charges for special services to industry, business and the professions constitute the second largest source of special fund revenue. Coupled with hunting and fishing licenses, receipts from these sources will amount to $45,304,000 in the coming fiscal year. This sum excludes $8,600,000 of liquor license fees going to the General Fund and $36,775,000 of horse racing revenue divided between the General Fund and the fair and exposition fund.

Royalties from oil, gas and mineral production on publicly owned lands will provide an estimated $10,940,000 for special purposes—chiefly water development and school support. This is $8,585,000 less than is shown for the current year, due to a change in the treatment of this revenue as outlined above.

Motor Vehicle Fuel Taxes—$368,100,000

The estimate of revenue from the 6 cent gasoline tax rests primarily upon two factors: The number of vehicles in operation and the average fuel consumption per vehicle. By year-end 1961 vehicle registrations, including those exempt from payment of registration and weight fees, will exceed the nine million mark, up 4.4 percent from the corresponding level of last year.

Fuel consumption is affected by many factors: Urbanization, stop and go driving, high horsepower engines and greater personal income all contribute to an increase in average consumption. Growth in number of two-car families, better highways, lighter cars and trucks resulting from utilization of aluminum and plastics, all tend to reduce average fuel consumption.

The successful introduction of the compact cars and the development of more efficient motors have been important factors in an indicated 7 gallon decline in average vehicle consumption during the current fiscal year. Average consumption is expected to decline an additional one and one-half gallons in 1961-62 to an average of 636 gallons per vehicle.

On this basis, net taxable gasoline during 1961-62 will exceed 5.75 billion gallons, resulting in revenue receipts of $345,100,000. This compares with $331,500,000 currently and $316,196,000 actually received during 1959-60.

Economic conditions have an important influence on diesel fuel consumption. The current leveling off in economic activity already has resulted in a slower rate of gain for diesel fuel. Total use during the current year is expected to increase by only 2 percent. However, the recovery in economic activity anticipated by midyear should bring 1961-62 consumption to about 7.5 percent above 1960-61 levels. On this basis, revenue receipts from the 7 cent diesel fuel tax and the 6 cent tax on liquefied petroleum gases are expected to total $23,000,000, compared with $21,500,000 in 1960-61 and the $20,589,000 received during 1959-60.

A comparison of the fuel tax estimates for the period covered by this budget is given below.

	(In millions)		
	1959-60 Actual	*1960-61 Estimated*	*1961-62 Estimated*
Motor vehicle (gasoline) fuel	$316.2	$331.5	$345.1
Use (diesel and LPG) fuel	20.6	21.5	23.0
Totals	$336.8	$353.0	$368.1

Motor Vehicle Fees—$272,450,000

Registration, weight and vehicle license fees account for over 95 percent of the $272,450,000 anticipated during 1961-62. Drivers' license fees, transfer fees, and charges for other services comprise the remainder. Continuing the growth that has made California the leading motoring state, fee-paid registrations are expected to approximate 9,300,000 by the end of 1962. Of this total, 7,400,000 automobiles, light trucks and motorcycles will be subject to the $8.00 registration fee and 1,900,000 trucks, buses and trailers to additional weight fees varying up to $267.

Sales of new vehicles and out-of-state registrations are expected to exceed 1,000,000 units per year. However, the net gain will be considerably less, since about 700,000 older vehicles will disappear from California's highways. Registration and weight fees, drivers' licenses, and other charges are expected to total $139,750,000 during 1961-62, compared to $136,000,000 this year and actual receipts of $132,308,000 in 1959-60.

Age distribution and market value, as well as the number of fee-paid vehicles in operation on our highways, are important considerations in preparing estimates of the vehicle license fee. The excellent reception of lower priced compact cars caused an overall decline in the average value of new automobiles, and a further decline has been projected. In addition, a reduction of 5 percent in the number of automobiles sold in 1961 is expected. Taking age distribution, value, and number of vehicles into consideration, receipts in 1961-62 are estimated at $132,700,000, compared with $128,600,000 in 1960-61 and $123,995,000 in 1959-60.

A comparison of the principal fees for the years covered in this document is given below.

	(In millions)		
	1959-60 Actual	*1960-61 Estimated*	*1961-62 Estimated*
Vehicle license fees	$124.0*	$128.6*	$132.7*
Registration and weight fees	120.7	123.8	128.0
Drivers' license fees	8.1	8.2	7.5
Other	3.5	4.0	4.2
Totals	$256.3	$264.6	$272.4

* Includes General Fund share.

Transportation Tax—$14,700,000

Gross receipts from the operation of motor vehicles engaged in the transportation of persons or property for hire outside cities are subject to the motor vehicle transportation tax. A close relationship exists between these receipts and general business conditions, as measured by personal income of California residents, and this relationship has been utilized in the preparation of the revenue estimates from this tax source for the current and subsequent fiscal year. On the basis of the California personal income estimates mentioned earlier, the 1.5 percent tax is expected to yield $13,150,000 during 1960-61 and $14,700,000 in 1961-62. Actual receipts during 1959-60 totaled $12,543,000.

Alcoholic Beverage License Fees—$19,250,000

A moderate increase in special fund license fee revenue is anticipated during the coming fiscal year, since additional licenses will be issued on the basis of the 1960 census of population. Coupled with the usual renewals, these will return $10,650,000 during 1961-62, compared with $10,163,000 in the current fiscal year and $9,942,000 last year.

General Fund revenue, however, is expected to increase substantially, with nearly $6,000,000 in additional revenue anticipated due to proposed issuance of new licenses and changes in provisions governing the issuance of licenses. General Fund revenue from license fee applications, renewals and other sources is estimated at $8,600,000 during 1961-62, compared with $3,280,000 in 1960-61 and the $2,437,000 in 1959-60.

Total receipts from the levies on liquor licenses are shown in the following table.

	(In thousands)		
	1959-60 Actual	*1960-61 Estimated*	*1961-62 Estimated*
For General Fund	$2,437	$3,280	$8,600
For cities and counties	9,942	10,163	10,650
Totals	$12,379	$13,443	$19,250

Other Special Fund Revenue—$62,945,000

Departmental collections, interest income, rentals and royalties for special funds during 1961-62 are estimated at $62,945,000. This represents a drop of $14,403,000 from the total anticipated in the current year. Approximately three-fourths of the change is accounted for in the abolition of the beach and park funds and the transfer of this aspect of fiscal operations to the General Fund, as outlined above. Entrance fees and service charges arising by reason of beach and park operations—formerly treated as special fund revenue—will be abated against operating expenses, in accordance with the present practice regarding other similar budget items. The remaining one-fourth represents an estimated decline in special fund interest, due particularly to a decline in highway and water fund balances.

Approximately one-third of the $62,945,000 represents charges and fees for special services or privileges. These include such charges as those for the inspection of agricultural products at the shipping point, offered on an optional basis to the agricultural industry of this State, and such fees as those for the privileges of hunting and fishing.

About one-fourth of the aggregate comprises regulatory fees paid largely on a self-imposed basis by various professional, vocational and business groups. The remainder comes from interest on special fund investments; rentals and royalties of various types; receipts from such operations as the State Fair; and the recently enacted surcharge on criminal fines which is used for the training of peace officers. Detail of this special fund revenue is shown in Schedule 2.

TAX TRENDS

State tax collections in the current fiscal year will amount to more than two and one-third times the total of ten years ago and half again as much as in 1955-56. Yet the increase in total personal income has been so nearly parallel that the burden of tax payments in relation to the aggregate income of California residents has changed very little over the decade. Total payments in 1950-51 were the equivalent of $4.81 per $100 of personal income of Californians in the calendar year 1950. The corresponding current ratio to last year's personal income is $5.09—an increase of 28 cents. In fact, though current year tax collections are almost eight times the pre-World War II level, State taxes per $100 of income are only 29 cents higher than they were in 1940-41.

However, there have been changes in both the tax pattern and in the relative importance of the individual levies. The sales tax has considerably less fiscal significance than it had ten years ago, while taxes imposed on personal income, corporate profits, inheritances and gifts, and the excises on such non-essential consumption items as alcoholic beverages and cigarettes have risen sharply. Special fund levies for support of highways, services to motorists and other activities for the benefit of special groups are slightly less in relation to the total than they were ten years ago. These changes are shown in some detail in the accompanying table and charts.

Three developments of the past decade have contributed to the changing impact of State taxes: (1) The nationwide rise in personal income and the particularly sharp increase in California's economy, with a resulting greater application of the progressive personal income tax rates and the growth in the corporate profits segment of the State's tax base. (2) The shift in personal expenditures away from goods, which in the main are subject to State sales tax, and toward services, which are untaxed. And (3) enactment of the 1959 tax program. This program stressed progressive income, inheritance and gift tax rates; gave greater importance to levies on corporate profits; and further utilized the taxation of non-essentials by raising the levies on beer and horse racing and imposing a tax on cigarettes. Factors of considerably less importance have also entered into the tax situation, such as the allowance of accelerated depreciation and greater depletion allowances under the income taxes, but the effect of these changes has been more than offset by other adjustments in the tax structure.

Table 9

STATE TAX RECEIPTS PER $100 OF PERSONAL INCOME OF CALIFORNIA RESIDENTS

Tax	*1950-51*	*1955-56*	*1960-61**	*1961-62**

Total Taxes	$4.81	$4.95	$5.09	$5.17

* As estimated for the 1961-62 State Budget.
† Including General Fund shares of liquor license fees, horse racing parimutuel tax, and motor vehicle license fees.

Ten years ago the sales tax produced $399.2 million in General Fund revenue and accounted for 42.3 percent of all State tax collections. At this level, sales (and use) tax receipts were the equivalent of $2.03 per $100 of personal income. It must be emphasized that only a part of all personal expenditures are subject to the sales tax and that more than a third of all sales tax revenue comes from payments by business and other non-personal entities and, therefore, have only an indirect relationship to personal income. The comparison of tax payments to income is made only to relate them to the general tax paying ability of the State.

In 1955-56 the sales tax produced $564.2 million—an increase of more than 40 percent over the total five years earlier—but even at this volume its fiscal importance and relative impact had declined materially. It accounted for 37.7 percent of all State tax collections. Personal income had advanced so sharply that collections amounted to $1.87 per $100 of income, nearly 8 percent less than in 1950-51.

Currently the sales tax will produce $714.5 million, but at this level it will show a further drop in relative importance, accounting for only 32.4 percent of the estimated tax receipts this year. In relation to aggregate personal income, this levy will amount to $1.65 per $100—a drop of 38 cents, or nearly 20 percent in relative burden over the course of the last ten years. Since sales tax collections are being influenced somewhat by the present economic recession, the current ratios are unusually low, but the recovery anticipated for 1961-62 will raise the relative importance to only

32.6 percent and the burden to $1.69 per $100 of personal income, both still well below the comparable figures of five and ten years ago.

Levies applicable to personal and corporate incomes have shown increases in fiscal significance and burden as well as in absolute amounts. The personal income tax produced $75.9 million ten years ago. It will yield an estimated $285 million this year. It accounted for less than one-twelfth of the total in 1950-51; it will produce more than one-eighth this year. In relation to aggregate personal income the tax amounted to 39 cents per $100 a decade ago, 42 cents in 1955-56 and will amount to 66 cents per $100 this year and next. The pattern is much the same in the case of the bank and corporation tax. Ten years ago it returned $98.2 million in General Fund revenue; this year an estimated $273 million. From a little more than 10 percent of the total in 1950-51, receipts from this source have risen to 12.4 percent this year. The burden in relation to all personal income—admittedly a particularly crude measure in the case of this tax—has risen from 50 cents per $100 ten years ago to 63 cents this year and a projected 64 cents in 1961-62.

Of the other general levies, the greatest change has occurred in the excise taxes, largely because of the newly enacted cigarette tax but partly attributable to the increase in the rate on distilled spirits in 1955 and on beer in 1959. From less than $20 million a decade ago, all from liquor, wines and beer, the excise tax total has risen to $116.3 million this year and will be nearly $122 million in 1961-62. These sources have more than doubled in fiscal importance, from 2.1 percent of all taxes ten years ago to 5.3 percent this year. The change in burden has been of roughly equal proportions, since the alcoholic beverages taxes amounted to 10 cents per $100 of income in 1950-51 and are expected to reach 27 cents this year and next.

Relative changes in the insurance gross premiums tax, the levies on inheritance and gifts and in other general levies are indicated in the accompanying table and charts. All have shown a growth in all three aspects of comparison—volume of revenue, fiscal importance and relative burden in relation to income.

One of the surprising developments in this area is the fact that highway user taxes today have roughly the same relative importance and about the same burden as they had a decade ago in spite of rate increases in 1953. These consist of motor vehicle fuel taxes; registration, weight, drivers' license and other fees; and the transportation tax. During the 1950-51 fiscal year these special taxes generated a total of $217.8 million for expenditures on highways, roads and streets and for the regulation of motor vehicles. This represented 23.1 percent of all tax collections and constituted a relative burden of $1.11 per $100 of personal income. Following a revision in fuel tax rates and license fees, the yield of these levies, their fiscal importance and relative burden all increased, with the result that the $398.3 million in highway user taxes collected in 1955-56 constituted 26.6 percent of all State tax receipts and represented $1.32 per $100 of personal income. Since that time the relative importance has declined to 22.8 percent and the burden to $1.16, despite the growth in revenue yield to an estimated $502.1 million this year. There are, of course, a number of factors which may have combined to cause this change, including improved efficiency of recent model cars, growth in the number of smaller vehicles and better highway conditions.

Other special tax levies, chiefly the vehicle license fee, have declined slightly in importance and burden. A summary of State tax collections, per capita amounts, and tax payments per $100 of personal income since 1936-37 is shown in Table 10. Comparative yields for each major tax during the postwar period are given in Table 11, and an outline of the present State tax system is provided in Table 12 on the following pages.

* Amounts shown during period of World War II represent civilian population, estimated income of civilians, and per capita civilian income.

† Estimated.

Population data, 1936 through 1949, are based on United States Census Bureau estimates; population, 1950 to date, estimated by the State Department of Finance.

Personal income, 1936 through 1959, from estimates by the Office of Business Economics, United States Department of Commerce. Reported totals for 1941 through 1945 have been adjusted to exclude income of armed forces personnel. Data for 1960 and 1961 are estimates by the State Department of Finance.

Income per capita computed from population and income data shown. Amounts differ somewhat from U. S. Department of Commerce estimates.

Taxes per capita computed on the basis of population January 1st, the midpoint of the fiscal year.

---

[1] Includes the corporation income tax and includes amounts credited to the postwar employment reserve in 1945-46.

[2] Including special fund share of horse racing revenue.

[3] Includes the motor vehicle (gasoline) fuel tax, use (diesel) fuel tax, and brokers and producers fees.

[4] Includes registration and weight fees, motor vehicle license fee (in lieu tax) and other fees. Part of the revenue from the motor vehicle license fee is credited to the General Fund.

[5] Motor vehicle transportation tax and permit fees. All revenue from this source accrued to the General Fund in 1945-46 and 1946-47 and the early months of 1947-48.

[6] Includes General Fund share of revenue from liquor license fees.

NOTE: Changes in rates and other features of these taxes have affected revenue yields during the period covered by this table hence, the data shown are not strictly comparable.

(1) Revenue and Taxation Code.
(2) This tax is levied at the rate of $1.24 per 31-gallon barrel.
(3) State Board of Equalization.
(4) Distilled spirits in excess of proof strength are taxed at double this rate.
(5) Minimum tax $100 per year, not applicable to banks.
(6) Franchise Tax Board.
(7) This tax is levied at the rate of 1.5 mills per cigarette.
(8) Business and Professions Code.
(9) Ocean marine insurance is taxed at the rate of 5 percent of underwriting profit attributable to California business. A special rate also applies to annuities.
(10) For return to cities and counties.
(11) For payment of administrative costs, highway bond interest and redemption and apportionment to counties, cities and school districts.
(12) For administrative expense and apportionment to State, counties and cities for highways, airport and small craft harbors.
(13) For administrative expenses and State highways.
(14) For support of State Department of Motor Vehicles, California Highway Patrol, county roads and State highways.
(15) Average property tax rate in the State during preceding year, which for 1960-61 was $6.44 per $100 of assessed valuation.

Expenditure Program, 1961-62

California State government has long ago learned to live with the problems of growth, as well as to prosper in the advances which growth has brought about. The recent decennial census has again confirmed the pattern which has seen this State double its population every twenty years since 1860. The 15,860,000 people as of mid-1960 have themselves created the need for a State expenditure program directed primarily to the support of the largest public education system in the country, to constant improvement in the social welfare and health services provided by government, to the wise development of natural resources and to large-scale highway programs to keep this population mobile.

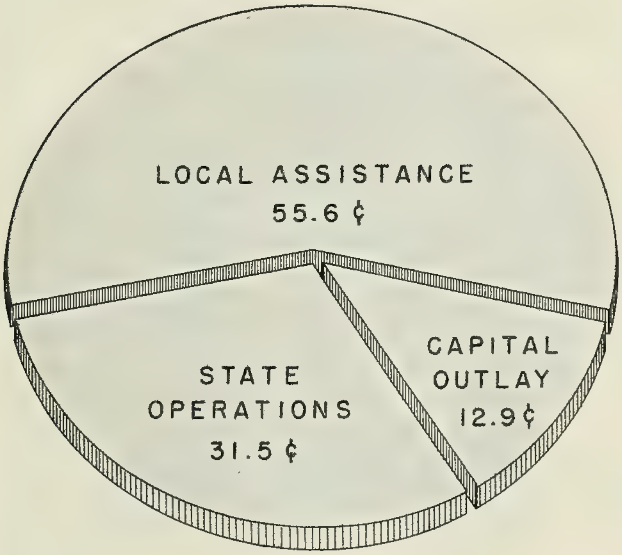
The 1961-62 Budget is again a reflection of the continuing needs of the people. Although a leveling of the economy has brought with it declining revenues, the expenditure program of necessity must respond to welfare needs of the aged and the unemployed, to continued growth of our educational system, and to improved treatment of our mentally ill and retarded. It must provide for meeting our future capital construction needs as they relate both to operating facilities and to the conservation of our vital water supply.

To meet these continuing demands, expenditure requirements of State government for the 1961-62 fiscal year total $2,492,364,068. However, due to leveling off of revenue receipts, capital construction costs of $99,920,000 have been financed from bond authorizations and are not included in this total, since bond costs are not considered expenditures until the money is repaid. Also, highway construction shows an apparent decrease of $118,588,000 in 1961-62 due to a carryover of $127 million in projects into the current year. By adjusting for these two large distortions, an increase of $71.2 million or 2.7 percent over the 1960-61 expenditure program is obtained for comparative purposes.

CHART 8

MAJOR DIVISION OF THE EXPENDITURE DOLLAR

1961-62



Since the 1961-62 Budget program has been prepared during the initial phase of the present economic decline, expenditures have been kept in line with tax receipts plus a small carryover surplus by means of an allocation system which first determined all available resources and then prescribed fixed levels of expenditure within which all agencies of State government must operate for that fiscal period. This has resulted in a budget narrowly in balance as of June 30, 1962, and has encouraged greater efficiency of operation by the departments of State government in order to meet ever-present workload increases within the limited resources dictated by economic conditions.

Three Divisions of the Budget

More than half of the outgo programed for the budget year represents State assistance to local governments—chiefly subventions for school support; contributions for aid to the aged, blind, children and the disabled; and allocations of revenue collected on behalf of cities and counties. In the aggregate, these local assistance payments will amount to $1,384,609,000, an increase of $78,695,000 over the current year requirement for this purpose.

Approximately one-eighth of the total consists of capital outlay items—chiefly expenditures for new highways, but including as well amounts for the construction of buildings at State colleges, University campuses, mental hospitals and correctional institutions. This broad category of costs will total $322,241,000, or $272,542,000 less than in the current year. This decrease is the result of highway construction carryover into the current year and the necessary use of bond financing for state buildings, as explained above.

The remaining 30 percent of the budget represents the cost of operating state governmental agencies—$785,413,000, or $48,156,000 more than will be required for this purpose in the current year. This includes the cost of supporting the activities of all the various departments, boards, commissions and independent offices, including the centers of higher education, hospitals, prisons and other facilities; maintenance of the higher courts of this State; support of legislative activities; and such miscellaneous items as bond interest and redemption, a cost which will show a substantial rise next year.

The most significant aspect of State operations cost is the staffing required to operate the various programs in State agencies. In the budget year, 121,000 State-level positions will be required to man the various departments, at a cost of $752.7 million, including expenditures from trust funds, revolving funds, and other accounts not included in the budget totals. Within this total are included 5,816 proposed new positions of which 75 percent represent the necessary staffing to operate various institutions and educational facilities due to greater workload demands of an increased population. The University and State College System alone account for nearly one-half of these new positions—2,650 directly required for enrollment growth of 12,400 students. The Department of Mental Hygiene will require 980 additional personnel for treatment of patients, and the correctional institutions will include 750 additional custodial and rehabilitation positions. Table 23 on page A-35 includes a breakdown of personnel man-years and dollar costs for the three fiscal years contained in this budget, subdivided by the type of positions used in State government. Included, also, is a summary of proposed new positions contained in the 1961-62 Budget.

The three major divisions of the 1961-62 Budget are shown in the preceding circle diagram. Amounts for each of the three fiscal years covered by this document, together with the increases in each category next year are given in the following table.

Table 13
STATE EXPENDITURES BY PRINCIPAL BUDGET DIVISIONS
(In millions)

	1959-60 Actual	1960-61 Estimated	1961-62 Proposed	Change from 1960-61 Amount	Change from 1960-61 Pct.
State Operations	$634.7	$737.3	$785.4	$48.1	6.5
Capital Outlay (current funds)	239.5	594.9	322.4	—272.5	—45.8
Capital Outlay (bond funds)	(56.4)	(10.8)	(99.9)	(89.9)	-
Local Assistance	1,211.4	1,305.9	1,384.6	78.7	6.0
Totals	$2,085.6	$2,638.1	$2,492.4	—$145.7	—5.5

Viewed purely in fiscal perspective, education is the leading activity of State Government. With $1,035.521,000 earmarked for this purpose next year, education accounts for 41.5 cents out of the average expenditure dollar. This is the latest in a series of increases in relative importance which has carried education from 34 percent of the expenditure total in 1950-51 and 39.5 percent in 1955-56 to the current 41.5 level.

Expenditures for highways are second in relative importance, accounting for 20.9 cents of the budget dollar. Included in this category are not only the amounts for highway construction and maintenance, but also allocations for local roads and streets, operation of the California Highway Patrol and support of the Department of Motor Vehicles. The two functions of education and highways comprise 5 of each 8 expenditure dollars.

Below these leading services are social welfare, public health and such related activities as industrial relations and veterans' affairs. In the aggregate, these make up 12.3 cents of each dollar. They are followed by expenditures for mental hygiene and corrections—8.5 cents; conservation and development of natural resources—6.4 cents; fiscal affairs and general administration—1.7 cents; and miscellaneous expenditures comprising 8.7 cents of the 1961-62 dollar. Considerably more than half of the latter represents the distribution of license fee revenue collected by the State for cities and counties. Charts showing these major functional divisions of the State's expenditure program are given on pages A-6 and A-7, while the dollar amounts are summarized in the following table.

Table 14
EXPENDITURES CLASSIFIED BY PRINCIPAL FUNCTIONS
(In millions)

Function *	Proposed 1961-62	Percent of total	Change from 1960-61 Amount	Change from 1960-61 Per-cent
Education	$1,035.5	41.5	—$25.0	—2.4
Highways, etc.	521.7	20.9	—124.8	—19.3
Welfare, health, etc.	305.6	12.3	28.6	10.3
Mental hygiene and corrections	212.1	8.5	—13.7	—6.1
Conservation	160.1	6.4	—12.9	—7.5
Fiscal affairs and general administration	41.1	1.7	—1.1	—2.7
Other expenditures	216.3	8.7	3.3	1.6
Totals	$2,492.4	100.0	—$145.7	—5.5

* See Tables 15 through 21 and accompanying charts for details of activities included in these general functional categories.

Due to the pressures of a declining economy, bond authorizations have been utilized to finance a major portion of the State's building program during 1961-62. After this allocation, $50 million of building bonds will remain for future capital outlay needs. The $99.9 million of bond projects contained in the budget year have been reported in parentheses in each functional table to permit comparability of expenditures with 1960-61, wherein all new building construction was financed from current funds.

In order to show as accurately as possible the total to be spent for each function of government, the cost of a recommended program of health and welfare benefits for State employees has been distributed to the various functions in the data presented in the above table and in this analysis. Throughout the remainder of the budget document, this amount is treated as a lump sum. Adjustments in the data have also been made to reflect the unidentified savings anticipated in operating expenses during both the current and budget years. These revisions account entirely for the differences between amounts referred to in this statement and the details shown elsewhere in the budget document.

Education—$1,035,521,000

There is no more important area of State expenditure than the field of education, both in the elementary and secondary grades and in the college level. California has done well to keep abreast of the phenomenal growth and changing curricular requirements in all of these levels of education, yet the future growth and the technological changes of the new age of science demand even greater effort. Over $1 billion is devoted to education, almost 42 percent of the entire budget, and 60 percent of the General Fund contribution therein. The expenditure program encompasses such diversified operations as public school assistance, a separate State College system, and a University which is widely recognized as one of the most eminent teaching and research centers in this nation.

The State Department of Education is responsible for the administration of public school education through the junior college level. Among the specialized programs administered by this department are school apportionments, free textbooks for the elementary grades, special schools for physically handicapped children, and centers for the adult blind. The department is also the cooperating agency in Federal-State programs for vocational rehabilitation, vocational education, national defense education, and surplus property distribution to the public schools. This budget proposes extension of vocational rehabilitation services to patients in mental hospitals to permit faster return of such persons to productive status.

Local Assistance

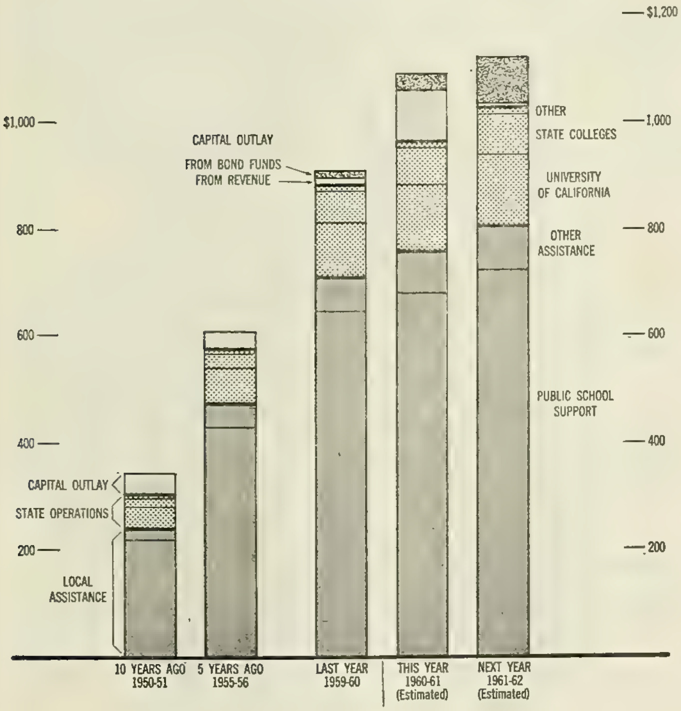
Numerically, our public school enrollment exceeds that of any other state, and dollar-wise our greatest single expenditure is in this area. This budget contains $721.8 million for public school support, representing an increase over the current year of $41 million for 190,000 additional students. We are now educating 3,550,000 children in the elementary and secondary grades through junior college, with 22.5 percent of our total population attending these grades. This picture is indicative of a trend which has seen these school-age groups grow at a rate 50 percent faster than the State's general population over the last ten years, with a continued above-average growth rate projected until the end of the next decade.

California has long furnished State-printed free textbooks to the elementary schools, with the adoption of new editions scheduled over an eight-year cycle. The 1960-61 Legislature provided for purchase of new reading books from private publishers at a cost of not more than 10 percent above State-printed prices. Since additional funds were not provided in that budget, it is necessary to include $1.5 million in the 1961-62 budget for the purchase of readers to complete the adoption. Since no other new titles are proposed, these carryover costs plus normal reprints and royalty payments will require only $8.5 million in 1961-62, a decrease of $3.8 million from the current year.

CHART 9

COMPARATIVE EXPENDITURES FOR EDUCATION

(In millions)



Funds for child care centers of $5.1 million reflect a 2 percent increase in hours of attendance, plus operation of recently authorized additional centers for physically handicapped children. Continued growth in the Teachers' Retirement System will require $41 million of matching contributions to provide the State's share of benefit payments to 24,600 retired teachers during the coming year. Debt service on public school bonds continues to increase rapidly as a result of the maldistribution of assessed valuations which finds so-called "bedroom" districts with extremely low property tax bases but high rates of enrollment growth. The State will be allocating $12 million a month in loans for construction during the coming year, with over one-half of the interest and redemption costs being carried by the General Fund for this bond program. Additional encouragement to the schools in meeting their fiscal problems is proposed in a $200,000 county grant for planning proper school district organization structures.

In total, the State will provide $803.2 million in assistance to local school districts next year, an increase of $45.3 million over the indicated requirement this year and $94 million more than was spent for this purpose in 1959-60.

Higher Education

Growth in the State's higher educational institutions over the next 15 years will see the University of California double in size to 100,000 students, while the State Colleges will triple to 180,000 regular students. To insure proper differentiation of functions among the agencies engaged in higher education—the University, State colleges and junior colleges—the 1960 Legislature implemented the Master Plan for Higher Education. This plan created a separate State College System under a Board of Trustees and established a Coordinating Council for Higher Education with representation from the general public and all segments of higher education in the State, effective July 1, 1961. This budget conforms to the Master Plan by establishing a new function for higher education and providing the staffing for the Coordinating Council and the Board of Trustees.

University of California

The University of California will experience its largest enrollment increase in a decade during the 1961-62 school year. The sum of $134.8 million will be required to provide for the educational needs of the 52,000 students to be enrolled, an increase of $12.2 million over the currently authorized expenditure level. This represents a rise of 10 percent in State support, which compares with an enrollment increase of 4,400 students, or 9.3 percent.

In order to meet future growth of the University, $220,000 is included for planning of three new general campuses in San Diego, Orange County, and the South

Central Coast area. Funds are also provided for initial planning and academic staff for a new medical school in San Diego.

Continuing capital construction requirements are budgeted at $48 million to provide student capacity needs through 1964, as well as research facilities and necessary land acquisition projects. Expansion of several smaller campus sites is necessitated by future growth, and designation of Riverside as the primary agricultural campus in Southern California also requires the acquisition of additional land.

State College System

The 15 existing State Colleges, formerly under the State Department of Education, will be transferred to the Board of Trustees of the State College System on July 1, 1961.

Funds for this new State College System are budgeted at $78.5 million, an increase of $9.5 million or 13.8 percent. This includes $1 million for support of the Board of Trustees, and $233,000 required to share in a $2.1 million Federal grant for student loans under the National Defense Education Act.

Enrollment at State Colleges will reach 76,900 regular and limited students during 1961-62, an increase of 7,900 students or 11.5 percent over the current year. This compares directly with an expenditure increase of $8.0 million or 11.7 percent over the amount required for support of the colleges in the current year. In addition to normal staffing needs for enrollment growth, an expanded program of instructional television is included to permit continued development in this important field. Additional strengthening of library acquisitions has also been provided for recently established colleges whose growth has necessitated rapid expansion of these facilities.

To meet future student needs in the mushrooming population areas of Southern California, planning staffs are included for two recently-authorized colleges to be known as San Bernardino-Riverside State College and South Bay State College. A planning and instructional staff is also budgeted to permit the opening of Sonoma State College in the fall semester of 1961.

The Legislature adopted a budget policy in the 1959-60 session that student fees would be based on noninstructional services, and in accordance with this policy the budget includes an annual fee of $72 for full-time students computed to cover such noninstructional services in 1961-62.

Proper planning and construction of educational facilities requires a three-year lead time on capital outlay projects. Therefore, $40.4 million is included to provide the classrooms, laboratories, auxiliary services and parking necessary for a 1964 enrollment of 97,000 regular students. In addition to normal parking development geared to fees charged for that purpose, $1.3 million is included for mandatory expansion of the Los Angeles State College campus to permit orderly maximum utilization of classroom facilities, and $1.5 million is required to complete the San Fernando Valley State College campus. Funds for working drawings and site development are also proposed for Stanislaus State College, now operating in rented quarters that cannot be expanded beyond 1963 needs.

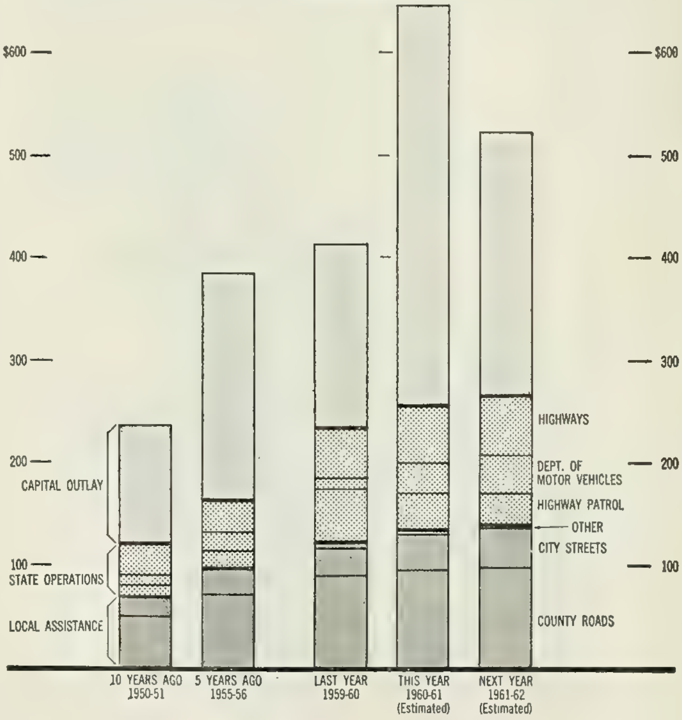
Highways, Streets and Motor Vehicle Regulation—$521,681,000

Expenditures in excess of a half billion dollars will be required in the coming budget on operations affecting motor vehicle traffic in the State of California. This includes the maintenance and operation of over

CHART 10

COMPARATIVE EXPENDITURES FOR HIGHWAYS AND VEHICLE REGULATION

(In millions)



14,000 miles of the present State highway system, construction of new facilities, support of the California Highway Patrol and the Department of Motor Vehicles, and distribution of funds to counties and cities for road and street purposes. In addition to the above total, $265.2 million of Federal and other funds will be available for work on the interstate system and local roads. These latter amounts are not reported in budget totals, but are detailed in the highways budget.

Highway construction for the budget year of $254.4 million will continue to emphasize freeway development with provision for 240 miles of multilane freeways and expressways, plus 42 miles of two-lane access-controlled highways. The 1961-62 budget shows a $118.6 million decrease from current year construction totals. This apparent decline results from the substantial carryover into the current year of amounts originally anticipated for expenditure in 1959-60. This revised current year program of $373 million compares with the figure of $246 million originally budgeted for this year—a difference of $127 million which tends to make comparison with the budget year difficult.

Among other regulatory activities of the Department of Motor Vehicles are registration, driver licensing and ascertaining the financial responsibility of individuals involved in vehicle accidents. The department will register 9,286,000 vehicles and issue licenses to 2,400,000 of California's 8,400,000 licensed drivers during the 1961-62 fiscal year. Continuing the economy program initiated during 1959-60, no new positions are proposed to handle normal workload increases.

The California Highway Patrol budget of $35.5 million for traffic enforcement during the budget year also reflects only continuance of existing services, since the Governor's program for highway safety will be contained in a special message to the 1961 Legislature.

Payments of shared revenues to local governments for street and highway purposes will again rise moderately, reflecting the anticipated increase in highway user tax revenue. Allocations to counties is budgeted at $97.2 million, up $2.5 million from the current year, and $8.2 million more than was paid out for this purpose in 1959-60. Cities will receive $36.7 million for street purposes, an increase of $1.6 million, while the matching program of railroad grade separation projects on local streets and roads will be continued at the present level of $5 million annually.

Welfare, Health and Related Activities—$305,632,000

The budget includes $305.6 million for welfare, health, and similar programs directed toward maintenance of the general well being of citizens of California. A number of programs are financed jointly by local, State, and federal governments, and range from direct assistance to the needy to activities for the general welfare, such as aid for local hospital construction and research in various disabling diseases.

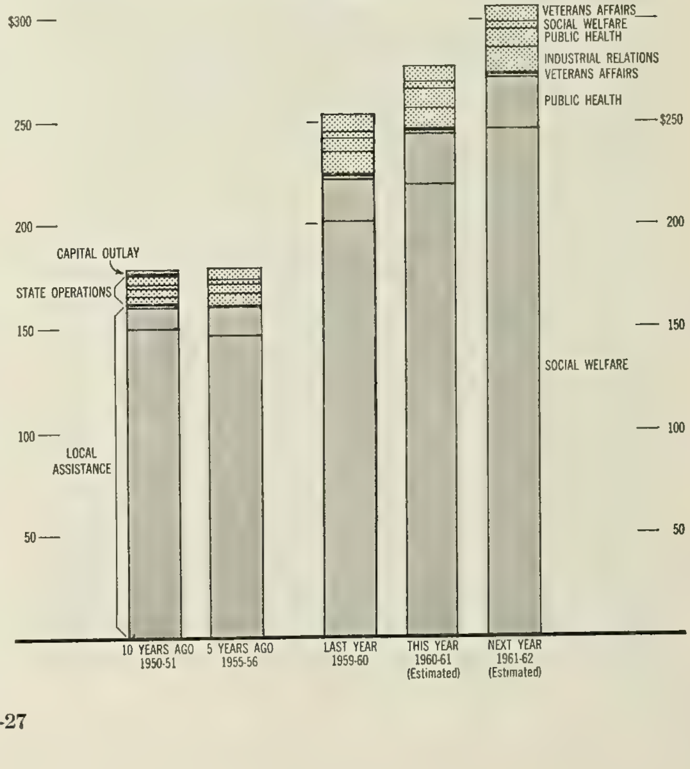
It should be noted that the unemployment insurance, disability insurance, and job placement activities of the Department of Employment and the operation of the Compensation Insurance Fund are not included in this group of expenditures. Payment for these purposes are made from federal or trust funds and are not included in the budget totals, but the details are reported in the appendix of the budget.

Continued growth of the State's labor force has brought about concomitant workload increases in the field of industrial relations. The ever-increasing number of disabling injuries and need for greater emphasis on industrial safety, together with the growing interest in the agricultural work force, and the safeguarding of employment rights for all persons rise to paramount importance in this field. To meet these areas of need, the 1961-62 budget reflects additional referee teams and safety engineers. Also, the Division of Fair Employment Practices is proposed for expan-

CHART 11

COMPARATIVE EXPENDITURES FOR SOCIAL WELFARE, HEALTH AND RELATED ACTIVITIES

(In millions)



sion at the field level to meet workload growth in the area of discrimination.

Public Health

Support expenditures for the Department of Public Health will increase $287,000 over the current year to total $9.1 million. This includes $100,000 for a new program of medical care for migrant farm workers who, because of non permanent residence do not qualify for the usual minimum standards of health services furnished at the expense of local taxpayers.

Potentially one of the most serious health problems facing California today is growth of air pollution, particularly in metropolitan areas. The budget provides $1,575,000 for various activities toward solving this problem. The Department will continue to monitor air pollution, set standards, conduct medical research and make health studies, while the University of California will continue its research activities in this field. Legislation creating the Motor Vehicle Pollution Control Board was enacted at the 1960 session of the Legislature and $500,000 was provided to test and approve motor vehicle devices designed to reduce pollutants from exhaust emissions. The Board has recently been organized and is preparing for the initiation of early testing of numerous devices. The budget includes $500,000 to continue the activities of this important part of the program.

It is proposed to expand the nursing home care program by including an increase of $78,000 for local demonstration projects and increased consultant services, payable from federal grants.

Expansion of the heart and cancer control programs is planned from available federal funds in the amount of $57,000 for increased statewide studies and data analyses.

Local assistance for Public Health will amount to $25.9 million in 1961-62, which represents an increase of $1.2 million over 1960-61. Over half of this increase results from normal program growth in care of crippled children. Other principal increases are in grants for therapeutic help for physically handicapped children and tuberculosis treatment. While the number of patient-days of treatment, and care for persons suffering from tuberculosis continues to decrease as a result of earlier detection and improved treatment techniques, the cost per patient of treatment continues upward.

Social Welfare

Expenditures for support of the Department of Social Welfare of $4.1 million represent an increase of $204,000 over the current year. A substantial portion of this is for administrative implementation of new programs of medical assistance for the aged, promotion of local community activities for older citizens and assistance to county welfare departments for planning and training to improve the effectiveness of local operations.

Payments of State funds to local government for old age security, aid to needy children, assistance to the blind and disabled and other welfare activities will total $246,147,000. This is approximately $26.9 million over the comparable total for 1960-61. Individual program growth is shown in the accompanying table.

Further improvements are proposed in the 1961-62 legislative program of the Governor to provide suitable standards of health and living conditions for needy persons through medical care, rehabilitation, vocational training and other social services directed toward the self-sufficiency of the individual. These include new subventions for:

1. *Medical Assistance for the Aged* to provide payment for medical care of older citizens who are not recipients of old age security but are without sufficient personal resources to meet their medical expenses.
2. *Community Services for Older Citizens* to encourage wider development of community centers for the large number of older citizens in retired status.
3. *Administrative Assistance to County Welfare Departments* directed toward restoring or rehabilitating families to maximum independence and to increasing the efficiency of social workers through in-service training and educational leave stipends.

Proposed changes in existing subventions are:

1. *Increased grants* which will recognize the impact of the rising cost of living in the old age security, aid to the needy blind, and the disabled programs.
2. *Changes in the definition of the needy disabled* in order to provide aid to persons who are truly disabled but are currently excluded by the restrictive wording of the present law.
3. *An increase in the maximum amount payable per child in a foster home* to meet the increased operating expenses of those who provide foster home care.

Perhaps of equal significance with these changes is the impact, dollarwise, on the expenditure for aid to needy children which historically has followed growing unemployment. The General Fund cost for aid to needy children is estimated at $68.4 million for the 1960-61 fiscal year and $79.6 million for the 1961-62 fiscal year. The cost of this program in the present fiscal year will be $6.6 million more than that estimated in the budget submitted a year ago. This impact will be even more pronounced during the budget year.

Veterans Affairs

The Department of Veterans Affairs has primary responsibility for State assistance to veterans. Major programs are educational assistance to veterans, educational assistance to veterans' dependents, and claims and rights service. In addition, the Department operates the Veterans' Home, which is expected to have an average population of 1,825 during the coming year. Total expenditures for these purposes are proposed at $7.1 million, a decrease of $93,000 from the 1960-61 fiscal year cost. This is primarily the result of increased payments by the federal government for partial support of the Veterans' Home.

Provision has been made for an additional $150,000 in payments for County Veterans' Service Officers and will require a total appropriation of $500,000.

Mental Hygiene and Corrections—$227,913,000

While differing in many ways, the mental hygiene and correctional programs of the State are aimed at a common goal—the return of persons committed to the care of the State to useful roles in society. The treatment and rehabilitation programs conducted by the agencies in this field are designed to alleviate the conditions which produce mental illness and crime and to assist patients and inmates in making the transfer from institutional to normal life successfully.

Mental Hygiene

The program of the Department of Mental Hygiene continues to be directed towards reduction of resident population and admissions by encouraging the further development of community oriented activities as well as improvement of the hospital treatment program. The success of this program is indicated by the fact that the 36,000 resident population in the 10 hospitals for the mentally ill is remaining constant, even in the face of constantly increasing admissions. Population of the four hospitals for the mentally retarded continues to rise, however, and will reach nearly 12,000 by the end of the 1961-62 year, an increase of 335 from the current year. The two neuropsychiatric institutions will care for 305 patients during the budget year.

Population of the hospitals for the mentally retarded depend primarily on the availability of beds. Additional facilities for 676 patients will be available at Fairview State Hospital by 1963-64, and a new hospital annex of 93 beds will open at Porterville State Hospital during 1962-63. This budget also provides for a new severely handicapped unit of 200 beds at Sonoma State Hospital.

The 1961-62 Budget will continue the necessary improvement to the treatment program initiated last year by the Department of Mental Hygiene. This program strives to (a) share the load by expanding State-local mental health services; (b) increase efficiency by a balanced hospital treatment staff; (c) emphasize pre- and post-hospital services through additional social workers and after-care facilities, an expanded convalescent leave program and new day-treatment centers; and (d) expand the training and research programs.

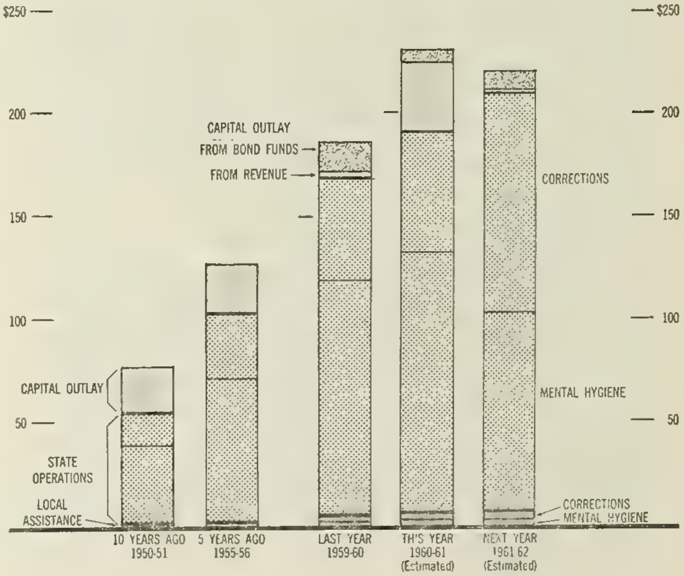
In addition to extending the existing services of the mental hospitals into the 1961-62 year, this budget provides for a supplemental program of improved services in the eight following categories:

1. *Administrative Strengthening* is necessary in the Statistical Research Section to obtain data upon which to measure past accomplishment and plan future programs, and in the Bureau of Patients Accounts to insure the return of revenues to the State which are authorized by statute.
2. *Continued and Expanded Research* in the fields of mental illness and mental retardation is essential to cope with these inherent problems.
3. *Training* programs are expanded to keep pace with growing hospital staffs and with new and improved techniques.
4. *Pre-Hospital Services* are strengthened by two additional day treatment centers and continued development of community resources.

CHART 12

COMPARATIVE EXPENDITURES FOR MENTAL HYGIENE AND CORRECTIONS

(In millions)



5. *Post-Hospital Services* are strengthened by two additional after-care facilities to augment the six now in operation, additional psychiatrists for the convalescent leave program and expansion of the home placement program.
6. *Hospital Services* are expanded to keep pace with increasing workload of admissions, as well as more adequate care and treatment of patients. Over 800 positions will be required primarily for direct contact with patients in carrying out the main treatment effort.
7. *Special Services for Mentally Retarded* are required to meet the rising demand for admission by providing outside placement in lieu of institutional care for those who will benefit by such placement. It is proposed to accomplish this objective by placement of mentally retarded persons in private medical facilities and family care homes.
8. *Salary Incentives for Psychiatric Technicians* are included to assist in recruitment of competent personnel.

Capital outlay expenditures for the coming year are proposed at $4.5 million to meet the demands for specialized facilities and to bring the existing plant up to modern standards. The program includes a new severely handicapped unit for the mentally retarded.

Provision is also made for a further increase in local mental health activities, which in turn require additional State aid. An appropriation of $3.1 million will be required in order to meet the cost of the State's share of the 35 local jurisdictions expected to participate in this program during the 1961-62 fiscal year.

Corrections

The custodial aspect of a modern penal system has a correlative function—that of rehabilitating the offenders. With these two fundamental bases as the foremost considerations, the facilities operated by the Department of Corrections and the Department of the Youth Authority are designed to allow the assignment of inmates and wards to institutions based upon custodial and training needs.

The Department of Corrections and the Department of the Youth Authority have responsibility for the administration of 18 institutions and training schools and 41 conservation camps, as well as supervision of those adults and minors on parole. A further responsibility in youth rehabilitation is evidenced by the dispersement of financial assistance to local governments for the construction and operation of local facilities for juvenile delinquents.

The Department of Corrections will retain the problems of an increasing inmate population which continues to grow at the rate of approximately 1,000 additional inmates per year. Along with the opening of new facilities in 1961-62 there will be a broader application of successful treatment techniques.

Included in the total operating expenses of $45.2 million is the initiation of a new program for increased correctional effectiveness which is built upon the knowledge gained in recent research studies. It will emphasize more efficient selection and grouping of inmates and parolees for special attention in small groups; increase use of intensive inmate-staff and parolee-staff relationships to foster social responsibility; and provide rapid return to short-term confinement for violation of parole.

While treatment procedures continue to be improved allowing for a shorter period of incarceration and more successful rehabilitation, the greater demand for capacity must still be met. A new medium security institution for 2,400 men will be opened this year at San Luis Obispo. This institution is designed to make possible a more personal relationship between the inmate and the treatment staff, and at the same time effect economies of central facilities for service and supply. Also construction will be undertaken for a new conservation center branch for 160 inmates to further expand the use of inmates in the work of conserving the state's natural resources. Capacity at the prison for women at Corona will also be increased with 120 additional beds to be constructed in the new Reception-Guidance Center. These facilities along with equipment for previously authorized projects will require construction expenditures of $3.7 million.

The estimated number of wards under the care of the Department of the Youth Authority in its institutions during the coming fiscal year will average 4,341, an increase of 859 (24.7 percent) over the current fiscal period. Parole population will average 10,586, an increase of 589 or approximately 6 percent over the estimated number for the 1960-61 year. The total cost of the daily operation for the 1961-62 period for these functions will be $21.3 million, a 16.7 percent increase or $3.1 million over the current year.

The special treatment program is proposed in this budget for extension to Paso Robles School for Boys and Ventura School for Girls. This will complete the presently planned integration of this program in its full scale into the existing institutions.

Two new parole research programs are proposed for the 1961-62 year. One, the Community Treatment Program, will provide a comparison between institutional treatment and more intensive parole treatment in a free setting, and will gauge the impact of each type of treatment on similar types of wards. The other is a nalline testing program to determine narcotics use among Youth Authority parolees having a history of narcotic addiction or practice.

Capital outlay requirements total $3.2 million for the coming fiscal year. In addition to completion of the new Ventura School for Girls and the furtherance of the remodeling of Fred C. Nelles School for Boys, planning for the initial phase of the new Northern California Youth Center is proposed. This center will ultimately house 4,800 wards in 12 separate institutions of 400 wards each, and will in this character retain the relatively small institution setting and yet accomplish economies through centralized services.

In addition to institutional and parole treatment, the Youth Authority provides assistance to public and private agencies who seek to combat the problem of juvenile delinquency and rehabilitation on a local level. Besides assistance in the form of consultation and advice, monetary subventions are distributed to the various counties and cities applying for such assistance and complying with established standards. The Department will, in this phase, administer a proposed $3.7 million program in 1961-62 to cities and counties for the construction and maintenance of local juvenile homes and camps.

Conservation and Development of Natural Resources—$160,068,000

Combined within this category are the several State agencies dedicated to conservation, development, and beneficial utilization of our natural resources. The activities covered here include water development and conservation; timber and watershed protection; conservation and management of fish and game; acquisition, development and operation of parks and beaches; assistance in the construction of small craft harbors; and assistance to the agricultural and mining industries of the State.

The aggregate cost of these diverse and varied services will be $160.1 million, a decrease of $12.9 million, or 7.5 percent less than the expenditures for like purposes during 1960-61. This decrease is accounted primarily by the transfer of the beach and park program to General Fund financing with expenditures offset by park fees collected, and with beach and park acquisition returning to a normal rate from an extremely high level of the current year.

Water Resources

Water conservation and development continue to be among the most pressing problems of California State government. Now that the voters have validated the $1.75 billion water resources development bond issue there will be an expansion of construction on State water facilities to speed the delivery of water to present and potential users. The Governor's recommendation to spend $47.9 million on water development reflects a firm determination to proceed with this statewide task with vigor and dispatch.

Particular attention is directed to the provision of funds to continue highway and railroad relocation at Oroville and to commence the construction of the diversion tunnel. Construction of this diversion tunnel has involved a policy decision to proceed immediately with the Oroville Dam. Amounts have also been included for final design and continuation of the acquisition activity on the San Luis reservoir project. Another major step forward is the decision to initiate construction of the aqueduct from the Delta southward.

Provision is made to complete construction of the Frenchman project on the upper Feather River, to continue work on the South Bay aqueduct, and to finance initial acquisitions on the North Bay aqueduct project.

Finally, provision has been made for the continuation of construction on the sea water conversion plant in San Diego, Black Butte Dam in Tehama County and New Hogan Dam in Calaveras County. Though the passage of the bond act terminates the local projects assistance fund, $4.4 million has been included to continue that program as a part of the $130 million set aside in the bond act for State financial assistance to local projects.

It will be noted that no expansion has been provided for in the water planning budget. Though long-range planning will continue, there will be shifts in the future to the more immediate needs of the construction and local projects programs.

Payments for flood control and watershed protection are included in the local assistance budget. For this purpose $17.9 million is provided, primarily for acquisition of rights of way for federally financed construction. Included in this amount is the continuation of the State constructed flood control project on the San Joaquin River, in lieu of financing acquisition of rights of way for federal construction.

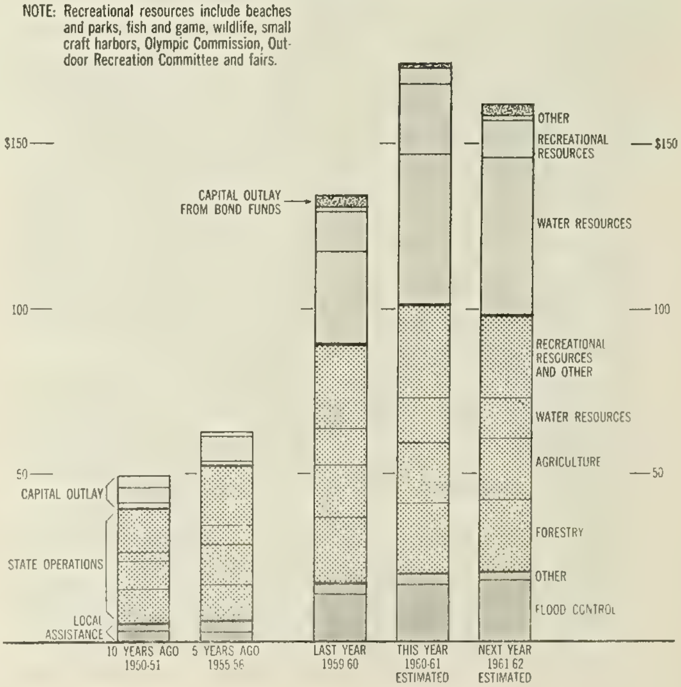
Beaches and Parks

Demand for recreational facilities throughout California has been growing for the past several years. Attendance at the beach and park areas operated by the State has increased and the resulting pressure

CHART 13

COMPARATIVE EXPENDITURES FOR THE CONSERVATION AND DEVELOPMENT OF NATURAL RESOURCES

(In millions)



NOTE: Recreational resources include beaches and parks, fish and game, wildlife, small craft harbors, Olympic Commission, Outdoor Recreation Committee and fairs.

has compounded the operating problems confronting the Division of Beaches and Parks as new areas are acquired and developed.

The financing of these recreational areas has been, in the past, accomplished from oil royalties and park fees. Growth of the park system has exceeded this source of funds, and it will become necessary during the 1961-62 fiscal year to transfer beach and park operations to the General Fund. Park fees are budgeted to offset the expenditures for services to park users in the amount of $3 million, and total expenditures for this program must include this offset to be comparable with prior year expenditures. With this adjustment added, expenditures for Beaches and Parks will require $17.3 million during the budget year for both operation and development of the park system. Operation of Squaw Valley, site of the 1960 Winter Olympics, was transferred to the Division of Beaches and Parks, and most of the facilities have been leased to a concessionaire for operation as both a summer and a winter recreation area.

A completely revitalized five-year program of new acquisition and development has been prepared by the Division of Beaches and Parks in the amount of $150 million. Acquisitions budgeted for 1961-62 are primarily for the solution of existing development problems or for providing additional areas for needed public facilities where loss of natural terrain is imminent. The major development program is directed toward increased public use facilities at already acquired properties. New developments requiring staffing are McGrath Beach (Ventura County), Ocean Beach (San Diego County), Thornton Beach (San Mateo County), and Woodson Bridge (Tehama County).

Other Natural Resources

The Division of Forestry is basically a wildland fire protection agency with responsibility for protection of over 39,000,000 acres of State and private lands having statewide interest with regard to timber production, range lands, recreational uses, and watershed values. In the 1961-62 fiscal year, provision is made for an improvement in working conditions for fire suppression personnel. The result of the adjustment is to reduce the workweek during the fire season from 120 to 104 hours by increasing fire crew strength.

Two new 80-man conservation camps are scheduled to be activated in the budget year. These are Deadwood Camp (Siskiyou County) and Men's Colony Camp (San Luis Obispo). Addition of these camps will bring population to 2,020 Department of Corrections inmates and 345 Youth Authority wards occupying 28 permanent camps, 3 mobile camps and 3 spike camps, in the forestry camp program.

The Small Craft Harbors Commission has estimated allocation of loans in excess of $11.0 million for development of small craft harbors throughout the State. In addition, the initial increment of a harbor of refuge is proposed at Shelter Cove in Humboldt County.

In the Department of Fish and Game a change of emphasis in the game management program is proposed. The purchase of 9,000 pheasants from private producers will permit elimination of high cost production facilities. This will pave the way for consolidation of pheasant production facilities, and provide birds for release in areas where conditions do not provide natural production.

The budget of the Department of Agriculture includes additional personnel for the development of ways and means of combating pear decline in this State. In cooperation with the University of California, every effort is being made by the Department to control this blight which destroyed 10,000 trees in 1960 and threatens to extend its damage many times over in the next few years. Additional personnel also are provided for the Bureau of Weights and Measures in order to enforce regulations relating to quantity control in packaging.

Fiscal Affairs and General Administration—$41,071,000

Combined in this category are the fiscal and housekeeping activities of State government, including overall direction by the Governor, business management, personnel management, tax collection, auditing, central purchasing, building management, and many other operations essential to governmental efficiency.

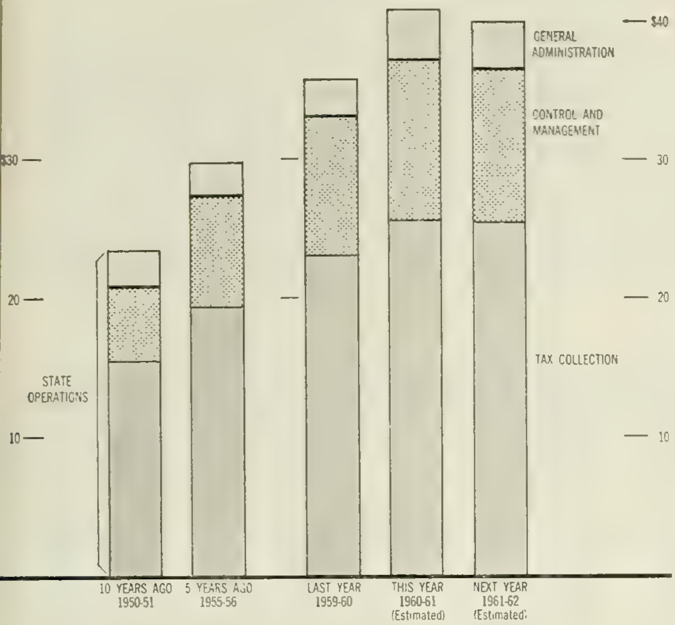
Nearly two-thirds of this category, or $26 million, will be used for tax collection and tax law enforcement. The remaining one-third, relating to fiscal and general administration, includes the control and management activities of the Department of Finance and the State Controller's Office; the services performed by the State Personnel Board, the Treasurer's Office and the Secretary of State; and the executive management provided by the Governor and his staff.

The following table shows the amounts for each of these activities. Not included in the table are three capital outlay items to be financed by loans from trust funds. A $2,710,000 augmentation of the authorization for an office building in Sacramento is necessary

CHART 14

COMPARATIVE EXPENDITURES FOR GENERAL ADMINISTRATION AND FISCAL AFFAIRS

(In millions)



to expand the floor space of this building to accommodate the growth of activities in the central government complex.

Another authorization of $10,100,000 is proposed for construction of additions to the existing Public Health building in Berkeley to correct office and laboratory space deficiencies as well as provide for future expansion. The third item will authorize the Board of Administration of the State Employees' Retirement System to acquire land for a parking lot at a cost of $1,500,000.

The reduction in the State Controller's budget reflects the installation of an electronic data processing system for disbursing and accounting. The major installation costs of the system were incurred in the 1959-60 and 1960-61 fiscal years. It is anticipated that during the first five years of operation, the State will recover its initial outlay and save an additional $450,000. Savings in each subsequent year should be $350,000. The $199,000 reduction in General Administration is primarily attributable to the fact that printing of election material will not be required in the budget year.

Provision has been made to expand the audit program of the Board of Equalization, particularly in sales tax administration. This will add approximately $346,000 to the operating expense of this agency during the coming year. The Franchise Tax Board is now converting its personal income tax accounts receivable ledgers to mechanized accounting on data processing machines. It is estimated that this new procedure will reduce expenditures by $52,000 per year after the conversion.

Table 20

EXPENDITURES FOR FISCAL AFFAIRS AND GENERAL ADMINISTRATION

(In thousands)

	1959-60 Actual	1960-61 Estimated	1961-62 Proposed	Change from 1960-61 Amount	Change from 1960-61 Pct.

Office buildings, etc.	$1,155	$1,552	$233	—$1,319	—85.0
Bond act program	(1,364)	(94)	(115)	--	(21)
Grand Totals	$36,984	$42,203	$41,071	—$1,132	—2.7

Other Expenditures—$216,270,000

Activities of the State which are not conveniently classified into any of the foregoing six broad functional groups are included in this category of costs. Covered here are such miscellaneous functions as legislative, judicial, and regulatory activities, with the major portion comprising the distribution of vehicle license fees and liquor permit receipts to city and county governments. Of the $216.3 million total, $137.4 million represents the return of these State-collected revenues.

Another significant cost of State government is represented by the steady increase in bond interest and redemption costs arising from the use of borrowed money to finance a portion of the State's building construction program. These costs result from the sale of $250 million of bonds for the expansion of State

institutions and centers of higher education to meet the growth needs of the State. As indicated earlier, this budget also contemplates using $100 million more from this source to finance construction needs during this period of revenue decline.

The Public Utilities Commission is continuing to pursue the policy of intervention in Federal Power Commission out-of-state gas rate proceedings. Since about 75 percent of California's gas is produced out-of-state and the Public Utilities Commission has no control over these producers, it is essential to maintain vigilance and intervene when necessary in order to protect California's gas consumers from excessive rates. A savings of over $3 million to California consumers was accomplished by the Commission during the current year by such interventions.

The Division of Corporations has successfully completed the first phase of an accelerated corporate securities examination program by reducing the average time for approval of securities issued from 7 to 3½ days. Additional staffing is needed in order to maintain this position in the budget year, as well as to intensify the fraud investigative program.

It should be noted that one of the largest increases in this miscellaneous category—the $1,892,000 increase shown for "other" expense of State operations is merely the usual provisions for unforeseen emergencies. The counterpart of this emergency fund in the current year's budget has been utilized in the course of State operations and is reported as expenditures in the various functions for which allocations were made. The two figures, therefore, are not comparable.

Less: Amounts in Sinking Funds November 30, 1960, available for payment of principal	------	------	------	------	------	3,676,971	------
NET BONDED DEBT	------	------	------	------	------	$2,036,089,029	

---

[1] There is $905,069.79 in the Sacramento State Building Interest and Sinking Fund in excess of $3,000,000 necessary to redeem all of the outstanding bonds.

[2] Funds were transferred from the General Fund to the Bond Sinking Fund of 1943 to pay the interest and principal on these issues to final maturity; however, $5,000,000 was loaned to the Highway Fund for the Golden Gate Bridge and Highway District. This loan will not be repaid until after final maturity of the district bonds.

[3] Money is transferred from the Motor Vehicle License Fee Fund to the General Fund in the amount necessary to pay the interest and redemption costs.

[4] Repayments from school districts are available to pay part of the interest and redemption costs.

[5] Chapter 104, Statutes of 1958, First Extraordinary Session, authorizes bonds to be issued and sold amounting to $20,000,000. There is no intention to sell these bonds.

[6] The servicing of these bonds is primarily the responsibility of the San Francisco Harbor Improvement Fund; the Veterans Farm and Home Building Fund of 1943; and the California Water Resources Development Bond Fund after the first sale of bonds estimated to occur in 1963. It may be necessary for the General Fund to advance funds to meet debt service obligations for the California Water Resources Development Bond Fund during the early phase of the program as authorized in Section 12937 of Chapter 1762, Statutes of 1959, Regular Session.

[7] The first sale of bonds is estimated to occur in 1963. Annual appropriations from the General Fund are authorized to pay the interest and principal on the bonds issued and sold. Revenue derived from the State Water Resources Development System shall be used in the following order of priority:

(a) To pay the reasonable costs of maintenance and operation.

(b) To pay annually the interest and principal on the bonds issued to the extent that revenues are available for transfer to the General Fund, or as soon thereafter with simple interest from available revenue.

(c) For transfer to the California Water Fund as reimbursement for funds utilized from this fund for construction of the State Water Resources Development System.

(d) For the acquisition and construction of the State Water Resources Development System from surplus revenues.

[8] Callable on and after January 2, 1951, in the amount available in the Sinking Fund.

[9] Callable on and after January 2, 1955, in the amount available in the Sinking Fund.

[10] $500,000 callable on and after March 1, 1971.

[11] Callable on and after January 2, 1941, in the amount available in the Sinking Fund.

[12] Chapter 103, Statutes of 1958, First Extraordinary Session, authorizes issuance of bonds totaling $50,000,000 for the San Francisco Harbor and $10,000,000 for development of small craft harbors.

LEGISLATIVE COUNSEL BUREAU

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$508,905	$639,245	$585,900	—$53,345 (—8.3%)
Personnel man-years	57.9	72	59.6	—12.4

GENERAL ANALYSIS

Objectives

The Legislative Counsel Bureau provides legal assistance to the Legislature and state officials in drafting legislative measures, gives legal advice, acts as counsel for committees of the Legislature, and represents the Legislature and legislators in litigation. It maintains indexes, tables and digests of all legislative measures, and edits, compiles and indexes state legal publications for the State Printer.

Program and Performance

Legal services furnished include opinions, bill drafting, counseling and attendance as counsel at meetings of committees of the Legislature. The attorney-client relationship is maintained, and all work is confidential.

In addition, the office maintains an Indexing Section, which indexes all bills introduced, maintains a statutory record, and acts as editor and compiler of all state-published codes and the official publication of the statutes. The work of this section during sessions is published as Interim Subject List, Tables of Sections Affected and Final Subject List.

The overall decrease in expenditures reflects the change from the 120-day General Session to the 30-day Budget Session.

LAW REVISION COMMISSION

Office at Stanford University

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
SUMMARY			
TOTAL EXPENDITURES			
Support *(General Fund)*	$90,911	$95,387	$95,387
Personnel man-years	5.1	5.7	5.7

GENERAL ANALYSIS

Objectives

The commission consists of a Member of the Senate appointed by the Committee on Rules, a Member of the Assembly appointed by the Speaker, and 7 additional members appointed by the Governor with the advice and consent of the Senate. The Legislative Counsel shall be an ex officio nonvoting member of the commission.

This commission examines the law to discover defects and recommends needed changes, receives proposed changes in law recommended by other bodies, recommends changes in the law necessary to modify or eliminate obsolete or unconstitutional provisions and reports proposed studies to the Legislature.

Program and Performance

The workload of this commission is determined primarily by the number of studies assigned to it by the Legislature. Because studies are scheduled for completion just prior to the general session of the Legislature, workload statistics presented below are discussed in terms of fiscal periods of 2 years:

	Actual 1957-59	Estimated 1959-61	Estimated 1961-63
Studies	12	12	12

The study of the Uniform Rules of Evidence and the study of Condemnation Law and Procedures are included among the studies scheduled for completion in 1961-1963.

COMMISSION ON UNIFORM STATE LAWS

Office at San Francisco

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
SUMMARY			
TOTAL EXPENDITURES			
Support *(General Fund)*	$4,880	$5,850	$5,850

GENERAL ANALYSIS

Objectives

In conjunction with other states the commission drafts and presents to the Legislature uniform laws deemed desirable and practicable by the National Conference of Commissioners on Uniform State Laws. The commission is composed of 4 members appointed by the Governor, the Legislative Counsel as a member ex officio, and 2 legislators.

Program and Performance

Provision is made for attendance of the commissioners at meetings of the national conference and California's contribution to the conference.

CONTRIBUTION TO LEGISLATORS' RETIREMENT FUND

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY				
TOTAL EXPENDITURES				
Budget Act appropriation *(General Fund)*	$152,000	$120,000	$140,000	$20,000 (16.7%)

GENERAL ANALYSIS

The State contributes an amount as estimated by the Board of Administration, State Employees' Retirement System, equal to so much of the benefits to be paid from the fund during the year as is not provided by the accumulated contributions of the members receiving such benefits. Re-estimates for the current year indicate that a surplus in the 1959-60 appropriation will not be completely used during 1960-61 and can be used as a partial offsetting adjustment for 1961-62 state contributions.

SUPREME COURT

Office in San Francisco

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY

Personnel man-years	61.6	63.2	63.1	—0.1

GENERAL ANALYSIS

The Supreme Court reviews cases including appeals in cases of equity, cases at law involving title or possession of real estate, taxation and probate matters, and death penalty cases. It also has jurisdiction to review all cases decided by the several district courts of appeal. In addition, it has original jurisdiction to issue writs of habeas corpus, mandamus, prohibition and certiorari. The court admits to the bar. It must also consider all executive clemency applications submitted to the Governor where the applicant has suffered 2 or more felony convictions.

This budget includes provision for continuation of 1 legal secretary position established on a temporary basis for 1960-61 to overcome congestion in the typing and circulating of opinions and memoranda upon which there are time limitations for the court's action.

JUDICIAL COUNCIL

Office at San Francisco

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$203,668	$238,237	$244,859	$6,622
Extra compensation and expenses of assigned judges *(General Fund)*	52,000	62,000	62,000	–
Totals	$255,668	$300,237	$306,859	$6,622 (2.2%)
Personnel man-years	17.9	18.7	19	0.3

GENERAL ANALYSIS

Objectives

The Judicial Council surveys the conditions of business in the courts with the view of simplifying and improving the administration of justice. Suggestions are submitted to the courts for expediting business and helping to secure uniformity. The chairman may assign any judge to another court of like or higher jurisdiction to relieve congestion and equalize the workload of the judges.

The Judicial Council consists of 18 members: The Chief Justice of the Supreme Court, 1 associate justice of the Supreme Court, 3 justices of district courts of appeal, 4 judges of superior courts, 2 judges of municipal courts, 1 judge of a justice court, 4 members of the State Bar, and 1 member of each house of the Legislature in accordance with Section 1a of Article VI of the Constitution as amended by Senate Constitutional Amendment No. 14 approved at the General Election, November 8, 1960.

Program and Performance

In order to meet the continuing increase in the workload of the Supreme and appellate courts the chairman assigns pro tem justices to each court. The difference between the salary of justices of the courts to which such pro tem justices are assigned and the salary of the court to which they had been appointed, plus expenses for travel and subsistence are paid by the State. These costs are included in a separate Budget Act item administered by the Judicial Council.

The council also collects and compiles statistics on all courts and makes many special studies looking to the improvement of the administration of justice, some of which are required by the Legislature and others voluntarily undertaken.

GENERAL ANALYSIS

The court has jurisdiction over appeals from superior courts in Los Angeles, San Luis Obispo, Santa Barbara, and Ventura Counties. It has original jurisdiction to issue writs of habeas corpus, mandamus, prohibition and certiorari. It also handles appeals and original proceedings transferred from the Supreme Court. The court consists of 3 divisions of 3 justices each.

This budget provides for continuation of a legal research associate established during the current year to handle increased workload in original proceedings.

GENERAL ANALYSIS

Article V of the Constitution vests the supreme executive power in a chief magistrate, who shall be called the Governor of the State of California.

The principal office is maintained at Sacramento and office facilities are available at Los Angeles and San Francisco.

The Office of Atomic Energy Coordinator was established as a part of the Governor's Office during 1959-60, and appears as a separate budgetary unit during 1960-61 and 1961-62.

Personnel man-years	–[a]	2	3	1

GENERAL ANALYSIS

Objectives

This office is charged with broad responsibilities with respect to atomic energy development and radiation protection. In that field, the coordinator is required to: advise the Governor and the Legislature; co-ordinate the activities of all state agencies and the cities and counties with each other, with other states, and with the Federal Government; act as liaison to other states and the Federal Government, including the Atomic Energy Commission; and disseminate information to the public and to state agencies.

Two advisory groups were prescribed by statute: an Advisory Council of 9 members appointed by the Governor, representing 9 areas of public interest in atomic energy matters, and a departmental co-ordinating committee of 16 members, who are the heads of those state agencies principally involved in atomic energy affairs.

Program and Performance

Major efforts during the first year of operation have been in connection with the program administered by the Department of Public Health for the registration of radiation sources within the State; analysis of, and preparation for, a proposed transfer of a large segment of regulatory authority from the Federal Atomic Energy Commission to the State; problems of radioactive waste disposal; the siting of nuclear power plants; and the level of radioactivity in the environment as a result of nuclear weapons tests and industrial and other uses of radioactive materials.

A new position is proposed to assist in the dissemination of information concerning atomic energy matters as required by Section 25736 of the Health and Safety Code.

GENERAL ANALYSIS

Objectives

This activity of the Governor's office, created by Chapter 467, Statutes of 1959, is responsible for advising the Governor on all matters affecting the interests of the people as consumers, and as to methods to increase the competence of the people as purchasers. The Consumer Counsel shall recommend to the Governor and to the Legislature the enactment of such legislation as is deemed necessary to protect and promote the interests of the people as consumers.

Program and Performance

The counsel makes such investigation and studies as are necessary to accomplish these functions, and render reports to the people of the State thereon. A 15-member advisory committee has been appointed by the Governor to assist the Consumer Counsel.

One Associate Counsel position is proposed to handle legal aspects of consumer problems and make recommendation for the protection of the public. This position would also perform the necessary liaison with the Attorney General. A stenographic position is proposed to do the related secretarial duties and assist with other clerical work of the office.

GENERAL ANALYSIS

Objectives

This agency has the responsibility for planning and co-ordinating a statewide program for emergency relief operations in the event of natural or war-caused disaster, and for providing leadership and assistance to other state agencies and local governments in the development of an effective state of operational readiness, as provided in Chapter 1, Division 7, of the Military and Veterans Code. The objectives of this program are:

(1) A fully prepared State Government, with those departments and agencies having emergency responsibilities prepared to carry out their assigned emergency jobs under disaster conditions;
(2) Fully prepared county and city governments;
(3) A co-ordinated and integrated federal-state-local emergency preparedness program;
(4) A well-informed and adequately prepared public.

The California State Disaster Council, appointed pursuant to the California Disaster Act, Section 1510 of Military and Veterans Code, is composed of the Governor, Lieutenant Governor, Attorney General, President pro tempore of the Senate, Speaker of the Assembly, and representatives of city government, county government, the American Red Cross, city or county fire services, and city or county law enforcement services.

In addition to its general responsibility of acting "as an advisory body to the Governor in times of war or disaster and with reference thereto in order to minimize the effects of such occurrences by recommending ameliorative action," the Disaster Council is also charged with responsibility for certain specific duties: (1) to accredit city and county disaster councils; (2) to approve boundaries of mutual aid regions and inter-regional and regional mutual aid plans; (3) to recommend for approval a State Disaster Plan, certain rules, regulations and orders, assignment of disaster responsibilities to state departments, creation of advisory committees, and expenditures of monies appropriated for the objects or purposes of disaster preparedness and relief; (4) to encourage development of effective local mutual aid plans; (5) and to evaluate and report to the Governor on state communications systems with particular regard to their adequacy in case of disaster.

Program and Performance

This office has been organized with a central administrative staff and a group of specialists who are responsible for the pre-emergency planning, training, and organization for disaster operations; providing technical guidance and assistance to other state agencies and local governments in their efforts to prepare themselves for emergency operations; and specific services that would be required during an emergency.

A field organization has been established, which includes six regions staffed by coordinators whose assignments are to implement the program on a comprehensive basis.

Under the provisions of the California Disaster Act and Executive Order No. 60-CD-1, this office is responsible for:

(1) the development and maintenance of the master emergency plans and programs of the State;
(2) the assignment of appropriate emergency roles to the other agencies of California State Government and to the local governments in California;
(3) providing direct assistance to state agencies, and to the local governments of California in programing and planning, organizing, equipping, and training the necessary emergency organizations;
(4) effecting the necessary co-ordination between federal, state and local emergency plans;
(5) representing all agencies of state government and the local governments of California in obtaining available federal funds and equipment to implement approved emergency plans and programs;
(6) co-ordination of planning activities pertaining to the post-attack resources management and economic stabilization functions which might have to be performed by state agencies, due to disruption of normal procedures on a national basis.

In addition to performing on a day-to-day basis the functions described in (1) through (6) above, this office must be in constant readiness to perform its own emergency role. During an emergency, the office functions as the immediate staff and co-ordinating organization of the chief executive in carrying out the State's responsibilities under the California Disaster Act and applicable federal statutes.

A large quantity of emergency equipment has been procured and stored throughout the State in the care of state and local agencies, all of which has to be inspected and maintained to insure its immediate availability for use in the event of a major disaster.

During the past year, a major increase in workload has resulted from increased demands by individuals and local governments for assistance in building or acquiring facilities for fallout protection.

There has been a considerable increase in the distribution of radiological instruments throughout the State and an increased participation in this program by many state agencies. This office is responsible for insuring that all of such equipment is adequately maintained and that qualified operators are available for using this equipment under emergency conditions. The agency has entered into contracts with 3 other state agencies to perform certain laboratory analyses relating to samples provided by these agencies and to report on data obtained as a result of such analyses.

The equipment purchases requested relate primarily to modification of existing communications equipment as a result of recently promulgated Federal Communications Commission regulations and to the improvement of certain units of the state-owned microwave system.

A 0.5 clerical position is provided to handle increased workload in the headquarters office. This service was temporarily authorized during 1960-61.

GENERAL ANALYSIS

The Lieutenant Governor is elected to hold office for the same term as the Governor. In the absence of the Governor from the State, the Lieutenant Governor must assume the duties of the chief executive. He presides over the State Senate during its sessions. He is a Regent of the University of California, member of the State Toll Bridge Authority, State Lands Commission, and Commission on Interstate Co-operation.

Offices are maintained in both Sacramento and Los Angeles for the convenience of the public.

One research technician position is proposed to assist in analysis and research of proposed legislation and to do research for the Lieutenant Governor for the boards and commissions on which he serves and 1 clerical position is proposed to keep abreast of increased workload. These positions were established administratively during 1960-61, and are proposed as new positions for 1961-62.

GENERAL ANALYSIS

Objectives

The primary purpose of the State Employees' Retirement System is to provide for the orderly retirement of employees who reach an age, or condition of disability, such that they cannot normally be expected to discharge their responsibilities with the desired proficiency, and to provide further that the retirement compensation offered be sufficient to attract and retain personnel of the required caliber. The policy-fixing body for the retirement system is its 8-member Board of Administration, consisting of the Director of Finance, a member of the State Personnel Board, 3 members elected from the members of the system, a life insurance company official, a bank officer, and a representative of the University of California. One of the board's most important functions is to invest money contributed by participants in the retirement system. The board also administers the Legislators' Retirement System.

Program and Performance

Members of the State Employees' Retirement System consist of state employees (including most University of California employees) and employees of approximately 400 local governmental jurisdictions, participating on a contractual basis. During the 1959-60 fiscal year, 23 additional governmental jurisdictions came under contract with the system for retirement benefits. The total number now contracting remains basically the same as in the prior fiscal year due to the fact that a large number of independent contracting units through local reorganization have consolidated into one organizational unit. Members of the Legislators' Retirement System consist of legislators and elective state officials who elect membership.

During the 1959-60 fiscal year, the number of members of the State Employees' Retirement System also covered by Social Security benefits exceeded 38,000. The 1959 survivor benefits available within the framework of the State Employees' Retirement System now covers in excess of 52,000 members.

During the 1960-61 fiscal year, financing was developed to provide for the costs incurred by the transfer of the investment function of the Department of Finance from that department to the State Employees' Retirement System effective October 1, 1960. Three permanent positions were added to the staff to cope with the increased workload in the administrative, legal and death benefit areas. Temporary help funds also had to be made available for the staff engaged in a feasibility study and management programing for a possible conversion to tape operations effective July 1, 1962; the accumulation of data from the records of retired state employees for submission to the Federal Government concerning a possible tax refund based on service rendered to the State prior to 1939; the continuation and completion of the necessary computations and adjustments of contributions on deposit with the retirement system in connection with payments to the Federal Government for the retroactive Social Security contributions from 1956 through 1959; and for conducting an election of a Board of Administration member resulting from the resignation of the member representing the public agency employees.

Increases were needed in operating expenses to provide for the board member election and the added space required by the transfer of the investment function and added staff.

The 1961-62 budget includes 22 proposed new positions. Of this total, 3 positions are those which were added during the 1960-61 year, and 11 positions are those associated with the programing and study of the conversion to the tape operations. The remaining 8 proposed new positions are requested to meet increased workload resulting from an increase of 15,000 new members and the expansion of Social Security and survivor benefit coverages to a greater number of present members. Primary causes of the increases in operating expenses are the investigation of experience and actuarial valuation as of June 30, 1961; conduct of a regularly scheduled election of a member to the Board of Administration, representing the entire membership of the system; the printing of informational booklets for members of the system reflecting changes to the system enacted during the 1961 Session of the Legislature; and finally, tabulating machine operations which will require an increase in supplies due to the expansion of membership and the expansion of the various types of coverage within the membership.

OLD AGE, SURVIVORS' AND DISABILITY INSURANCE

Objectives

To act for the State in administering the Old Age, Survivors' and Disability Insurance program for public employees within the State under such coverage.

Program and Performance

This program is conducted under the Federal Social Security Act and in accord with provisions of state law and a federal-state agreement. Financing of the program is derived from assessment of the political subdivisions participating in the program.

Presently there are 2,797 political subdivisions participating with approximately 114,000 employees covered. It is anticipated in the 1961-62 fiscal year that the number of participating political subdivisions will reach 3,000.

One clerical position is proposed to provide staffing for the workload increase resulting from normal expansion and added agencies. An auditor position is provided as a result of the increase in special audits that will be required beginning in 1961-62, on a continuing basis, because of the large expansion in 1959-60 of the agencies under coverage.

---

[a] Includes 3 positions temporarily established during 1960-61 fiscal year to meet increased workload and 3 positions transferred from the Department of Finance for investment services.

GENERAL ANALYSIS

Objectives

The commission consisting of 7 Senators, 7 Assemblymen, and 5 officers of the State appointed by the Governor, formulates proposals for co-operation with other states and the Federal Government and participates in the regional and national councils of state governments.

Program and Performance

The principal item of expenditure by the commission is California's proportionate share of the cost of operation of the National Council of State Governments.

The council is a research and service agency which assists the various interstate associations of state officials consisting of representatives from the several states.

GENERAL ANALYSIS

Objectives

Under the State Civil Service Act, the Personnel Board is responsible for serving the personnel needs of state agencies as well as providing leadership for these agencies in improvement of personnel practices and procedures and in personnel management. The board which consists of 5 members appointed by the Governor for 10-year terms, prescribes, amends, and repeals rules as necessary to administer the State Civil Service Act, and sets the general policies for the Personnel Board. Technical personnel services are provided for political subdivisions on request.

Program and Performance

Under the general policies of the Personnel Board, the executive officer directs the various divisions in recruiting, examining, certifying, adopting suitable pay rates, co-operating in training, and establishing standards of health and safety. The functions of the divisions have become more complex during the past few years due in part to the continued growth in number of state employees and the condition of the labor market. More examinations are being given and more applicants are applying for the tests.

More emphasis is being put on research to develop methods to improve and save on time and staff. New procedures have been and are being introduced due to this work. Training courses are being conducted for personnel of various state departments to develop more efficiency and promote better training programs.

During the current year, an electronic data processing system is being installed to accommodate the present roster and certification systems. The resulting abolishment of 21.7 positions is being accomplished by attrition. The added costs of conversion to the new system will be absorbed during the current year.

BOARD

Objectives

The board adopts general policies and rules, establishes job classes and pay ranges, and hears and decides appeals from disciplinary and other actions.

The board consists of 5 members appointed by the Governor to carry out the administration's policy and provide effective, economical administration of laws affecting this department.

Program and Performance

The board meets once every 2 weeks for 2 days. The meetings are scheduled at Sacramento, San Francisco or Los Angeles.

The hearing officer presides at hearings on appeals concerning civil service status. The number of these hearings has become too numerous for the Personnel Board and its hearing officer, and assistance from the Division of Administrative Procedure is required.

ADMINISTRATION

Objectives

Within the general policies, this division plans, directs, coordinates, and controls the work of the agency.

Program and Performance

The executive officer directs the line functions of the board through the assistant executive officer who directly supervises the chiefs of the Personnel Services Division, Recruitment and Field Services Division, Examining Standards Division, and Office Services Division. The chiefs of the staff divisions, and Co-operative Personnel Services report directly to the executive officer.

PERSONNEL SERVICES DIVISION

Objectives

This division maintains and revises the classification and pay plans for civil service employees and for certain state college employees. The division is charged with the responsibility for the preparation of examinations utilized in the state selection program for civil service employees.

Program and Performance

Operations Section, consisting of 5 units, performs the day-to-day classification and examining work of the Personnel Board. These units also analyze and prepare recommendations concerning salary ranges for civil service and state college classes and establish new or revised civil service classes and nonacademic state college classes. On July 1, 1961, the Trustees of the State College System will assume responsibility for salary determination of state college academic classes.

Examining Services Section is responsible for scheduling activities such as the written examinations, oral interviews, and the conducting of investigations of applicants for state employment.

The activities of this division are influenced by such factors as growth in the number of state employees; changes in the scope and variety of state programs and functions; labor market conditions; the activity of employee and other organized groups; and changes or additions to laws and rules affecting the State Civil Service System.

As state service enlarges, various steps have been and are being taken to streamline and update technical processes to best conserve technical staff time. In recent years, clerical assistance has been added to relieve technicians of certain detail work; changes in procedures have been implemented; continuing effort is being placed in reviewing operating procedures to develop the most effective methods of fulfilling the legal responsibilities vested in the board.

RECRUITMENT AND FIELD SERVICES DIVISION

Objectives

The primary functions of the division are to attract qualified applicants to compete for positions in the state service, to provide information concerning state employment, to administer continuous testing programs, and to provide assistance in personnel matters to state agencies. Branch offices are maintained in San Francisco and Los Angeles to provide assistance to state departments and the public.

Program and Performance

The public information counters at Sacramento, Los Angeles, and San Francisco give information concerning the state civil service to state employees and the public. The number of contacts at these information counters is increasing with the population growth and the increased economic activity in the State. The division also supervises the proctoring of state examinations in the metropolitan centers and administers continuous clerical testing. As a result of several studies, a number of other examining programs are being decentralized to the field offices.

The division has programs designed to provide direct and continuing contact with employment sources such as colleges, labor unions, placement services, technical and professional associations, and other organizations to create favorable long-term interest in state employment as a career in schools and colleges and to advertise and personally recruit at sources of labor supply. Its function of attracting well-qualified applicants to the state service is made difficult by manpower shortages in many occupations and by the organized competition faced by the State for available personnel. The workload has increased with the rise in the number of authorized positions in the state departments. The division is attempting to measure the effectiveness of various recruitment media and techniques. It is planned to offset, in part, workload increases and improve recruiting by effecting closer co-operation with operating departments and their field offices throughout the State and through extension of the practice of recruitment through employees.

STANDARDS AND SURVEYS DIVISION

Objectives

This division develops classification and pay policy, standards, and techniques. It conducts general wage, salary, and employee benefits surveys on the basis of which state salaries are kept in reasonable relation to those paid in other governmental jurisdictions and private employment. It conducts agency classification and personnel management surveys. It develops physical standards for jobs, directs the program of pre-employment physical examinations, and advises agencies on medical phases of personnel programs.

Program and Performance

In conjunction with the agency classification survey program, emphasis is being placed on the development and improvement of classification standards and encouraging the participation of line supervisors in the classification process. In an effort to meet the future needs of state service, the division is engaged in long range studies of various plans to cope with the problems inherent in the increasing size and complexity of State Government.

EXAMINING STANDARDS DIVISION

Objectives

The function of this division is to insure the adequacy of the State's personnel selection program. One of its units develops policies and standards and prepares operating manuals for the guidance of the staff, evaluates the effectiveness of the selection program, develops and co-ordinates improved methods of selection such as continuous testing, trains the staff in examining techniques, and produces form or standardized tests for long-term use. Another unit maintains files of test materials and assists the technical staff by preparing both new and old material for use.

Program and Performance

Emphasis has been given to the development of methods that attract better employees to state service, that will result in filling vacancies more quickly, or will effect economies in operating procedures. A common type of assignment is the correction of a situation in which the operating agencies are not satisfied with the quality or numbers of persons available for appointment in a class. The solution to the problem may include changes in the classification structure as well as improvement of the recruiting and testing methods, and sometimes delegation of the testing program to the agencies.

A major function is the construction of standardized written tests. High quality tests of known difficulty are a necessity in continuous testing programs. Their increased validity has favorably affected the quality of employees hired. Their repeated use over a period of several years makes their cost comparable to custom made tests and frequently effects savings in cost.

OFFICE SERVICES DIVISION

Objectives

This division performs clerical work; processes applications; arranges, administers, scores, and processes examinations and establishes eligible lists; maintains statistical data and the employee roster; and conducts certification activities.

Program and Performance

Processing and operating procedures in this central service unit are constantly being reviewed for simplification and improvement. Increased use of mechanical aids such as punched cards, mechanized files, photographic reproduction, offset duplication, and microfilming has speeded production and increased capacity.

An electronic data processing system being installed during 1960-61 will result in the abolishment of 21.7 clerical positions in the Roster, Certification and Data Processing sections in January 1961. The reduction in salaries and wages is more than enough to offset the increased costs in equipment rental with estimated net savings of approximately $20,000 a year after the conversion period.

---

[a] Three junior-intermediate clerk positions were identified in the 1960-61 Budget to be abolished due to increased efficiency available through the purchase of equipment. However, since the equipment is not yet on the market these positions could not be abolished and are continued in this budget.

TRAINING DIVISION

Objectives

The Training Division works with state agencies in the conduct of employee training and staff development programs for the purpose of improving the quality of service rendered by persons in the state civil service.

Program and Performance

The division is instrumental in encouraging and developing continuous training activities in state agencies, resulting in increased organizational efficiency and improvement of morale, communications, and productivity. Emphasis has been placed upon the attainment of greater management effectiveness through direct training and consultative assistance to agency line officials and their staffs. The division encourages and assists agencies to develop training aimed at improved work methods, increased professional and technical skills, and knowledge which make possible more economical and efficient operation of departmental programs. The division also sponsors and coordinates the State's interagency management development program aimed at improved administrative performance in present positions and future assignments.

The State Safety Coordinator stimulates interest among state agencies and encourages training efforts designed to increase employee safety and reduce industrial accidents. The division provides leadership and technical assistance for a broad driver safety program to reduce vehicle accidents and resultant costs.

CO-OPERATIVE PERSONNEL SERVICES

Objectives

This division provides personnel services to local agencies on their request and on a contract basis by which all costs are reimbursed.

Program and Performance

An increasing trend in local government to employ staff through merit selection methods has led to this program serving more than 140 agencies and giving almost 1,150 examinations for such agencies during 1959-60. These agencies find this service more effective and economical than providing their own testing service. Methods are being reviewed constantly to lower these costs without sacrifice of quality.

An increasing number of local agencies have turned to the State for experienced help in installing and maintaining modern job classification and standardization plans. During 1959-60, 33 agencies including over 6,000 jobs were studied by this division.

GENERAL ANALYSIS

Objectives

Examines and files articles of incorporation, amendments thereto, elections to dissolve and final dissolutions; statements of trust receipt financing; certificates of recordation relating to mortgaged personal property; registers trademarks; exercises general supervision of elections; maintains the archives of the State and the Central Record Depository; attests the official acts of the Governor and Legislature.

Program and Performance

Before a corporation can operate in California, its articles must first be reviewed, and if approved, filed with the Secretary of State. Likewise, all amendments to corporate articles, as well as dissolutions, agreements of merger and consolidations must be filed with this office. In the 1959-60 fiscal year there were 39,743 corporate documents reviewed. This represents an increase of 280 or 0.7% over those reviewed in the 1958-59 fiscal year. Of this total 30,755 were filed of which 20,296 represented articles for new corporations in California. The marked workload increases which followed the 1957-58 recession have now leveled off. In line with the continuous population and industrial growth of California, current and budget year workload estimates reflect slight but steady increases.

The Secretary of State will collect cash receipts of approximately $3,793,445 in 1961-62. This includes franchise tax prepayments of about $2,068,000.

A new responsibility relating to statewide elections was added to the Secretary of State's office by Chapter 2094, Statutes of 1959. Following each statewide election, the Secretary of State must imemdiately conduct a semiofficial canvass of the vote cast at said election and shall immediately make public the results of his compilation. The cost of conducting such a canvass approximates $3,500.

The publishing and distribution of election pamphlets normally occurs in alternating fiscal years. However, in the past year there were three measures which appeared on the June 1960 primary election ballot thereby necessitating the printing of an election pamphlet at a cost of $36,092. In the current year election pamphlets for the November 1960 general election were provided at a cost of $250,000. As a result of this pattern, there is a large fluctuation in the budget for this office from year to year. There is no election pamphlet expense anticipated for the budget year.

CENTRAL RECORD DEPOSITORY

Objectives

This unit has custody of all records required or permitted by law to be deposited in the office of the Secretary of State.

Program and Performance

The Central Record Depository was established in 1947. The use of modern record center systems, procedures, techniques and equipment enables the depository to efficiently service records for the depositing agencies and the general public. Through the transfer of inactive material to the record center, depositing agencies are able to effect economies due to reduced purchases of filing equipment and the need for less space for records retention.

As of July 1, 1960, there were 88,758 cubic feet of records housed in the record center and archives. By the end of the budget year, there will be an estimated 109,258 cubic feet of records being housed.

A preservation program for historically valuable documents by lamination process is being planned for the budget year. First-year cost of the program will be $22,067. Of this amount, $4,092 is for one proposed new position, $3,500 is for services and supplies, while $14,475 is for the required purchase of lamination laboratory equipment. At the present time, a large number of valuable historical records in the State Archives are in poor condition. Deterioration continues steadily. Preservation treatment is a necessity if these valuable records are to be salvaged.

GENERAL ANALYSIS

Objectives

This department is responsible for the protection of plants and animals from infectious disease, pest animals, weeds and injurious insects and the prevention of the introduction and spread of crop and livestock pests and diseases. The department is charged with the administration of programs designed to assist in the marketing of agriculture products, and the protection of the public by assuring quality controls and preventing fraud and deception.

Program and Performance

The department operates through 5 divisions, field offices, crews, and advisers and consultants operating throughout the State. A major portion of the departmental responsibility is accomplished in co-operation with the 54 offices of county agricultural commissioners. The department gives technical assistance, co-ordinates various county programs and surveys, and assists in training field personnel.

Increasing workload and program changes require 48.3 additional positions during the budget year. One administrative adviser and 1 clerk are included in Administration effective January 1, 1961, to provide the director with needed legal advice. Eight data processing positions are included to mechanize several departmental operations. Although there is an initial net cost of $60,155, long term savings will accrue as a result of this program. The alarming incidence of pear decline in the northern portion of the State requires 5.5 positions to develop ways and means of combating this threat to the pear industry. These positions were established effective November 1, 1960. One additional position is necessary to assist in handling the increased workload of additional registrations of new pesticides.

Two veterinarian positions and 0.8 man-years of temporary help are required in the Bureau of Meat Inspection to continue state responsibility for the sanitary slaughter and retail of livestock at the current level. One milk products specialist is included on a workload basis to supervise the increasing number of milk inspection services in Southern California. One economist is included effective January 1, 1961, to participate in the development of co-operative bargaining associations and co-operative marketing organizations.

Five technicians and 1 clerk are included in the Bureau of Weights and Measures effective January 1, 1961, to protect consumers against improper packaging practices and 6 additional positions are provided for the 1961-62 fiscal year on a workload basis. Fifteen positions were established in the current year in the Bureau of Milk Stabilization to supervise the increasing production and sales of milk and dairy products.

DIVISION OF ADMINISTRATION

Objectives

The director and his assistants are responsible for departmental policy, and the channeling of the efforts of the operating divisions to insure efficient administration of the agriculture laws.

Program and Performance

The Division of Administration provides agricultural and related economic information for the Governor and the Legislature. In addition, it maintains co-operative relations with federal, state and county agencies and institutions. The accounting office administers all fiscal matters of the department relating to budgets, accounts, collections, payrolls and disbursements. The personnel office conducts job classification studies, salary surveys, and investigates cases requiring disciplinary action.

One administrative advisor and 1 clerk are included to provide the director with needed legal assistance and 8 positions are provided for the establishment of a departmental data processing system.

DIVISION OF PLANT INDUSTRY

Objectives

This division is charged with preventing the introduction and spread of crop pests, and with the protection of the farmer and consumer in respect to plants, seeds, fertilizers, pesticides, feeds, and related activities.

Program and Performance

The first line of defense against the introduction of plant pests, including harmful insects, plant diseases, nematodes, and noxious weeds, consists of agricultural inspection stations maintained at 18 border locations for the purpose of inspecting vehicular traffic and enforcing plant quarantine regulations. Stations are also maintained in San Francisco, San Pedro and San Diego to inspect ships and airplanes. Quarantine enforcement at interior points, consisting largely of the inspection of freight, express and mail shipments, is carried out by county agricultural commissioners.

Leadership, co-ordination, and technical assistance are supplied to the counties. Field surveys are conducted in co-operation with the counties to detect crop pests present, but not yet

DEPARTMENT OF AGRICULTURE—Continued

DIVISION OF PLANT INDUSTRY—Continued

Program and Performance—Continued

widely distributed in the State. When they are discovered, particularly in incipient stages, suppressive and eradicative measures are initiated.

This division provides identification and classification of pests intercepted during surveys or quarantine inspections.

Co-operative programs are developed with local governments and landowners to control noxious weeds and rodents harboring diseases transmissible to humans. A joint program is carried on with the United States Fish and Wildlife Service to control predatory animals to protect livestock, poultry, crops such as melons and grapes, and as an aid in the suppression of rabies.

Fruits and vegetables, hays and fodders, are sampled and analyzed to determine whether they contain deleterious spray residue which would be injurious to persons or animals. In co-operation with county agricultural commissioners, regulations are enforced pertaining to injurious herbicides and other injurious materials requiring a permit to use.

The co-ordination of nursery inspection to insure uniformity of inspection procedures in all counties is accomplished through the county agricultural commissioners and county inspectors who are trained by the department in the detection and control of insects, nematodes, plant diseases, and weeds. Nurseries meeting minimum plant pest cleanliness requirements are issued certificates which permit them to ship their stock to 56 of the 58 counties without inspection at destination. During 1959-1960, 8,022 nurseries were licensed to sell and ship nursery stock.

This division exercises enforcement in the area of commercial feeding stuffs, grain warehouse inspection, and agricultural warehouses. All commercial feeds must be labeled to show analysis and ingredients. Inspection and laboratory analysis of about 8,200 samples are accomplished for the purpose of assuring properly labeled feeds and livestock remedies.

In the inspection and certification of grain and other field crops, about 65,000 certificates are issued. Personnel performing these inspections are licensed by the United States Department of Agriculture and are under its technical supervision through a co-operative agreement.

The registration of economic poisons, commercial fertilizers, agricultural minerals, and auxiliary plant chemicals is to prevent the sale of ineffective, unsuitable or dangerous products. During the 1959-1960 fiscal year there were 1,924 firms that secured certificates of registration to sell these materials, and 14,867 economic poisons were licensed. Approximately 6,000 samples, drawn each year from materials offered for sale, are analyzed to check conformity of composition with accepted standards of labeling and chemical content.

Agricultural pest control operators are licensed for the specific types of pest control for which they are qualified. During the 1959-1960 fiscal year there were 1,392 licensed operators in this State. A further responsibility is the certification of over 700 aircraft pilots for pest control work.

One additional position is necessary to assist in handling the increased workload of additional registrations of new pesticides, and 5.5 additional positions are included in the Bureau of Plant Pathology, effective January 1, 1961, to develop ways and means of combating pear decline in the State.

DIVISION OF ANIMAL INDUSTRY

Objectives

This division is responsible for the protection of the livestock and poultry resources of the State from disease and from losses by theft, straying, or unintentional movement. An objective of major importance is to enforce laws and regulations designed to assure the consuming public of wholesome, high quality, nonadulterated, properly labeled foods of animal origin.

Program and Performance

Prevention of diseases of livestock and poultry is accomplished through the enforcement of state restrictions and quarantines on livestock and poultry shipped into the State, to prevent the introduction of disease. Control and eradication are accomplished by veterinarians operating out of 10 regional offices and by 6 diagnostic laboratories located throughout the State. Cooperative programs are conducted with the Federal Government and include the eradication of tuberculosis and brucellosis in cattle. Veterinarians conduct tests for these diseases, vaccinate calves for brucellosis, and appraise and identify reacting animals. They also diagnose outbreaks of other transmissible diseases and take appropriate measures to suppress them. Pro-

DIVISION OF ANIMAL INDUSTRY—Continued

Program and Performance—Continued

vision is made for the continuation of the brucellosis eradication program during the budget year. This program was expanded on July 1, 1960, to include all counties in the State, and is expected to peak some time during the current fiscal year. January 1, 1963, has been set as a target date for declaration of the entire State as a modified certified brucellosis area.

A further responsibility is the enforcement of provisions of the Agricultural Code relating to standards of quality and wholesomeness of dairy products and the prevention of fraud and deception in the sale of these items. Sanitary inspection of dairy products plants and dairy farms are conducted. Supervision is maintained over local inspection agencies, licensed testers, weighers, pasteurizers, and quality determination technicians. Inspections and checks are made of milk products, milk products plants, recording thermometers, imitation dairy products, water supplies, pasteurizers and many other places and activities involved in the production and sale of milk and milk products.

This division also enforces the provisions of the Agricultural Code providing for federal, state, or state-approved municipal inspection of all meats from animals slaughtered and meat products produced in counties of over 28,000 population. A program of slaughterhouse sanitation is conducted. Supervision is extended over the preparation and composition of meat products to insure wholesomeness, and prevent deception and fraud, and adulteration with pesticides and chemicals. This division licenses importers and handlers of foreign cold storage meats and inspects such products. The volume of such importations is expected to continue at a high level. Administration of certain provisions of the Humane Slaughter Act, Chapter 1060, 1959 legislative session, effective July 1, 1960, imposed an additional activity on the Bureau of Meat Inspection.

This division maintains a system of statewide brand recording for livestock owners, inspection of cattle for ownership prior to shipment, sale or slaughter, as well as the inspection of hides and licensing of sales yards, horse and cattle slaughterers, and transporters of horses. Inspections are conducted by a force of inspectors operating in the field and at sales yards and packing houses throughout the State. The duty of collecting beef promotion fees, added by the 1957 Legislature, will be continued.

Poultry processing plants are licensed and required to meet uniform standards for building construction equipment and sanitation. Poultry meat inspectors are trained and licensed. Inspections are made for sanitation, and to assure that diseased or otherwise unwholesome poultry or rabbit meat is not passed for human consumption. Appropriate approval and supervision of labeling is effected to prevent fraud and deception. Laboratory tests are conducted to detect adulteration. Two veterinarian positions and 0.8 man-years of temporary help are included for the Bureau of Meat Inspection and 1 specialist in milk and milk products is included for the Bureau of Dairy Service on a workload basis.

DIVISION OF MARKETING

Objectives

This division is responsible for the protection of the producer and consumer in the marketing of agricultural products.

Program and Performance

Marketing orders and programs originate upon request of grower and handler groups, and are designed to control surpluses, establish acceptable standards of quality, size, condition, or pack, carry on promotional activities and research, and to control or prevent unfair practices in the handling of farm products. This function assists farm groups in the preparation of an acceptable form of marketing order, conducts public hearings upon such proposed orders and programs, and supervises the administration of the programs after they become effective. Surveys are also made of marketing and distribution problems for various agricultural groups of the State to develop new and larger markets. Additional duties in the development of economic material for use by the staff of the department as well as assisting the industry will be carried on in the fields of co-operative bargaining associations, transportation rates, land taxation, and urban sprawl.

The Bureau of Milk Stabilization fixes minimum wholesale and retail prices in each of the marketing areas of the State for fluid milk and cream. Approximately 98 percent of the fluid milk sold in California is subject to these established minimum prices. Milk distributors are licensed, and the sale of dairy products is regulated. Unfair practice provisions of the California Dairy Products Act are enforced as a part of the activities of this unit. A continuing program of promotion and sales stimulation of fluid milk and dairy products is carried on with the co-operation of the Dairy Industry Advisory Board.

The regulation, inspection and control of automotive fuels, antifreeze, and brake fluid products are also administered by this division. Advertising media, dispensing outlets, and labeling are watched carefully to insure compliance with the provisions of the Business and Professions Code. Samples of products to be sold are anaylzed to insure that they do not contain injurious materials. Public weighmasters are also licensed by this division. Weighing devices are inspected, and the licensee is instructed in the proper service to be rendered as a public weighmaster. Inspection of all items sold to consumers by weight or by measure is a function carried on by this division. Such activities are in collaboration with county sealers of weights and measures. The program involves training and co-ordination of activities and assistance in technical phases.

The Bureau of Market Enforcement administers the Produce Dealers Act and Processors Law. These 2 statutes protect producers from improper reporting, accounting, and payment for crops marketed either in fresh outlets or in the processing outlets. Processors and dealers are bonded for proper performance and to guarantee financial responsibility to producers.

Six positions effective January 1, 1961, are included in the Bureau of Weights and Measures to protect consumers against questionable packaging practices. An additional 6 positions are provided for this bureau on a workload basis. Fifteen positions were established in the current year in the Bureau of Milk Stabilization as a result of an unusual increase in the manufacture of milk and milk products requiring more state supervision. The cost of these positions is borne entirely by the industry. One economist is included in the Bureau of Markets effective January 1, 1961, to assist in the development of co-operative bargaining associations and co-operative marketing organizations.

DIVISION OF MARKETING SERVICES

Objectives

This division is responsible for the enforcement of laws and the administration of services designed to assist producers and handlers in the marketing of agricultural products.

Program and Performance

The Market News Service reports current price and movement information covering agricultural commodities in intrastate, interstate, and foreign markets. Information gathered in California is assembled and released over leased-wire systems to other states and markets, and similar information gathered in federal offices pertaining to California crops is received on these leased wires and in turn disseminated to California points.

The Crop Reporting Service develops and releases forecasts of production of our major agricultural commodities and prepares and publishes annual estimates of the acreage, production and value of most crops in the State.

The enforcement activities of this division include enforcement of the minimum standards of the Agricultural Code relating to fruits, nuts, vegetables, honey, eggs, and poultry meat designed to maintain and improve the quality of such California products in California markets, as well as in markets throughout the nation, and to protect consumers from fraud, mislabeling and deception. These laws are enforced by the County Agricultural Commissioners in each county of the State under the direction and supervision of representatives of this division.

The canning tomato inspection provisions of the Agricultural Code, administered by this division, require that all canning tomatoes delivered by producers to canners be inspected. During 1959, a total of 2,108,724 tons of canning tomatoes were inspected. Fees to cover the cost of this service are collected from the canner, payable one-half by the grower and one-half by the canner. A new service inaugurated for the first time in the 1959 season involves the voluntary inspection of grapes for crushing at wineries. This service is rendered only at the request of the wineries, and the cost of the service is supported by the collection of fees. Quality determinations and certification resulting from such inspection is of value to the processor in determining the utilization of the grapes for wine or distilled products.

The division is also responsible for the inspection and certification of fields of potatoes being produced for seed to provide potato growers in California and elsewhere with disease-free seed stocks.

The Federal-State Shipping Point Inspection Service conducted in this division is rendered at the request of growers, shippers or other financially interested parties, and consists of inspection and certification of fruits, nuts and vegetables. In the 1959-60 fiscal year the equivalent of 156,516 railroad carloads of 61 different commodities were inspected.

---

[a] One economist, 5 auditors, 7 investigators and 2 clerks added in the 1960-61 fiscal year for workload.

FEDERAL CO-OPERATIVE MARKETING RESEARCH

Objectives

The matching funds marketing service work being carried on by the State Department of Agriculture, under the authority of the Agricultural Marketing Act of 1946, has these aims: to help marketing agencies at each level of distribution to put into use the best known marketing practices as they are brought to light by research under the act and by other agencies, both private and public; to provide more timely and better marketing information; and to increase the consumption of farm products.

Program and Performance

For the operation of marketing service activities on the matched fund basis, allotments are made to states under co-operative agreements between the United States Department of Agriculture and the State Department of Agriculture, bureaus of markets, and similar state agencies. The states engaged in the program submit projects each year to the Agricultural Marketing Service for approval.

In California, advantage of the matched fund program is made available by the provisions of Section 1286 of the Agricultural Code and by co-operation with the Federal Government in marketing research under the provisions of Public Law 733 (79th Congress).

Currently, there are 4 separate projects effective in California, concerned with checks of bearing and nonbearing acreages of fruits and tree nut crops; and surveys of the acreages and production of minor crops. One survey covers improvement of marketing efficiency, overcoming obstacles to distribution and sales, achieving market stability, expanding markets and effecting improvements in quality, packaging, and methods of sales promotion. Another project is directed toward the development of maturity standards, studies of containers, and packaging methods. Studies concerned with the development of a methodology for certification that fruit and nut tree and vine nursery stocks are free of serious virus diseases are also carried on.

GENERAL ANALYSIS

Objectives

The California Dairy Industry Advisory Board provides the means for the dairy industry to develop, maintain, and expand markets for California dairy products.

Program and Performance

The board, made up of 25 industry representatives, nominated by dairy producers, producer-handlers, and handlers, and appointed by the Director of the Department of Agriculture for a 3-year term, acts in an advisory capacity to the Director of the Department of Agriculture, who is designated as the administrative and enforcement officer for duties outlined in Division 4, Chapter 14, of the Agricultural Code. The use of dairy products throughout the State is encouraged by providing health and educational materials to schools and carrying on advertising and research programs. The cost of this program is defrayed entirely by fees paid by producers and handlers of dairy products.

GENERAL ANALYSIS

Objectives

The Poultry Improvement Commission provides California's poultry industry with accurate production data on the various types and strains of chickens and turkeys.

The commission consists of 10 members. Three are ex officio members—2 representing the University of California and 1, the Director of the Department of Agriculture. Seven are appointed by the Governor for 4-year terms and are chosen so far as possible to give representation to the 7 major poultry districts of the State.

Program and Performance

The work of this commission is divided into 2 distinct areas, the chicken project which is located near Modesto and the turkey project which is located near Keyes. Specific tests, requested by the poultry industry, are conducted to provide a means whereby commercial poultrymen may judge the merits of available strains of chicks and poults. A representative sample, randomly collected, of each entrant's stock, is raised on the testing grounds and periodic reports are made to breeders, hatcherymen, poultrymen, and the general public. Measurements of the productivity and efficiency of each sample are biometrically compared with similar data of all entrants and the results recorded and distributed.

In order to improve the reliability of results derived from these tests, provision is made in the 1961-62 fiscal year budget for expanding the number of birds utilized in the samplings.

GENERAL ANALYSIS

Objectives

The protection of society is the primary purpose of the Department of Corrections. Since 98 percent of the prisoners are eventually released, adequate protection not only includes segregation from society by imprisonment, but also preparation for release and adequate supervision while on parole. To be most effective, the correctional process must continue throughout both the institutional and parole periods. The aim is rehabilitation of the person in the shortest period possible and restoring him to a constructive life in the community.

Program and Performance

The Department of Corrections, established in 1944, is presently composed of the Director of Corrections, the Adult Authority, the Board of Trustees of the Institution for Women, the Correctional Industries Commission, and the Board of Corrections. The director and members of all of the boards are appointed by the Governor.

The Director of Corrections is the chief administrative officer of the department. He is directly responsible for management of the state prisons and for the custody, care, treatment, training, discipline, and employment of the prisoners. He is likewise responsible for administration of the Adult Paroles Division, which supervises adult male parolees.

The Adult Authority is responsible under California's indeterminate sentence law for determining the sentences of male prisoners and granting or revoking parole. Like responsibility for women prisoners is placed in the Board of Trustees, Institution for Women.

The Correctional Industries Commission recommends industrial and agricultural enterprises to eliminate prison idleness by providing work and training. Such enterprises may be started only when authorized by the commission after a public hearing.

The Board of Corrections is composed of the Director of Corrections, members of the Adult Authority, members of the Youth Authority, members of the Board of Trustees, Institution for Women, and 2 public members appointed by the Governor. It is responsible for the correlation of the State's correctional programs, the study of the entire subject of crime, inspection of jails and the provision of advisory services to cities and counties regarding jail and detention facilities.

During 1961-62, the department will be faced with caring for an estimated average population of 22,100 inmates, including 1,615 male Youth Authority wards over 18, and 940 women. This prison population will be confined in 8 institutional facilities for males, highway and forestry conservation camps and an institution for women. Capacity of these facilities and camps will be 19,947. Thus, with a year-end population of 22,715, an excess of 2,768 inmates will be handled by overcrowding existing facilities. During 1961-62, an average of 9,216 males and 775 females will be under parole supervision.

The increase in the prison and parole population is primarily a reflection of the increase in the civilian population of the State rather than an increase in the crime rate.

The institutions and camps under the control of the department comprise a diversified correctional system. This means facilities with a planned capacity to allow for varying degrees of custodial control of inmates, providing for special and general programs of training and treatment for different types of prisoner groups.

As maintaining persons under control in prison while treating them until evaluated safe for release is the goal for protection of the public, it is essential to know what the characteristics of these people are, how to control and treat them, and what facilities are required.

The prison population for 1961-62 will represent the most serious behavior problems among the State's felons, since only 25-30 percent of the persons convicted of felonies are committed to the department. The balance serve county jail terms or are granted probation. The prison population may be described in general in terms of the "average" inmate: A white male between 25-29 years old with a prior juvenile, jail or prison record, with about 10 years' residence in California, with only a 7th-grade education but normal intelligence, lacking in work skills, and having a serious personality difficulty. In addition to the "average" inmate, groups requiring specialized custody and

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

treatment are included such as the aged, the psychotic, the sex deviate, the tuberculous, the physically defective, the chronic behavior problems and condemned cases.

The program for handling 32,091 individuals daily in prison and on parole during 1961-62 will include:

Diagnosis: Study of each prisoner upon receipt to recommend an individualized program for his control and treatment.

Classification: Designation of a degree of custodial control, educational assignment, medical care, psychological therapy, religious training, and avocational training for each inmate.

Care: All inmates must be fed and clothed. A basic food ration is maintained in all institutions under the general supervision of the Departmental Food Administrator. Rations are modified to meet age, activeness and health needs of the inmates. Clothing is also controlled on a ration or formula basis in several institutions based on recorded usage and actual experience.

Treatment: Programs with staff to effect the treatment process. Treatment involves the integrated activities of a number of subsections. Together, and in co-operation with effective custodial control, the treatment programs make possible the operation of a productive correctional process during the time the inmate is confined and prepared for release. The major activities are as follows:

Academic and Vocational Education: About 11,000 inmates are in educational programs during the year. Academic education provides elementary and high school courses, both by contracting with the local school district and by institution staff. Vocational training, conducted by the institution staff, is available in approximately 30 trades. Educational services include library programs used extensively by inmates.

Medical Care: Hospital facilities exist at all institutions. Virtually any medical or surgical problem can be handled within the department. Complicated surgical procedures are generally performed at San Quentin due to the availability of specialists.

Psychiatric Treatment: Specialized psychiatric service is provided principally at the California Medical Facility. Psychiatric positions are also authorized at the other institutions and the parole Out-patient Clinic. Psychiatric treatment includes ward management of psychotics and other highly disturbed persons. Extensive programs for individual and group psychotherapy for more than 2,000 inmates are also provided under psychiatric direction.

Counseling Services: Professional staff of correctional counselors at each institution deal with social and personal problems of inmates and families and prepare progress reports for the Adult Authority. Two specialized units of correctional counselors are engaged in pilot programs of intensive counseling with small caseloads. Around 9,500 inmates currently participate in weekly group counseling sessions conducted by custodial, educational and maintenance staff employees who receive in-service training in counseling.

Religion: The religious program includes full-time Catholic and Protestant chaplains at each institution together with part-time services for the other faiths. In addition to conventional religious activities, chaplains participate in case counseling and in total classification and treatment activities of the institution.

Recreation: Programs of physical and interest-type recreational activities are maintained at each facility under the leadership of persons trained in recreation. Balance is maintained between spectator and participation programs. Such programs boost morale, encourage constructive use of off-duty time, and teach sportsmanship and teamwork.

Employment: The constructive employment of as many inmates as possible is one of the keys to the total treatment program. Prisoners work in factories, maintenance and culinary sections, offices, farms and camps, obtaining diversified work experience. Constructive use of inmate assignments has economic benefit to the institutions and carryover value for work placement after release. Idleness, on the other hand, results in low morale, and mental and physical degeneration. Conservation centers and campus operated by the department provide added opportunity for outdoor projects of a type which are also beneficial to the development of California's natural resources.

Release Procedures: Each of the nearly 8,800 inmates to be released during 1961-62 will participate in preparole instruction classes to prepare for adjustment after prison. In addition, each releasee will be interviewed regarding release plans and a report prepared to assist with employment and living placements.

Parole Procedure: Of the total number released from the institutions, about 80 percent will be released under parole supervision. The institutional treatment process, which is directed toward successful adjustment on release is continued in the parole program. In addition, the jurisdiction of the Director of the Department of Corrections is maintained while the parolee is serving the remainder of his term as a productive member of society.

Narcotic Treatment-control: This is the third year of a 5-year experimental program, begun in 1959-60, to study the detection, diagnosis, custody, and clinical treatment of addicts and suspected addicts, in order to develop better methods of rehabilitation of such persons.

Additional Facilities

The Men's Colony East Facility at Los Padres, scheduled for completion in April 1961, will start receiving inmates in July 1961, and reach capacity of 2,400 by June 1962. Two additional 80-man camps will be activated in 1961-62. With these additional 160 inmates in camps, the department will have an average population of 2,121 in year-round camps plus 118 in summer United States Forest Service Camps.

Expanded Program

Program for Increased Correctional Effectiveness

A plan to secure increased correctional effectiveness that will produce a net savings of $25 million over the next 8 years has been developed. Through scientific selection of inmates and parolees for special processing and increased staff attention, utilizing knowledge and experience derived from research and operation of pilot projects, the plan would effect an approximate 2,000 reduction in the projected prison population at the close of the period. This population reduction will avoid large capital outlay and operating expenditures that would otherwise be required. This reduction in projected population cannot be secured without the proposed treatment and control measures.

Review of pilot program findings shows increasing data to support the conclusion that special programs for certain kinds of inmates are having important effect. Findings from the Special Intensive Parole Unit show that parolees given intensive supervision are less frequently arrested than those given normal supervision. This was especially true in the subgroup of parolees who were not forecast as the "best" group but rather were in the "next best" group. The institutional Intensive Treatment Unit findings at present indicate that inmates who were exposed to the pilot program had a higher percentage of terms set by the Adult Authority on their regular calendars (54.8 percent as against 47.4 percent). This indicates a direct effect of program on Adult Authority recognition of progress. Data from the Deuel Vocational Institution Special Treatment Unit show that parolees who were diagnosed amenable to treatment and who were processed through the special unit show consistently superior parole performance as measured by time free of confinement after release. Each of the foregoing findings by itself may be inconclusive. However, a very clear trend is emerging to indicate that (1) special intensive treatment methods produce better response, and (2) units for selected groups of inmates have produced better parole response results. Improved selection procedures have also been developed. Among these is the "base expectancy" system. The "base expectancy" score is an aid in parole prediction developed by the Research Division. It is based on the same sort of actuarial principles used by insurance statisticians in computing life expectancies.

The new programs will emphasize (a) more efficient selection and grouping of inmates and parolees for special attention in small groups; (b) increased use of intensive inmate-staff and parolee-staff relationships to foster social responsibility; (c) special emphasis on community and family resources in planning with inmates and parolees; (d) rapid and short-term parolee return to confinement while on parole status.

The major features of the new program planning are:

Reception-Gudiance Center Screening: More effective screening of cases will occur at reception-guidance centers based on parole potential as determined by clinical and administrative judgment and their "base expectancy" score.

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS—Continued

Expanded Program—Continued

Institution-Inmate Community Living Units: Facilities are to be established at selected institutions and camps. Units will use existing housing facilities and will vary in size from 50 to 80. They will receive directly, selected cases from guidance center for short-term intensive programing followed by release. The Adult Authority will confirm the selection process and the heart of the program will consist of guided group interaction under close staff leadership.

The same units will receive a portion of inmates with longer terms (not directly from the Guidance Center) with plans for intensive programming a year or less prior to release. With intensified program, parole can occur earlier if followed by close supervision. Some units will receive parolees for short-term institution return without parole violation, when parole failure seems imminent.

One special unit with a population of 50 will be established at the California Medical Facility—for evaluation of difficult long-term cases where the Adult Authority needs special staff evaluations.

Augmented Parole Division Services: Basic to the entire plan is the requirement that parole services provide substantial elements of increased attention to selected cases. Many parolees will not require any change in parole services, but those identified by the screening process as subject to improvement will be placed under special treatment and surveillance. The new provisions will include:

a. Thirty-man caseloads for parolees which would benefit from close case supervision including close supervision of narcotic addicts. This would result in approximately 90 percent of the paroled narcotic addicts being under smaller caseload supervision. Units for close supervision of average parole potentials will be provided. (Best parole potentials to continue under regular supervision.)

b. Added parole staff for pre-release work with inmates in special institution units will be utilized. This is a relatively small but important keystone of the program which will greatly improve capacity to bridge the institution to community transition. Special attention will be devoted to employment placement and family reunion problems.

c. A parolee outpatient clinic for the San Francisco Bay area for specialized attention to selected parolees is planned. The Los Angeles clinic has been an important factor in permitting the Adult Authority to parole certain cases with the confidence that necessary psychiatric supervision will be provided. A parallel unit in San Francisco will fill a major need to complete the balance of parole services.

Special Training and Staff Interpretation: Introduction of the new programs in the institutions and Parole Division will be accomplished through the use of training specialists who will develop intensified treatment and control techniques with staff. There will be modified practices which affect the entire departmental operation and staff services will be required for program interpretation to departmental personnel and inmates.

Research and Statistics: Evaluation of the new programs will be necessary and desirable on a continuing basis to assess which phases give the most promising results. The department's administrative statistics will develop a more effective inmate manpower control system for selection and assignment of cases.

The augmented staffing comprises a total of 48 new positions, included in the total program cost of $252,010.

MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary by program accounts for the proposed increase of $3,925,273 (9.5%) over the 1960-61 expenditures. These increases provide for the necessary adjustments to meet population changes, the staffing of new facilities, the correction of various deficiencies in staffing, and improvements in the level of treatment and services.

Additional personnel for increased correctional effectiveness (48)		$189,015
Additional personnel for staffing new facilities:		
a. East Facility, Men's Colony (280)	$1,148,948	
b. Reception-guidance Center, California Institution for Men (6)	29,775	
c. Hospital expansion, California Institution for Men (11)	21,600	
d. Activation of New Conservation Camps: State Prison at San Quentin (12.4)	16,103	
		$1,216,426
Additional personnel for institutional workload changes:		
a. Increased intake of inmates (7)	$38,796	
b. Population growth (24.2)	134,008	
		$172,804
Additional personnel for the Adjustment Center, State Prison at San Quentin to improve the counseling and guidance of emotionally disturbed inmates requiring isolation and segregation housing under close custody (3.2)		$20,723
Additional personnel for planning and administration of conservation program (16)		31,057
Additional personnel for correction of existing staffing deficiencies (7)		38,216
Additional personnel for increased numbers of parolees (4)		14,852
Additional personnel for Departmental Administration (4)		36,606
Net increased cost in authorized positions due to full year costs of positions authorized during the current year, improved employment conditions and salary changes		1,031,515
Increase in operating expenses and equipment:		
a. Increases primarily in feeding, clothing, education, and utilities, for price and population changes, new facilities, and increased correctional effectiveness program		1,067,705
b. Decrease in equipment		—84,311
c. Increase in reimbursements (primarily due to the activation of new forestry camps and services to other agencies)		—80,585
Increase in inmate pay—work projects for population growth and increased camp operations		58,689
Increase in contributions to State Employees' Retirement Fund		212,561
Total		$3,925,273

DEPARTMENT OF CORRECTIONS—Continued

SUMMARY OF PROPOSED NEW POSITIONS

The following 422.8 new positions totaling $1,719,699 for the prisons and other correctional facilities and organizations represent standard classes used in all correctional facilities and are, therefore, discussed by program and function.

Increased Correctional Effectiveness Program

48 Positions (see page 71) $189,015

These positions are proposed to implement a program for increased correctional effectiveness. This program is planned to reduce the projected prison population through scientific selection of inmates and parolees for special processing and increased staff attention.

The major augmentations are for staffing the following phases of the program: Community-living units to be established at selected institutions and camps; 30-man caseloads for parolees, including narcotic parolees; prerelease work with inmates in special institution units; expansion of the parolee outpatient clinic program development of intensified treatment and control techniques; and increased statistical scope for the development of a more effective inmate manpower control system for selection and assignment of cases.

Men's Colony—East Facility

280 Positions $1,148,948

The 280 positions are proposed to complete the staffing for the new East Facility, Men's Colony. These positions are budgeted on the basis of approved staffing formulas, comparability of staffing authorized for similar functions at other prisons, and in recognition of special physical plant factors and type of inmates.

The new institution is planned to provide 4 segregated areas for 600 men each. Housing, feeding, outdoor and indoor recreation, elementary education, and group counseling facilities are provided within each unit.

The staffing of the new institution utilizes the treatment team concept adopted for the 600-man units of the North Facility at the Correctional Training Facility. A unit manager will be in charge of each of the four 600-man units, and will supervise both treatment and custodial personnel assigned to the unit.

Success of the treatment program within the 4 segregated units will depend to a considerable extent on the proper co ordination with the overall operation of the institution. Inmates from the units will participate in training, treatment, recreation, religion, industrial and other work assignments outside of their units. Much of the value of a single administration of treatment and custody within the unit may be lost if there is lack of unity in this regard at a higher administrative level.

This problem will be met by providing a deputy superintendent who will make use of the specialized training and knowledge of an associate superintendent and the staff members reporting to him on the operations within the 4 units. The associate superintendent will have charge of the primary custodial and treatment functions in the overall operation of the institution.

The effective dates of the new positions are based on the scheduled completion of the East Facility in April 1961, and receiving of inmates beginning in July 1961 and continuing on a regular monthly schedule until full capacity is reached during June 1962. Generally, the positions are phased to provide necessary time for recruitment, orientation, and training prior to the arrival of the inmates.

Conservation Center

16 Positions $31,057

Sixteen positions are proposed to provide initial staffing for the Conservation Center and branches. It is necessary to establish a portion of the staff during 1961-62 in order to prepare for the activation of the facility and the receiving of inmates beginning in September 1962. The branches are scheduled for activation early in the 1962-63 fiscal year. These facilities were authorized under the provisions of Sections 6200 to 6208 of the Penal Code. The center will be located in Lassen County and will house 1,200 inmates, with branches having inmate populations of 160 inmates each located in Tuolumne County and the north coast area. When established, the population will consist of minimum and medium inmates received from the reception-guidance centers and directly from the prisons. They will be given academic and vocational training designed to prepare them for assignment to the conservation camps and their ultimate rehabilitation. The center and its branches will ultimately operate 34 conservation camps located throughout Northern California with a total population of 2,417 inmates.

Custodial and Personal Care Personnel

3 Correctional sergeant $16,488

These positions are required to provide additional custodial supervision in the housing units at the Medical Facility due to the more disturbed type inmates being housed at this institution and to correct the staffing deficiency caused by adding 33 additional correctional officer posts during the past 5 years with only 1 additional position for supervision. The housing lieutenants and watch lieutenants can no longer give adequate supervision to the housing posts in addition to their other duties.

1 Correctional sergeant 5,496

This position is required at the Institution for Men, Tehachapi Branch, to cover unsupervised areas and to act as institution fire chief. This sergeant is needed to supervise the correctional industries, vocational education, academic education maintenance, laundry, and nursery areas which at present are inadequately supervised.

2 Women's correctional supervisor I 9,720

One position is included for the increased workload in the mail room at the Institution for Women due to a 15 percent increase in inmate population since the 1959-60 fiscal year at this institution. The custodial positions in the mail room also supervise the visiting room and act as release officers. During the past year, 300 hours of overtime were required for this activity at this institution. One position is required at this institution to correct a staffing deficiency and provide relief in accordance with approved post assignments.

11 Correctional officer 37,675

One position is included for the Institution for Men to correct a staffing deficiency and provide relief in accordance with approved post assignments.

Five positions are included for the normal correctional officer coverage in the new wing of the Institution for Men Reception-Guidance Center which will be completed in the 1960-61 fiscal year. Five positions are included for coverage of the new 50-bed capacity hospital addition at the Institution for Men.

1 Correctional officer 4,860

One position is included because of the addition of a new housing unit (Briggs Hall) at the Tehachapi Branch of the Institution for Men. The 1 additional position is included to provide relief for those employees engaged in intensive pro-

DEPARTMENT OF CORRECTIONS—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Custodial and Personal Care Personnel—Continued

graming which will be initiated in an existing housing unit in lieu of custodial supervision. The 5 existing custodial positions assigned to this latter unit will be transferred to the new inmate housing unit in accordance with the standard staffing coverage for such a facility.

Group Counseling Personnel

1	Correctional counselor II	$7,008
1	Temporary help	4,364

One correctional counselor position is included for the Medical Facility to supervise 40 groups involving approximately 400 inmates in the group counseling program. This program has been recently activated at the Medical Facility and is primarily for the inmate workers at that institution. Group counseling will be given biweekly consistent with the frequency of group psychotherapy at the Medical Facility. Temporary help funds are also included for this program at the Medical Facility to provide for 25 percent of the counseling services on an overtime basis. The amount of $4,364 provides 1,666 hours of overtime at an average rate of $2.62 per hour on the same basis as the overtime authorized at other institutions for similar programs.

20	Total	$85,611

Reception-Guidance Personnel

1	Clinical psychologist II	$7,728	
3	Correctional counselor I	19,080	
3	Intermediate typist-clerk	11,988	
7	Total		$38,796

One clinical psychologist, 1 correctional counselor, and 1 typist-clerk, are required for the Deuel Vocational Institution and 1 each correctional counselor and typist-clerk for the Institution for Men and the Medical Facility to process the workload resulting from an increased intake of prisoners. These positions are justified by application of the existing workload-staffing formula.

Medical Care Personnel

2	Dentist II	$22,800	
1	Surgical nurse I	4,980	
5	Supervising nurse I	8,720	
8	Total		$36,500

One dentist for the Medical Facility and 1 dentist for the Deuel Vocational Institution are included on the basis of increased inmates processed through the Reception-Guidance Centers at the existing level of service provided at these facilities. The surgical nurse is required at the Institution for Men to assist with surgical operations, to give specialized nursing care and to increase the effectiveness of the professional staff by relieving physicians of duties which can be more appropriately performed by a surgical nurse. Five supervising nurses are required for 24-hour, 7-day coverage of the additional 50-bed hospital facility at the Institution for Men.

Classification and Parole Personnel

1	Correctional counselor I	$6,360	
2	Intermediate typist-clerk	8,190	
3	Total		$14,550

One clerical position is required at the Tehachapi Branch, Institution for Men, and 1 clerical position and 1 professional position are required at Folsom based on established formula standards to handle the increase in population and inmate movement.

Conservation Camp Personnel and Camp Supervision

3	Correctional lieutenant	$6,360	
2	Correctional sergeant	2,748	
8	Correctional officer	9,480	
0.4	Chaplain—intermittent	695	
0.2	Overtime—fire fighting	1,000	
13.6	Total		$20,283

One correctional lieutenant and 0.2 overtime—fire fighting are included for staffing the new conservation camp which will be activated at the Men's Colony—West Facility. The other necessary staffing of this camp will be provided from existing positions. A total of 6.2 positions are provided for each of 2 new conservation camps to be operated by the State Prison at San Quentin.

Adjustment Center Personnel

0.2	Staff psychiatrist	$2,195	
2	Correctional counselor II	14,016	
1	Senior typist-clerk	4,512	
3.2	Total		$20,723

The 3.2 proposed new positions will complete the treatment team staffing for the new 101-bed capacity adjustment center at the State Prison at San Quentin. Total staffing will be identical to that which is now authorized for the adjustment center at the State Prison at Folsom.

Business Services Personnel

1	Accounting technician II	$4,626

One new position in the accounting office at the Institution for Women is required for the increased workload resulting from an inmate population increase from 820 during the 1959-60 fiscal year to 940 for the 1961-62 fiscal year. The workload increase in the processing of invoices and claims relates directly to the population, thereby requiring an additional position.

1	Intermediate typist-clerk	3,996

One new clerical position in the personnel office at the Institution for Men is required for increased workload. Presently there are 2 clerical positions in the personnel office and in the 1961-62 fiscal year there will be an increase in total authorized positions justifying 3 personnel office clerical positions on the basis of the approved workload formula of 1 personnel office clerical position to 200 authorized positions.

1	Intermediate typist-clerk	3,996

One clerical position in the personnel office at the Medical Facility is required because of increased workload and a relatively high employee turnover rate. The approved workload formula for personnel office clerical positions justifies 3 clerical positions at the Medical Facility in the 1961-62 fiscal year as compared with the present authorization of 2 positions assigned to this function.

1	Property clerk II	5,772

Continuation of a property clerk position previously authorized on a temporary basis at the Tehachapi Branch of the Institution for Men is required to complete current property records and to correct a staffing deficiency in business services. This position was approved in the 1960-61 fiscal year and is requested for continuance in the 1961-62 fiscal year to complete the property records and inventory.

4	Total	$18,390

DEPARTMENT OF CORRECTIONS—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Plant Operation Personnel

2	Stationary engineer	$12,120	
1	Painter foreman	6,672	
1	Plumber I	6,060	
1	Women's correctional supervisor I	4,860	
1	Correctional sergeant	5,496	
3	Correctional officer	14,580	
9	Total		$49,788

One stationary engineer is included for the Correctional Training Facility because of additional workload resulting from an expanded physical plant. One painter foreman is provided for the Correctional Training Facility—North Facility to accomplish a preventive maintenance painting program. One stationary engineer is included for the Institution for Men to compensate for increased workload at the reception center resulting from an additional physical plant plus an accelerated deterioration of the existing physical facilities. One plumber is required for the Institution for Women to accomplish existing workload beyond the capacity of the authorized staff and to prevent excessive physical plant deterioration. One women's correctional supervisor is recognized as necessary to supervise a crew of 20 currently idle inmates in the operation of a preventive maintenance painting program.

One sergeant and 2 officers are included for Folsom to provide an additional crew for the departmental bus service. There are currently 4 buses and only 2 crews. The second officer is required to correct a staffing deficiency and furnish the same relief for the officers which is now provided for the sergeants. One officer is required for the maintenance of automotive equipment at Folsom including the maintenance of the departmental buses.

Culinary Personnel

3	Supervising cook I	$14,580

Three supervising cook positions will provide 7-day, 2-shift coverage of the culinary operation at the Institution for Women. These positions will supervise the preparation and serving of meals in the 6 cottages and are required for increased workloads resulting from continued population increases together with the activation of additional facilities and the overcrowding of all institutional facilities during the past several years, which require double-shift feeding at all cottages.

Administrative Division Positions

1	Chief of planning and development	$16,056	
1	Senior stenographer-clerk	5,496	
2	Total		$21,552

The position of chief of planning and development and his secretary are included to provide for more efficient and economical use of existing plants and staff through maximum program effectiveness. Present projections indicate an increase in prison population which will amount to more than 10,000 additional inmates during the next 10 years. This professional position will develop major programs and policies utilizing research findings and operational experience to provide increased correctional effectiveness in the treatment of inmates and parolees.

1	Assistant to the director	$10,860

This exempt position is included to aid the director in administering the intricate programs of the department and co-ordinating these programs with other agencies. He will inform the director of progress made by other agencies in related programs and serve as liaison between the Adult Paroles Division and law-enforcement agencies.

1	Intermediate stenographer-clerk	$4,194

This position is included for the increased workload in the correctional program services division and to provide stenographic services to the assistant to the director.

Parole Supervision

3	Parole agent I	$10,226	
1	Senior typist-clerk	4,626	
4	Total		$14,852

Parole agent positions are included on the basis of increased number of parolees on the overall standard of 55 parolees per professional position. In addition to the above positions, 2 parole agents and 1 clerk authorized in the 1960-61 fiscal year will not be appointed until the 1961-62 fiscal year because the estimated number of parolees to be supervised in this fiscal year is less than was estimated at the time of submitting the 1960-61 budget. One clerical position is requested for personnel record maintenance and documentation.

422.8 Totals, Proposed New Positions $1,719,699

SUMMARY OF OTHER INCREASED EXPENDITURES

Additional Cost—Authorized Positions

This increased expenditure is occasioned by full-year cost of positions authorized during the current year, improved employment conditions, annual merit salary increases and positions to be abolished during 1960-61 **$1,031,515**

Operating Expenses

Increased average daily population of 1,145 (5.7 percent) and some increases in prices will require an increase in operating expense of $1,067,705. Other factors are that there will be expenses for new facilities preparing to receive inmates and expenditures relative to operation of new facilities. The major areas of increase are for food and clothing $1,067,705

Equipment

Equipment decreases are planned at most institutions to reflect a reduction from the equipment expenditure program authorized for the 1960-61 fiscal year —$84,311

Inmate Pay—Work Projects and Reimbursements

Both of these items are increased due to the expanding conservation camp program. Inmate pay for work projects increases $58,689 while reimbursements from forestry increases —$44,040. Other increases amounting to $36,545 bring the total reimbursement change to —$80,585 —$21,896

Contributions to State Employees' Retirement Fund $212,561

Total, Other Increased Expenditures $2,205,574

GRAND TOTAL—INCREASES $3,925,273

GENERAL ANALYSIS

Objectives

The Department of Corrections is responsible for public protection through the confinement, supervision, and rehabilitation of persons committed to it by the courts.

Program and Performance

The director is responsible for the establishment of policies and management of programs to achieve the objectives of the department. The Board of Corrections and Adult Authority act in an advisory and co-ordinating capacity in policy formulation. The Board of Corrections is composed of the director, the members of the Adult Authority and of the Youth Authority, the members of the Board of Trustees of the California Institution for Women and 2 qualified persons appointed by the Governor with the advice and consent of the Senate for 4-year terms. The departmental administration is organized primarily to provide the required staff assistance to carry out the established policies and programs. This is accomplished through the activities of the executive and 6 major divisions, each headed by a chief. These are: Correctional Program Services, Management Services, Research, Conservation, Correctional Industries, and the Adult Paroles Division.

The Correctional Program Services Division includes staff responsibility for medical and psychiatric services, custodial activities, employee training, education and library services, inmate classification, casework and related professional disciplines, group counseling, records, recreation, and the chaplaincy services. Each of these is an important treatment activity or service at the institution level. During the past year, significant progress has been made in the selective reception, classification and assignment of an exceptionally high intake. Continued progress has been made on new concepts of programing exemplified by planning for the new Men's Colony—East Facility at Los Padres, for the conservation centers, and for the conservation camps. The new concepts include a closer merging of custodial and treatment goals, and this is emphasized by adding functional responsibility for custodial services and the training activity to the Correctional Program Services Division in the Central Office. Emphasis continues on the special treatment and custody of unusually violent individuals in adjustment centers and in the general population in the institutions. There has been a cooperative effort with the Research Division in developing measures of effectiveness in pilot treatment programs and in the vocational and educational programs as well as in group counseling.

The Management Services Division staff is responsible for general fiscal management including budget preparation and control, management analysis, prison planning, personnel management, procurement and services, departmental construction and maintenance supervision, the feeding program, and accounting. Major accomplishments in 1960-61 have included the continued planning for the activation of the Men's Colony—East Facility and the California Conservation Center.

The Research Division through its studies of inmate and parole population characteristics and performance provides important data for present and future institution and parole correctional programs by developing and testing specific types of correctional programs for specific types of inmates. A major achievement in 1960-61 has been the development of a classification system which states the expected parole performance for any group of parolees. This system is being tested for increased effectiveness in both male and female parole assignment procedures.

The Conservation Division was established to provide for the central co-ordination and standardization of the center and camp program. This program calls for the expanded utilization of inmates in conservation and further development of California's natural resources, working co-operatively with other governmental agencies. It is estimated there will be 2,357 inmates in camps by June 30, 1962.

The Correctional Industries Division provides a balanced and diversified work program enabling inmates to acquire the good work habits and occupational skills necessary for successful adjustment to free society. The Correctional Industries program includes 25 industrial and 15 agricultural enterprises in each of the correctional institutions with the exception of the Medical Facility.

A total of 4 positions is proposed in the 1961-62 fiscal year, not including the positions proposed for the increased correctional effectiveness program nor paroles. One chief of planning and development and 1 senior stenographer are included for the development of major programs to provide for the more efficient use of existing physical plants to meet the increased prison population. One assistant to the director, an exempt position, is proposed to aid the director in co-ordinating the expanding programs with other agencies. One clerical position is requested for the increased stenographic workload.

These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 64.)

ADULT PAROLES DIVISION

GENERAL ANALYSIS

Objectives

The objective of the Adult Parole Division is the protection of society by supervising men released from prison and assisting them to fully readjust to life in the community. More than 80 percent of the men released from prison are released to parole supervision.

Program and Performance

The Adult Parole Division supervises all adult males released from California prisons to parole programs in this State. In addition, it supervises men released from prisons of other states to parole programs in California just as other states supervise California parolees residing there.

This division has its headquarters in Sacramento and 20 field offices throughout the State. For administrative purposes, the State is divided into 2 regions at approximately the Tehachapi Mountains.

The work of the parole agent consists of investigating the proposed programs for parolees; assisting the parolee in vocational guidance, job placement, and counseling on personal problems; appraising the parolee's behavior, attitudes, work record, and associations; maintaining contact with other law enforcement agencies; and protecting the interests of society by taking the parolee into custody if he shows evidence of becoming a threat to the community.

Parole agents are budgeted on the basis of an overall ratio of 55 parolees per professional employee. All professional employees, except the chief, deputy chief, and the interstate unit are included in computing the ratio. This means that the regional supervisors, associate regional supervisors, district office supervisors, and staff specialists in placement and training are counted. As a result, each agent actually supervises approximately 75 parolees.

As an aid to supervision, the division operates an out-patient psychiatric clinic in Los Angeles serving a large portion of the Southern California region. The clinic provides professional psychotherapy to parolees with emotional problems thus bridging the gap between institution and community. Clinic staff also provides emergency psychiatric evaluations of parolees, consults with parole agents, and participates in the training of agents.

In addition to the regular supervision of parolees, the division operates 2 research projects designed to discover more effective and economical methods. The Special Intensive Parole Unit continues to evaluate the results of giving more intensive and specialized supervision. In its current phase, the unit is testing the effect of assigning specific groupings of parolees to selected parole agents.

The Narcotic Treatment Control Project brings a 3-phase attack to bear on the supervision of former narcotics addicts released to the community after serving their prison sentence. During 1961-62, the division will continue to operate 4 field units supervising a total of approximately 770 males and 30 females all of whom were once narcotic addicts. Three of the field units are located in Los Angeles, where the problem is most acute, and one is located in the San Francisco-Oakland area. The first phase of the project is intensive supervision of small 30-man caseloads made up exclusively of former addicts by agents specially trained to work with them. The second phase is frequent chemical testing of the parolee by anti-narcotic injections which will disclose any recent use of addicting narcotics. The third phase is the provision for return of the parolee to special detention-treatment units at San Quentin, the California Institution for Men and the Institution for Women when appropriate.

During the 1961-62 fiscal year, it is estimated that an average of 9,216 adult male parolees will be supervised in California. The number supervised at the end of the year is estimated at 9,305 or an increase of 205 over the revised estimate of 9,100 at the end of the 1960-61 fiscal year. A total of 4 additional positions are included for this increased workload of which 3 professional positions are provided for regular parole supervision based on the workload formula. One clerical position is requested for personnel record maintenance and documentations.

These positions are discussed in General Analysis, Departmental Summary. (See pages 59 to 64.)

DEPARTMENTAL ADMINISTRATION—Continued

COMMISSION ON PROBLEMS OF INSANITY IN CRIMINAL CASES

Objectives

Broad objectives include study on problems of insanity relating to criminal offenders. Distinction is made in assignment of the problem between procedural and substantive aspects. Recommendations aimed at improving laws relating to procedures and the criminal responsibility of persons afflicted with mental diseases or disabilities are primary goals.

Program and Performance

This commission was divided into 2 special commissions of 5 members each, created by Executive Order of the Governor on May 4, 1960. The Legislature provided, in the budget act, that a report was to be submitted to them within the first 30 days of the 1961 Session. Each special commission is authorized to make progress and interim reports on such subjects within the general scope of its assignment and at such times as may be deemed appropriate by said commission.

In view of the complexity and importance of the subject matter and the depth of the study required, it is anticipated that the work of the overall commission will be extended into the 1961-62 fiscal year. This budget, therefore, proposes to continue the overall commission until June 30, 1962.

SPECIAL STUDY COMMISSION ON JUVENILE JUSTICE

Objectives

The study, evaluation and proposal of constructive recommendations concerning all matters related to juvenile justice and the protection of minors was the objective of the Special Study Commission on Juvenile Justice.

Program and Performance

The commission was originally created by Executive Order of the Governor on September 23, 1957, which pointed out that there had been no comprehensive revision of the juvenile court law since 1913, while the demands for services and facilities concerned with minor children have been intensified at every level of government by California's phenomenal population growth. On March 30, 1959, the Governor issued a new executive order extending the final reporting date to June 30, 1960.

The commission consisted of 5 outstanding citizens appointed by the Governor. This group gave policy direction to a full-time professional staff named by the Chairman of the Board of Corrections.

The commission has made recommendations as indicated by its studies, by expert advice received and by testimony at public hearings.

The work for which the technician and clerk positions were extended into the 1960-61 fiscal year was completed and the positions were discontinued on July 31, 1960.

SPECIAL COMMISSION ON NARCOTICS

Objectives

The study, evaluation and proposal of constructive recommendations concerning all phases of the narcotics problems in Cailfornia is the purpose of the Special Study Commission on Narcotics.

Program and Performance

This commission was created by Executive Order of the Governor on March 22, 1960. A special progress report will be submitted to the Governor during the first part of December 1960, containing any recommendations indicated by its study and by expert advice and testimony received from informed and interested persons at its numerous hearings held throughout the State of California. A report will be submitted to the Legislature within the first 30 days of the 1961 Session. A final report of the commission's study and recommendations will be filed with the Governor by June 30, 1961.

The work of the commission, including the staff, will be completed by June 30, 1961, and, therefore, no additional funds are requested for the 1961-62 fiscal year.

PROGRAM FOR INCREASED CORRECTIONAL EFFECTIVENESS[a]						
The objective of this new program is to secure increased correctional effectiveness through scientific selection of inmates and parolees for special processing and increased staff attention, thereby reducing prison population.						
The initial operation of this program is temporarily authorized during the current fiscal year and would assume full operation in July 1962. This program will emphasize more efficient selection and grouping of inmates and parolees for special attention in small groups; increased use of intentive inmate-staff and parolee-staff relationships to foster social responsibility; and rapid short-term parolee return to confinement while on parolee status. Special emphasis will be placed on community and family resources in planning with inmates and parolees				–	$51,776	$252,010

GENERAL ANALYSIS

Objectives

The Conservation Center has as its objectives, the confining and rehabilitation of male offenders by training and employing them in natural resources and conservation practices.

Program and Performance

This facility was authorized under provisions of Sections 6200 to 6208 of the Penal Code. The Superintendent, Conservation Center, is to administer the center and the branches located in Tuolumne County and the North Coast area. An 80-man conservation camp will be established in the Mono-Inyo area in lieu of a branch of the center until a work program is developed sufficient to justify the establishment of a branch.

Inmates may be assigned to perform public conservation projects including, but not limited to, forest fire prevention and control, forest and watershed management, recreation area development, fish and game management, soil conservation and forest watershed revegetation.

During the prior year, program information was developed, architectural plans completed, a site acquired, and the bids let to construct the center for a population of 1,200 inmates. Construction is to be completed during the latter part of the 1961-62 fiscal year, with the first inmates being received on September 1, 1962. Completion of the architectural plans and the construction of the Tuolumne and North Coast branches for a population of 160 inmates each is scheduled for completion in the first part of the 1962-63 fiscal year.

When established, the population will consist of minimum and medium inmates received from the reception-guidance centers and from the more secure prisons. They will be given academic and vocational training designed to prepare them for assignment to the conservation camps and their ultimate rehabilitation.

The center and its branches will ultimately operate 34 conservation camps with a total population of 2,417 inmates.

A total of 16 new positions are proposed in the 1961-62 fiscal year to provide for initial staffing related to the activation of the center and branches. Even though inmates will not occupy the new facility during the 1961-62 fiscal year, it will be necessary to have a portion of the staff on the scene prior to the completion date to prepare for the activation of the facility and the inmate intake beginning in September, 1962.

The 16 new positions are classified by function as follows:

Administrative	2
Business	7
Program division	3
Medical care	2
Feeding	1
Plant operation	1

These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 64.)

GENERAL ANALYSIS

Objectives

The Correctional Training Facility protects the public by confining male prisoners under medium custody, and by so treating them as to permit their safe release to the community. A camp program is operated, and is now in the process of being expanded to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

This insitution was established as the State Prison at Soledad in 1945 and activated in 1946 at its present 907-acre site in temporary military type barracks which will remain in use in 1961-62. The first of the permanent facilities was completed in 1951; the new north unit was completed and activated in 1959. The total complex is now fully occupied. The name of the institution was changed by Chapter 936, Statutes of 1959, to the Correctional Training Facility. It is planned to continue the operation of the institution at full capacity with an average of 3,385 during the 1961-62 fiscal year.

Correctional treatment planned for inmate rehabilitation includes vocational and academic programs, industrial work, plant maintenance training, and one of the largest agricultural enterprises in the department. Group counseling, religious programs and recreational activities also play an important role. While the institution and program are designed for adult felons, vocational and academic education courses are emphasized in the north unit, as 600 Youth Authority wards are housed there with 600 of the younger adult felons.

One cell wing of the central unit is used as an adjustment center, housing inmates with severe behavior problems.

Institution population in 1961-62 may be described in general by the following characteristics:

Adult felons:

Median age, 27.1 years; 31.1 percent prior prison commitments; 21.4 percent prior escape records; offense groupings will include about 26 percent narcotics, 20 percent burglary, 21 percent robbery and 13 percent forgery and illegal checks.

Youth Authority wards:

Median age over 19.5 years; 39.9 percent prior commitments; offense groupings will include 17 percent robbery, 26.9 percent burglary, 15.8 percent auto theft and 11.1 percent narcotics.

In addition the institution is responsible for the administration of an expanding conservation camp program. During the 1960-61 fiscal year 3 permanent and 1 temporary state conservation camp will operate with inmate populations totalling 290 men until December 15, 1960. At that time the temporary camp will be replaced by a new state conservation camp and the permanent camp population will be adjusted to a total of 320 inmates. In addition to these permanent camps, on July 15, 1960, a mobile camp with 40 inmates was opened for general conservation work. During the 1961-62 fiscal year 4 permanent state conservation camps will operate with 320 inmates, and the mobile camp with 40 inmates.

The camps, manned by specially selected and trained minimum custody inmates, serve the public in the conservation of the State's natural resources through firefighting and reforestation work. This provides valuable work and excellent training experience for the inmates.

Population and release of inmates from this institution are as follows:

	1959-60	1960-61	1961-62
Average Population:			
Adult felons	3,133	3,118	3,065
Youth Authority wards	467	601	680
Totals	3,600	3,719	3,745
Paroles and Discharges:			
Adult felons	1,203	1,260	1,310
Youth Authority	565	563	540
Totals	1,768	1,823	1,850

A total of 2 new positions is proposed in the 1961-62 fiscal year budget request—1 stationary engineer for increased workload in maintenance of the added facilities, and 1 painter foreman to permit implementation of a maintenance painting program in the North Facility.

These positions are discussed in the General Analysis, Demental Summary. (See pages 59 to 64.)

GENERAL ANALYSIS

Objectives

The Deuel Vocational Institution provides custody; care; industrial, vocational, and other training; guidance and reformatory help for young men too old to be benefited by the programs of correctional schools for juveniles and too immature in crime for confinement in prisons.

Program and Performance

This institution was created in 1945 as the California Vocational Institution. In 1951 the Legislature changed the name to the Deuel Vocational Institution. The institution was originally located at Lancaster in temporary military quarters and moved to the present permanent 780-acre location near Tracy in 1953. A new 300 capacity reception-guidance center opened in September, 1960. This new facility provides for the initial processing of an average of 2,415 persons (2,040 Youth Authority wards and 375 adult felons).

The treatment program is designed to rehabilitate young offenders committed either to the Youth Authority or the Department of Corrections and emphasizes academic and vocational instruction, industrial work, and training. A special program for young men with severe behavior problems is operated in the adjustment center. A group counseling program staffed generally by volunteer leaders under trained management provides a media wherein the majority of the inmate population have an opportunity to review with their peers the causes of delinquency.

Institution population in 1960-61 may be described in general by the following characteristics:

Adult Felons:
Median age 24.1 years; 16.4 percent under 21 years of age; 5.2 percent serving life sentences; 28.4 percent prior prison commitments; offense grouping will include 25.1 percent robbery, 16.6 percent forgery and checks, 19.6 percent assault, and 16.3 percent narcotics.

Youth Authority Wards:
Median age approximately 19.5 years; 39.6 percent prior commitments; offense groupings will include over 26 percent burglary, approximately 20 percent robbery, 16 percent auto theft, and about 9 percent narcotics.

---

[a] Composed of savings in salaries and wages, $27,158; operating expenses, $158,351; equipment, $2,634; inmate pay—work projects, $618; and loss in reimbursements, $14,824.

[b] Composed of savings in salaries and wages, $65,455; and operating expenses, $10,536.

[c] Excluding cost of operating reception-guidance center, but including cost of feeding, housing, and other expenses of inmates processed therein.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The research study conducted by the Pilot Intensive Counseling Organization (PICO) will continue to evaluate first phase results. Preliminary findings indicate a significant degree of success with certain types of inmates. In the second phase, PICO will be expanded to include integrating staff efforts, both treatment and custody, to provide a community living experience and to provide a continuity of treatment between institution and parole experiences.

Phase II proposes to develop and study, over a 5-year period, (1) a community living unit within a correctional institution, (2) typologies and treatment strategies, and (3) a parole program which will be a continuation of the institutional treatment. Subjects will be young adults, both California Youth Authority wards and Department of Corrections inmates who are generally representative of the institution population. They will be housed in a 125-bed wing of the institution for periods ranging from 6 months to 2 years.

The service program to be tested will have as goals (1) transcending, through the development of a community culture, the antagonistic elements of the inmate culture, (2) utilizing and developing a previously described typology to develop individual treatment strategies, and (3) making continuous the now relatively discreet experiences of institutional and parole treatment.

This will be viewed as a staff-inmate community with efforts directed toward involving correctional officers, clinical staff, research staff, and the inmates themselves in active participation in those decisions capable of being made at the level of the community unit. Examples would be classification, discipline, and general community interaction problems. They will all be organized around studying problems of offenders and developing solutions.

The integration of institutional and parole treatment will be accomplished by (1) special attention to visiting families, (2) bringing parole agents into the institution program prior to the release of their charges, (3) development of pre-release reports with special attention to community-adjustment problems, (4) provision for temporary return to the unit when parole becomes unusually stressful.

In addition to using post-release records as measures of the project, there will be analysis of the social structure of the living unit community and of the development of the problem and treatment typologies.

Population and release of inmates from Deuel Vocational Institution are as follows:

	1959-60	1960-61	1961-62
Average Population:			
Main Institution			
Adult Felons	728	645	635
Youth Authority	665	670	695
Reception-Guidance Center			
Youth Authority	188	220	240
Adult Felons	3	45	60
Totals	1,584	1,580	1,630
Paroles and Discharges:			
Adult Felons	228	210	220
Youth Authority	696	739	678
Totals	924	949	898
Reception-Guidance Center (Intake for processing)	1,835	2,215	2,415

Four positions included under the approved standard staffing for the Reception-Guidance Center include:

1 Dentist
1 Clinical psychologist
1 Correctional counselor
1 Intermediate typist-clerk

The above proposed new positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 64.)

GENERAL ANALYSIS

Objectives

The State Prison at Folsom protects the public by confining chronic male adult offenders, 8 percent of whom require maximum or close custody supervision. The program is designed to protect the public through a treatment process to bring about an adjustment which will permit their safe release to the community. A camp program is provided as an integral part of the rehabilitation process. It is designed to provide useful employment in a minimum custody setting for carefully selected inmates who can be expected to profit from this type of a gradual release experience.

Program and Performance

This institution was established in 1880 on a 1,700-acre site in Sacramento County. The institution is expected to confine an average of 2,510 inmates in 1960-61 and 2,485 inmates during 1961-62.

Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, plant maintenance work and training, group counseling, medical and dental care, religious, library, and recreational activities. Because of the overcrowding of the institution some idleness will exist during 1960-61 as well as during 1961-62.

A special unit, the 138 capacity adjustment center, provides control and treatment of many of the department's most severe behavior problem cases. The institutional population for 1961-62 may be described in general by the following characteristics: Median age 38; 89 percent prior prison commitments; 36 percent prior escape records; 8 percent serving life terms; offense groupings will include over 25 percent robbery; over 6 percent homicide; over 20 percent burglary; over 12 percent narcotics; over 11 percent forgery and illegal checks.

In addition the prison is responsible for the administration of 6 year-round state conservation camps as well as 1 which will be located for approximately 6 months in Calaveras Big Trees State Park and 6 months at Folsom Lake State Park. In addition the institution currently operates 2 seasonal camps for the United States Forest Service.

During 1960-61 it is planned to activate a mobile camp having a capacity of 40 in August 1960 and a new conservation camp with a capacity of 80 in April 1961. The addition will bring the year-end camp population to 607 in both 1960-61 and 1961-62.

These camps, manned by specially selected minimum custody inmates, serve the public through conservation of the State's

---

[a] Composed of savings in salaries and wages, $24,317; operating expenses, $54,642; equipment, $2,912; inmate pay—work projects, $355; and loss in reimbursements, $676.

[b] Composed of savings in salaries and wages, $84,486; operating expenses, $109,615; and excess reimbursements, $40.

[c] Includes $21,555 for rental payment applicable in the 1959-60 fiscal year.

natural resources by fire fighting and reforestation work. This also provides a valuable work and training experience for the inmates.

Population and release of men from this institution and its camps are as follows:

	1959-60	1960-61	1961-62
Average population, including camps	2,776	2,988	3,038
Paroles and discharges	977	1,050	1,100

A total of 6 new positions is proposed in the 1961-62 fiscal year. One additional typist-clerk and 1 correctional counselor are requested to handle the increased workload in classification and parole and a correctional officer—mechanic, a correctional officer—driver, and a correctional sergeant are requested due to the increase in bus movement necessitated by the new institution at San Luis Obispo and the increased number of camps, and 1 correctional officer is added as required relief. These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 64.)

GENERAL ANALYSIS

Objectives

The Institution for Men has as its objective the protection of the public by confining for training and treatment the more tractable young male offenders with the majority under minimum custody.

The Institution for Men is composed of the main institution and Reception-Guidance Center at Chino, a branch institution at Tehachapi, and an extensive conservation camp system.

Program and Performance

This institution was established in 1941 on a 2,500-acre tract south of Chino in San Bernardino County. The main institution will house an average 1,495 inmates during the 1961-62 fiscal year.

The Reception-Guidance Center receives all new male commitments from the southern counties. It will operate at a load of 550 during the 1961-62 fiscal year, processing an estimated 3,575 cases. It will receive a total of 5,818 individuals including 3,800 adult felons, 880 parole violators and 1,138 Youth Authority wards.

The Tehachapi branch was opened in 1955 after the earthquake-damaged facilities were repaired. It will operate at a capacity population of 595 during the 1961-62 fiscal year.

Correctional treatment at the main institution is designed primarily for carefully screened young male offenders capable of profiting by the program and accepting its responsibilities. It covers a broad field of vocational and academic instruction, plus a wide variety of industrial activities, including an extensive agricultural program. A large number of medium security men, however, are held at the Tehachapi branch, which was originally designed as a minimum custody facility. That this has been successfully accomplished is attributed in large part to the group counseling program which is particularly emphasized at the Tehachapi branch.

The main institution population, excluding camps, in 1961-62 may be described in general by the following characteristics: median age is 31 years; 34 percent have prior commitment records; offense groupings will include about 30 percent forgery and illegal checks, 23 percent burglary, 21 percent robbery, and 5 percent narcotics.

The Tehachapi branch population in 1961-62 may be described in general by the following characteristics: median age is 33 years; offense groupings will include about 17 percent burglary, 21 percent forgery and illegal checks, 12 percent robbery, and 31 percent narcotics; 48 percent have prior commitment records.

The institution at present also administers 7 year-round conservation camps in co-operation with the state conservation program—6 with the State Division of Forestry, and 1 with the State Division of Highways. The year-end camp population will total 615.

Since January 1960 the institution has provided services including hospital, laundry, bakery, trash and garbage disposal, as well as sewage disposal, to the new Youth Training School located on the institution tract. Also, the institution has been providing laundry services to the Fred C. Nelles School for Boys (Youth Authority) and the Southern Reception Center and Clinic (Youth Authority).

Population and release of men from this institution are as follows:

	1959-60	1960-61	1961-62
Average Population:			
Institution	1,489	1,455	1,435
Narcotic Clinic	11	60	60
Camps	560	612	615
Tehachapi	487	530	595

Parole Violators	761	830	880
Youth Authority	1,149	1,055	1,138
Totals	5,464	5,535	5,818
Total Cases Processed—Adult Authority	3,554	3,575	3,575

---

[a] Gross cost of operating camps (exclusive of reimbursements) for 1959-60 was $776,473; it is estimated to be $885,636 for 1960-61 and $878,913 for 1961-62.

[b] Excludes cost of operating Reception-Guidance Center, but includes cost of feeding, housing, medical and other expenses of the inmates being processed therein.

Department of Corrections

INSTITUTION FOR MEN—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

During 1960-61 the housing wing of the Reception-Guidance Center expansion was completed. Because of the extreme overcrowded condition in the existing housing unit, the new housing unit was activated while the construction of the program portion of the expansion was completed. Five correctional officers were temporarily approved in 1960-61 to supervise the new housing unit. With the completion of the entire facility in August 1961, the 5 correctional officers are shown as proposed new and in addition the balance of the staff is required and includes 1 correctional officer, 1 correctional counselor I, and 1 intermediate typist-clerk.

Hospital facilities at the main institution provide services for the Reception-Guidance Center and the Youth Training School in addition to the main institution. The expansion of the Reception-Guidance Center and the Youth Training School require additional hospital facilities. A 50-bed addition will be completed in March 1962 and will require 5 nurses, 5 correctional officers, and 1 surgical nurse. All hospital population is included in the population of the 3 facilities and does not increase the capacity of the main institution.

One position is provided for the personnel office based on previously approved ratio, and 1 engineer for maintenance of added facilities.

Four proposed new positions at Tehachapi include 1 correctional sergeant as fire chief and gate area supervisor, 1 correctional officer as relief for program personnel, 1 clerk based on the classification parole ratio, and 1 clerk to complete the property records.

These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 64.)

GENERAL ANALYSIS

Objectives

The Medical Facility is the psychiatric diagnostic and treatment center of the department. It confines and treats adult male felons who are mentally ill or who have severe mental or emotional disorders. These include psychotic, severe neurotic, and anti-social character disorders. A small number of recalcitrant tuberculars are housed here also.

A reception-guidance center located in facilities adjourning the main institution receives adult male felons from the 47 northern counties for diagnosis, classification and recommended institutional placement. It also receives male parole violators returned to prison from the entire State.

Program and Performance

The Medical Facility occupies permanent facilities in Solano County on a 900-acre site near Vacaville. This facility will process an estimated 4,250 cases during 1961-62.

Group psychotherapy is the major treatment method at the Medical Facility.

Programs of academic and vocational education, plant maintenance work and training, medical and dental care, library, recreation and religion are offered to all inmates to the degree to which they can participate. These programs are designed to provide intensive treatment for felons afflicted with major mental illnesses (psychoses) and severe emotional and personality disorders, particularly the latter. A sizeable number of problem cases are also admitted expressly for psychiatric evaluation and recommendation with respect to disposition. Although the overwhelming majority are adult felons, there is a small number of wards from the Youth Authority and tuberculous recalcitrant misdemeanants from the Department of Public Health.

The prison population in 1961-62 may be described in general as follows:

Median age, 30.3 years; 38 percent prior prison commitments; 2.3 percent prior escape record; offense groupings will include 21 percent sex offenders, 17 percent burglary, 17 percent robbery, 12 percent forgery and checks, and 7.1 percent narcotics.

This prison population may also be described in terms of medical classifications as follows:

Psychiatric observation cases, 35—168 cases per year for diagnosis and evaluation for the Adult Authority, courts or other institutions;

Active treatment cases, 730—group therapy, 650; special treatment, 80—consists of patients with treatable mental or emotional disorders;

Care cases for continuous treatment, 160—homosexuals, 40; chronic psychotics, 60; mental defectives, 30; severe neurological, 30;

Administrative cases, 125—awaiting transfer, etc., 75; departmental policy cases, 35; tuberculosis, 15;

Workers, 300—skilled craftsmen, cooks, clerks, nurses, technicians, etc.; assigned primarily for maintenance of the institution.

Population and release of men from this institution are as follows:

	1959-60	1960-61	1961-62
Medical Facility:			
Average population	1,360	1,350	1,350
Paroled and discharged	372	375	390
Reception-Guidance Center:			
Average population	642	610	655
Intake for processing	3,995	3,900	4,250

A total of 9 proposed new positions are included in the 1961-62 fiscal year. These include 1 clerical position for the increased workload in the Personnel Office; 3 correctional sergeants to provide additional coverage of inmate housing during the second and third watches plus relief; 1 correctional counselor II to supervise group counseling which has just been started in this institution and a temporary help position to provide for the overtime required in the group counseling program.

Three positions will be assigned to the Reception-Guidance Center on formula computations as follows: 1 dentist II, 1 correctional counselor II, and 1 clerical position. These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 64.)

GENERAL ANALYSIS

Objectives

This facility protects and serves the public by confining male prisoners under medium custody and by so treating them as to permit their safe release to the community.

Program and Performance

The Men's Colony (California Medium Security Prison) is a permanent medium security institution for 2,400 inmates and is under construction adjacent to the minimum security facilities. It is scheduled for completion in April of 1961. It will start receiving inmates in July 1961. The existing temporary Men's Colony (West Facility) will continue to operate separately but the deputy superintendent in charge of each of the facilities will be responsible to the superintendent.

This new institution is unique in design in order to make possible a more personal relationship between the inmate and the treatment staff, and, at the same time, effect economies of central facilities for service and supply. It is so planned as to provide 4 segregated areas for 600 men each. Housing, feeding, outdoor and indoor recreation, elementary education, and group counseling facilities are provided within each unit.

The staffing of the new institution utilized the treatment team concept adopted for the two 600-man units of the North Facility at Soledad. A program administrator will be in charge of each of the four 600-man units, and will supervise both treatment and custodial personnel assigned to the unit.

From the standpoint of the type of inmate involved, Housing Unit 1 will be materially different from the other 3 units, having assigned thereto the following types of inmates:

a. Psychotic and psychoneurotic	250
b. Aged and infirmed inmates not suitable for West Facility	200
c. Medically restricted and medical rehabilitation cases	100
d. Newly received inmates and inmates in "in-route" status	50
Total	600

This type of inmate and the work necessary to supervise, handle and treat them will require at least double the amount of time per inmate patient as that necessary in other units.

Inmates from the units will participate in training, treatment, recreation, religion, industrial, and other work assignments outside of their units.

Population and release of inmates from the Men's Colony—East Facility are as follows:

	1959-60	1960-61	1961-62
Average population	–	–	1,010
Parole and discharges	–	–	65

A total of 280 new positions are proposed in the 1961-62 fiscal year. These positions are classified by function as follows:

Administrative	2
Business office	6
Custody	177
Care and treatment	8.8
Classification and parole	22
Medical	29
Special unit	4
Education	15
Feeding	5.2
Clothing	1
Laundry	2
Plant operation	8
Total	280

These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 64.)

---

[a] Composed of savings in operating expenses, $58,965; equipment, $850; inmate pay—work projects, $434; and loss in reimbursements, $13,937.

[b] Composed of savings in salaries and wages, $66,565; operating expenses, $30,655; and loss in reimbursements, $12,030.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS

Objectives

The Men's Colony—West Facility protects the public by confining aged, infirm, and other handicapped male felons and by so treating and training them that they can be safely released, many of them to become self-sustaining members of their communities.

Program and Performance

The Men's Colony—West Facility (California Medium Security Prison) was authorized by the Legislature in 1949. It was established in 1954 on a 220-acre site in the hospital area of Camp San Luis Obispo. The post office address is Los Padres. The institution will house an average of 1,348 men in 1961-62.

The correctional program is designed primarily for the retraining, rehabilitation and return to civilian life of the elderly and infirm offender. This program includes a small vocational program, an academic program in conjunction with the San Luis Obispo School District, group counseling, organized recreation, Alcoholics Anonymous assistance, arts and crafts training, and religious guidance.

In addition, during the 1961-62 fiscal years, the institution will open and operate 1 new permanent state conservation camp with an inmate population of 80 men. This camp, manned by specially selected and trained minimum custody inmates, serves the public in the conservation of the State's natural resources through fire fighting and reforestation work. The institution's 1961-62 population may be described in general by the following characteristics: median age about 54 years, 62 percent with prior prison commitments, 8 percent serving life sentences; offense groupings will include about 22 percent sex offenses, 20 percent forgery and illegal checks, and more than 14 percent homicide. Some will be blind, paralyzed, senile, or lacking limbs.

Population and release of inmates from the Men's Colony, West Facility are as follows:

	1959-60	1960-61	1961-62
Average population	1,332	1,350	1,348
Parole and discharges	502	535	600

One proposed new position of Correctional Lieutenant is requested to provide supervision for the new state forestry camp scheduled to open January 1, 1962. Overtime for fire fighting is also added. These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 64.)

GENERAL ANALYSIS

Objectives

The State Prison at San Quentin protects the public by confining adult male felons under close-medium security and by so treating them as to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

The institution is expected to confine an average of 4,518 inmates in 1961-62. Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, group counseling, medical and dental care, and religious, library, and recreational activities. Because of overcrowding of the institution some idleness will exist during 1961-62.

A special unit at San Quentin provides custody of inmates sentenced to death and provides for their execution under the death penalty.

The 101-capacity adjustment center, a special unit to provide control and treatment of the most severe behavior problem cases, was activated during August 1960.

The Narcotic Treatment Control Project was activated in August 1960. During 1961-62 this unit will consist of an average population of 20 parolees who will be housed at the construction dormitory and will have a half-day treatment and a half-day work program.

The institution population for 1961-62 may be described in general by the following characteristics: median age 30; about 45 percent prior prison commitments; about 25.1 percent prior escape records; 5.3 percent serving a life sentence; offense groupings will include 9.6 percent homicide, 21.8 percent robbery, 15.1 percent burglary, and 17.8 percent narcotics.

San Quentin is responsible for the administration of 7 year-round road and conservation camps, 1 mobile camp and 1 seasonal United States Forest Service camp. It is planned to open 1 conservation camp with a capacity of 80 in February 1962 which will bring the year-end camp population to 690 in the 1961-62 fiscal year.

---

[a] Composed of savings in salaries and wages, $4,326; operating expenses, $51,575; equipment, $955; inmate pay—work projects, $222; and excess reimbursements, $2,743.

[b] Composed of savings in salaries and wages, $34,483; and excess reimbursements, $1,630.

STATE PRISON AT SAN QUENTIN—Continued

SUMMARY AND GENERAL ANALYSIS — ACTUAL 1959-60 — ESTIMATED 1960-61 — PROPOSED 1961-62

These camps, manned by specially selected minimum custody inmates, serve the public by aiding in the conservation of the State's natural resources through fire fighting and reforestation work. The highway road camp inmates perform highway maintenance and construction work in remote areas of Northern California. This provides valuable work and training experience for the inmates.

Population and release of men from this institution and its camps are as follows:

	1959-60	1960-61	1961-62
Average population	4,326	5,257	5,129
Paroles and discharges	1,464	1,600	1,635

A total of 15.6 new positions are proposed for the 1961-62 fiscal year. Of this total, 2.2 professional positions and 1 clerical position are proposed to augment the staffing and provide a treatment team for the Adjustment Center, while 12.4 positions are included for staffing of 2 new 80-man conservation camps opening in February 1962 and July 1962. These positions are discussed in the General Analysis. Departmental Summary. (See pages 59 to 64.)

GENERAL ANALYSIS

Objectives

The Institution for Women receives and confines all types of female prisoners committed to the Department of Corrections and so treats them as to permit their safe release to the community.

Program and Performance

The correctional treatment program is designed for the rehabilitation of women inmates and includes courses of academic and vocational instruction, group psychotherapy and counseling, medical and dental care, and religious, library, and recreational activities. There is also an active industrial program consisting of the manufacturing of garments as well as other sewing projects such as designing, dressmaking, alterations, and tailoring; laundry and food service training.

A study is made of all women entering the institution and a classification committee works with the inmate to develop an individual treatment program based on her physical and mental condition, aptitudes and skills, educational background, and social history.

There is an active program of work, education, and recreation in which every woman is required to participate daily. Individual and group therapy for the more seriously disturbed inmates is conducted by a staff of psychiatrists and psychologists. The majority of inmates receive individual and group counseling, which is conducted by other staff members.

---

[a] Composed of savings in salaries and wages, $18,859; operating expenses, $362,210; equipment, $2,840; inmate pay—work projects, $500; and loss in reimbursements, $20,101.

[b] Composed of savings in salaries and wages, $77,776; operating expenses, $93,608; and excess reimbursements, $5,693.

[c] Includes payment of rent for prior years.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The institution will house a unit of the Narcotic Control Treatment program which is a pilot project designed to reduce the amount of addiction recurrence.

The present population of the institution may be described in general as having the following characteristics: median age 33 years; 23 percent prior prison commitments; 3 percent serving life sentences; offense groupings include 35 percent forgery and illegal checks; 24 percent narcotics; 10 percent homicide, and 10 percent thefts other than auto thefts.

While the present capacity of the institution will be 801, an average population of 894 is estimated for 1960-61 which is anticipated to increase to 940 in 1961-62.

Population and release of women from this institution are as follows:

	1959-60	1960-61	1961-62
Average population	820	894	940
Paroles and discharges	335	475	430

Increasing population and need for more work projects represents the primary reason for needing the following proposed new positions:

2 women's correctional supervisor I
3 supervising cook
1 women's correctional supervisor I—paint crew

The following positions are needed to provide necessary plant and business services:

1 accounting technician II
1 plumber I

These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 64.)

Objectives

The Adult Authority is composed of 7 members appointed by the Governor for a term of 4 years.

The Adult Authority is the term-fixing and parole-granting agency in California for the adult male felons. The authority is fundamentally concerned with rehabilitation of adult male felons and with the release of these individuals at a time which is compatible with the interests of both the inmate and society.

The members of the Adult Authority serve on the State Board of Corrections and act as the Advisory Pardon Board to the Governor on matters of executive clemency as well as assuming responsibility for investigating and reporting to him on condemned cases.

Program and Performance

The Adult Authority meets at each of the several state correctional institutions regularly and conducts hearings by organizing into panels for the purpose of fixing terms, granting paroles, determination and forfeiture of credits, and restoration of certain civil rights requested by inmates.

The authority meets weekly to consider reports and recommendations submitted by the Adult Parole Division concerning revocation of parole, restoration of certain civil rights requested by parolees, reinstatements and refixing terms of parolees. The Adult Authority also plays a vital role in the narcotics treatment program as it approves the placement of parolees in this program for treatment of narcotic addiction.

During the fiscal year 1959-60, the Adult Authority heard a total of 22,525 cases. It is estimated that a total of 23,300 cases will be reviewed by the board during the fiscal year 1960-61 and 24,500 cases in 1961-62.

GENERAL ANALYSIS

Objectives

The Board of Trustees, California Institution for Women, is responsible under the Indeterminate Sentence Law for fixing the terms of adult female felons and the granting or revoking of parole to such women. The board is also responsible for administration of the Women's Parole Division which supervises all adult female felons released on parole from the Institution for Women and those women released from other co-operating states to parole programs in California. It also may advise the Director of Corrections on general policies for the maintenance and operation of the California Institution for Women and the care, custody, treatment, training, discipline and the employment of women confined at the institution. The objective of the board is the protection of society by the setting of appropriate terms, careful selection of those women to be released on parole and their proper supervision while on parole.

Program and Performance

The Board of Trustees consists of 5 members, 3 of whom shall be women. They are appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years. The board maintains its office in Los Angeles; the parole division has offices in Los Angeles and San Francisco.

The board meets regularly, reviewing the individual cases and studying the histories of the women prisoners. The increasing workload of the board is reflected in increasing population of the Institution for Women, which has risen from an average of 820 in 1959-60 to an estimated 894 in 1960-61 and 940 in 1961-62.

The board's increasing responsibilities and workload are also reflected in the rise in parole population. Parole agents responsible to the board will supervise an estimated 775 parolees in 1961-62 compared to an estimated 776 parolees in the current year and an actual 655 in the 1959-60 fiscal year.

The Board of Trustees is participating in the Department of Corrections' Narcotics Treatment Control Project through the assignment of 1 parole agent to this phase of rehabilitation.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

GENERAL ANALYSIS

Objectives

The objectives of the Youth Authority are first, the protection of society by substituting for retributive punishment, training, and treatment directed toward the correction and rehabilitation of young persons declared wards for delinquent causes or found guilty of public offenses; and second, prevention of the occurrence of delinquency. In addition, the department encourages improvements in juvenile law enforcement and probation and increased use of county juvenile homes and camps.

Program and Performance

The Department of the Youth Authority was originally conceived as the Youth Correction Authority by the Legislature in 1941. Amendments to the original law in 1943 created the present Department of the Youth Authority and gave it responsibility for the administration of the State's correctional schools and parole program for youths. The law provides that commitments can be made to the Youth Authority by judges of the superior court sitting in juvenile or criminal court and judges of the municipal court after they have determined that the youth is under 21 years of age at the time of apprehension and that there is no program at the county level to meet the special needs of the individual.

The director of the Youth Authority is the chief administrative officer of the department and chairman of the Youth Authority Board. He is directly responsible for the management of the State's correction schools, reception center-clinics, youth conservation camps, and for the operation of field services and branch offices. He is responsible for the custody, care, treatment, training, discipline, welfare and supervision of wards committed to the Youth Authority, whether in the institutions or on parole in the community.

The Youth Authority Board is concerned with acceptance or rejection of wards committed to the Youth Authority and with parole and discharge of wards. It also works with the director in the formulation of policies concerning classification, transfer, training and treatment of wards.

The years between 1941 and 1943 gave the Youth Authority time to develop a plan of organization and a pattern for diagnosis, training and treatment, and community organization. The 3 institutions transferred to the Youth Authority in 1943—Preston School of Industry, Fred C. Nelles School for Boys and Ventura School for Girls—have increased to 7 institutions, 2 reception center-clinics, and 4 Youth Authority conservation camps for boys. The first 400-bed unit of a new institution for older boys was occupied in January 1960, and the second 400-bed unit will be occupied in March 1961. This new institution, the Youth Training School, is located near Ontario. A new Ventura School for Girls is also planned to replace the present school which was constructed in 1917 as a temporary institution. The first 400-beds of this new institution are scheduled for occupancy beginning February 1962.

The research division was authorized by the 1957 Legislature to provide the department with the means to conduct research into the fields of human behavior as related to its wards and in the specific field of delinquency, its causative factors, treatment and prevention.

Research programs are now under way to test the effectiveness of psychiatric treatment in institutions, optimum parole caseloads, base expectancy predictions and other programs to aid in better measurement of existing programs and evaluation of proposed plans for improving the treatment of delinquent youth.

The research division also includes the records and statistics section which is responsible for population accounting for wards in institutions and on parole. This section also provides population forecasts used in planning for capital outlay and current operations.

The Department of the Youth Authority has centralized parole services by shifting the operation from the 3 original institutions into a separate bureau responsible for continuing the treatment and supervision of the ward after his release from a correctional school and upon his return to the community. Branch offices have been opened in a number of the larger cities to provide for more efficiency and better service. Institution and parole operations are carefully co-ordinated in the interests of maintaining a continuous program of rehabilitation and training for each ward.

During 1961-62 the institutions of the Department of the Youth Authority will have an estimated average daily population of 4,341. These facilities include 2 reception center-clinics, 5 schools for boys, 2 schools for girls and 4 Youth Authority camps for boys. In addition, an average of 1,650 wards will be in Department of Corrections institutions. Also, during 1961-62 the Youth Authority will supervise an estimated average parole caseload of 10,586, as compared with 9,141 during 1959-60.

The bureau of probation and delinquency prevention services conducts a program to develop an awareness of the value of local delinquency prevention programs and the need for adequate community services, and assists in improving them. Training programs are provided for probation officers; counties are assisted in developing plans for new homes, camps and juvenile halls; the interstate compact for juveniles is administered; and publications are developed that are directed toward improving the quality of local services.

The Department of the Youth Authority's institutional program for handling the wards committed to it by the various counties includes:

Diagnosis: A diagnostic study and evaluation is made of each ward committed to the Youth Authority. This study and evaluation, made during the ward's stay in a reception center and clinic, is for the purpose of diagnosing the cause of the ward's delinquency and making recommendations for a program of individualized treatment to correct the ward's behavior pattern. This study and evaluation results in a recommendation of the degree of custodial supervision required, educational needs, medical and dental care, psychological or psychiatric therapy needed to treat the ward's mental and emotional needs, religious training and other programs that will aid in the ward's return to society as a useful citizen.

Treatment: The correctional programs carried on in the institutions are designed to enable the Youth Authority to achieve a high degree of training and treatment in the institutional setting and to guide the ward in the development of good moral standards.

Special Treatment Program: The 1957 Legislature gave the Youth Authority the responsibility for the custody and treatment of a group of wards who have severe emotional and behavioral problems and who are in need of professional, psychiatric-type treatment. The department was not previously equipped to handle both a custodial training program and psychological and psychiatric therapy services. Staff was authorized for the diagnosis and treatment division for the planning, control, and supervision of this program. Preston School of Industry, Fred C. Nelles School for Boys and Los Guilucos School for Girls have been authorized staff for the first 3 treatment units.

Expansion of this program to the Paso Robles School for Boys in July of 1961 and the Ventura School for Girls upon occupancy of the new institution in February 1962 is proposed in the 1961-62 fiscal year. Salaries and wages costs for the 12 positions assigned to the Paso Robles School for Boys total $64,668. Salaries and wages costs for the partial year staffing of 12 positions at the Ventura School for Girls total $28,762.

Capacity being completed during the 1960-61 fiscal year for additional population include the following: Northern Reception Center and Clinic—49-boy living unit; Paso Robles School for Boys—8-bed addition to admission unit; Preston School of Industry—2 50-boy special treatment program living units; Youth Training School—second 400-bed increment; Washington Ridge Youth Conservation Camp—80-boy camp.

Presently financed construction to be completed in 1961-62 includes the following: Northern Reception Center and Clinic—50-boy dormitory; Fricot Ranch School for Boys—50-boy dormitory; Fred C. Nelles School for Boys—4 50-boy living units; Youth Training School—third 400-bed living unit; Ventura School for Girls—400-bed capacity at the new Ventura School for Girls, and Los Guilucos School for Girls—41-bed psychiatric treatment program living unit.

The department also administers programs to give financial assistance to counties in the construction and maintenance of juvenile homes and camps caring for wards who could otherwise be committed to the Youth Authority. During this fiscal year it is expected that there will be 39 county operated homes and camps. It is estimated that an average of 2,450 boys and girls will be housed in these facilities.

The Youth Authority is charged with responsibility for establishment of standards and the administration of this state aid. The construction subsidy program was established by the Legislature in 1957. Funds already allocated and proposed are sufficient to finance the State's share of 1,236 county camp beds.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary accounts for the $3,029,193 (16.5 percent) increase in 1961-62 expenditures over 1960-61. Increases are mainly for additional workload due to operation of new facilities, increased parole caseload, extension of the special treatment program and increase in wards processed through the reception centers.

Additional personnel for staffing new facilities:		
a. Youth Training School (122.9)	$394,528	
b. Fred C. Nelles School for Boys—2 additional living units (20.8)	41,571	
c. Northern Reception Center and Clinic—additional living unit (8)	20,806	
d. Ventura School for Girls—new institution (including special treatment) (80.2)	186,040	
		$642,945
Additional personnel for institution workload changes:		
a. Positions in accordance with established workload standards and increased population (12.6)	$49,047	
b. Administration and plant operation (12)	63,006	
c. Food service and housekeeping (2)	6,630	
		$118,683
Community treatment program (10.2)		56,348
Narcotics treatment program (5)		28,920
Parole positions for increased parole population (19.3)		96,115
Special treatment program—Paso Robles (12)		64,668
Research (12.2)		74,886
Additional personnel for increased workload in Departmental Administration (17)		95,448
Net increased cost in authorized positions due to full year costs of positions authorized during the current year, improved employment conditions and salary changes		1,084,119
Changes in operating expenses and equipment:		
a. Increases in feeding, medical care, parole costs and utilities primarily due to population increases and new facilities		486,632
b. Other items of operating expenses		330,103
c. Decrease in equipment		—106,390
Additional reimbursements		—80,172
Increase in contributions to State Employees' Retirement Fund		103,498
Other current expenses reflecting increased number of paroles		33,390
Total		$3,029,193

SUMMARY OF PROPOSED NEW POSITIONS

The following 334.2 proposed new positions, at a cost of $1,178,013, are included in the various institution budgets and Departmental Administration. One hundred twenty-two and nine tenths of these positions are proposed for the Youth Training School, 81.7 for the new Ventura School for Girls, and 20.8 for Fred C. Nelles School for Boys and are discussed in 3 groups. The other positions are discussed in the functional grouping in which they are to be used.

Youth Training School

122.9 Positions $394,528

One hundred twenty-two and nine tenths positions are proposed in the areas of custodial and personal care, classification and counseling, education and religion, medical care, food preparation, plant operation, and business services. Positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions at other institutions and if not based on either of these, minimum requirements due to considerations of physical plant, type of ward, institution program and organizational structure.

The effective dates of the new positions are based on the availability of the third 400-ward living unit and the receiving of wards for this unit beginning in November, 1961, and population buildup to maximum capacity of 1,200 during the 1961-62 fiscal year. Generally, the positions have been phased to permit from 2 weeks to 1 month's time for recruitment, orientation and training prior to the arrival of this group of wards.

Ventura School for Girls

81.7 Positions $186,040

Eighty-one and seven tenths positions are proposed in the areas of custodial and personal care, classification and counseling, education and religion, medical care, food preparation, plant operation, and business services. Positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions at other institutions, and if not based on either of these, minimum requirements due to considerations of physical plant, type of ward, institution program and organizational structure.

The effective dates of the new positions are based on the availability of the new institution and the receiving and transfer of wards beginning in February, 1962, and estimated population buildup to 320 by June 30, 1962. Generally, the positions have been phased to permit from 2 weeks to 1 month's time for recruitment, orien-

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

VENTURA SCHOOL FOR GIRLS—Continued

tation and training prior to the arrival of this group of wards.

Also included in the 81.7 positions is a Special Treatment Unit composed of 8 professional and 4 clerical positions. This is 1 of the 2 institutions to which this program is proposed for 1961-62.

Fred C. Nelles School for Boys

20.8	Positions		$41,571

Twenty and eight-tenths positions are proposed in the areas of custodial and personal care, classification and counseling, education and religion, and food preparation. Positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions at other institutions, and if not based on either of these, minimum requirements due to considerations of physical plant, type of ward, institution program and organizational structure.

The effective dates of the new positions are based on the availability of 2 new 50-boy living units and the receiving of wards for these units beginning in April 1962, and estimated population buildup to 438 by June 30, 1962. Generally, the positions have been phased to permit from 2 weeks' to 1 month's time for recruitment, orientation and training prior to the arrival of this group of wards.

It is anticipated in 1961-62 fiscal year that Wrigley cottage will be closed for alterations for a period of 9 months. The capacity for this cottage will be moved into 2 new living units being filled during the early part of 1961-62 fiscal year.

Executive Office, Administration

1	Management consultant	$7,728	
1	Assistant administrative analyst	6,672	
1	Assistant to the director	10,344	
2	Intermediate stenographer-clerk	8,388	
5	Total		$33,132

The management consultant is provided to meet the increasing workload in dealing with management and labor based on increased population and the new program at Youth Training School. The assistant to the director is provided to facilitate communications and assist the director in evaluating program on a current basis. The administrative analyst is proposed to meet increased administrative planning and organizational study workload created by the growth of the department in population and facilities. The 2 clerical positions are to provide clerical assistance to these new positions, excluding the administrative analyst.

Research Division

2	Senior research analyst	$19,704	
2	Associate research analyst	16,224	
1	Assistant research technician	6,672	
1	Junior research technician	5,496	
1	Senior typist-clerk	4,512	
2	Intermediate stenographer-clerk	7,890	
3	Intermediate typist-clerk	11,988	
0.2	Consultant services	2,400	
12.2	Total		$74,886

One senior research analyst, 1 associate research analyst, 1 assistant research analyst, 1 senior typist-clerk, 1 intermediate stenographer-clerk, and 1 intermediate typist-clerk are proposed to staff the Community Treatment Program. An additional 10.2 positions related to this same program are discussed under parole services in this summary and general analyses. These positions are to be financed by a proposed federal grant on a reimbursement basis.

One senior research analyst, 1 intermediate stenographer-clerk, and 1 intermediate typist-clerk are proposed to continue and expand the measurement development and classification program. This program is designed to assist the department in determining which wards will require a minimum of institution treatment to return them to society as useful citizens.

One associate research analyst is proposed to continue the research into the effectiveness of the psychiatric treatment and group counseling programs in the institutions.

One junior research technician and 1 intermediate typist-clerk are included to meet the increase in workload in the population accounting and reports section due to increased institution and parole caseload.

Two-tenths consultant services will provide for outside specialized assistance in establishing research structures.

Parole Services

1	Assistant chief	$9,384	
1	Parole agent IV	8,940	
1	Parole agent III	3,864	
3	Parole agent II	15,768	
6	Parole agent I	32,800	
2	Senior stenographer-clerk	9,024	
4	Intermediate typist-clerk	11,924	
1.3	Parole agent trainee—reclassification	4,411	
19.3	Total		$96,115

Thirteen positions are included for the Bureau of Paroles to provide for the increased parole caseload in accordance with currently authorized caseload ratios.

Two parole agent II positions are a deviation from authorized caseload ratios to provide an administrative assistant and training officer for the bureau, and the 1 assistant chief to meet increased workload based upon increased parole population. This latter position also contemplates a reorganization of the bureau into a division. Two senior stenographer-clerks are provided based upon the contemplated reorganization. One and three-tenths parole agent trainee—reclassification positions are provided to facilitate recruitment of trained parole agents.

Community Treatment Program—Parole Supervision

1	Supervisor of community treatment	$8,520	
6	Parole agent II—therapist	35,040	
1	Senior clerk	3,760	
2	Intermediate typist-clerk	6,628	
0.2	Consultant services	2,400	
10.2	Total		$56,348

This new program will provide for the release of selected wards to parole and their communities earlier than would normally be prescribed. The program will provide close caseload coverage (8 wards to 1 parole agent initially) and the research statistics to determine the value of institutional treatment as related to parole treatment for certain groups of wards. The supervisor of this program will be fully reimbursed from federal funds.

Parolee Narcotics Treatment Program (Nalline Testing)

1	Associate research analyst	$8,112	
1	Intermediate stenographer-clerk	4,092	
2	Parole agent I	12,720	
1	Intermediate typist-clerk	3,996	
5	Total		$28,920

This program is to provide for testing of certain parolees for narcotics use during their terms on parole. The results of these nalline tests will be the grounds upon which the parolees will be exonerated from suspicion of use or returned by Youth Authority Board order for further treatment at an institution or clinic.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Special Treatment Program—Paso Robles

1	Staff psychiatrist	$11,976	
1	Supervisor of special treatment	8,520	
1	Clinical psychologist II	6,440	
1	Supervising social worker	5,840	
4	Senior social worker	18,020	
1	Senior stenographer-clerk	4,512	
3	Intermediate stenographer-clerk	9,360	
12	Total		$64,668

As noted in the prior discussion in Ventura School for Girls, a special treatment unit is proposed for that institution along with this unit for Paso Robles.

These above-mentioned positions are included to permit extension of the special treatment program to Paso Robles School for Boys. This, combined with Ventura's proposal, will provide this treatment in all institutions excluding Fricot Ranch School for Boys. This program is designed to meet the special needs of a group of wards regarded as not suited for existing Youth Authority programs because of serious personality disturbances or because of the need for professional therapy not now provided.

Delinquency Prevention

1	Field representative	$7,008	
0.5	Intermediate typist-clerk	1,950	
1.5	Total		$8,958

This representative and clerical assistance are provided to meet demands by counties requesting advice on juvenile delinquency prevention programs. With the increase in requests, this position is necessary to cover one-half of the State because of its vast geographical area.

Administration and Personnel

2 Intermediate typist-clerk $7,992

These positions are provided to meet increased institutional and parole population as the records office workload is directly related to total ward population.

0.5 Intermediate stenographer-clerk 2,097

This position is included to meet increased workload in the Administrative Services Division, and also to provide clerical assistance to the proposed new administrative analyst.

3 Intermediate account-clerk 11,988

These 3 positions are provided to meet the increased workload in the central accounting office based on the addition of Washington Ridge Forestry Camp late in the 1960-61 year, and the normal workload increase created by institutional and population increase.

1 Intermediate typist-clerk 3,996
0.5 Intermediate stenographer-clerk 2,097

The 1 typist-clerk position included for the personnel office in departmental administration is to meet workload due to increased number of employees in accordance with the current staffing formula. The stenographer will provide clerical assitance to meet previously recognized but unmet workload.

2 Transportation officer 10,464

These positions will provide the necessary number of personnel to transport wards to and from institutions. The workload necessarily directly corresponds to the number of institutions, their population and wards on parole.

1 Correctional facilities planning specialist 12,576
0.5 Intermediate stenographer-clerk 2,148

This professional position, along with clerical assistance, will provide the necessary guidance for program development and planning for the new Northern California Youth Center (ultimate planned capacity of 4,800 wards) and other new institutions. These positions were approved in 1960-61 budget for 1 year.

0.5 Intermediate typist-clerk 1,950
1 Stock clerk 4,296

These positions are provided for business services at Paso Robles School for Boys. The stock clerk will provide more adequate control of clothing and other supplies and is contemplated to partially pay for itself from savings due to controls established.

The typist position will provide clerical assistance in the business office to meet previously recognized but unmet workload.

12 Total $59,604

Custody

1	Senior group supervisor	$2,834	
12	Group supervisor	39,938	
0.5	Overtime—case conference	2,825	
0.3	Overtime—group counseling	1,665	
1.2	Overtime—custodial	6,330	
15	Total		$53,592

One senior group supervisor and 7 group supervisors are provided for Northern California Reception Center and Clinic to provide custodial coverage for a new 50-boy living unit in the 1961-62 fiscal year. 2 group supervisors are included for Preston School of Industry to provide coverage for permanent increased capacity in the receiving unit, and 2 group supervisors at Paso Robles to provide 5 post coverage at the special treatment dormitory. 1 group supervisor is also included at Paso Robles for security and escort.

Three-tenths position is provided at Paso Robles for case conference on wards preparing for parole. Two-tenths position is included at Fricot for the same purpose.

Fricot is also provided with 0.3 position for group counseling of the wards, a position that has become standard in the State's penal institutions.

One and two-tenths custodial overtime is provided for Washington Ridge Conservation Camp based on increased workload due to increased population at this camp.

Medical Care

0.5	Physician and surgeon II	$2,994	
1	Dental assistant	1,860	
1	Graduate nurse	2,370	
2.5	Total		$7,224

The 0.5 physician is included at Northern Reception Center and Clinic to provide adequate professional medical coverage based upon a new 50-boy living unit and related increased admissions. The 1 dental assistant is based upon an accepted formula per caries per ward. The graduate nurse is provided to gain adequate coverage of the hospital which is in the process of being enlarged to provide more hospital bed capacity.

Education and Religion

0.5	Catholic chaplain	$3,336	
0.5	Protestant chaplain	3,336	
0.1	Pianist—intermittent	415	
0.5	Intermediate typist-clerk	1,950	
1.6	Total		$9,037

The 2 half-time chaplains and 0.1 pianist are provided at Fricot to increase the present chaplains to full time based upon the need for full time religious counsel at this institution, and provide music at religious services.

Five-tenths typist is included at Paso Robles to provide clerical assistance to the assistant supervisor of academic instruction at this institution, a position included in a prior budget.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Food Service, Clothing and Housekeeping

1	Baker	$2,148	
1	Supervising cook I	4,482	
2	Total		$6,630

The baker is included at Northern California Reception Center and Clinic based upon an accepted formula requiring a baker to be added when the institution population reaches a certain minimum number.

The supervising cook is provided at Fricot to give adequate supervisorial coverage of the feeding operations at this institution. 0.6 part-time position is abolished in establishing this full-time position.

Plant Operation

1	Painter foreman	$6,672	
3	Painter	18,330	
2	Building maintenance man	10,212	
1	Maintenance mechanic	6,060	
2.5	Groundsman	11,010	
1	Senior clerk	4,476	
10.5	Total		$56,760

One painter foreman is included at Preston based upon increased building area and upon a previously accepted formula of the square footage of building area. One senior clerk is also included at Preston School for Industry to provide assistance to the chief of maintenance, and to maintain an adequate preventive maintenance records system.

One painter each is included for the Northern Reception Center and Clinic, the Southern Clinic and Los Guilucos School for Girls. These positions are based upon the previously accepted formula of square footage of building area.

One building maintenance man for Northern Reception Center and Clinic and 1 for Los Guilucos School for Girls are included to provide adequate maintenance based upon increased building area and previously recognized but unmet workload.

One maintenance mechanic is included at Paso Robles School for Boys to provide for machine and other maintenance workload which has not been met in previous years.

One groundsman each is included at Los Guilucos School for Girls and the Southern Reception Center and Clinic, while 0.5 groundsman has been included for the Northern Reception Center and Clinic. The positions for the 2 clinics are predicated upon previously recognized but unmet workload. Los Guilucos will develop increased workload in landscaping due to a construction project, and also meet a previously recognized but unmet workload.

334.2 Totals, Proposed New Positions $1,178,013

SUMMARY OF OTHER INCREASED EXPENDITURES

Additional Cost—Authorized Positions

This increased expenditure is occasioned by full-year cost of positions authorized during the current year, improved employment conditions and annual merit salary increases $1,084,119

Operating Expenses

This 20.2 percent increase results from a 19.8 percent increase in average annual population, new facilities and 5.9 percent increase in parole caseload supervision. The major items of increase are feeding, medical care, utilities and those items related to parole supervision 816,735

Equipment

Decreased equipment needs are primarily applicable to equipment for new facilities being provided through Capital Outlay projects —106,390

Reimbursements

Increase in reimbursements primarily attributable to a grant from National Institute of Mental Health —$80,172

Contributions to State Employees' Retirement Fund

This item is related to salaries and wage costs 103,498

Other Current Expenses

This increased expenditure results primarily from increased parolees placed in foster homes 33,390

Total, Other Increased Expenditures $1,851,180

GRAND TOTAL—INCREASES $3,029,193

YOUTH AUTHORITY BOARD AND ADMINISTRATION

GENERAL ANALYSIS

This division includes the Youth Authority Board, director, administrative services, and supervision of the diagnosis and treatment, special treatment, and departmental research programs.

The Youth Authority Board consists of 6 members, each of whom is appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years. It is concerned with acceptance or rejection of wards committed to the Youth Authority and with classification, length of institutional training and parole periods, and formulation of policies concerning wards. Two Youth Authority Board representatives assist the board in meeting its workload.

The executive group is composed of the director, who is chairman of the Youth Authority Board, and his staff. The director is the administrative head of the department and is charged with those duties and responsibilities of the department in carrying out its objectives not specifically assigned to the Youth Authority Board. The 1961-62 budget program includes 1 management consultant, 1 assistant to the director, 1 assistant administrative analyst, and 2 clerical positions based on workload.

The Youth Authority clerk and records office maintains the master files on all wards committed to the Youth Authority. This office is also responsible for recording actions taken and for orders issued by the Youth Authority Board. The workload of this office grows with any increase in commitment rate, institution bed capacity, or in the number of wards on parole. Two clerks are proposed in 1961-62 to meet the increased workload.

Administrative services are furnished in the fields of accounting, budgeting, personnel management, food administration, maintenance and construction, and general administration. The administrative services division also operates as the link between the department and the other agencies concerned with the financial and managerial services of the State Government. Five clerical positions are requested in the 1960-61 budget on a workload basis.

The diagnosis and treatment division is responsible for supervision and operation of the department's reception centers, institutions, and conservation camps. This responsibility includes the training and treatment program in the institutions, as well as reception, diagnostic evaluation, and transportation of wards between institutions. It also includes supervision and operation of the department's special treatment program which was started during the 1957-58 fiscal year. This program is designed to meet the needs of special problem delinquents who, because of emotional disturbances or other severe personality problems, do not fit into nor benefit materially from the regular treatment program. One temporary professional position and 0.5 clerk are included on a workload basis for planning in connection with the new Northern California Youth Center. Two transportation officers are proposed to provide for the increased ward movement resulting from the additional bed capacity to be occupied in the 1961-62 fiscal year.

The research division is responsible for research programs being developed and undertaken by the department, as well as for the accounting for the ward population in institutions and on parole. One research technician and 1 clerical position is proposed in 1961-62 to handle increased workload. Basic research is planned and being conducted in the fields of human behavior and in the specific field of delinquency, its causative factors, treatment and prevention. One senior research analyst and 2 clerical positions are proposed in 1961-62 to continue and expand research into development of classification and measurement methods designed to aid in better identification of the causes of delinquent behavior, improved classification of wards, and resultant improvement in treatment. One associate research analyst is proposed to conduct a research into the effectiveness of the psychiatric treatment and group counseling programs in the institutions. One professional and 1 clerical position are also provided for the basic research structure to gain controlled information on the proposed Parolee Narcotics Testing program.

A community treatment program designed to test the effectiveness of substitution of treatment in the community for institution treatment is also proposed, contingent upon approval of the grant by the National Institute of Mental Health. It is anticipated that the National Institute of Mental Health will assume the cost of the research aspects of this program on a reimbursement basis with the State providing the parole staff required for the treatment phase of this program. Three research analysts and 3 clerical positions are proposed for this project, all financed by an anticipated federal grant. Two-tenths of a position is provided for outside specialized consultant assistance for the research structure of the Community Treatment Program.

All of these 29.7 positions are discussed in the General Analysis, Departmental Summary.

---

[a] Parole officers assigned to regular parole supervision only.

DIVISION OF FIELD SERVICES

GENERAL ANALYSIS

The Field Services Division is composed of the Bureau of Probation and Delinquency Prevention Services, the Bureau of Paroles, and the interstate unit which administers the Interstate Probation Compact and the Interstate Compact on Juveniles. The Bureau of Probation and Delinquency Prevention Services provides assistance, leadership and guidance to the counties and cities of the State in studying youth problems, and encourages them to provide more effective programs to meet their needs. It is concerned with the encouragement of improved juvenile law enforcement and probation. It also administers the program for maintenance of juvenile homes and camps.

The Bureau of Paroles provides direct supervision and casework counseling for wards of the Youth Authority who are on parole. Parole officers make use of all available local services in directing wards toward a normal life in the community.

Current planning provides for the reorganization of the Division of Field Services. The Bureau of Probation and Delinquency Prevention Services and the Bureau of Paroles will become divisions. This reorganization will recognize the needs of 2 growing and complex organizations. The present chief of the Division of Field Services will be transferred to the department's executive office as an assistant to the director to provide additional assistance to the director in formulating and carrying out the overall departmental policies and programs, serving as the director's personal representative to promote the department's philosophies and objectives at meetings and conferences with both local and statewide groups, confer with judges and other county and local officials on matters pertaining to juvenile delinquency problems and assist colleges and universities in the development of programs to encourage students to enter the correctional field.

One field representative and 0.5 clerical positions are included in the 1961-62 fiscal year to provide staff to meet the workload increases caused by the increase in the State's population, the demand for service by the counties and the growth in communities.

A supervisor of community treatment, 6 parole agent-therapists and 3 clerical positions are proposed to staff the community treatment program. This is a research program to determine the feasibility of the substitution of treatment within the community for institution training for wards amenable to this type of program. An assistant chief, Division of Paroles, 1 parole agent-training officer, 1 parole agent-administrative assistant and 1.5 clerical positions are proposed as a part of the planned reorganization of the Bureau of Paroles. The parole agents presently assigned training and administrative assistant duties are included within the overall staffing formula. Under this proposal these positions and the assistant division chief will be excluded from the formula.

A narcotics control unit requiring 2 additional parole agents and 1 clerical position are proposed for 1961-62. The increase in parole caseload will require 9 new parole agent positions which will be established as the increase is realized. This will be in accordance with the overall ratio of 55 parolees per parole officer. Four and five-tenths clerical positions are also included on a workload basis.

Active parole population for 1959-60 and the estimated caseload for the current and budget years are as follows:

	1959-60	1960-61	1961-62
Average parole population	9,141	9,997	10,586
Parole population end of year	9,436	10,364	10,721

GENERAL ANALYSIS

Objectives

The Northern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth Authority from Northern California. The purpose of the reception center is to receive, examine, and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

Program and Performance

This institution's program is centered in the reception and diagnostic evaluation of boys and girls committed to the Youth Authority. A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude, and abilities. Recommendations based on such study are made to the Youth Authority Board regarding type of training, treatment, and custodial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen. Remedial medical, dental, and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institutions are transferred to this facility for major surgical and limited psychiatric treatment. Limited use is made of ward help in the reception center because of the short length of stay and the intensive diagnostic evaluation program.

A new administration building was completed and occupied during the 1959-60 fiscal year. The former administration building is currently being remodeled to provide expansion of hospital bed space, laboratories, and office space necessary for the anticipated increase in ward population and clinical staff personnel.

A 49-bed dormitory is scheduled for completion in March, 1961, and another for completion in December, 1961.

Ward movement and average population at this institution are as follows:

	1959-60	1960-61	1961-62
Average Daily Population:			
Boys	166	175	235
Girls	54	54	54
Totals	220	229	289
Parole Releases and Processed Cases Transferred:			
Boys	1,260	1,534	1,851
Girls	380	407	441
Totals	1,640	1,941	2,292

The 14 new positions included in this budget are composed of 8 group supervisors to provide custodial coverage for the new dormitory; 0.5 physician, 1 dental assistant and 1 graduate nurse based on increased admissions; 1 baker per departmental standards based on institution population; and 1 painter, 1 building maintenance man and 0.5 groundsman based on increased number of buildings, and increased area needing landscaping. These positions are discussed in the General Analysis, Departmental Summary. (See pages 124 to 125.)

GENERAL ANALYSIS

Objectives

The Southern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth Authority from Southern California. The purpose of the reception center is to receive, examine and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

Program and Performance

This institution's program is centered on the reception and diagnostic evaluation of boys and girls committed to the Youth Authority. A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude and abilities. Recommendations based upon such study are made to the Youth Authority Board regarding type of training, treatment and custodial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen. Remedial, medical, dental and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institutions are transferred to this facility for major surgical and limited psychiatric treatment. Limited use is made of ward help in the reception center because of the short length of stay and intensive diagnostic evaluation program.

The anticipated 1961-62 decrease in cases processed results from activation of 2 new boys' dormitories at the Northern Reception Center and Clinic. Northern cases previously transported south will now be processed at Perkins.

Ward movement and population at this institution are as follows:

	1959-60	1960-61	1961-62
Average Daily Population:			
Boys	303	300	300
Girls	50	49	49
Totals	353	349	349
Parole Releases and Processed Cases Transferred:			
Boys	2,168	2,467	2,321
Girls	442	434	436
Totals	2,610	2,901	2,757

Two new positions are proposed for the 1961-62 fiscal year: 1 groundsman to overcome present deficiency; and 1 painter to meet requirements posed by department standards. These positions are discussed in General Analysis Departmental Summary. (See page 125.)

---

[a] Composed of savings in salaries and wages, $6,845; operating expenses, $32,873; equipment, $2,353; and increased reimbursements, $152.

[b] Composed of savings in salaries and wages, $82,352; operating expenses, $40,070; and equipment, $1,330.

GENERAL ANALYSIS

Objectives

The Youth Authority conservation camps for boys are conservation camps operated jointly by the Youth Authority and the Division of Forestry. Their primary purpose is the rehabilitation of older delinquent boys through useful work including suppression of forest fires, reforestation, road construction, and general maintenance of the State's forests. Selected boys primarily in the 17 to 21 age group are sent to these camps as an intermediate stage between training in an institution and return to society. These wards include both criminal court commitments transferred from Deuel Vocational Institution and the Correctional Training Facility at Soledad, and juvenile court commitments from the Youth Authority institutions.

YOUTH AUTHORITY CONSERVATION CAMPS FOR BOYS—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance

Three conservation camps are currently operating, emphasizing work programs both in the forest and in the camp. A few boys are held in each camp for operation of the kitchen, dining room, laundry, general housekeeping and building maintenance. A recreation program is conducted after working hours including activities ranging from sports to arts and crafts. A counseling program to aid in removing the causes of delinquent behavior is conducted concurrently with the work and recreational program.

The existing camps are Pine Grove, located east of Jackson; Ben Lomond, in the mountains near Santa Cruz; and Mount Bullion, near Mariposa. Three 20-boy spike camps are operated as branches of the main camps, 1 from Pine Grove and 2 from Mount Bullion.

The activation of a new camp is planned during the 1960-61 fiscal year. This camp is the Washington Ridge Conservation Camp which will be located near Nevada City, California. The population build-up at the new camp will begin in May 1961, with 20 boys and increase to a population of 70. Supervision of the Smartsville Spike Camp, currently operated as a branch of the Pine Grove main camp, will be transferred to the Washington Ridge Conservation Camp July 1, 1961. The new camp's activation will increase the total estimated average daily population of these camps to an average of 264 boys during 1960-61, and to approximately 328 during 1961-62.

GENERAL ANALYSIS

Objectives

The Fricot Ranch School for Boys is a correctional school for training, education and rehabilitation of delinquent boys primarily between 8 and 13 years of age. The purpose of the school is to provide a residential treatment center for the youngest and most immature boys committed to the Youth Authority and to return them to society as useful citizens.

---

[a] Composed of savings in salaries and wages, $3,780; operating expenses, $19,236; equipment, $3,101; inmate pay—work projects, $2,604; and a loss in reimbursements, $18,692.

[b] Composed of savings in salaries and wages, $1,311; operating expenses, $7,994; equipment, $3,965; inmate pay—work projects, $861; and an excess in reimbursements, $725.

Department of the Youth Authority

FRICOT RANCH SCHOOL FOR BOYS—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	

GENERAL ANALYSIS—Continued

Program and Performance

This institution places major emphasis upon a program of academic education and counseling. Minimum custodial standards are maintained as part of the treatment program. Because of its location in the mountainous Mother Lode country the school is able to carry on a program of scouting, hiking, and outdoor living as part of its total rehabilitation program. A new 50-boy living unit will be available for occupancy in July 1961.

Ward movement and average population at this institution are as follows:

	1959-60	1960-61	1961-62
Average daily population	172	178	220
Parole releases	121	165	146

Included in this budget are 2.6 positions to meet increased workload consisting of custodial blanket positions of 0.5, the increase of 2 chaplains from one-half to full-time positions, 0.1 pianist for Sunday services and a supervising cook position. These positions are discussed in the General Analysis, Departmental Summary. (See page 124.)

GENERAL ANALYSIS

Objectives

The Fred C. Nelles School for Boys is a correctional school for the rehabilitation of delinquent boys, primarily between the ages of 13 and 15. The purpose of the school is to return the youths to society as useful citizens.

Program and Performance

The school conducts a program of education, training, and treatment designed to guide the delinquent youth into accepted behavior patterns. The educational program covers the elementary and junior high school grades and is remedial in nature. Academic and industrial arts shop program similar to public school programs are conducted to enable wards to return to the public school system at the grade level commensurate with their age.

Average age of wards at this institution continues to be approximately 13.8 years. Ward help in the operation of the kitchen, dining room and laundry as well as the maintenance program is being reduced. All youths in this age group should be receiving a full-time school program. It is planned to discontinue the laundry operation at this institution effective January 1, 1961, and at that time obtain laundry service provided by California Institution for Men located at Chino. The discontinuance of the laundry will relieve approximately 30 wards from being involved in this activity, and these wards will receive a full-time school program.

Ward movement and average population at this institution are as follows:

	1959-60	1960-61	1961-62
Average daily population	318	318	378
Parole releases	497	500	397

Included in this budget are 20.8 new positions distributed in the following manner: 8 group supervisors for custodial supervision of wards in new living units; 8 teaching personnel based on the teacher-pupil ratio; 1 assistant supervisor of academic instruction based on a departmental workload standard plus 0.5 clerical help; 1 parole agent and 0.5 clerical help for the classification and counseling unit based on increased population; and 1.8 food service assistants based on post assignment revision as ward help in the kitchen is being reduced. These positions are discussed in General Analysis, Departmental Summary. (See page 123.)

Program and Performance—Continued

nature and covers junior and senior high school subjects with provision for graduation from high school for those who successfully complete the required courses.

Major emphasis is placed on individual and group counseling of wards, and every available professional service to provide for the treatment needs of wards, including psychological and psychiatric therapy.

Wards are used to help in the operation of the kitchen, dining room, laundry, shoe repair shop and maintenance functions. Training and supervision are given in these areas as part of the total rehabilitation program. A farm and garden operation is also conducted as part of the education program, to train wards interested in this field. The farm furnishes eggs, poultry, ham and pork products and a limited amount of fresh vegetables to the school feeding program.

Ward movement and average daily population at this institution are as follows:

	1959-60	1960-61	1961-62
Average daily population	449	448	452
Paroles	741	780	608

Included in this budget are 14 new positions to staff the Special Treatment Program proposed for this institution; 1 stock clerk to effect economies in clothing; 0.5 typist-clerk for previously unmet workload; 1 group supervisor for security and escort; 0.3 overtime for case conferences; 0.5 typist-clerk in education to meet acknowledged workload; and 1 maintenance mechanic to meet existing workload and establish an adequate preventive maintenance program. These positions are discussed in General Analysis, Departmental Summary. (See pages 123 and 124.)

GENERAL ANALYSIS

Objectives

The Preston School of Industry is a correctional school for the custody, training and treatment of delinquent boys, primarily between the ages of 17 and 21 years. The purpose of the school is to rehabilitate these youths and return them to society as useful citizens.

Program and Performance

The Preston School of Industry conducts an educational program in 3 general areas. These are:

1. Academic instruction for wards who are from 3 to 5 years behind the educational level commensurate with their chronological age. The program is of elementary and high school level, including graduation from high school for those successfully completing the necessary courses.
2. Vocational training in various trades such as printing, auto mechanics, cabinet work, electrical work, sheet metal and others.
3. Farm program with basic education in the operation of a dairy, poultry unit, hog ranch and field crops.

Wards are used to help in the operation of the kitchen, dining room, laundry and maintenance program. Training and supervision are given in these areas as a part of the total program.

A program of counseling to understand and remove the causes of delinquent behavior is conducted concurrently with the educational and custodial program. Also a program for special treatment of wards with serious personality problems or in need of psychiatric therapy has been in operation since the 1957-58 fiscal year.

Average ward population and paroles at this institution are as follows:

	1959-60	1960-61	1961-62
Average daily population	782	856	832
Released on parole	1,395	1,425	1,140

The authorized positions in the budget year include 9.2 positions that are being transferred from the Waterman academic education program which was previously funded from operating expenses.

Proposed new positions include 2 Group Supervisors to provide 5-post coverage in the receiving unit due to increased capacity of that dormitory; 1 Painter Foreman to assure proper preventive maintenance; and 1 Senior Clerk to provide the Chief of Institution Maintenance I with clerical help. These positions are discussed further in the General Analysis, Departmental Summary. (See page 125.)

GENERAL ANALYSIS

Objectives

The Youth Training School is a correctional facility for the rehabilitation of delinquent boys primarily between 17 and 21 years of age. The purpose of the school is to rehabilitate these wards through an emphasis on vocational training with meaningful work experience and to return them to society as useful citizens.

Program and Performance

The Youth Training School is located near Ontario, California. The first units of permanent construction were occupied January 4, 1960. The total construction program is planned in 3 phases which when completed will provide housing and program for 1,200 wards. Phase I provided for one 2-story, 400-bed housing unit; administration and hospital building; vocational shops; academic school; kitchen and commissary; boiler plant and other related buildings. Phase II scheduled for completion and occupancy in March 1961, provides for the second 400-bed housing unit and expanded facilities for the vocational shops, auditorium, chapel and academic classrooms. Phase III provides for the third 400-bed housing unit, expanded facilities for office space in the administration building and additions to the commissary and hospital. Completion of Phase III is scheduled for November 1961, and will provide housing for the full 1,200 capacity program.

The rehabilitation process is carried out through an intensive program of education, training, counseling and treatment designed to guide young adults into acceptable behavior patterns. The program is designed to give wards pre-employment training in the various vocational fields and to provide an opportunity for completion of the requirements for high school graduation. The vocational training program consists of 3 major divisions: (1) formal vocational instruction; (2) related work experience in maintenance and operation of the institution; and (3) work experience-education, areas not related to the maintenance and operation of the institution, i.e. offset printing, business machine repair, electronics, etc. The work experience program will be conducted in 2 major areas: (1) plant maintenance and operation, and (2) food service. The auxiliary functions vital to institutional administration will be performed by wards under close supervision of journeyman instructors in a program generally consisting of one-half day vocational training in the shops and one-half day related work experience.

Average population in 1960-61 fiscal year will be 437 wards. In the 1961-62 fiscal year average population is estimated at 1,006 wards. A total of 1,169 wards will be released on parole in 1961-62 fiscal year, as opposed to 669 in the 1960-61 fiscal year.

A total of 122.9 new positions are proposed for the 1961-62 fiscal year. They are briefly classified by function as follows:

Business services	7
Unit administration	1
Custodial and personal care	57.2
Medical care	5.5
Education and religion	33.1
Classification and counseling	9.6
Feeding	6
Plant operation	3.5

These positions are discussed in the General Analysis, Departmental Summary. (See page 122.)

GENERAL ANALYSIS

Objectives

The Los Guilucos School for Girls is a correctional school with a resident population of girls between the ages of 10 and 18. The purpose of the school is to rehabilitate these girls and to return them to society as useful citizens.

Program and Performance

The program is primarily educational and stresses remedial academic instruction, home economics, and arts and crafts with provision for graduation from high school for those who successfully complete the required courses. A counseling program to remove the causes of delinquent behavior is conducted concurrently with the education and custodial program.

Girls are used to help in operation of the kitchen, dining room, hospital and dental unit as part of the total program. Girls are responsible for housekeeping in the dormitories and also assist the housekeepers in maintenance of less critical areas of the school.

Average ward population and releases at this institution are as follows:

	1959-60	1960-61	1961-62
Average daily population	204	221	259
Parole releases	242	255	276

Three new positions are proposed in this budget for maintenance functions based on workload. These are 1 painter, 1 building maintenance man and 1 groundsman. These positions are discussed in the General Analysis, Departmental Summary. (See page 125.)

GENERAL ANALYSIS

Objectives

The Ventura School for Girls is a correctional school for rehabilitation of the older delinquent girls, primarily in the 16 to 21 age group. The purpose of the school is to rehabilitate girls and return them to society as useful citizens.

Program and Performance

The Ventura School for Girls conducts a program of educational training and counseling to treat the causes of delinquent behavior. The education department offers a remedial program at the junior and senior high level, with graduation from high school for those who successfully complete the required courses.

A vocational training program is emphasized to prepare girls for employment when paroled. Training is given in practical nursing, laundry operation, production sewing, stenography, accounting and related clerical work. A co-operative effort with the State Department of Employment seeks to make the educational program fit these girls for work when paroled.

The present plant is old and in very poor condition requiring continuing maintenance. A new institution is under construction and will be activated in February, 1962.

A special treatment program unit is proposed in this budget for the care of the more emotionally disturbed wards at this institution.

Paroles and average ward population at this institution are as follows:

	1959-60	1960-61	1961-62
Average daily population	186	200	230
Paroles	318	331	294

A total of 81.7 new positions are proposed for the 1961-62 fiscal year and are predicated upon the opening of the new institution in February, 1962, and expansion of the population to 320 by year's end.

They are briefly classified by function as follows: administration, 1; business services, 5.6; custodial and personal care, 15.4; medical care, 3.7; education and religion, 9.5; classification and counseling, 1.5; special treatment, 12; feeding, 10.8; clothing, laundry, and housekeeping, 8; and plant operation, 14.2.

These positions are discussed in the General Analysis, Departmental Summary. (See page 122.)

GENERAL ANALYSIS

Objectives

The Department of Education, under the direction of the Board of Education, seeks to insure that all children of the State have an opportunity to attend the Public School System, and that once enrolled, they receive adequate instruction by qualified teachers. The Superintendent of Public Instruction, an elected official, is ex officio Director of Education and secretary and executive officer of the State Board of Education, which is the policy determining body of the department. The board consists of 10 members appointed by the Governor for 4-year terms. Physically handicapped children and adults may receive an education, physical rehabilitation services or sheltered employment through the special schools and centers operated by the department.

The department also administers joint federal-state programs dealing with the distribution of surplus commodities for educational purposes and administers jointly financed educational programs.

Program and Performance

The department is divided into 6 divisions to handle specific areas of responsibility: Departmental Administration, Public School Administration, Instruction, State Colleges and Teacher Education, Special Schools and Services, and the Division of Libraries which for budgetary purposes is a separate unit. The program of each division is discussed in conjunction with its detailed budget presentation.

The 1961-62 budget for the State College Division reflects the transfer of duties to the Trustees of the State College System.

DIVISION OF DEPARTMENTAL ADMINISTRATION

GENERAL ANALYSIS

The Division of Departmental Administration, headed by a deputy superintendent of public instruction, furnishes executive, accounting, personnel, research and legal services to the Department of Education, and administers the program of teacher certification for the public schools.

All applicants for credentials must file fingerprints with this division, and reports are furnished by the Bureau of Criminal Identification of the Department of Justice on those applicants who have arrest records. This record is reviewed by a field representative to determine if the applicant's record is such that he cannot hold a California teaching credential. Since the reports generally indicate only the arrest record of an applicant, it is necessary to secure reports of the disposition of the case.

An additional responsibility of this division is the program to assist and advise local school districts in problems relating to discrimination on the basis of race, religion or other grounds in connection with the employment of certificated personnel, as directed by Section 187 of the Education Code.

The Accounting Office of the division administers certain trust funds, and provides budgeting, purchasing, and internal auditing services. The accounting functions for the state colleges, special schools and Industries for the Blind are performed by those respective agencies. The expenditures of the State Board of Education are included and administered through the departmental budget.

The Personnel Office exercises general direction over the personnel program of the Department of Education.

The Administrative Advisor's Office acts as legal advisor to the Superintendent of Public Instruction and his staff, the State Board of Education, and to the staffs of the special schools and special service agencies in the department. It represents these agencies and officers in disciplinary actions, both contested and uncontested, involving disciplinary action against public school teachers and employees of the department. During general sessions of the Legislature, the office prepares department-sponsored legislative bills, and prepares recommendations to the Governor on those bills of concern to the department. It drafts and passes on the legal adequacy of contracts, including those for the purchase of state-adopted textbooks, leases, deeds, easements, and probate documents affecting the department and the agencies under its jurisdiction.

The Bureau of Education Research is responsible for studies in the evaluation of public school curriculum, educational measurements, and in the area of school administration, such as finance, teacher preparation, class size and enrollment data. It also furnishes consultant services to school districts in advising and planning test programs. The tabulating machine section renders services to the various bureaus and divisions of the department. In the annual apportionment the bureau assumes the responsibility for mechanical computations for the school apportionment.

The Credentials Office evaluated 135,127 applications for credentials during 1959-60. It is estimated that 145,000 evaluations will be made in 1960-61 and 155,000 evaluations will be made during 1961-62.

The 1961-62 budget proposes a reduction of 6.3 positions because of the transfer of the state college administration to the Trustees of the State College System. One position is deleted in the Accounting Office and 5.3 positions in the Personnel Office.

An increase of $155,000 in additional credential fee reimbursements is included in the 1961-62 fiscal year. Legislation will be introduced at the 1961 General Session of the Legislature to increase the credential fee from the present $4 to $6. This increase will make the credential function more nearly self-supporting.

The $4 fee was established by the Legislature in 1949 and at the time was sufficient to reimburse the direct costs of issuing credentials. A $31,487 deficit occurred in 1954-55 as a result of rising costs and since then the annual deficit has increased to $125,929 in the 1959-60 fiscal year and to an estimated $163,940 in 1960-61.

A new position of Associate Superintendent and Chief of Division together with a supporting secretarial position is included in the 1961-62 fiscal year. This position will be in charge of a planned new division to include the functions of Junior College

---

[a] Neither receipts nor expenditures of bond funds included in the overall budget totals.

[b] Included in the Co-ordinating Council for Higher Education portion of the budget for 1961-62.

DIVISION OF DEPARTMENTAL ADMINISTRATION—Continued

GENERAL ANALYSIS—Continued

Education, Teacher Education and Accreditation, Adult Education, Teacher Recruitment, Readjustment Education, Credential's Office, and the Commission on Discrimination on Teacher Employment. The grouping of the functions related to the post high school area will result in better co-ordination of such activities. The responsibility of the State Department of Education for issuing teacher credentials, accreditation of public and private teacher training institutions, the approval of public and private schools and college granting diplomas and degrees, and approval of public school adult programs and public school junior college programs are closely related. The planned establishment of this division is the result of a reorganization of the department occasioned by legislation following the Master Plan Study for Higher Education which places greater emphasis and responsibility in the area of junior college education and the additional functions which have been added to the responsibilities of the State Department of Education since 1945, when the present organization was established.

Certain functions within the areas of teacher education, teacher recruitment and accreditation of teacher training institutions which are in the Division of State Colleges will remain the responsibility of the State Department of Education after the responsibilities for the administration of the state colleges are transferred July 1, 1961 to the new state college agency.

The Master Plan for Higher Education, in placing greater emphasis on the junior college reports that an estimated 50,000 lower division students will be diverted from the state colleges and the University of California to the junior colleges by 1975.

Increased efforts will be made to encourage all sections of the State not presently included within districts operating junior colleges to go into junior college districts as rapidly as possible. The plan indicates that there is evidence now at hand for the establishment of 22 new junior colleges. The instructional functions of the junior college as contemplated by the Master Plan include the first 2 years of a collegiate education for students planning to complete work for baccalaureate degrees, as well as 2 years in associate in arts degree programs, and vocational-technical education and training. The State Board of Education will be the state policymaking board for junior colleges.

DIVISION OF INSTRUCTION

GENERAL ANALYSIS

The Division of Instruction is the operating division through which the Department of Education co-ordinates the instructional program in the State's public school system. In addition, the department's services for upgrading and improving the statewide instructional program are provided through this division. Although the 2 major functions of this unit are the co-ordination and improvement of instruction, its functions in specific fields vary widely. In the field of adult education, the division, as required by law, approves all adult courses offered by local districts. In connection with special education programs and in certain vocational fields, the division provides classroom supervision services and in 2 programs, police officer training and fire training, division staff-members regularly organize and conduct classes.

The Bureau of Elementary Education is responsible for the co-ordination and improvement of instruction in the elementary grades of the 1,435 elementary and unified districts in the State. The efforts of the bureau staff are concentrated on working with key personnel in state and regional meetings and on the preparation of instructional materials such as teachers' guides and similar publications. No staff time is required for programs of inspection and approvals, for accreditations, or for direct instructional services.

The Bureau of Secondary Education is responsible for the co-ordination and improvement of instruction in high schools and in this capacity works with the county superintendents and the high schools and unified school districts maintaining junior, senior, and 4-year high schools. In addition, the bureau is required by law to approve the courses of study of all secondary schools. It collects and analyzes annual reports from high schools and represents the department in the accreditation of high schools.

The Bureau of Junior College Education is now in its fourth year of operation. The work of this unit was formerly carried on by the Bureau of Secondary Education. The bureau is responsible for the co-ordination and improvement of instruction in the public junior colleges.

The Bureau of Adult Education has the responsibility for co-ordinating and improving programs of adult and continuation education. In addition, this unit is required to approve more than 20,000 adult classes annually and to approve forum and lecture series, continuation high schools and special and evening classes and summer sessions in elementary schools.

The Bureau of Audio-Visual Education is responsible for the co-ordination and improvement of programs of audio-visual education in counties and school districts. The bureau is also a service unit for the department and for other state agencies and maintains materials and equipment to be used on a loan basis by departmental staff members and other state agencies where necessary.

DEPARTMENT OF EDUCATION

General Activities—Continued

DIVISION OF INSTRUCTION—Continued

GENERAL ANALYSIS—Continued

The Bureau of Guidance is responsible for the co-ordination and improvement of guidance programs in counties and school districts and represents the department in working with other state agencies that provide services related to the guidance and placement of school pupils.

The Bureau of Physical Education, Health Education and Recreation is assigned the responsibility for the co-ordination of physical and health education and recreation programs in counties and districts. This includes responsibility for athletic services, medical and nursing services and school district co-operation in community recreation programs of various types.

The Bureau of Special Education is the unit through which the department co-ordinates, improves and supervises the various programs for pupils with special needs. These include programs on speech difficulties, hearing losses, sight limitations and crippling conditions. Because such programs carried by counties and school districts must meet specific requirements in order to qualify for special state reimbursements, this bureau has certain responsibilities for program approvals. Many of the counties and districts are unable to provide qualified supervisors fo such specialized programs and in these cases, members of th bureau staff engage in classroom supervision. Also, instructiona materials available to blind pupils through the American Printing House for the Blind are requisitioned and made availabl to California school districts by this unit.

The 1961-62 budget proposes 1 new position of consultan in Audio-visual Education to assist school districts with th problems arising from the use of television in education. This position is recommended by the Governor's Committee on Educational Education and is necessary to ensure that the inevitable increase in the use of educational television in the publi schools of the state develops in the most effective and economical manner possible.

DIVISION OF PUBLIC SCHOOL ADMINISTRATION

GENERAL ANALYSIS

The Division of Public School Administration assists school districts by rendering assistance in noninstructional areas. The services furnished include school planning, school district organization, school lunch, free textbooks, surplus federal property, the child care program, approval for veterans' training and advisory service in school finance and attendance and federal financial assistance under Public Law 874 and 815.

The Administrative Services Bureau advises school districts on financial and administrative matters including child care centers. The bureau also reviews the audit reports of all school districts and takes appropriate action as indicated by the review.

The Bureau of School Apportionments and Reports verifies reports of school districts and compiles data for use by the public schools. The apportionments are made in 5 major stages to local jurisdictions by this unit. The bureau prepares for publication such materials as are necessary to establish and maintain uniformity of practices and procedures throughout the State in public school financial accounting. (See Local Assistance Section of the budget for the apportionment of public schools.)

The school lunch program and the school milk program are federal grant-in-aid programs in which cash reimbursement and commodities are allocated to participating schools. The expenditures in the school lunch program and the school milk program are shown in the Local Assistance for Education portion of the budget.

The Bureau of Textbooks and Publications is responsible for the editorial policy of all department bulletins and for administration of the free textbook program. (See Local Assistance

GENERAL ANALYSIS—Continued

Section of the budget for details on the Free Textbook Program.)

The Bureau of Readjustment Education approves and supervises veteran training. Federal Law (Public Law 550) requires that each course for which reimbursement from the Veterans Administration is sought must be specifically approved. In return for performing this service, the Bureau of Readjustment Education is reimbursed by the Veterans Administration for a portion of its salary and travel expense. In addition, Sections 24201 through 24220 of the Education Code require that investigations be made to determine compliance with the requirements for authorization to issue specified diplomas as well as investigations that are necessary to determine whether or not there has been compliance with the provisions of the law in order that reports can be made to the Attorney General.

The Bureau of School Planning assists and advises school districts in regard to acquisition of sites and construction of school buildings.

The Bureau of School District Organization assists county committees with district reorganizations, taking into account population, transportation, economics and school building facilities. Some degree of the measure of success of the program is the steady decline in the number of elementary and high school districts and the increase in the number of unified districts and junior college districts as shown in the table below:

	1956-57	1957-58	1958-59	1959-60	CHANGE FROM 1958-59

DIVISION OF SPECIAL SCHOOLS AND SERVICES

GENERAL ANALYSIS

The Division of Special Schools and Services provides administrative and educational supervision for the state residential schools for deaf, blind and cerebral palsied children and directs the programs of the Industries for the Blind, Field Rehabilitation Services for the Adult Blind, the Opportunity Work Centers for the Blind, the Oakland Orientation Center for the Blind, and the Vocational Rehabilitation Section.

The program and budget details of the state residential schools, the Industries for the Blind, the Opportunity Work Centers and the Oakland Orientation Center are shown separately in the department's budget.

The Home Teacher Counselor Service for the Blind acquaints blinded adults with the state services available and assists with an orientation program designed to each individual's particular needs. All blind persons are eligible for such services notwithstanding their financial status. Instruction is given in braille, typing, travel training, techniques of daily living and home economics. Close liaison with the Vocational Rehabilitation Section, Oakland Orientation Center and Department of Social Welfare is maintained to eliminate duplicate services.

During the 1959-60 fiscal year, home teacher-counselors made 19,141 home calls and gave 9,295 lessons in orientation, braille, typing and homemaking, and provided clients with 11,356 counseling sessions. On July 1, 1959, there were 932 adult blind persons under instruction, and on July 1, 1960, there were 992 receiving service. Of the total number of persons served during the year, approximately one-half reside in rural areas.

The program of vocational rehabilitation is to assist disabled persons to achieve the maximum degree of self-support. It is based upon a co-operative plan between the State Department of Education and the United States Office of Vocational Rehabilitation and is administered by the Vocational Rehabilitation Section through its 2 regional, 10 district, and 14 branch offices. The total program is financed by state and federal funds and is shown separately in the department's budget.

DIVISION OF STATE COLLEGES AND TEACHER EDUCATION [b]

GENERAL ANALYSIS

The administration of the state college system will be transferred under the provisions of Chapter 49, Statutes of 1960, First Extraordinary Session, to the Trustees of the State College System at the close of the 1960-61 fiscal year. The teacher education function, which will remain with the Department of Education, furnishes consultant services to all teacher training institutions in the State accredited by the State Board of Education. Assistance is also given to institutions seeking accreditation. The teacher recruitment function, which also will remain, assists local districts in methods of securing qualified teachers.

STUDY OF PROBLEMS—EMOTIONALLY DISTURBED CHILDREN *(General Fund)*

Chapter 2385, Statutes of 1957, authorized the Department of Education to make a study of problems relating to emotionally disturbed children in the public schools of the State. The study has been concluded and a report will be presented to the Legislature on January 1, 1961.

STUDY OF EDUCATIONAL PROBLEMS—GIFTED CHILDREN *(General Fund)*

Chapter 2385, Statutes of 1957, authorized the Department of Education to make a study of special educational programs designed to meet the needs of gifted pupils in the public schools of the State. The study was conducted over a period of 3 school years and a report will be provided to the Legislature by January 1, 1961.

DEPARTMENT OF EDUCATION

General Activities—Continued

WESTERN REGIONAL HIGHER EDUCATION COMPACT *(General Fund)* [a]

Chapter 1694, Statutes of 1955, provided for California's participation in the compact which now includes 13 other western states, including Alaska and Hawaii, to promote better co-operation in higher education in medicine, dentistry, veterinary medicine and public health.

Three commissioners are appointed by the Governor for 4-year terms to the Western Interstate Commission for Higher Education. One commissioner must be engaged in the field of higher education in California. A report of activities is required to be submitted by the commission before January 15th each year to the Governor and Legislature. The amount represents California's share of the expenses of the Western Interstate Commission.

GENERAL ANALYSIS

The National Defense Education Act of 1958 was enacted by Congress (Public Law 85-864) to provide financial assistance to states and their subdivisions in order to ensure trained manpower of sufficient quality and quantity to meet the national defense needs of the country. The portions of the act of concern to the State are:

Title 2—Loans to Students in Institutions of Higher Education. This title provides loans to worthy and needy students in institutions of higher learning within the State.

Administration of this program is transferred to the Trustees of the State College System in 1961-62 and the program and budget for 1961-62 is shown in that section of the budget.

Title 3—Improvement of Instruction. This title is composed of 2 programs. Title 3a provides federal funds to the Department of Education for reimbursement to local public school districts for the purchase of equipment and materials and for minor remodeling to improve instruction in science, mathematics and modern foreign languages. These federal funds are matched by expenditures of the local school districts and are shown in the Local Assistance Section of the budget, Subventions for Education. Title 3b provides federal funds to the Department of Education for the costs of administering Title 3a and for expansion and improvement of supervisory and related services in public schools in the fields of science, mathematics and foreign languages. These funds are matched by the State.

Title 5—Improvement of Guidance. This program provides federal funds to be used to establish programs of testing and guidance for the identification and encouragement of able students. Existing state and local expenditures in guidance programs meet the matching requirements of this title so that General Fund appropriation is not required. The Title 5 funds reimbursed to school districts are shown in the Local Assistance Section of the budget, Subventions for Education.

Title 8—Improvement of Technical Education. This program provides federal funds to improve vocational education and has been amended into the Vocational Education Act of 1946. The budget and program for the title are shown in the Education Section of the budget, Vocational Education, and in the Local Assistance Section, Subventions for Education.

Title 10—Improvement of Statistical Services. These federal funds are provided to improve educational statistics so that more valid information is available about the condition and progress of education in the State. State matching funds are included for this program.

TITLE 2—LOANS TO STUDENTS IN HIGHER EDUCATION

Objectives

Title 2 provides loans to worthy and needy students in institutions of higher education within the State.

Administration of this program is transferred to the Trustees of the State College System in 1961-62 and the program and budget for 1961-62 is shown in that section of the budget.

Student Loan Program	$1,000,000	$1,664,880	– [a]	
General Fund	*100,000*	*166,488*	– [a]	
Federal funds [b]	*900,000*	*1,498,392*	[a]	

TITLE 3b—IMPROVEMENT OF INSTRUCTION

Objectives

Title 3 of the National Defense Education Act is concerned with the improvement of instruction in the fields of science, mathematics, and modern foreign languages. Federal funds for this program are matched by the State.

Program and Performance

Before a state can participate in the provisions of Title 3, it must prepare and have approved by the United States Commissioner of Education a state plan which in fact becomes the state's contract with the Federal Government for participation under the provisions of Title 3. Federal funds are then released to the state in accordance with the approved state plan and on the basis of the state allocations determined by the United States commissioner. These allocations are made on the basis of a formula as described in Section 302 (a) of the act.

Title 3a provides federal funds which are matched by local public school agencies for the purchase of equipment, materials, and minor remodeling for instruction in science, mathematics, and modern foreign languages. These funds are shown in the Local Assistance Section, Subventions for Education.

Title 3b provides federal funds which are matched by the State for the administration of Title 3a and for expansion and improvement of supervisory services to public schools in the

[a] Included in the budget for the Trustees of the State College System in 1961-62.

[b] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

TITLE 3b—IMPROVEMENT OF INSTRUCTION—Continued

Program and Performance—Continued

fields of science, mathematics, and foreign languages. These funds are expended for the following major purposes:

1. To evaluate, process, and approve local applications for federal funds under Title 3a.
2. To disseminate information throughout the State on new developments and practices resulting from project activities developed under the National Defense Education programs.
3. To supplement consultant staff in the Department of Education to meet the increased workload resulting from National Defense Education sponsored activities.
4. To finance statewide or regional studies, workshops and in-service education programs and conferences. During 1959-60 a total of 2,921 administrators, supervisors, and teachers were involved in such programs. It is estimated that this number will be approximately 4,000 in 1960-61.
5. To provide special consultants to local school districts. These consultants are recognized leaders in their respective fields and they assist local school districts with special problems in the teaching of mathematics, science, and foreign languages. These problems include in-service education of staff, program evaluation, local research, and development of new instructional materials. In 1959-60 the Department of Education provided 1,970 man-days of such special consultant services. It is anticipated that the figure will be approximately 2,500 man-days in 1960-61.

The Department of Education has as yet not undertaken any broad formal program of evaluation, for up to this point districts have been involved largely in preparing project proposals for consideration, and in purchasing and installing equipment. Therefore, many programs have not actually been under way long enough for a realistic evaluation. There are, however, certain impacts which can be readily identified. They include:

1. The Bureau of Secondary Education reports enrollments have increased in the last 3 years in science, 58.4 percent; in modern foreign languages, 44.7 percent; and in mathematics, 44.2 percent. They further report that where no Russian was taught 3 years ago, it is now taught to 1,100 students in the high schools of California. The junior colleges now report enrollments of 975 in Russian classes. In the elementary schools of the State, although teaching modern foreign language is not required, instruction in foreign languages is now being given to 105,000 children.
2. The large amount of general purpose audio-visual equipment purchased with Title 3a funds has strengthened instruction in the 3 subject areas financed by the National Defense Education Program and has also improved the quality of learning experience in all areas of the curriculum.
3. Science instruction is beginning to emphasize individual pupil activity with a corresponding decrease in textbook-lecture programs.
4. Some of the projects involving the teaching of foreign languages proposed carefully controlled action research. The purpose of the research was to determine most effective organization and instructional procedures. The results of this research will have a great influence on elementary and secondary school foreign language instruction in the future.
5. There has been a great increase in active co-operation by the various segments of education. It has become common for the Department of Education, county offices, local school districts, and college faculties to work on a single instructional program.

The cumulative aspects of this program increase the workload of the administrative and supervisory staff. Each year the program has the responsibility of servicing an additional number of approved projects. One additional clerical position is proposed in the 1961-62 fiscal year to handle the related increased clerical workload resulting from the review and administration of the increasing number of local school district projects.

TITLE 5—IMPROVEMENT OF GUIDANCE

Objectives

This program provides federal funds, to be matched by local funds or by existing state program expenditures, to establish and maintain programs of testing, guidance and counseling.

Program and Performance

Before a state can participate in the provisions of Title 5, it must prepare and have approved by the United States Commissioner of Education a state plan which becomes the state's contract with the federal government. Federal funds are then released to the state in accordance with the approved state plan and on the basis of state allocations determined by the United States commissioner under a formula prescribed in the act.

School districts file applications for federal funds to support improved programs of testing, counseling and guidance. The Department of Education reviews the application in terms of the act and the state plan. Upon approval by the Department of Education the local district is authorized to proceed with its program as outlined in its project proposal. Following the expenditure of funds by the local district, the district files a claim with the Department of Education for reimbursement of expenditures. These reimbursements are shown in Local Assistance, Subventions for Education.

Existing state and local expenditures meet the matching requirement of this act and no General Fund appropriation is required. State level expenditures are made for the following purposes:

1. Consultation with administrators and guidance personnel in local educational agencies for the improvement and long-range development of guidance programs.
2. Evaluation and co-ordination of Title 5 projects in local educational agencies by personal visitation.
3. Encouragement of and provision for research and experimentation in guidance supervised and co-ordinated by the State Department of Education.
4. Establishment and supervision of a pilot data processing center for pupil personnel data.
5. Provision of co-ordination and financial support to the college coordinators of pupil personnel training programs for statewide meetings to improve training programs.
6. Provision for and direction of an annual statewide conference of directors of local Title 5 projects.
7. Encouragement of and participation in the in-service-training meetings at the local and regional level.
8. Publication and distribution to secondary guidance personnel of materials such as; a scholarship catalogue, occupational information materials, a catalogue of audio-visual aids in guidance, a catalogue of junior and four-year college offerings, and reports on Title 5 activities.
9. Participation in leadership activities of professional associations.

Certain major trends in guidance programs have recently occurred which can be attributed in part to the Title 5 program.

1. Higher standards of training are being required for guidance personnel, and more efficient use is being made of trained personnel by assigning larger blocks of counseling time in the school day to such personnel. Clerical help is increasingly being provided to guidance personnel, thus freeing them from routine tasks and providing more time for counseling.
2. The parents of secondary school students are being increasingly involved in the educational and career planning of their children by means of counselor-student-parent conferences.
3. Testing programs for the identification of talent in youth are being improved, and more effective use is being made of test score and other data about individual students.
4. Perhaps the single most important guidance development is that local educational agencies are providing additional local funds for the support of increased guidance services.

Department of Education

NATIONAL DEFENSE EDUCATION—Continued

TITLE 10—IMPROVEMENT OF STATISTICAL SERVICES

Objectives

Title 10 provides for the improvement of statistical services of both state and local educational agencies so that more valid information is available about the condition and progress of education in the State.

Program and Performance

This title provides $50,000 a year to be matched by state funds for the purpose of carrying on research to improve and strengthen the adequacy and reliability of educational statistics provided by state and local reports and records, and to improve the methods and techniques for collecting and processing educational data and disseminating information about the condition and progress of education in the State.

Before a state can participate in the provisions of Title 10, it must prepare and have approved by the United States Commissioner of Education a state plan which becomes the state's contract with the federal government for participation in this title. The responsibility for this program in California has been assigned to the Bureau of Education Research. The programs to be undertaken as outlined in the state plan are:

1. *Evaluation of Present Statistical Services.* A detailed analysis of the approximately 100 annual report forms emanating from the department is in progress. The purpose is to develop a comprehensive, co-ordinated system of report forms adapted to automatic machine processing.
   All school districts and offices of county superintendents of schools were surveyed to ascertain the actual or contemplated use of data processing equipment. Functions, costs, types and quantities of equipment were enumerated. Results of this survey were published.
2. *Development of Accounting and Reporting Manuals.* The revision of the "Classification of Income" and "Classification of Expenditures" portions of the accounting manual are completed. Revisions of the "General Ledger and Stores Accounting," "Supplies and Equipment," "Abatements," "A.D.A. Cost Accounting," and "Terminology" portions are in progress. This development of the accounting manual is a co-operative effort with the officers and five regional organizations of the California Association of Public School Business Officials.
3. *Inventory of Educational Facilities.* All school districts were surveyed to discover the date of bond elections held during 1954-1959, the amount of the bond issue, the percent of the vote in favor of the bond issue, and the approximate date and amount of each bond issue planned for the future. Results of this survey have been published. A comprehensive survey of all public school facilities in California is in progress. As of June 30, 1960, the survey document in its preprinting form was being circulated to selected school districts on a tryout basis.
4. *Report of Noncertificated School Employees.* Sources of information concerning noncertificated personnel were explored, and data presently available from outside sources were evaluated. On the strength of the evaluation of this data this activity was postponed as not warranting intensive study at this time.
5. *Survey of Pupil Age-in-Grade and School Progress Information.* All school districts were surveyed to ascertain the number of school districts organized to accommodate entering classes at midyear. The birth dates and present grade assignments for 3 million elementary, junior high, and high school pupils have been gathered. The purpose is to provide accurate information regarding retardation, acceleration, and school-leaving of pupils. Analysis of the data is now in progress.

GENERAL ANALYSIS

Objectives

The State Library, in addition to maintaining a collection of books and other library materials, has several service responsibilities. These include: furnishing basic reference services to the State Legislature and the executive branch of the State Government; providing supplementary library service through local libraries in the State; assisting and stimulating the development of public library facilities in the State, and representing the interests of the State in the acquisition and preservation of historical material regarding the State.

Program and Performance

The State Librarian, who is appointed by the Governor, directs the activities of the State Library which, in addition to Administration, is composed of 4 operating bureaus. These are Field Services, Law Library, Reader Services and Technical Services.

The Field Services Bureau is responsible for the stimulation and development of public library facilities and service throughout the State, for the making of studies and surveys of library needs and for certain delegated responsibilities in relation to the supervision of county libraries.

In 1959-60 the Field Services Bureau concentrated particularly on: city-county relationships; unserved areas, or those needing a higher level of service; co-operative efforts of neighboring libraries; and library buildings. The Field Services also participated in the Governor's Conference on Public Library Service, and made special studies of particular libraries or the relationship of one library to its neighboring libraries.

The Law Section serves as a legal research and legal reference center for the Legislature, the State's law officers and agencies and the bench, bar, law students and citizenry of the State. In the 1959-60 fiscal year, the Law Section circulated 14,603 volumes outside the library and shelved 50,054 volumes.

The law classification and recataloging project started in July 1957, added 2,426 classed items in the field of American public and private law in 1959-60, thus making a total of 5,785 volumes classified to date and leaving a balance of 12,000 volumes remaining to be classified.

The Reader Services Bureau has the responsibility of coordinating the activities of the 7 public service sections included in the bureau. The Administrative-Legislative Reference Service handled an estimated 3,700 reference questions in its Capitol Branch. Registration in the Books for the Blind Section has increased by approximately 300 borrowers during the last fiscal year and the circulation of materials by 12,000. Circulation has increased throughout the State Library by 20.1 percent over the previous year.

The Technical Services Bureau has as its objective the coordination of the various functions of the sections which comprise the bureau and the efficient performance of the responsibilities under its jurisdiction.

The Union Catalog staff carried out a pilot study of a Last Copy Preservation plan. The State Library extended the scope of the plan from 18 member libraries to include all 64 Union Catalog libraries.

An increase of $15,000 in the book budget is included for 1961-62. This increase is based on an estimated 11 percent price increase, on the increased population to be served by the library in the budget year, and on selective increases in other categories of purchases. It is the general purpose of this increase to enable the State Library to maintain its position relative to the public it serves.

A 3-year project of book cleaning and repairing of the Sutro Branch collection is initiated in the budget for 1961-62 with a first year's cost of $8,444. For the past 17 years the collection has received only emergency physical maintenance. It is proposed to dust the entire collection; to clean the vellum volumes; to oil the leather volumes and to make repairs and mendings where necessary. It is estimated that this undertaking will require 2 book repairers for 3 years. During this 3-year period a study will be made to determine the permanent level of book repair work necessary at the Sutro Branch.

It is estimated that the present expansion space in the Library and Courts Building will be fully in use within the next 7 years. Additional storage space will then be required at some other location. In order to extend this period before maximum occupancy of the existing space is achieved and to prevent using costly rented space for storage of relatively valueless material, it is proposed to initiate a 2-year program of weeding the book collection at a yearly cost of $36,187. It is proposed to employ subject matter specialists, possibly from the Sacramento State College faculty, to review the material title by title; 2 librarian II positions to handle the additional professional workload; and 3 clerical positions to perform the clerical work involved in the weeding project.

RURAL LIBRARY SERVICES

Objectives

The Rural Library Services Act (Public Law 597, Eighty-fourth Congress) has as its objective the extension of public library services to rural areas now lacking in such services. Federal funds are provided for this purpose.

Program and Performance

The field program continued to be accelerated by the Federal Library Services Act through which reimbursed projects are demonstrating improved library service in rural areas. During 1959-60 the San Diego Bookmobile project was successfully completed; the San Joaquin Valley project to provide complete and speedy information services to 6 county and 4 city libraries was developed and is being carried forward into 1960-61; the small exhibit bookmobile purchased with federal funds continued operation; the North Bay Cooperative Library System, a demonstration of co-operative library service in parts of 6 counties in the North Bay area, was established and will be carried forward; the Processing Center, for 16 member libraries in Northern California, cataloging, classifying and preparing their books for use, is continuing; a scholarship program has been established and will be carried forward; and plans are being developed for partial demonstration of library service in Mendocino County which does not have a county library.

GENERAL ANALYSIS

Objectives

The State operates 3 subsidized production centers located at Oakland, Los Angeles and San Diego. These centers offer factory employment to blind, partially sighted and physically handicapped persons enabling them to contribute to their own support.

Program and Performance

The manufacture of such items as brooms, mattresses, mops, pillowcases and other textile items, surgical wrappers, rugs, brushes, plastic articles and rubber mats constitutes the main production program together with the fabrication and assembly of many products on a subcontract basis. The administrative and physical plant operating expenses are a direct charge against the General Fund and the manufacturing activities are financed from working capital supplied by the Industries for the Blind Manufacturing Fund into which the proceeds from the sale of the products are deposited.

For many years these centers were considered as separate entities with little direct central administration. The goal is now toward development of a strong central administration to coordinate the activities of the centers and provide adequate administrative control over the program. The program is administered by a central office headquarters staff under the general direction of the Chief, Division of Special Schools and Services of the Department of Education.

In keeping with recommendations of the Co-ordinating Council on State Programs for the Blind, management is attempting to make these centers more competitive by transferring the less efficient workers to the Opportunity Work Center Program.

During the 1959-60 fiscal year 283, or a full-time equivalent of 190 blind or otherwise physically handicapped workers were employed in the 3 centers, and the payroll for these workers was $467,431.

Sales of the 3 centers amounted to $2,129,846 and the cost of goods sold, including salaries and wages, totaled $2,186,029. This reflects a loss in the manufacturing operations of $72,808 in the 1959-60 fiscal year.

In an effort to improve operations of the Industries for the Blind, management requested a marketing study by a private consulting firm. This study was completed in the 1959-60 fiscal year and it strongly recommended that the industries direct their products and sales activities more in the direction of the commercial market in order to avoid the overdependency of the program on federal orders. In the 1959-60 fiscal year the loss in the manufacturing operations of $72,808 resulted mainly from a sharp reduction of federal orders.

Management is now implementing many of the recommendations of this study. Sales and marketing specialists have been employed to increase the emphasis on commercial outlets and subcontract work. Quality control personnel have been employed to improve the quality of products and to more closely control the pricing structure of products in order to compete in the commercial market.

Management feels that these steps will lead to a more economical program in terms of state support and a better opportunity for the blind workers to have steady productive employment at a reasonable rate of compensation.

The program for 1961-62 is based on the employment of 355 individuals or a full-time equivalent of 238 workers.

---

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the Los Angeles area to enable them to contribute to their own support.

Program and Performance

This center is the largest of the 3 blind manufacturing centers and has the most diversified manufacturing program. The program includes the manufacture of mattresses, box springs, pillowcases, ironing board pads and covers, sterile wrappers, aprons, surgical drapes, mattress ticks, dry mops, rugs, mats, floor brushes and commissary specialties. A contract department is operated in which subassembly work is done for local private industries.

The General Fund is charged with administration costs not directly related to the manufacturing process and the Industries for the Blind Manufacturing Fund is charged with all manufacturing costs.

The financial transactions of the Manufacturing Fund for this center, excluding administrative costs borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit
1954-55	$806,000	$195,431	$588,263	$22,306
1955-56	987,660	202,705	729,665	55,290
1956-57	944,019	239,509	659,051	45,459
1957-58	1,313,147	276,261	996,099	40,787
1958-59	1,432,605	277,838	1.038,476	116,291
1959-60	837,826	179,665	659,017	—856

A decrease in sales of $594,779 occurred in the 1959-60 fiscal year from the prior year resulting in a reduction of $98,173 in wages paid to the blind workers, and a loss in the total manufacturing operation of $856. The plan of management to improve the program is discussed in the Industries for the Blind general analysis. (See page 182.) These improvements are expected to result in an increased number of workers over the actual number employed in the 1959-60 fiscal year and a more efficient program in general.

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the Oakland area to enable them to contribute to their own support.

Program and Performance

This center specializes in the manufacture of domestic and industrial corn brooms. Other products manufactured at this center are street brooms, pillowcases, mailing bags, sewn domestic cotton items, sanitary brushes, rubber mats, and commissary items for the Federal Government.

The General Fund is charged with administrative costs not directly related to the manufacturing process and the Industries for the Blind Manufacturing Fund is charged with all manufacturing costs.

The financial transactions of the manufacturing fund for this center, excluding administrative costs borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit
1954-55	$865,000	$209,174	$625,877	$29,949
1955-56	712,624	200,967	489,587	22,070
1956-57	909,452	228,263	649,579	31,610

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped and some physically handicapped persons in the San Diego area to enable them to contribute to their own support.

Program and Performance

This center specializes in the manufacture of flat mops, stick mops and mopholders. Improvement in the management of the program is recognized by the increase number of workers anticipated over the actual number in the 1959-60 fiscal year.

The General Fund is charged with administrative costs not directly related to the manufacturing process and the Industries for the Blind Manufacturing Fund is charged with all manufacturing costs.

The financial transactions of the Manufacturing Fund for this center, excluding administrative costs borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit
1955-56	$641,698	$68,107	$535,240	$38,351

OAKLAND ORIENTATION CENTER FOR THE BLIND—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	

GENERAL ANALYSIS

Objectives

The Oakland Orientation Center admits blind persons as trainees in an intensive program designed to assist them in becoming more self-sufficient and, in cases where feasible, partially prepares them for useful and remunerative work in trades, professions, private business, private industry, or public service. The center also provides a home for those blind persons in residence prior to 1951.

Program and Performance

In meeting these objectives, the center offers a program designed to deal intensively with problems arising from blindness. First of all, a blind person must learn new means of performing the various tasks and functions connected with the whole range of living, including new techniques of travel, communication, habits of daily living and the use of one's senses other than sight in orienting one's self to the physical world about him. To accomplish these ends, the center offers courses in travel, Braille, typing, shop, home economics, daily living, physical conditioning, and the like.

The program is designed to help the enrollee regain a feeling of competence and self-confidence, to the end that he may return to the pattern of life which he would have followed in the absence of blindness. Almost without exception, all of the 100 students admitted or terminated during the fiscal year ending June 30, 1960, gained a confidence for self-help, many becoming entirely self-supporting, others resuming their functions as homemakers, and still others enrolling in courses of further training leading to vocational or professional goals.

The center also provides a residence for blind persons admitted prior to the separation of the orientation functions and the workshop manufacturing functions in 1951. The number of such blind persons being cared for is now 33.

It is anticipated that a portion of the present site will be used for highway purposes during the 1962-63 fiscal year. Co-operative studies are now being conducted by the agency, Department of Finance and the Division of Architecture to determine the proper action to be taken.

GENERAL ANALYSIS

Objectives

These centers, established under the provisions of Section 3366, Welfare and Institutions Code, provide work opportunities for blind and physically handicapped adults who cannot, because of their handicap, physical condition, or personal desires, be employed in private industry or in the Industries for the Blind Program.

Program and Performance

This program is conducted in 3 centers located in Berkeley, Los Angeles, and San Jose. The San Jose Center has operated since 1953, and the Berkeley and Los Angeles Centers were established during the 1959-60 fiscal year.

Employment opportunities stem mostly from assembly and subcontract work for private industry and for the Industries for the Blind with the balance arising from handicraft work such as chaircaning.

The co-ordinating council on State Programs for the Blind recommended in March 1957 that only productive workers be retained in the California Industries for the Blind workshops and that less productive workers should be given work opportunities in the opportunity centers.

The budget proposes that the 2 presently authorized half-time laborer positions at the Berkeley and Los Angeles Centers be increased to full-time to provide adequate minimum staffing to handle the assembly and subcontract workload. These increases are partially offset by the elimination of 0.1 man-year temporary help at each of the centers.

---

[a] Composed of savings in salaries and wages, $914; operating expenses, $12,915; equipment, $481; and a loss in reimbursements, $1,568.

[b] Composed of savings in salaries and wages, $302; operating expenses, $4,704; and excess reimbursements, $131.

[c] Expenditures for the 1959-60 fiscal year are reported in the General Activities, Department of Education portion of the budget. (See pages 170 and 171.)

Program and Performance—Continued

high school levels. Besides special teaching methods and techniques, special equipment such as Braille writers, Braille books, embossed maps and globes, geometric models, models for nature study, audio and various types of other equipment are also used. The Helen Keller deaf-blind unit provides a full educational program for these doubly handicapped children.

In addition to the residential school aspects, field services are available for preschool blind children, graduates and ex-pupils. The school also administers reader service for blind college students who cannot be served by Vocational Rehabilitation Services.

During the 1961-62 fiscal year, the program will provide general education for 166 resident children, field services for 100 preschool children, guidance services for approximately 55 former pupils, and reader service for approximately 70 blind college students.

Of the 166 resident students 158 are blind and 8 are classified as deaf and blind. During the 1960-61 fiscal year, there has been an unanticipated increase in the number of deaf-blind from 6 to 8. The 2 additional students are at the beginning school age and require more attention than the older deaf-blind students which have been budgeted on a 1 teacher to 3 students ratio. To handle this increased workload 1 additional teacher position has been approved on a temporary basis in the 1960-61 fiscal year and is proposed on a permanent basis in the 1961-62 fiscal year. An additional 0.5 position in temporary help is included to correct a staffing deficiency in the janitorial maintenance function.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis and treatment and the determination of an educational program for children from Northern California afflicted with cerebral palsy and other similar handicaps. It also serves as a demonstration laboratory school for the education department of San Francisco State College. In addition, the school functions as the Medical-Educational Diagnostic Center for the Neurologically Handicapped Child in co-operation with the Bureau of Crippled Children Services, Department of Public Health.

Program and Performance

During the 1959-60 fiscal year this school served a total of 181 children, 25 more than were served in the previous fiscal year. Of these, 84 were evaluated in the diagnostic center only, and 97 were enrolled in the school for intensive educational work and therapy.

The 97 children enrolled in the school for prolonged work were selected mainly from those previously examined in the diagnostic center with the balance referred from local school districts, other diagnostic centers and other state agencies.

In addition to providing local school programs and parents with recommendations regarding suitable programs for the children's future based upon their individual needs, the school co-operated with the Bureau of Vocational Rehabilitation, Department of Education, by providing a limited amount of prevocational training of students, enabling the children to develop sufficient skills to become good candidates for further counseling and work experience provided by the Bureau of Vocational Rehabilitation.

The agency program served as a training experience for 6 physical therapists who received practical clinical training. Regularly scheduled visits were made to the school by senior nursing students from 6 San Francisco hospitals, and approximately 30 student and graduate teachers from the Special Education Department of the San Francisco State College observed the program and participated in practice teaching in the various classes.

Increased emphasis will be placed on the teacher training aspects of the program in the 1961-62 fiscal year to prepare new teachers and retrain presently employed teachers who desire to increase their knowledges and skills in meeting the problems presented by children with multiple handicaps, language problems and other severe educational problems enrolled in public school programs for handicapped children in the State.

One Food Service Assistant is proposed in the 1961-62 fiscal year and it is completely offset by the abolishment of an equivalent position of temporary help.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis, treatment and determination of an educational-therapy program for children from Southern California who are crippled by cerebral palsy or other similar handicaps. It serves also in a limited capacity as a demonstration laboratory school for the training of teachers of handicapped children for the education department of Los Angeles State College of Applied Arts and Sciences.

Program and Performance

The children enrolled in the school are referred by the Crippled Children Services of the Department of Public Health and from the local school districts of the 13 counties of Southern Cailfornia. The length of a child's enrollment, usually less than a year, is dependent upon the severity of the handicap, the degree of difficulty in establishing an individual educational, medical and therapy program, and the response of the parents to counseling and guidance provided by the staff. Upon completion of the residential program, the child is either returned to his local community for continued medical supervision, treatment and special education or is cared for by other private or public facilities. During the 1959-60 fiscal year, a total of 65 children were enrolled. Enrollment of 75 is anticipated during the 1960-61 and 1961-62 fiscal years.

In the 1959 summer session, Los Angeles State College taught 6 courses at this school in which 65 students were enrolled.

Present rented buildings continue to be used with a minimum of maintenance in anticipation of the development of the new campus adjacent to Los Angeles State College. It is planned to begin construction during the 1961-62 fiscal year and it is estimated that students may be received in September 1963.

A 0.5 medical social worker position is proposed in the 1961-62 fiscal year to provide social casework services to the children. This position has been previously authorized, but was abolished because of recruitment difficulties.

A 0.5 intermediate stenographer-clerk position is proposed to provide clerical services to the proposed social worker position and to the previously authorized 0.3 physician and surgeon II position which is to be filled for the first time in 1961-62.

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children from the elementary through the high school grades with special emphasis on the development of language concepts.

Program and Performance

The School for the Deaf, Berkeley, is a residential school admitting mentally normal deaf children from 5½ to 21 years of age. Students are given elementary and high school general education, with special emphasis on development of language concepts. Students are given special speech instruction using oral techniques as well as finger spelling and lip reading. Opportunities are provided for learning a trade in one or more of the following fields: home economics, commercial art, printing, cabinet making, shoe repair, baking, business techniques, and metal shop.

Opportunity is provided for the students to qualify for attendance at Gallaudet College in Washington, D.C., the only college in the United States providing collegiate instruction for deaf people. Twenty-eight graduates of this school attended Gallaudet College in the 1959-60 school year. Other graduates have been placed in business firms, construction, printing and allied trades, shoe repair, bakeries, and in self-employed business ventures.

While academic and vocational subjects constitute the main program at this school, the problem of teaching these handicapped children to adjust to society and everyday problems is met to a large extent by the use of psychologists and counselors.

Two classroom teachers are proposed for the 1961-62 fiscal year in accordance with the authorized staffing formula for classroom teachers. This formula provides for staffing of elementary grades at a 1:8 ratio and intermediate and advanced levels at a 1:10 ratio. Based on the estimated enrollment of 478 (160 primary and 318 intermediate and advanced) 2 additional teachers are required.

One-half position temporary help is proposed for the 1961-62 fiscal year to relieve the excessive workload of the existing men's physical education teacher who also coaches all athletic teams of the school which compete in a Bay Area athletic league.

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children from elementary through high school grades with special emphasis on language concepts.

Program and Performance

The curriculum of this residential school is similar to that found in public day schools, but with special instruction for all students using oral techniques as well as lip reading and finger spelling.

The vocational education program is an important part of the curriculum. A student may receive a certificate of proficiency in any one of the following fields: home economics, commercial art, printing, cabinetmaking, body and fender repair, spotting and pressing, business education, baking, electric motor rewinding and electric appliance repair.

The school also offers a college preparatory course to qualify students for admission to Gallaudet College in Washington, D.C., which is the only college in the United States providing collegiate instruction for deaf people. Ten students from this school attended Gallaudet College in 1959-60.

In addition to the academic and vocational programs offered, the problem of teaching these handicapped children to adjust to society and its everyday problems is met to a large extent by the employment of counselors.

One Supervising Teacher position is proposed in the 1961-62 fiscal year to provide specialized teacher supervision and to perform psychologist duties of testing and counseling.

GENERAL ANALYSIS

Objectives

The purpose of vocational education is to provide training to develop skills, attitudes, and working habits, and to impart knowledge and information needed by workers to enter and progress in employment on a useful and productive basis.

Program and Performance

The vocational education program for California is based on a plan, co-operatively approved and financed by local school districts, the State Department of Education, and the United States Office of Education. The available funds are expended for supervision and teacher training at the state level.

Federal funds available for vocational education under the Smith-Hughes and George-Barden Acts must be matched on an equal basis by local or state funds. The George-Barden funds may be used for the reimbursement of salaries, traveling expense and instructional equipment while the Smith-Hughes funds allow for reimbursement of salaries only.

In addition to an administrative unit the state agency for vocational education is divided into 4 services which offer assistance and guidance to the local districts. These services include:

1. Agricultural education, which assists persons who are planning to enter, or have already entered the occupation of farming. In 1959-60 a total of 18,576 persons enrolled in such courses, a decrease of 53 persons from 1958-59.
2. Industrial education, which is designed to help the person who is contemplating entering a trade or has already done so. The 1959-60 enrollment in this activity totaled approximately 125,000, or an increase of 1,210 from 1958-59.
3. Homemaking education, the largest of the 4 services, which operates a program of helping local school districts to assist persons engaged in the duties and responsibilities of the home. Enrollment in these courses for 1959-60 totaled 143,881, an increase of 5,617 from 1958-59.
4. Business education, which deals only with the distribution occupations phase of business education. This program is limited to part time, day, and evening classes and the 1959-60 enrollment totaled 93,114 an increase of 8,592 from 1958-59.

In addition to the basic vocational education program, there are 2 state-financed programs which augment the joint federal-state-local program. These are the Fire Training Program and the Apprenticeship Instructional Materials Program which are discussed below:

Fire Training. This program provides service to local fire departments by conducting in-service training throughout the State, teaching the latest methods and techniques of fire fighting, fire prevention and fire investigation. During 1959-60, 227 schools were held and 5,597 men were instructed in classes taught by the 6 itinerant instructors on the staff. A total of 4,748 class hours of instruction were given. In addition, the annual arson seminar was conducted at Berkeley with an attendance of 239, and the annual workshop was conducted in Fresno with an attendance of 188.

Instructional Materials for Apprentices. This program prepares instructional materials for use by apprentices in trades where there are a minimum of 100 apprentices. There are currently 30 such trades. The materials prepared include, in addition to textbooks, such instructional aids as examinations, progress charts and teacher handbooks. These publications are sold to the apprentice at a price sufficient to recover the direct costs of such publications.

The Practical Nurse Training Program was instituted in 1956-57 by the Federal Government for the purpose of developing curricula and programs in this field. The development is being performed by contractual arrangements with the University of California.

The Area Vocational Education Program is financed entirely by federal funds from Title VIII, National Defense Education Act which seeks to stimulate the technical education and training of technicians needed by industry. This program is responsible for the reviewing, approving and processing of local school district applications for federal funds allotted to California for the purpose of technical education. Workload increases incurred administering the program required 2 positions in temporary help and an additional half-time clerical position in the 1960-61 year. These positions are proposed in the 1961-62 fiscal year budget.

GENERAL ANALYSIS

Objectives

Vocational Rehabilitation Program encourages and assists physically and mentally handicapped persons to achieve a maximum degree of self-support.

Program and Performance

The section offers case diagnosis and evaluation, vocational guidance and a series of services as needed to bring the disabled individual to the point of employment; finally, to assist him in locating a suitable job. These other services may include furnishing a prosthetic device, medical or psychiatric treatment, training and training supplies, aid in establishing selected individual in small business enterprises and, when needed, maintenance and transportation concurrently with training or medical care. Other specialized activities include the Business Enterprise Program for the Blind, which establishes vending stands, snack bars, and cafeterias for qualified blind persons, either in public buildings or in private industrial establishments. The section also conducts a fully federally reimbursed program involving the determination of disability of persons unable to work because of a physical or mental disability. These are persons who have Social Security coverage, as well as a disabling physical or mental condition.

Demands upon the section have increased at a sharply accelerated rate. Presently the section accepts about 1 out of 4 applicants for service, and this ratio will decrease with increasing referrals. The tremendous growth of special education programs for severely handicapped children has caused a rapid increase in demands for vocational rehabilitation services to prepare these young people for employment as they complete their public school work. It is estimated that the entire resources of the section could ultimately be absorbed in 1 or 2 large disability groups coming out of the public schools, notably, mentally retarded, cerebral palsied, and severe orthopedically handicapped cases. In addition, nationwide publicity given to the dramatic results obtainable through modern rehabilitative methods has produced many referrals from agencies who expect their clients to be served by the State.

Administration

Central program direction and operation functions are carried on by this unit. The section is presently budgeted on a ratio of approximately 54 percent federal funds to 46 percent state funds. A General Fund addition of $70,000 is included in 1961-62 to finance the third year of the so-called "Bridge Provisions" of the financing formula in Public Law 565. This will provide for a new ratio of 52 percent federal funds to 48 percent state funds in 1961-62. After a 4-year bridge period the overall program will be budgeted at an approximate ratio of 50 percent federal funds to 50 percent state funds.

As a part of administration there is again included the program of encouraging establishment and operation of sheltered workshops for the disabled, authorized under Chapter 2030, Statutes of 1959.

The new position of workshop consultant was not filled until June of 1960 due to recruiting difficulties. In the time it has been filled it is already apparent that this position will be of great value through assisting community workshops in more efficient operation, developing a more rational means of establishing fees for services purchased by the State, and encouraging greater community participation in the rehabilitation of disabled clients of the section.

Business Enterprise Program for the Blind

This program assists blind persons to become self-supporting by providing equipment for the establishment of vending stands, snack bars, and cafeterias, in public buildings and industrial plants. Assistance is also furnished by a staff of Business Enterprise Officers to insure that such establishments are properly operated.

The section has established a maximum allowance of $4,000 to install any one stand.

Vocational Guidance and Placement

This unit comprises the main body of the program. It is divided into 10 districts and 14 branch offices throughout the State.

In 1952 the Vocational Rehabilitation Section took steps to implement legislative intent by establishing a system of priorities for acceptance of eligible cases. Public assistance cases were placed high on the priority list and since that time a substantial number of recipients of public relief have been rehabilitated into employment.

In 1954 the section instituted an adequate statistical recording and reporting program so that careful records have been kept since that time on the nature and characteristics of the people served. In the 6-year period ending June 30, 1960, the section rehabilitated 3,631 individuals who had been on public assistance. Since the average grant for these families was approximately $1,500, the savings for 1 year would be $5,446,500 in relief payments. If they remained self-supporting for 5 years, the savings would amount to $27,232,500.

The following table presents the movement of the active caseload during the fiscal years 1957-58 through 1959-60:

	1957-58	1958-59	1959-60
Active caseload	5,552	7,124	8,945
Accepted during year	5,151	6,372	6,166
Total active	10,703	13,496	15,111
Closed, rehabilitated	1,528	1,794	2,382
Closed, unemployed after plan developed	615	613	827
Closed, other reasons	1,436	2,144	2,682
Total closed	3,579	4,551	5,891
On hand at end of year	7,124	8,945	9,220

While the number of rehabilitations accomplished by the Vocational Rehabilitation Section is numerically low compared to results in other states, evidence indicates that in many states the emphasis is placed upon serving only those disabled applicants who may be brought to employment most quickly and cheaply, often at the expense of more severely involved cases which have a greater need for service. The past experiences of the California program, when primary emphasis was placed on numbers served, created a condition where all staff efforts were

Department of Education

VOCATIONAL REHABILITATION SECTION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Vocational Guidance and Placement—Continued

directed toward bringing into the caseload persons whose needs were superficial and who might have been served through agencies such as the public employment service or community health services. California's present program gives priority to those cases whose need, broadly defined, is greatest and who, without assistance from the State, would become permanent public charges. Although such a policy is incompatible with the present national trend of serving large numbers of undifferentiated cases, the ultimate returns to this State are much greater.

Disability Certification Program

This program is completely financed from the Federal Social Security Trust Fund. It involves the disability certification program connected with the Old Age and Survivors Insurance.

1961-62 Program

The 1961-62 Budget proposes $110,000 for a new program to provide vocational rehabilitation services to patients under the care of the Department of Mental Hygiene. This will provide for 7 new vocational rehabilitation counselors and 5 clerical positions.

In addition 6 new positions are included on a workload basis. Of these, 5 are proposed as an extension of positions limited by the Legislature and 1 is included for professional study services to a private hospital on a reimbursable basis.

The 1960-61 Budget authorized an Administrative Assistant on a limited term basis of 1 year. This position was required to relieve the increased workload of the chief of the section in the area of administrative detail such as liaison, public information, manual preparation, complaint handling and correspondence. Workload requirements in this area are still pressing, and to handle these duties it is now believed that a more specialized knowledge is required. As a result a Supervising Vocational Rehabilitation Counselor II is proposed on a permanent basis.

The Legislature approved 2 Vocational Rehabilitation Counselor positions and 2 related clerical positions on a temporary basis for the 1960-61 fiscal year. These 4 positions are proposed on a permanent basis for the 1961-62 fiscal year.

An additional Vocational Rehabilitation Counselor position is proposed to provide services to the Mount Zion Hospital to aid in a study of rehabilitation of clients afflicted with Parkinson's disease. This position and related expenses will be financed by increased reimbursements.

The Disability Certification Program is budgeted at the same level as in fiscal year 1960-61. It is anticipated, however, that later in the year there will be needed additional staff for this program because of the 1960 amendments to the Social Security Act. The amendment having the greatest impact on the California Disability Certification Program is removing the provision of limiting cash benefit payments to disabled individuals over 50 years of age. This amendment removes any age restriction, so cash benefit payments can be made to any individual who has been working under covered employment long enough to be eligible for benefits under the Social Security Law.

GENERAL ANALYSIS

Objectives

The function of this system is to provide monthly allowances to public educational personnel who are qualified to retire for services or disability in accordance with the provisions of the Teachers' Retirement Act and policies established by the State Teachers' Retirement Board. The board consists of the State Board of Education plus 2 additional members who represent teachers in the system.

Program and Performance

The present Teachers' Retirement System was established by Chapter 13, Statutes of 1944, 4th Extra Session, and is provided for in Section 13801 through Section 14415 of the Education Code. It was intended to provide retirement allowances for service or disability, and other related benefits for the California public school teachers.

The law provides for the collection of contributions from members by payroll deduction, from the counties, school districts, and other employing agencies. These funds consist of members' contributions which are based on an individual rate applied to the earned salary, and also employer contributions of $12 per year for each member employed, and an amount equal to 3 percent of the certificated payroll of each district or a lesser amount determined by applying an appropriate rate to the assessed valuation of the district's property. Additional members' contributions are received directly by the system for payments of redeposits and arrears, and for the purchase of additional annuities above those provided by the application of the normal retirement benefit formula to the individual case. The member's contributions are credited to his account to be used to provide a retirement allowance or to be refunded upon withdrawal from membership or death; they are invested in qualified securities in accordance with the system's investment program. The employer contributions, plus the appropriation from the General Fund, are used to pay current benefits to eligible persons.

There were approximately 200,000 contributing members during the year 1959-60. In addition to these persons, there were over 35,000 members who had elected to leave their money on deposit since they were either then eligible for a retirement benefit upon attainment of age 55, or they intended to return to a contributing status in the future.

The investment function previously administered by the Department of Finance was transferred during 1960-61 to the Teachers' Retirement and the State Employees' Retirement Systems where the major portion of investment needs has existed. The positions of Investment Officer and Assistant Investment Officer were added on a half-time basis in each agency. Teachers' Retirement System will reimburse the Employees' Retirement System for related investment expenses. The cost to this system for 9 months in 1960-61 is estimated to be $17,625; with full 1961-62 cost at $25,000.

Two positions used to verify out-of-state service prior to 1944 have been abolished in 1960-61. Such services will now be verified at the time of retirement of a member rather than before retirement.

Two positions are provided to administer survivor benefits and health insurance programs. These positions were temporarily established in 1960-61 out of temporary help funds provided in the 1960 Budget for these purposes.

Totals	–	$37,594	$258,879	$221,285
Personnel man-years	–	5	18	13

GENERAL ANALYSIS

Objectives

The Donahoe Higher Education Act of 1960 requires the Co-ordinating Council for Higher Education to perform the following functions advisory to the governing boards of the institutions of higher education in California and to appropriate state officials:

1. Review the annual support budgets and capital outlay requests of the University of California and the State College System, and present comments on the general level of support sought;
2. Delineate the different functions of public higher education and counsel as to the programs appropriate to each segment;
3. Develop plans for the orderly growth of public higher education and make recommendations on the need for, and location of, new facilities and programs.

Program and Performance

The Co-ordinating Council for Higher Education was established by the Legislature in 1960 as part of the Master Plan for Higher Education. The council consists of 15 members, 3 each from the University of California, the State College System, the junior colleges, the private colleges and universities, and representatives of the general public.

The council held its first meeting on October 4, 1960, in Sacramento. The council has, therefore, only begun to organize itself and to engage in a search for a director of the council. By statute, the director is responsible for the appointment of a small staff, and thus the council is concentrating on the selection of a director. Until such time as staff is available, the council will review and make recommendations on all remaining unfinished proposals of the Master Plan for Higher Education.

It is anticipated that the director will be selected and appointed by June 1961. The council should begin to operate and carry out its duties and obligations during the 1961-62 fiscal year.

The new positions proposed for 1961-62 will provide staff services for the co-ordinating council with specialists in the following areas: academic affairs, fiscal affairs, and facilities planning.

WESTERN REGIONAL HIGHER EDUCATION COMPACT

Objectives

Chapter 1694, Statutes of 1955, provided for California's participation in the compact which now includes 13 other western states, including Alaska and Hawaii, to promote better co-operation in higher education in medicine, dentistry, veterinary medicine and public health.

Program and Performance

Three commissioners are appointed by the Governor for 4-year terms to the Western Interstate Commission for Higher Education. One commissioner must be engaged in the field of higher education in California. A report of activities is required to be submitted by the commission before January 15th each year to the Governor and Legislature. The expenditure amount represents California's share of the expenses of the Western Interstate Commission for Higher Education.

[a] Current funds available for general and specific purposes, including endowments and donations for support of continuing activities; does not include funds for services under contracts. Neither the revenues nor the expenditures of University funds are included in overall budget totals.

[b] Total current expenditures including contributions to the State Employees' Retirement Fund. Excludes expenditures, income, and enrollment, if any, for the following activities and functions:

(1) Summer sessions, extension and public service, organized research, student aid, auxiliary enterprises.

(2) Organized activities of educational departments such as the University Creamery at Davis, and the Optometry Clinic at Berkeley which are supported out of their own income. However, teaching hospital expenditures in excess of their income are included as well as expenditures in the University elementary schools both of which activities represent instruction.

[c] *Unit Cost by Level of Student Budget 1961-62:*

Unit costs developed for use in the Master Plan for Higher Education were based on information obtained from the Restudy of the Needs of California in Higher Education conducted in 1953-54. This previous study provided the cost per student credit hour (SCH) for each level of instruction. By obtaining the total SCH's produced in 1959-60 and projecting those to be produced in 1960-61 and 1961-62 based on enrollment estimates, it was possible to prorate expenditures for each of the years in question by weighting the SCH's produced at each level of instruction by the same cost ratios that existed between them in the 2 previously mentioned studies.

Students who are *classed* as lower, upper, or graduate division students, do not take all their course work at the corresponding level of *instruction*. Therefore, in order to compute the cost per full-time student, a study was made at each campus of the University to determine the average annual number of course units taken at each level of *instruction* by each *class* of student. The cost per SCH was then extended by the course units undertaken at each level of instruction. At Berkeley, for example, the calculation for cost per average upper division student is as follows for the year 1959-60:

	Each upper division student		
	Average SCH's taken	*Cost per SCH*	*Total*
Lower division	6.69	$32.26	$215.82
Upper division	21.78	64.64	1,407.86
Graduate	.11	190.30	20.93
	28.58		$1,644.61

GENERAL ANALYSIS

Objectives

The University of California is a statewide institution of higher learning which has 4 major functions.

These are:

1. Research directed toward advancing the understanding of the natural world and the interpretation of human history and of the great creations of human insight and imagination.
2. Instruction of able young people, not merely by transmitting to them established knowledge and skills, but by helping them to experience with their teachers the actual processes of developing and testing new hypotheses and fresh interpretations in many fields.
3. Training for professional careers—a training not merely routine, but grounded in understanding of relevant sciences and literature, and enlightened by some experience in the methods by which the boundaries of knowledge are pushed back.
4. Various sorts of expert public service.

Program and Performance

In keeping with these general purposes admission requirements at the University of California are more selective than those of the junior colleges and state colleges, even though the content of introductory courses at the freshman and sophomore levels may be closely comparable for students planning to go on to a bachelor's degree, by transfer or otherwise. The program of the University of California develops greater differences in the upper division, and goes on to levels of professional or general scholarly training not duplicated in other public institutions.

The University operates on 7 major campuses and a number of experiment stations. Major campuses are situated at Berkeley, San Francisco, and Davis in Northern California, and at Los Angeles, LaJolla, Riverside and Santa Barbara in Southern California. Its full-time resident enrollment has been the largest in the country for a number of years. It reaches the people directly in all parts of the State through its agricultural extension service, including 4-H clubs, and through university extension classes, correspondence courses and conferences. It maintains off-campus services through which practicing doctors, lawyers, dentists, engineers, etc., may renew and deepen the value of their services to the public throughout life; a university press for the publishing and distribution of scholarly books; and diagnostic and treatment centers to which doctors may refer citizens of the State suffering from particularly dangerous or obscure ailments.

In carrying out these programs the University has attained a ranking that places it among the greatest institutions of learning in the world. As a natural part of this development the University has tended to devote its energies to advanced studies and large amounts of fundamental research. As a consequence the student body is heavily weighted in the upper division and graduate schools.

UNIVERSITY OF CALIFORNIA—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

One measure of this is the number and type of degrees granted. The table below shows the distribution of degrees granted in 1950-51 and 1959-60. This table also illustrates the growing trend toward the more advanced types of work.

YEAR	UNDERGRADUATE DEGREES	GRADUATE DEGREES
1950-51	84.0%	16.0%
1959-60	69.1%	30.9%

Another measure of this shift to advanced standing and graduate work can be shown by considering the composition of the enrollment. The table below shows the trend for the years 1957-58 through 1961-62.

	1957-58	1958-59	1959-60	1960-61	1961-62
Lower division (%)	31.8	31.8	32.5	32.4	33.6
Upper division (%)	43.4	41.4	39.7	39.1	36.0
Postgraduate (%)	24.8	26.8	27.8	28.5	30.4

The budget for 1961-62 contains provision in recognition of these trends in enrollment both as to size and shifts between lower and upper divisions. The allowances for academic positions have been made on the basis of a weighted teacher-student ratio which recognizes the differences in requirements for instructing at the lower division, upper division, and postgraduate level.

The 1961-62 Budget provides for a $11,378,249 increase over the amount of state funds appropriated in 1960-61. This 9.4 percent increase is comparable to the 9.3 percent gain in enrollment estimated for 1961-62.

University revenues are up $3,126,816 (6.3 percent) over their 1960-61 level. Major elements of this rise include: *Auxiliary Enterprises* (residence halls, bookstores, parking operations, etc.) for which a $776,229 increase is estimated; *Student Fees,* including incidental fees, nonresident fees, special tuition fees, and University Extension fees, for which the increase is $1,984,902; and *Endowment Income,* up $324,199.

STATEWIDE

This part of the budget includes the statewide and administrative expenditures for the University as a whole. In addition, it also contains the operating budgets for units which function on several campuses or outside of the jurisdictions of chief local administrative officers. These include Lick Observatory, statewide Agricultural Sciences, Graduate Division, University Extension, etc. The statewide budget is also the temporary resting place for miscellaneous lump-sum provisions for contingencies and salary changes, which will later be allocated to appropriate detailed budgets on the various campuses.

The salary and budgetary savings realized in recent years have averaged approximately 3 percent of applicable expenditures. Based on this experience this budget contains a deduction totaling $4,000,000.

General Administration: In order to maintain an economical and efficient system of management controls, the University is developing a modern electronic data processing system, to replace the present mechanical system at a cost of $113,917 during 1961-62.

Staff Benefits: The $564,091 increase comprises $175,000 for State Compensation Insurance and $389,091 for contributions to the Regents' Pensions and Retiring Annuities System due to the 7.5 percent academic salary range increase effective July 1, 1960, and for new positions contained in the budget.

Departments of Instruction and Research: The $231,266 increase provides $50,213 for the Graduate Division to handle the processing of applications for graduate enrollment; provision of $14,400 for sabbatical leave replacements; and $101,102 for continuing development of agriculture field stations.

Extension and Public Service: All but $221,122 of the $1,482,168 increase is derived from fee income from students and public service operations of University Extension. This continues the 1960-61 level of 9 percent from state support, the balance coming from fee income, pending a study by appropriate segments of state government to determine the extent and necessity of state support for all areas of adult education—high school, junior colleges, state college, and university.

The Real Estate Program is continued with $202,500 from the State Real Estate Education and Research Fund. This program involves research to improve the efficiency of real estate operations and of land use, and improvement of instructional materials in real estate courses.

Research in sea water conversion is continued at $334,900 from the General Fund. This program has been funded from the Water Fund in the past but under the Water Resources Development Bond Act the Water Fund is not available for such research.

Provision for New Campuses: Operating support of $220,000 is proposed to commence educational planning and take steps towards readying three new University general campuses in Orange County, San Diego County, and the South Central Coast area. $250,000 is proposed for initial planning and staffing of a new medical school in San Diego.

BERKELEY

The Berkeley campus is the oldest and most populous of the University campuses. In 1873 the first classes met on the Berkeley campus, which now covers more than 900 acres on the eastern side of San Francisco Bay.

For 1961-62, budget increases are confined to those required in departments of instruction and research and for student-related activities for the enrollment increase of 2,020 students, an increase of 9.7 percent over the 1960-61 budget estimate.

General Administration: Workload increases include a manager for educational placement and 2 positions in the chancellor's office and their related expenses. Also $72,348 is provided for the development of electronic data processing services.

Student Services: The $221,635 increase relates to the increment of added students and maintains the present level of service.

Maintenance and Operation of Plant: An increase of $232,000 provides service for an additional estimated 295,705 outside gross square feet in the maintained areas of the campus. This continues the current level of unit costs, $0.71 per square foot.

Departments of Instruction and Research: $1,832,945 provides for increased enrollment at the presently budgeted student-teaching staff ratios, for teaching staff and support expense.

Libraries: The $193,765 increase provides staff and other operational costs, including $55,000 for books, to meet enrollment increases, and $25,000 for recataloging of volumes that are to be transferred to branch libraries and off-campus storage. This increase will be partially offset by a reduction of $23,154 that results from termination of special collections and an arrears binding program.

Organized Research: The increase provides for new faculty members, additional rental on enlarged memory unit of 704 computer, and cost increases distributed over 45 research units.

UNIVERSITY OF CALIFORNIA—Continued

DAVIS

The 3,000-acre Davis Campus, 13 miles west of Sacramento, is the northernmost of the University's statewide system. Established in 1905, about two-thirds of the campus acreage is devoted to crops and farm animals for teaching and research in the College of Agriculture and as an agricultural experiment station. Other major units are the College of Letters and Science and the School of Veterinary Medicine.

In 1959 the Regents designated the University of California at Davis, as a general campus of the University, thereby authorizing the performance of the accepted university functions of teaching, research, and public service in a number of academic and professional disciplines. However, it will continue to be the University's major center for research and teaching in agriculture.

The increase of $1,105,646 provides $650,743 to the Departments of Instruction and Research. This includes provision in the College of Agriculture for research assistants to meet demands of graduate enrollments and industry for agricultural research; two academic positions in the School of Veterinary Medicine to meet needs of the livestock industry; academic staff to round out the four-year program in the Department of Engineering; and faculty for increased enrollments in the College of Letters and Science.

$126,947 additional is provided for Libraries to meet student and research needs.

$69,601 additional is proposed for Maintenance and Operation of Plant for additional facilities.

$76,128 is the increase for Student Services to provide enrollment needs in the Student Health Service, Registrar's, and Dean of Students' offices.

$86,869 additional in General Administration meets the needs of enrollment growth by providing clerical assistance in the business, accounting, purchasing, and personnel offices; and for intensified use of electronic data processing equipment for management purposes.

LA JOLLA

The La Jolla campus in the City of San Diego has been a center of research in oceanography since the Scripps Institution of Oceanography became a part of the University in 1912. Activities include the Scripps Institution of Oceanography, which has sent its ships over the Pacific Ocean in quest of detailed scientific information about the ocean; and the School of Science and Engineering established in 1957-58 to provide graduate instruction and research in mathematics, physics, chemistry, earth and biological sciences, and engineering.

The School of Science and Engineering, enrolled its first class of graduate students in 1960-61.

One hundred sixty-five graduate students will be enrolled in 1961-62 for the second year of instruction. The increase of $252,526 in the Department of Instruction and Research includes 17 faculty members added to fill out course offerings for the 4 major departments of earth sciences, chemistry (and biology), physics (and mathematics), and oceanography. The increase of $123,581 in libraries provides for an accelerated rate of growth to serve the new school's program of instruction and research. $47,769 additional in organized research provides for an increase in salaries and wages and supplies for ships operations and maintenance, and for the research program of the Scripps Institution of Oceanography.

LOS ANGELES

The Los Angeles campus has the second highest enrollment in the University. It is located in the western part of Los Angeles about 5 miles from the Pacific Ocean, and includes both a general campus and a medical center.

General campus (excluding medical center):

Workload increases are related to the maintenance of present standards for an increase of 663 students in 1961-62. The major budget increase occurs in Departments of Instruction and Research ($706,629) in order to maintain the present ratio of students to teaching staff. Student Services increase by $58,246 and Libraries by $126,976 to maintain present levels of service in direct proportion to expanded student population. Maintenance and Operation of Plant requires $307,848 as the result of 348,007 square feet of additional space coming into service (at a cost of $0.681 per square foot). The increase in General Administration of $108,071 covers three new positions and costs incident to development of data processing system to effect improved management controls.

Organized Research activities are increased to continue the present level of research activity, in relation to the number of faculty members budgeted, to permit the University to carry out its responsibility for the research function in the State of California under the Master Plan for Higher Education.

Medical Center:

The Los Angeles Medical Center is located on the Los Angeles campus and includes Schools of Dentistry, Medicine, Nursing, and Public Health.

The Medical Center includes the University of California Hospital which provides facilities for teaching, research, and health services.

An increase of $206,889 is proposed for the Schools of Medicine, Nursing, and Public Health, which will have an estimated 11.8% enrollment gain and an expansion from 55 to 72 students in each of the first two years of the medical curriculum.

RIVERSIDE

The regents have now authorized graduate programs and the consequent development of Riverside to general campus status. This development and the sustained upward trend of enrollment (18.8 percent increase in 1961-62) are the underlying factors supporting the 1961-62 Budget. Departments of Instruction and Research increase by $390,505 to maintain present instructional standards, and provide for research programs at the Citrus Experiment Station. The agriculture program will increase due to termination of this program at the Los Angeles campus and its transfer to the Riverside campus. Student Services increase $60,873 and Libraries $60,593.

SAN FRANCISCO

The San Francisco Medical Center offers instruction in the Schools of Dentistry, Medicine, Nursing, and Pharmacy. In addition the Hooper Foundation for Medical Research is a center of investigation in epidemiology. The Medical Sciences Building, University Hospital, Medical and Dental Clinics offer facilities for teaching, research, and public service.

The $1,044,780 increase will provide $347,563 to meet enrollment workload requirements for the Schools of Medicine, Dentistry, Pharmacy and Nursing. Campus enrollment is up 7 percent and the fourth year Medical School class will be increased from 78 to 100 students to be graduated in June, 1962. Instructional budgets increase by 6 percent. The only other significant augmentation is in Organized Activities—which includes $311,297 to assure additional teaching patient beds needed by the larger fourth year medical class. For General Administration, $61,107 will provide for expanded electronic data processing services and moderate staff augmentations for the chancellor's office. Libraries, the $40,030 is required to meet student needs.

SANTA BARBARA

The Santa Barbara campus is situated on a 408-acre seashore site, adjacent to the community of Goleta, 7 miles northwest of the City of Santa Barbara.

The regents have designated Santa Barbara as a general campus. Accordingly, the program which has included a 4-year liberal arts undergraduate program leading to the bachelor of arts degree, and graduate work in certain specialized fields, is being extended to include engineering and additional fields of graduate work.

An enrollment growth of 24.2 percent (755 students) estimated for 1961-62, and further general campus development provide the basis for the increase of $1,072,489 in educational and general expenses. An increase of $710,695 is budgeted for Departments of Instruction and Research to maintain the present staffing ratios. Other increases related to students include $90,593 for student services and $103,805 for libraries. An increase of $69,946 for maintenance and operation of plant is budgeted in order to care for an additional 63,936 square feet of building space to be available in 1961-62.

GENERAL ANALYSIS

Objectives

Hastings College of Law is a fully accredited institution offering systematic and thorough instruction in those branches of law which will best prepare the student for practice of the profession of law.

Program and Performance

Hastings College of Law is the largest publicly supported law school in California. It has its own board of directors, it is designated by statute as the law department of the University of California, and degrees are issued in the name of the Regents of the University of California.

The college was founded in 1878 by S. C. Hastings with a grant of $100,000 to the State. By stipulation in the original agreement, the State must pay to the school the sum of 7 percent per annum on the grant or repay the $100,000 in full to the Hastings' heirs.

One of the noteworthy parts of the program at Hastings is the "Sixty-Five Club." Many faculty members are former deans of other law schools or are renowned teachers who have been obliged to retire upon reaching retirement age. A very distinguished faculty has been assembled at Hastings by employing these men.

Since 1951 the college has offered 2 programs leading to the LL.B. degree; a 3-year program to which holders of the bachelor's degree are admissible, and a 4-year program to which students who have completed 2 years of college work may be admitted. The fourth year subjects have been offered in alternate years, to a combined class consisting of students taking their fourth year of work in chronological order and students in their third year of study taking fourth year subjects out of order; the fourth year curriculum will again be given in 1961-62. However, due to the large number of applications for the 3-year program, admission to the 4-year program has been discontinued, and, commencing in 1961, only holders of the bachelor's degree will be eligible for admission.

Two new teaching positions are proposed for the additional units of instruction required for the fourth year program.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS

Objectives

As defined in Education Code, Section 22606, the primary function of the state colleges is the provision of instruction for undergraduate students, and for graduate students through the master's degree, in the liberal arts and sciences, in applied fields and in certain professions, including the teaching profession.

Beginning July 1, 1961, the trustees of the State College System will succeed to the powers, duties and functions with respect to the management, administration, and control of the state colleges previously vested in the State Board of Education or in the Director of Education (Chapter 49, Statutes of 1960).

The California Maritime Academy is controlled by a Board of Governors as provided in Section 26001 of the Education Code and has not been transferred to the trustees of the State College System.

In 1961-62 there will be 15 state colleges in operation, on 16 campuses and 2 off-campus centers.

Stanislaus State College (Chapter 2172, Statutes of 1959) began operation in the fall of 1960 in rented facilities in Turlock; 1960 was the second year of operation for the state colleges in Alameda and Orange Counties. Funds are requested in this budget for Sonoma State College (Chapter 68, Statutes of 1960) to begin instruction in the fall of 1961 in rented facilities. The off-campus center operated by San Francisco State College in Santa Rosa will be discontinued upon the opening of the new Sonoma State College.

In that the trustees of the State College System will assume the responsibility for the administration of the state colleges on July 1, 1961, the development of the educational policy for this college has been reserved for their determination.

Because of the rapidly increasing enrollments in those areas to be served by the San Bernardino-Riverside and South Bay State Colleges, funds are proposed which will provide for planning staffs for each of the colleges.

Program and Performance

Enrollment Trends

The following table reflects the growth in full-time-equivalent (FTE) enrollments in the state colleges during the period 1951-52 through 1960-61. (Full-time-equivalent enrollments are computed on the basis of 15 semester units of instruction representing 1 unit of full-time-equivalent enrollment.)

Annual Full-Time-Equivalent Enrollment of Regular and Limited Students in California State Colleges, Regular Sessions 1951-52 through 1960-61
(Exclusive of the California Maritime Academy)

Academic Year	Regular FTE	Limited FTE	Total FTE	Percent of Total FTE Represented by Limited Students
1951-52	22,584	1,666	24,250	6.9
1952-53	23,638	2,147	25,785	8.3
1953-54	26,777	2,804	29,581	9.5
1954-55	31,269	3,236	34,505	9.4
1955-56	36,326	3,808	40,134	9.5
1956-57	41,374	5,086	46,460	10.9
1957-58	45,755	6,228	51,983	12.0
1958-59	49,061	7,284	56,345	12.9
1959-60	53,438	8,168	61,606	13.3
1960-61	61,270	7,730	69,000	11.2

The decrease in the 1960-61 proportion of limited students is due in part to the requirement that all students shall be matriculated, that is, meet regular admissions standards.

Degrees Granted and Graduate Programs

There has been an increase in the number of degrees granted, roughly corresponding to the increase in enrollments. There has also been a marked growth in number and types of graduate programs in the state colleges since 1951-52.

Number of Bachelor's and Master's Degrees Granted in California State Colleges, 1951-52 through 1959-60

Year	Bachelor's degree	Master's degree	Total degree	Percent master's
1951-52	5,691	434	6,125	7.1
1952-53	5,272	653	5,925	11.0
1953-54	5,423	752	6,175	12.2
1954-55	5,840	975	6,815	14.3
1955-56	6,878	1,270	8,148	15.6
1956-57	8,709	1,447	10,156	14.2
1957-58	9,737	1,761	11,498	15.3
1958-59	10,770	1,668	12,438	13.4
1959-60	11,034	1,911	12,945	14.8

---

[a] After deduction of expenditures for summer session and extension only.

[b] Includes summer quarter FTE.

[c] After deduction of reimbursements of student fees, charges to employees, federal payments and payments from other agencies for services rendered by the college.

GENERAL ANALYSIS—Continued

Programs Offered

The following table indicates the scope of the programs offered in the state colleges, and shows their relative size expressed in full-time-equivalent enrollment for the spring of 1959 and 1960:

Full-Time-Equivalent Enrollment by Subject Field in California State Colleges, Spring Term, 1959 and 1960

	1959		1960

Teacher Education Programs

The state colleges are the most important source of trained public school teachers in the State of California. The following table, based on data from the Credentials Office, Department of Education, illustrates the importance of the state colleges in the field of teacher education.

Number and Percent of Credentials Issued on Formal Institutional Recommendation by Types of Accredited Institutions in California, 1951 through 1959-60

Academic year	State Colleges		University of Calif.		Independent Institutions		All Institutions	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
1951-52	2,776	46.4	1,048	17.5	2,163	36.1	5,987	100.0
1952-53	2,800	52.4	815	15.2	1,734	32.4	5,349	100.0
1953-54	2,869	49.7	1,068	18.5	1,834	31.8	5,771	100.0
1954-55	3,381	53.6	939	14.9	1,988	31.5	6,308	100.0
1955-56	4,209	59.8	947	13.4	1,884	26.8	7,040	100.0
1956-57	4,227	57.5	1,060	14.4	2,066	28.1	7,353	100.0
1957-58	4,392	59.8	951	13.0	2,000	27.2	7,343	100.0
1958-59	5,627	64.3	998	11.4	2,130	24.3	8,755	100.0
1959-60	5,545	63.8	1,141	13.1	2,006	23.1	8,692	100.0

It is apparent that the state colleges are a major factor in the training of teachers for the state's expanding public school system. The following table shows a comparison of the number of credentials based on formal recommendations from the state colleges with the total number of students securing degrees and/or credentials:

Number of Students Formally Recommended for Credentials by the California State Colleges As a Percent of Total Students Securing Degrees and/or Credentials 1951-52 through 1959-60

Academic year	Total students securing degrees and/or credentials	Students recommended for credentials	
		Number	Percent
1951-52	7,358	2,776	37.7
1952-53	6,926	2,800	40.4
1953-54	7,285	2,869	39.4
1954-55	8,110	3,381	41.7
1955-56	9,968	4,209	42.2
1956-57	11,654	4,227	36.3
1957-58	13,063	4,392	33.6
1958-59	14,746	5,627	38.2
1959-60	15,372	5,545	36.1

State College Faculty

The numbers of full-time, part-time, and full-time-equivalent faculty members needed to carry on the instructional programs of the state colleges for the years 1951-52 through 1959-60 are shown in the following table:

Teachers in California State Colleges 1951-52 through 1959-60

Academic year	Individuals			F. T. E. Teachers	
	Full-time	Part-time	Total	Total	Increase prior year
1951-52	1,306	406	1,712	1,436	43
1952-53	1,343	505	1,848	1,494	58
1953-54	1,553	539	2,092	1,674	180
1954-55	1,689	556	2,245	1,845	171
1955-56	2,037	726	2,763	2,231	386
1956-57	2,501	833	3,334	2,729	498
1957-58	2,991	665	3,656	3,197	468
1958-59	3,282	903	4,185	3,569	372
1959-60	3,743	970	4,713	4,081	512

MAJOR PROGRAM AUGMENTATION AND COSTS

The total increase in 1961-62 over the revised amounts budgeted in 1960-61 for the State College System is $11,104,111 or 16.1 percent. The Board of Trustees increase is $3,091,819, representing an increase in the support expenditure program of $756,699 and an increase in the student loan program of $2,335,120. The major portion of the state college increase of $8,012,292 results from increased workload arising from an estimated enrollment growth of 7,925 FTE and the addition of approximately 1,300,000 sq. ft. of new facilities. This increase can be outlined as follows:

Salaries and Wages:

Additional teachers per faculty staffing formula	$3,273,452
Professional, technical and clerical personnel for enrollment growth in accordance with staffing standards	1,515,173
Maintenance personnel for new facilities in accordance with accepted staffing standards	500,000
Net increased cost in authorized positions due to full-year costs of positions authorized during the current year, improved employment conditions, salary changes and academic promotions	1,740,693

STATE COLLEGE SYSTEM—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	

MAJOR PROGRAM AUGMENTATION AND COSTS—Continued

Operating Expenses:	
Special allowances for library books in order to provide minimum libraries for new colleges and new curricular offerings	$419,668
Price increases, growth of enrollment, and growth of new facilities	972,347
Equipment:	
Price increases, growth of enrollment, growth of new facilities	$143,786
Increase in contributions to State Employees' Retirement Fund	436,725
Increased reimbursements, including increased student fees	*—989,552*

Included above is $423,549 for Sonoma State College which will provide a planning staff for development of a new curricula and facilities and an instructional staff based upon a budgeted enrollment of 150 students (FTE) for 1961-62. This budget includes funds for the rental of instructional facilities.

The 1961-62 Governor's Budget includes $228,921, of which $178,921 is included in the support budgets of the state colleges and $50,000 in minor capital outlay for instructional television. This amount provides for a planned increase in the educational television program which when added to the existing programs will contribute materially to the instruction programs of the state colleges.

Each state college charges employees and students a parking fee which has been established by the Superintendent of Public Instruction. An estimated amount of $945,726 will be collected in the 1961-62 fiscal year. Expenditures of $337,207 are budgeted for the complete operation of these facilities and includes security personnel, rental and/or purchase of automatic control devices, maintenance and repair of parking areas, the collection and accounting of fees and other miscellaneous expenditures. The capital outlay program for 1961-62 contains provisions in the state colleges for a program of constructing parking facilities in an amount of the total net reimbursement of $600,000.

As an offset against the total increase of $9,001,844, the amounts collected as reimbursements have been increased by $989,552. Regular session student fees are increased by $1,176,478. This increase in regular session student fees is due to increased enrollments which accounts for $638,478 and a student fee increase as discussed below which provides $538,000.

The budgets for each of the state colleges includes increased reimbursements due to proposed increases in the basic student fee from the existing $66 per year to $72 per year for regular students and from $34 per year to $37 per year for limited students. These increased fees are designed to cover the non-instructional expenses of state college students such as general expenses in the instruction function, health services, counseling and testing services, placement services and student activities including housing.

The existing library book acquisition formula has again been augmented to provide sufficient book allotments for those colleges experiencing rapid growth. Special book allowances have been provided for the State Colleges at Alameda, Kellogg-Voorhis Campus of California Polytechnic College, Fresno, Long Beach, Los Angeles, Orange, Sacramento, San Fernando Valley, San Francisco, San Jose, Stanislaus, and Sonoma in the amount of $419,668.

Proposed New Positions:

The 1961-62 Budget includes a total of 1,181.3 proposed new positions. The following table shows the distribution both by college and principal function:

PROPOSED NEW POSITIONS FOR STATE COLLEGES

COLLEGE	INSTRUCTION			LIBRARY	ADMINISTRATION AND BUSINESS MANAGEMENT	STUDENT PERSONNEL	MAINTENANCE AND OPERATION OF PLANT	Agriculture	Summer Session and Extension	Total positions

STATE COLLEGE SYSTEM—Continued

PROPOSED NEW POSITIONS FOR STATE COLLEGES—Continued

Positions are budgeted on the basis of staffing formulas and standards. Workload units are applied to the formulas and standards and resulting increases are presented as proposed new positions.

INSTRUCTION FUNCTION

Teachers:

The need for teachers is determined by application of a faculty staffing formula which was first adopted as a budgetary tool in 1953-54. The formula determines the number of full-time teaching positions based upon a 45-hour workweek for instructors. The formula allows 9 hours a week for nonteaching assignments (such as student advising, committee work, administrative duties, etc.) and 36 hours per week for teaching assignments including class preparation as well as actual instruction. The number of hours of actual instruction in relation to class preparation varies between 12 and 24 hours per week depending upon the type of instruction; e.g., lecture, activity and laboratory.

In order to compute the need for teachers, the number of sections is determined based upon distribution of the total estimated campus enrollment among the various subject offerings. This distribution determined on the basis of past experience, anticipated shifts in program emphasis, and expansion of curricular offerings. Since January 1, 1960, the State Board of Education has authorized 32 curricula leading to a degree of either a Bachelor of Arts or Sciences and 14 curricula leading to a Masters of Arts or Sciences. These additions include, but are not limited to, social science, physical science, mathematics, music-drama, chemistry, nursing, and business administration. According to the formula, a total of 548.4 additional teachers are required to meet the instructional demands in the budget year for the state colleges.

Supervision:

Division Chairman, Curriculum Supervisors, Evaluators and Coordinators are added in the budget and have the responsibility of supervising various aspects of the instructional program. The need for each division chairman is measured by the number of teaching positions within a homogenous grouping of curricula. Curriculum evaluators and supervisors are fractional teaching positions released from instructional responsibilities in order to develop a new curricula or supervise the offerings in a large existing curriculum. Curriculum coordinators, also fractional teaching positions released from instructional responsibility, supervise students doing internship work away from the college. These are used primarily for the supervision of practice teachers. 29.1 such positions are added in the budget year.

Technical and Clerical:

Technical and clerical positions are budgeted on a ratio to teachers, the need for clerical positions by supervisory positions, and the requirements for positions based on the accepted audio-visual staffing formula. 150 new positions are required for these responsibilities.

LIBRARY

109.8 professional and clerical positions are added, based upon the library staffing formula. This formula allocates staff on the basis of accepted workload standards for technical processing of new volumes; mending, inventorying and discarding existing volumes; sorting and shelving volumes; and manning public service desks and checkout points.

ADMINISTRATION AND BUSINESS MANAGEMENT

61 new positions are added in the executive and business management function in order to provide professional, technical and clerical assistance in accordance with staffing formulas.

STUDENT PERSONNEL

Ninety-four and six-tenths new positions are justified in the student personnel function. Staffing in this function is closely allied to increases in enrollments. The total proposal consists of the following increases by function:

Admissions and records	38.8
Counseling and testing	14.4
Placement	8.7
Student activities including housing	6.1
Health	26.6

MAINTENANCE

One hundred seventy-seven and eight-tenths new positions are budgeted to provide adequate maintenance and security of the approximately 1,300,000 square feet of new facilities which will be added to the state colleges' physical plant in 1961-62.

AGRICULTURE

Eight and three-tenths positions are included for agriculture programs including 3.2 positions for the college farm at Chico State College which has only recently been acquired. The other positions are justified for the instruction programs at Fresno and California State Polytechnic College.

SUMMER SESSION AND EXTENSION

These programs are fully financed by students' fees. The 2.3 new positions included in the budget are offset by increased reimbursements.

GENERAL ANALYSIS

Objectives

The Trustees of the State College System have the responsibility of administering the California state colleges. The primary function of the state colleges is the provision of instruction for undergraduate and graduate students, through the master's degree, in the liberal arts and sciences, in applied fields, and in the professions, including the teaching profession. Currently established 2-year programs in agriculture are authorized but other 2-year programs will be authorized only when mutually agreed upon by the Trustees of the State College System and the Board of Education. The doctoral degree may be awarded jointly with the University of California. Facility research is authorized to the extent that it is consistent with the primary function of the state colleges and the facilities provided for that function.

Program and Performance

In carrying out these objectives the Board of Trustees, composed of 20 members, is charged with the responsibility of setting policies for the governance of the 15 established state colleges. In addition it provides a central administrative staff for the systematic development of these policies and to furnish administrative services to the various state colleges.

The Board of Trustees was established by Chapter 49, Statutes of 1960, First Extraordinary Session, to take over the administration of the state colleges from the State Board of Education and the Division of State Colleges and Teacher Education within the Department of Education. In addition, work on personnel matters for academic and administrative positions now performed by the State Personnel Board will become the responsibility of this board. The Trustees will begin full-scale operations on July 1, 1961. The year 1960-61 has been a time of preparation for the task ahead. The 1961-62 Budget provides for the first year of operation under the new governing board. To this end the 1961-62 Budget provides for services in the following areas: administrative and legal services for the Trustees; the establishment and operation of a personnel service for the college system; management research; academic planning; student affairs; business affairs; and facilities planning.

To provide these services a total of 93 positions are proposed in all areas listed above. These are offset by a decrease in the budget for the Department of Education of 43.7 positions, most of which were located within the Division of State Colleges and Teacher Education.

NATIONAL DEFENSE EDUCATION ACT TITLE 2, STUDENT LOAN PROGRAM

Objectives

Title 2 provides loans to worthy and needy students in institutions of higher learning within the State. By means of forgiveness of a portion of the loans to those who engage in the profession of teaching, there is a special emphasis to encourage students to enter the field of teaching.

Program and Performance

In order to continue the Student Loan Program, authorized by Chapter 952, Statutes of 1959, $233,512 is required in the 1961-62 Budget. This amount represents one-ninth of the amount of federal funds which it is estimated will be made available to California state colleges for student loans in accordance with the National Defense Education Act.

An appropriation of $200,000 for 1961-62 is proposed and carryover balances from last year's appropriation in the amount of $33,512 are anticipated as a transfer from the Department of Education. Total estimated federal funds which were anticipated for matching purposes during 1960-61 did not become available, however assurances made by federal representatives indicated that for 1961-62 there will be federal matching money for all available state funds. The application for allocation of federal funds is made directly by the college to the Federal Government. After receipt of federal funds actual disbursement of federal and state funds will then be made by the Trustees of the State College System to the various colleges.

PLANNING STAFFS FOR NEW COLLEGES

In order to meet the rapidly increasing enrollments in the Los Angeles enrollment areas it is mandatory that planning staffs for South Bay State College and San Bernardino-Riverside State College be provided for the 1961-62 budget year. The San Bernardino-Riverside State College was established by Chapter 64, Statutes of 1960. The South Bay State College was established by Chapter 65, Statutes of 1960. For planning purposes 12 positions and related operating expenses and equipment are included for each of the colleges.

GENERAL ANALYSIS

Objectives

The State College for Alameda County is an upper division institution with programs in teacher education, occupational and preprofessional curricula and the liberal arts designed to meet the needs of Alameda County and portions of Contra Costa and San Mateo Counties.

Program and Performance

The State College for Alameda County, established by Chapter 1681, Statutes of 1957, offered classes for the first time in the fall of 1959 in rented facilities in the City of Hayward. Course offerings for the first year of operation were limited to upper division education courses leading to an elementary teaching credential.

The 1960-61 Governor's Budget estimated an enrollment of 700 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 480, a decrease of 220 students (FTE). Where possible, reductions are reflected in the current year in the 1961-62 Budget for all areas that are directly related to enrollment.

The 54.3 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 815 students (FTE).

A total of 18.4 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the college's present curricula the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: Language Arts—B.A., Social Science—B.A., Biological Science—B.S., Physical Science—B.S., and Mathematics—B.S. Other additions within the instructional function include 0.7 new supervisory positions, and 6 technical and clerical positions which are allowed on the basis of accepted workload standards.

Four new positions in the administration and business management functions are based upon increased workload.

One new position is required for the student personnel area in the admissions and records function which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment.

Increases in staff in other areas are based upon accepted workload standards, including 8.2 positions for the library, and 16 positions for plant operation.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $65,180 is allowed for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

Chico State College is a 5-year fully accredited college with programs in teacher education, occupational and pre-professional curricula designed to meet the needs of eight counties in the upper Sacramento Valley and in the contiguous mountain regions.

Program and Performance

Chico State College was founded as a normal school in 1889, and is the second oldest of California's state colleges. Its primary responsibility is for the training of teachers for the public school system of the State. Its effectiveness in this respect is demonstrated by the fact that 50 percent of its students are enrolled in courses with teacher training objectives.

In recent years, the college has expanded and continued to develop its program into liberal arts, occupational, and preprofessional areas. Occupying an important place in the offerings are such curricula as agriculture, nursing, business, engineering, and social work.

The Agriculture program which was supported from the State College Fund prior to 1959-60, but is now supported from the General Fund, has expanded from an original terminal 2-year program to a 4-year degree program. The Agriculture program is operating on the new farm site consisting of 644 acres.

The 1960-61 Governor's Budget estimated an enrollment of 3,000 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 2,900, a decrease of 100 students (FTE). Where possible, reductions are reflected in the current year in the 1961-62 budget for all areas that are directly related to enrollment.

The 30.1 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 2,970 students (FTE).

A total of 4.8 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the college's present curricula the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: Economics—BA, Music—MA, and Physical Education—MA. Other additions within the instructional function include 3 technical and clerical positions which are allowed on the basis of accepted workload standards.

In the administration and business management functions, 0.5 new positions are based upon increased workload.

A total of 2.6 new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 1.3 positions in admissions and records and 1.3 positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 11.5 new positions in plant operation. 5.7 new positions are justified for the agriculture program of which 3.2 are for the development of the college farm.

Chico State College is one of several state colleges who are developing instructional television programs. For that purpose, the college is allowed 2 new positions and $13,000 for the rental of television equipment.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. All other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

FRESNO STATE COLLEGE—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS

Objectives

Fresno State College is a 5-year, fully accredited college, with programs in the liberal arts and sciences, in applied fields and in the professions, including the teaching profession, designed to meet the needs of the 7 counties in the southern San Joaquin Valley.

Program and Performance

Established in 1911, Fresno State is located on sites totaling 1,324 acres on the northeast side of the City of Fresno. At this new site the college continues to carry out its traditional functions, but in recent years has expanded its program to include several important new curricula and community services. The performance of the college in fulfilling its responsibilities toward the area it serves is illustrated by the number of degrees conferred and by the number of its graduates who qualified for teaching credentials, as follows:

Degrees Granted:	1957-58	1958-59	1959-60
General and professional	1,027	1,180	1,162
Agriculture	80	71	77
Students securing degrees and teaching credentials	407	375	363

The 3 most important programs at Fresno State College, from the standpoint of number of students, are teacher education, business, and engineering. Approximately a third of the total enrollment of the college can be credited to the various teacher education programs. Agriculture is fourth in order of enrollment.

Other programs of significance in the total offerings of the college include biology, criminology, fine arts, home economics, humanities, industrial arts, nursing, physical education and social science.

Fresno State College is 1 of 3 state colleges which has been authorized to conduct an off-campus resident center. It is located in Bakersfield and offers programs for resident credit in elementary teacher education only. The enrollment anticipated at the center for the 1961-62 fiscal year is estimated at 390 individual students or a total full-time equivalent enrollment of 180.

The 1960-61 Governor's Budget estimated an enrollment of 4,950 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 4,730, a decrease of 220 students (FTE). Where possible, reductions are reflected in the current year in the 1961-62 Budget for all areas that are directly related to enrollment.

The 35.3 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 4,850 students (FTE).

A total of 21 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the colleges present curricula the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: Art—M.A. and Agri-business—B.S. Other additions within the instructional function include 3.5 technical and clerical positions which are allowed on the basis of accepted workload standards.

Increases in staff in other areas are based upon accepted workload standards, including 3 positions for the library, 6.5 positions for plant operation, 1 position for agriculture, and 0.3 position for the extension program, which is completely reimbursed from student fees.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $4,500 is provided for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

Humboldt State College is a 5-year, fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of the northwestern counties of the State.

Program and Performance

Humboldt State College was established in 1913 as a 2-year normal school and has experienced changes parallel to other such institutions until it was established as a state college with the duty to educate teachers and offer curriculums in liberal arts; science, engineering and mathematics; occupational and preprofessional courses. The preparation of teachers remains a primary function of the college, and the following figures indicate the development of this program:

	1957-58	1958-59	1959-60
Credentials recommended	89	129	111
Degrees granted	170	250	256

Due to its unique geographical location, Humboldt State College offers vocational training in fisheries, game and forestry management. Approximately one-fourth of the total enrollment (FTE) of the college is enrolled in natural science laboratory classes. The college also has strong curriculums in fine and applied arts, business, language arts, and physical education.

The 21.8 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 1,790 students (FTE).

A total of 10.9 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the college's present curricula the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: Civil Engineering—B.S. and Psychology—M.A. Other additions within the instructional function include 0.5 new supervisory position, and 0.5 technical and clerical position which are allowed on the basis of accepted workload standards.

In the administration and business management functions 0.5 new position additional is based upon increased workload.

Included are 1.1 new positions for the student personnel area workload increase caused by fluctuations in student enrollment. The total includes new positions in the following functions: 0.4 position in counseling and testing, and 0.7 position in placement.

Increases in staff in other areas are based upon accepted workload standards, including 3.6 positions for the library, and 4.7 positions for plant operation.

The general expense in the instruction function is allowed on the basis of $31 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. All other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

Long Beach State College is a 5-year fully accredited college with programs in teacher education, occupational and pre-professional curricula designed to meet the needs of southeast Los Angeles County.

Program and Performance

Long Beach State College was established in 1949 to meet the demand for a teacher training institution in the Long Beach area. Since its establishment, Long Beach has grown to one of the largest of the state colleges and now offers a variety of courses, not only in teacher training, but also in occupational and pre-professional fields. The performance of the college in meeting the needs of the area it serves is illustrated by the number of teacher training candidates produced by the college and the number of degrees conferred. This is shown below:

	1957-58	1958-59	1959-60
Credentials recommended	510	677	726
Degrees granted	1,310	1,471	1,574

Long Beach State College has developed occupational programs in the areas of engineering, biological science, business, industrial arts, physical education, social science, and sociology.

---

[a] Composed of savings in salaries and wages, $9,195; operating expenses, $9,909; equipment, $3,759; and decreased reimbursements, $11,920.

[b] Composed of savings in salaries and wages, $64,359; and operating expenses, $2,939.

[c] After deduction of expenditures for summer session and extension.

[d] After deduction of reimbursements of student fees, charges to employees, federal payments and payment from other agencies for services rendered by the college.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The 1960-61 Governor's Budget estimated an enrollment of 7,140 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 6,790, a decrease of 350 students (FTE). Where possible, reductions are reflected in the current year of the 1961-62 Budget for all areas that are directly related to enrollment.

The 130.3 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 7,570 students (FTE).

A total of 65.3 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the college's present curricula the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: Nursing—BS, Philosophy—BA and Speech-Drama—MA. Other additions within the instructional function include 2.5 new supervisory positions, and 16.2 technical and clerical positions which are allowed on the basis of accepted workload standards.

Three new positions in the administration and business management functions are based upon increased workload.

A total of 3.3 new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 1.6 positions in student activities and housing and 1.7 positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 9 positions for the library, and 29 positions for plant operation.

Long Beach State College is one of several state colleges who are developing instructional television programs. For that purpose, the college is allowed 2 new positions and $15,000 for television equipment rental in 1961-62.

General expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $5,600 is allowed for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

The Los Angeles State College of Applied Arts and Sciences is a 5-year fully accredited multipurpose institution offering a wide variety of curriculums in liberal arts education, occupational education, and teacher education.

Program and Performance

Los Angeles State College has one of the largest teacher-training programs in the country and a graduate program involving almost half of its students. From the time it was established in 1947 until 1959, the college had no lower division, however, in September 1959, the first freshman class was admitted. In addition, one of the primary functions of the college is the training of students for gainful occupations in the arts and sciences as related to business and industry. The enrollment in these areas is high, as it is in teacher and liberal arts education.

Some of the aspects of the program of this college include its labor and industrial institutes for the training of workers in the field and a work-study program which relates practical work experience with classroom instruction.

The college offers 42 fields of concentration or major programs for the various baccalaureate degrees and 30 fields of concentration or programs for the Master of Arts or Master of Science degree.

The 1960-61 Governor's Budget estimated an enrollment of 9,220 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 8,800, a decrease of 420 students (FTE). Where possible, reductions are reflected in the current year in the 1961-62 budget for all areas that are directly related to enrollment.

The 102.3 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 9,590 students (FTE).

A total of 53.9 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the college's present curricula, the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: Geology—BA, philosophy—BA, speech correction—MA, and audiology—MA. Other additions within the instructional function include 1.2 new supervisory positions, and 14.1 technical and clerical positions which are allowed on the basis of accepted workload standards.

Three new positions in the administration and business management functions are based upon increased workload.

A total of 12.9 new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in the student enrollment. The total includes new positions in the following functions: 3.6 positions in admissions and records, 4 positions in counseling and testing, 2 positions in placement, and 3.3 positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 12.2 positions for the library, and 5 positions for plant operation.

Los Angeles State College is one of several state colleges who are developing instructional television programs. The college is allowed $13,000 for the lease of a video tape recorder and $20,000 for the purchase of additional equipment for closed-circuit television.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $42,000 is allowed for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

---

[a] Composed of savings in salaries and wages, $408; operating expenses, $76,840; equipment, $15,321; and a decrease in reimbursements, $12,952.

[b] Composed of savings in salaries and wages, $232,843; operating expenses, $19,284; and increased reimbursements, $21,133.

[c] After deduction of expenditures for summer session and extension.

[d] After deduction of reimbursements of student fees, charges to employees, federal payments and payments from other services rendered by the college.

GENERAL ANALYSIS

Objectives

Orange County State College is an upper division institution offering programs in teacher education, business administration, biological sciences, humanities, fine arts, communications, and social sciences. This college is being planned to serve a primary enrollment area consisting of portions of Orange, Riverside and Los Angeles Counties.

Program and Performance

Established by Chapter 1681, Statutes of 1957, Orange County State College offered classes for the first time in the fall of 1959. The opening programs of the college were confined to elementary education. In the 1960-61 academic year, the offerings of the college were expanded to include secondary education and business administration. In the third year of operation, 1961-62, the college will offer baccalaureate programs in business education, music, biological science, mathematics, social science, and language arts.

The 1960-61 Governor's Budget estimated an enrollment of 700 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 600, a decrease of 100 students (FTE). Where possible, reductions are reflected in the current year in the 1961-62 budget for all areas that are directly related to enrollment.

The 55.8 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 1,120 students (FTE).

A total of 26 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the college's present curricula the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: Music—BA, Biological Science—BA, Mathematics—BA, Social Science—BA, Language Arts—BA and Business Education—BA. Other additions within the instructional function include 1 new supervisory position, and 6 technical and clerical positions which are allowed on the basis of accepted workload standards.

In the administration and business management functions 6 new positions are based upon increased workload.

A total of 5.3 new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes new positions in the following functions: 1.8 positions in admissions and records, 2 positions in placement, and 1.5 positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 3.5 positions for the library, and 8 positions for plant operation.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $49,110 is allowed for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

Sacramento State College is a 5-year fully accredited college with programs in teacher education, liberal arts, occupational and preprofessional curricula designed to meet the needs of the thirteen counties in the Southern Sacramento Valley and central mountain regions of California.

Program and Performance

Sacramento State College was established in 1947, and has as one of its primary responsibilities the providing of teacher training. The college also offers a considerable variety of liberal arts and professional occupational curriculums. One measure of the success of the college in carrying out this responsibility can be measured by the number of teaching credential recipients the college has produced and the number of degrees conferred. This is shown below:

	1957-58	1958-59	1959-60
Credentials recommended	250	455	392
Degrees granted	730	829	888

Sacramento State College also offers the master of arts degree in a variety of liberal arts and professional education fields, as well as the master of science degree in business and public administration.

The 1960-61 Governor's Budget estimated an enrollment of 4,220 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 4,050, a decrease of 170 students (FTE). Where possible, reductions are reflected in the current year in the 1961-62 budget for all areas that are directly related to enrollment.

The 44.2 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 4,350 students (FTE).

A total of 19.9 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the college's present curricula the State Board of Education, since January 1, 1960, has authorized the granting of a B.S. degree in Electrical Engineering. Other additions within the instructional function include 1.8 new supervisory positions, and 6.9 technical and clerical positions which are allowed on the basis of accepted workload standards.

In the administration and business management functions, 2.3 new positions are based upon increased workload.

A total of 1.3 new positions are required for the student personnel area in the admissions and records function which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment.

Increases in staff in other areas are based upon accepted workload standards, including 5 positions for the library, and 7 positions for plant operation.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $16,000 is allowed for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

San Diego State College is a 5-year fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of the southern counties of the State.

Program and Performance

San Diego State College, first established in 1897, has a long history of providing teachers for the public schools of the State of California. More recently it has met the needs of the southern counties for people trained in various occupational programs. The performance of the college in fulfilling these responsibilities is best illustrated by the number of successful teacher training candidates produced by the college and the number of degrees conferred. This is shown below.

	1957-58	1958-59	1959-60
Students securing teaching credentials	488	492	469
Degrees granted	1,166	1,261	1,138

Other than teacher training, the important offerings at San Diego include accounting, business administration, engineering, liberal arts, physics, psychology and social science.

The 1960-61 Governor's Budget estimated an enrollment of 7,720 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 7,960, an increase of 240 students (FTE). Where possible, increases are reflected in the current year in the 1961-62 Budget for all areas that are directly related to enrollment.

The 135.2 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 7,960 students (FTE).

A total of 76.4 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the college's present curricula

---

[a] Composed of savings in salaries and wages, $11,769; operating expenses, $27,847; equipment, $9,213; and decreased reimbursements, $7,067.

[b] Composed of savings in salaries and wages, $121,437; operating expenses, $3,000; and equipment, $1,000.

[c] After deduction of expenditures for summer session and extension.

[d] After deduction of reimbursements of student fees, charges to employees, federal payments and payments from other agencies.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: Physical science—M.A., Biology—B.A., Geology—M.S., and Astronomy—B.A. Other additions within the instructional function include 4 new supervisory positions, and 15.5 technical and clerical positions which are allowed on the basis of accepted workload standards. Also 1 new teacher and 1 clerical position are included for the off-campus center in Imperial County.

In the administration and business management functions, 5 new positions are based upon increased workload.

A total of 11.3 new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total also includes new positions in the following functions: 4 positions in admissions and records, 0.6 positions in counseling and testing, 2 positions in placement, 0.5 positions in student activities and housing, and 4.2 positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 5 positions for the library, and 16 positions for plant operation.

San Diego State College is one of several state colleges who are developing instructional television programs. For that purpose, the college is allowed $13,000 for rental of a video tape recorder in 1961-62.

The general expense for the instruction area is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. All other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

San Fernando Valley State College is a 5-year institution offering programs in teacher education and occupational and pre-professional curricula designed to meet the needs of the San Fernando Valley portion of Los Angeles County.

Program and Performance

San Fernando Valley State College began operation as a separate state college July 1, 1958. Prior to this date the institution conducted classes on its present site as the San Fernando Valley campus of Los Angeles State College.

San Fernando Valley State College is in the midst of a phase of extremely rapid growth in enrollment, staff, and physical facilities. Full-time equivalent student enrollment in 1961-62 will rise from 3,840 to 4,950, an increase of 28.9 percent.

Further evidence of the growth of San Fernando Valley State College may be seen in recapitulation of teaching credentials recommended, and degrees granted by the college as shown below:

	1958-59	1959-60
Credentials recommended	179	278
Degrees granted	293	398

---

[a] Composed of savings in salaries and wages, $50,266; operating expenses, $36,490; equipment, $2,333; and excess reimbursements, $102.

[b] Composed of savings in salaries and wages, $42,332; operating expenses, $5,217; and equipment, $5,609.

[c] After deduction of expenditures for summer session and extension.

[d] After deduction of reimbursements of student fees, charges to employees, federal payments and payments from other agencies for services rendered by the college.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The 1960-61 Governor's Budget estimated an enrollment of 3,680 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 3,840, an increase of 160 students (FTE). Where possible, increases are reflected in the current year in the 1961-62 Budget for all areas that are directly related to enrollment.

The 144.6 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 4,950 students (FTE).

Seventy-three and six-tenths new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the college's present curricula the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: psychology, M.A.; engineering, B.S.; chemistry, B.S.; physics, B.S.; geology, B.S.; French, B.A.; Spanish, B.A.; geography, M.A.; and journalism, B.A. Other additions within the instructional function include 4.8 new supervisory positions, and 13 technical and clerical positions which are allowed on the basis of accepted workload standards.

Five new positions in the administration and business management functions are based upon increased workload.

Nine new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes new positions in the following functions: 4 positions in admissions and records, 3 positions in counseling and testing and 2 positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 15 positions for the library, 23.2 positions for plant operation and 1 position for the summer session program, which is completely reimbursed from student fees.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $70,800 is allowed for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

San Francisco State College is a 5-year fully accredited college with programs in teacher education, occupational and preprofessional curricula designed to meet the needs of the counties in the San Francisco Bay and peninsula area.

Program and Performance

San Francisco State College, originally established in 1899 as the San Francisco Normal School, has been operating on its present Lake Merced Campus since 1954. This college has 3 principal responsibilities: teacher training; preprofessional and occupational programs; and general liberal arts programs. One measure of the success of the college in fulfilling these responsibilities can be determined by the number of credentials recommended and degrees granted which is shown below:

	1957-58	1958-59	1959-60
Credentials recommended	824	817	891
Degrees granted	1,677	1,719	1,816

The college has developed outstanding programs in the following fields: creative arts, business, English and humanities, psychology, science, social science, and teacher education. The college is also noted for its credential programs in pupil personnel services, school supervision and administration. A downtown center is operated as an administrative center for its extension programs and as a teaching center for the School of World Business.

An off-campus instructional program in Santa Rosa has been operated by San Francisco State College for a number of years. The Governor's Budget includes the opening of Sonoma State College in the fall of 1961. Therefore, no provision is made in the budget of San Francisco State College for the off-campus center at Santa Rosa.

In addition to the college's present curricula, the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: homemaking—M.A., recreation—M.S., statistics—B.A., and general engineering—B.S.

The 1960-61 Governor's Budget estimated an enrollment of 8,490 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 8,520, an increase of 30 students (FTE). Where possible, increases are reflected in the current year in the 1961-62 Budget for all areas that are directly related to enrollment.

The 46.4 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 9,000 students (FTE).

A total of 21.5 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. San Francisco State College will expand its course offerings in 1961-62 with new courses in homemaking, recreation, statistics, and general engineering. Other additions within the instructional function include 1 new supervisory position, and 8.7 technical and clerical positions which are allowed on the basis of accepted workload standards.

One new position in the administration and business management functions is based upon increased workload.

A total of 4.7 new positions is required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 0.8 new position in counseling and testing and 3.9 new positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 3 positions for the library, and 3 positions for plant operation.

San Francisco State College is one of several state colleges that are developing instructional television programs. For that purpose, the college is allowed 3.5 new positions and $21.912 for television equipment in 1961-62. In addition $15,000 is provided for rental of an electronic computer for the instructional program.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $8,900 is allowed for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

---

[a] After deducting expenditures for summer session and extension.

[b] After deducting reimbursements of student fees, charges to employees, federal payments, and payments from other agencies for services rendered by the college.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS

Objectives

San Jose State College is a 5-year fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of Monterey, San Benito, Santa Cruz, Santa Clara, and San Mateo Counties.

Program and Performance

San Jose State College, the largest of the state colleges, is also the oldest. Established in 1857, it was the first institution for higher education established by the State.

While San Jose offers courses leading to 33 major public school credentials it can no longer be characterized as solely a teacher training institution because it confers bachelor's and master's degrees in 146 areas of specialization. Two out of every 3 graduates enter fields other than teaching.

The performance of the college is illustrated by the following:

	1957-58	1958-59	1959-60
Credentials recommended	885	932	965
Degrees granted	2,045	2,164	2,083

The 1960-61 Governor's Budget estimated an enrollment of 11,400 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 11,550, an increase of 150 students (FTE). Where possible, increases are reflected in the current year in the 1961-62 Budget for all areas that are directly related to enrollment.

The 107.3 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 12,150 students (FTE).

A total of 43.3 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. In addition to the colleges present curricula the State Board of Education, since January 1, 1960, has authorized the granting of degrees in the following areas: Meteorology—BA, Civil Engineering—MS, Geology—MS, Political Science—MA, and Industrial Design—BS. Other additions within the instructional function include 3 new supervisory positions, and 13.6 technical and clerical positions which are allowed on the basis of accepted workload standards.

In the administration and business management functions, 0.5 new positions are based upon increased workload.

Ten and six-tenths new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes new positions in the following functions: 4.3 positions in admissions and records, 1.1 positions in counseling and testing, 0.5 positions in student activities and housing, and 4.7 positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 15.9 positions for the library, 19.4 positions for plant operation and 1 position for the summer session program, which is completely reimbursed from student fees.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $6,000 is allowed for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61

GENERAL ANALYSIS

Objectives

Sonoma State College is scheduled to offer general education programs designed to meet the needs of a primary enrollment area composed of the Counties of Sonoma, Marin, and Napa. Service will also be provided to Solano, Contra Costa, Lake, and Mendocino Counties.

Program and Performance

Chapter 66, Statutes of 1960, First Extraordinary Session, provides for the establishment of a state college in Sonoma County. It is proposed that the college open in the fall of 1961 in rented facilities. The permanent site for this college has been selected near the City of Cotati.

An instructional staff is proposed on the basis of an estimated enrollment of 150 full-time equivalent students, and the planning staff is the same as that provided for all new colleges recently established.

In that the trustees of the State College System will assume the responsibility for the administration of the state colleges on July 1, 1961, the development of the educational policy for this college has been reserved for their determination.

The 41.5 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an estimated enrollment of 150 students (FTE).

Ten new teachers are included in the budget based upon the faculty staffing formula. Other staff within the instructional function include 5 supervisory positions, and 5 technical and clerical positions which are allowed on the basis of accepted workload standards.

A total of 9.5 positions in the administration and business management functions are based upon estimated workload.

Six positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to student enrollment. The total includes positions for the following functions: 4 positions in admissions and records and 2 positions in student activities and housing.

Staff in other areas based upon accepted workload standards, including 5 positions for the library, and 1 position for plant operation.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $56,400 is allowed for library books; all other operating expenses and equipment are based upon enrollment estimates and price levels.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61

GENERAL ANALYSIS

Objectives

Stanislaus State College, established by Chapter 2172, Statutes of 1959, is offering general upper division education programs designed to meet the needs of a primary enrollment area composed of the counties of Stanislaus, San Joaquin, Merced, Calaveras, Tuolumne, and Mariposa.

Program and Performance

The 1960-61 Governor's Budget estimated an enrollment of 120 students (FTE) in 1960-61. Recent re-estimates indicate that the 1960-61 enrollment will approximate 320, an increase of 200 students (FTE). Where possible, increased costs are reflected in the current year in the 1961-62 budget for all areas that are directly related to enrollment.

The 66.9 proposed new positions included in the budget for the fiscal year 1961-62 are based upon an enrollment of 500 students (FTE).

A total of 26.3 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Since January 1, 1960, the State Board of Education has authorized the granting of degrees in the following areas: Elementary Education—BA, Business Education—BA, Business Administration—BA, Art—BA, Music—BA, Humanities—BA, Mathematics—BA, Science—BA and Social Science—BA. Other additions within the instructional function include 1.1 new supervisory positions, and 8.5 technical and clerical positions which are allowed on the basis of accepted workload standards.

Eight new positions in the administration and business management functions are based upon increased workload.

Nine new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes new positions in the following functions: 6 positions in admissions and records and 3 positions in counseling and testing.

Increases in staff in other areas are based upon accepted workload standards, including 9 positions for the library, and 5 positions for plant operation.

Stanislaus State College has been allowed $13,000 for the rental of a video tape recorder in 1961-62; it is 1 of several state colleges engaged in development of instructional television.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $58,278 is allowed for library books; all other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

California State Polytechnic College is a 4-year accredited college with programs in agriculture, engineering, arts and sciences, and business. Because of the unique programs offered by the college, California State Polytechnic College has objectives different from the other state colleges. It fulfills a statewide responsibility and draws students to its two campuses from all counties of the State.

Program and Performance

The campus of California State Polytechnic College at San Luis Obispo has the largest undergraduate agriculture program in the 13 western states. Enrollment in the engineering programs at San Luis Obispo constitutes the second largest engineering school in the West. Agriculture, engineering, arts and

GENERAL ANALYSIS—Continued

Program and Performance—Continued

sciences, and business programs are designed to meet the needs of the entire State and emphasize the learn-by-doing approach. The Kellogg-Voorhis campus has similar programs. Throughout its occupational curriculum, the college uses the "upside-down" approach by which the student begins work in his major department in his freshman year and is given instruction in the practical phase of his field of specialization during the first 2 years of his program. California Polytechnic also provides nondegree technical programs at its San Luis Obispo campus in all agricultural fields.

The performance of the college as expressed in terms of degrees and credentials in the various areas of specialization is shown below:

Degrees Granted:	1957-58	1958-59	1959-60
Agriculture	254	256	233
Engineering	341	405	347
Arts and Sciences	168	234	256
Students securing teaching credentials	69	71	62

New course offerings for curricula previously approved by the State Board of Education for San Luis Obispo are in the fields of agribusiness, food processing, and business administration, at Kellogg-Voorhis these new course offerings are in the fields of elementary education, business administration, mathematics, physical science and social science.

Enrollments for the San Luis Obispo and Kellogg-Voorhis campuses in 1960-61 failed to meet original estimates by 440 and 200 students (FTE) respectively. Where possible, reductions at both campuses are reflected in the current year in the 1961-62 Budget for all areas that are directly related to enrollment.

The 68.1 proposed new positions included in the budget for the fiscal year 1961-62 for the San Luis Obispo campus are based upon an enrollment of 5,140 students (FTE).

A total of 27.7 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Other additions within the instructional function include 12 new technical and clerical positions which are allowed on the basis of accepted workload standards.

An increase of 5.5 new positions in the administration and business management functions is based upon increased workload.

Five new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes new positions in the following functions: 2.5 positions in admissions and records, 0.5 positions in counseling and testing, 1 position in placement, and 1 position in health service.

Increases in staff in other areas are based upon accepted workload standards, including 6.4 positions for the library, 9.9 positions for plant operation, and 1.6 positions in the agriculture program.

The 97.2 proposed new positions included in the budget for the fiscal year 1961-62 for the Kellogg-Voorhis campus are based upon an enrollment of 3,100 students (FTE).

Forty eight and four-tenths new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Other additions within the instructional function include 2.5 new supervisory positions, and 9 technical and clerical positions which are allowed on the basis of accepted workload standards.

An increase of 7.2 new positions in the administration and business management functions is based upon increased workload.

A total of 11.5 new positions is required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes new positions in the following functions: 5 positions in admissions and records, 1 position in counseling and testing, 1 position in placement, 1.5 positions in student activities and housing, and 3 positions in health service.

Increases in staff in other areas are based upon accepted workload standards, include 6 positions for the library, and 12.6 positions for plant operation.

The general expense in the instruction function at both campuses is allowed on the basis of $32 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance of $700 for travel related to recruitment of faculty. A special allowance of $36,900 is allowed at the Kellogg-Voorhis campus for books; all other operating expenses and equipment at both campuses are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis.

GENERAL ANALYSIS

Objectives

The Maritime Academy trains qualified young men to become licensed officers in the Merchant Marine. The course is 3 years and leads to the bachelor of science degree with a specialization in either the deck or engineering fields.

Program and Performance

The 3-year training program during which the student attends school 11 months of each year, is culminated by the United States Coast Guard examination for a license as either third mate or third assistant engineer. The student must pass the license examination before he can receive a degree.

The program at the academy is supplemented by a training cruise each year of 3 months' duration aboard the Golden Bear, a merchant-type ship loaned to California by the Federal Maritime Administration. An accepted schedule of cruises has been developed on a 3-year cycle. This cycle includes a cruise to the west coast of South America, one to the mid-Pacific Ocean area, and one through the Panama Canal into the Caribbean area.

These cruises provide training in celestial navigation, in both the northern and southern hemispheres, piloting, and midocean ship operation. The 1961-62 Budget provides funds for a cruise to South America.

The Maritime Academy Act of 1958 revised the method by which federal grants and subsidies are made to the various state-supported maritime academies. The new law permits an outright grant of $25,000 to academies operating in accordance with prescribed standards and an additional payment of $50,000 for academies that accept out-of-state students. The aid also provides for payments of $600 per student per academic year to assist in defraying the cost of uniforms, books, and subsistence for each student. Of the total of $600 the State receives $400 and the remaining $200 goes to each midshipman.

In addition to providing the ship for the training cruise, the Federal Government also provides for the annual drydocking, overhaul and major repair of the California Maritime Academy ship at an estimated cost of $50,000. This amount, however, is not reflected in the budget.

Three positions are proposed in the 1961-62 fiscal year. One instructor position is included to handle the workload caused by the increased enrollment of 19 students over the programmed number of students in 1960-61. One building maintenance man and 1 janitor position are proposed for increased workload in the maintenance function for the new engineering building now under construction which is scheduled for completion during May 1961.

GENERAL ANALYSIS

Objectives

The State Scholarship Commission, consisting of 9 members appointed by the Governor, administers a statewide program of competitive scholarships enabling a group of academically able students to attend the college of their choice. These students, because of financial considerations, would not have the freedom of college choice without the scholarship program. The program has encouraged independent institutions to expand enrollment facilities and absorb a large proportion of the student's educational cost without a burden on the taxpayers for capital investment in instructional facilities and operating costs.

Program and Performance

The Legislature through Chapter 74, Statutes of 1960, First Extraordinary Session, increased the maximum number of authorized scholarships from 2,560 to 3,200 for the 1961-62 academic year. Six hundred forty additional scholarships will be added in the 3 subsequent years until a maximum of 5,120 is reached. Chapter 74 of the 1960 First Extraordinary Session also increased the maximum grant from $600 to $900 and authorized graduated awards from $300 to $900 in $100 intervals, but in no case in excess of tuition and fees. The same legislation also authorized the commission to hold in trust, scholarships won by students who later elect to go to junior colleges until such time as they enroll in a 4-year institution.

The awards are made on the basis of scholastic ability, academic potential and the need for financial assistance to enable a student to attend the college of his choice. Academic aptitude is measured by means of the Scholastic Aptitude Test of the College Entrance Examination Board. Academic achievement is measured by a minimum performance in high school, and need for financial assistance is determined by a widely used need-evaluation system and by the judgment of college admissions and scholarship directors employed by the commission on a temporary basis.

It is estimated that there will be 17,000 applications for new scholarships received in the spring of 1962. This compares with 15,000 estimated to be received in the spring of 1961, and 11,000 in the spring of 1960. Because of increased scholarships 1.5 clerical positions and related operating expenses are necessary.

The Legislature in Chapter 76, Statutes of 1960, First Extraordinary Session, also passed legislation making certain changes in the State Agricultural Scholarship Program. The number of authorized scholarships was increased from 100 to 200, and 100 scholarships will be added in 2 subsequent years until a maximum of 400 is reached. The awards are for tuition and necessary fees up to a maximum of $600. In addition various technical changes were made, with the principal change removing the restriction of one applicant per high school offering agricultural courses. Under the new law, scholarship applicants are limited to students attending high schools offering agricultural courses. However, application is now made directly to the commission and there is no limit on the number from any given high school.

GENERAL ANALYSIS

Objectives

The board, consisting of the Director of Finance, the State Controller, and 1 other member appointed by the Governor, makes rules and regulations governing the presentation and auditing of claims, allowances for traveling on official business, and the issuance of merit awards. Other functions include considering, auditing, and recommending to the Legislature claims against the State for which no appropriation has been made, and hearing appeals in accordance with the purchasing procedure under the provisions of Section 13391 of the Government Code.

Program and Performance

Each year the board considers approximately 800 claims arising because no appropriation is available or because the settlement of the claims was not otherwise provided for by law. Claims approved by the board are, with the sanction of the Governor, referred to the next session of the Legislature with a recommendation that an appropriation be made in payment thereof. The board subsequently pays all claims for which funds have been provided and the Governor has approved. The board meets semimonthly to conduct business, consider appeals, establish rules and regulations concerning state travel and per diem expenses, and hear claims.

The board appoints members to the Merit Award Board on a 2-year basis and monthly considers the recommendations for awards of that board.

GENERAL ANALYSIS

Objectives

The State Controller is the accounting and disbursing officer of the State. As the State's fiscal officer he maintains the accounts of all funds and appropriations, which involves determination of the legality of all receipts of moneys by the State and all payments withdrawing moneys from the Treasury; makes various apportionments of state revenues; administers the state payroll system, including the United States Savings Bond program; he accounts agency trust moneys in the custody of the Treasurer; supervises the administration of state inheritance and gift taxes; collects motor vehicle fuel license tax, motor vehicle transportation license taxes, petroleum and gas assessments and insurance premiums tax; administers the tax refunds to nonhighway users of motor vehicle fuel; collects state and county sales and use taxes on fuel not used on a public highway; administers laws concerning county budget procedures; reports state, county, city, district, and street and highway financial transactions; prescribes the scope and content of the annual audit made of all California special districts; supervises the general procedures concerning delinquent property taxes and administers property tax-deeded to the State; and, field audits expenditures by local governments for programs involving state subventions.

Program and Performance

The Controller serves on 17 boards and commissions. Staff service is rendered to him by his Administration Division in respect to these memberships.

In addition to the Administration Division, there are 7 other major divisions which assist the Controller in carrying out his duties and responsibilities as State Controller:

1. Accounting Division maintains the control accounts, makes financial analyses and apportionments and prepares the annual report of the Controller, and administers unclaimed property. Provision is made in this budget for 2 positions to handle increased workload in control accounts.
2. Audits Division audits all claims and conducts a field audit program related to claims. During 1959-60 a realignment of the claim audit function was effected involving a reduction in the intensity of claim review.
3. Disbursements Division makes all disbursements, administers the state payroll system and performs electrical machine accounting services for the entire office and other agencies. Installation of electronic data processing is provided for in 1960-61 which is estimated to save $350,000 a year operating costs over present methods after equipment costs are amortized. Proposed in 1961-62 is the abolishment of 51.5 positions as a result of conversion.
4. County Budgets and Reports Division prescribes forms for county budgets, is responsible for reviewing and reporting on the use of state gas tax funds, consolidates and publishes the annual reports of transactions concerning cities, counties, and special districts.
5. Tax Collection and Refund Division makes tax collections for 4 different taxes and audits claims for refund of fuel taxes paid for nonhighway use of fuel. On such fuel, state and county sales and use taxes are collected.
6. Inheritance and Gift Tax Division administers inheritance and gift tax laws and controls the flow of inheritance and gift tax moneys into the State Treasury. A 7 percent increase in returns has led to request for 5 additional clerical and 1 additional legal positions.
7. Tax-deeded Land Division has general supervision over the procedures for collection of property taxes, including sales and deeds to the State for delinquent taxes, redemptions from such sales, and sales of tax-deeded property.

The total support for the office of State Controller is financed from 5 funds, namely: (1) General, (2) Motor Vehicle Fuel Fund, (3) Motor Vehicle Transportation Tax, (4) Redemption Tax, and (5) State School Building Aid.

ADMINISTRATION DIVISION

Objectives

This division provides general administration of the Controller's office and staff assistance to the Controller pertaining to his responsibilities as a member on boards and commissions. It also performs the auxiliary services for the entire Controller's office.

Program and Performance

The Controller's general administrative staff is responsible for the general administration of 7 divisions; for legal, research, personnel, accounting and miscellaneous auxiliary services; and for providing assistance to the Controller in connection with his duties on boards and commisisons.

ACCOUNTING DIVISION

Objectives

The principal functions of the Division of Accounting are to maintain the control accounts covering the receipts, disbursements, resources, liabilities and balances of all state funds, to audit and designate the fund of all deposits into the State Treasury; to prepare various financial statements and reports covering the State's condition and operations; to make various apportionments of revenues to local government; to administer the unclaimed and escheated property laws; and to administer the Judges' Retirement Fund.

Program and Performance

In addition to the administrative staff, there are 3 bureaus within the division. They are the Bureau of Control Accounts, the Bureau of Financial Analysis, and the Bureau of Unclaimed Property.

The Bureau of Control Accounts maintains the accounting records of receipts, disbursements, resources, liabilities and balances for 150 funds in the State Treasury. This involves maintenance of approximately 26,175 accounts. It is also responsible for the auditing of all deposits into the State Treasury to determine the legality of the receipt of the money and its proper disposition. It also maintains accounts for bond investments held by the various state funds for the pooled money operation and for interest-bearing bank accounts. It maintains accounts for all agency funds deposited in trust with the State Treasurer. It superintends the collection of the State's share of fines and forfeitures levied by judges under various state laws.

The scientific method of amortizing bond premium, discount and accrued interest was installed effective July 1, 1960. The new procedure, utilizing punched card accounting methods will provide the most accurate distinction between corpus and income for all funds, resulting in more acurate operating statements and balance sheets.

The Bureau of Financial Analysis has, as a major responsibility, the preparation of the annual report of the State Controller. This bureau also publishes a preliminary annual report, a monthly statement of collections of all major taxes, receipts and expenditures of the General Fund, reserve funds and school construction funds; and several other periodic reports of a topical nature. It also compiles data and makes computations for the apportionment to local agencies of various revenues, such as the motor vehicle license fees, highway users taxes, and moneys received from the Federal Government. It compiles estimates of future cash receipts and expenditures which are used in connection with the Pooled Money Investment Program. In addition to the above functions, the bureau administers the Judges' Retirement Fund and makes computations of the annual repayments due from school districts on loans made to them under the school building aid programs.

The Bureau of Unclaimed Property administers the Controller's duties relating to unclaimed money or property received from abandoned property and unclaimed estates of deceased persons. The 1959 Legislature enacted a Uniform Disposition of Unclaimed Property Act which resulted in increased collection of revenue. A total of $3,142,934 was received during the 1959-60 fiscal year from various sources. Because of pending litigation, $640,800 of the above amount was deposited in the Special Deposit Fund, Abandoned Property Suspense Account, and an additional $1,000,000 was reported but not received by the Controller. In addition to this, during the 1960-61 fiscal year, unclaimed contents of innumerable safe deposit boxes will be received and will have to be screened for items of possible value. It is estimated that $2,000,000 will be received during the 1960-61 fiscal year and $1,500,000 during the 1961-62 fiscal year.

An additional accountant and 1 clerical position are proposed in 1961-62. Both positions were established out of temporary help during 1960-61 to handle increased workload in control accounts in the preparation of journals under the new electronics data processing procedures and for additional work in the scientific amortization of premium and accrued interest in bond accounting. A clerical position is abolished in this unit as a result of the elimination of transfer posting in fund accounting under the electronic data processing program.

AUDITS DIVISION

Objectives

The Division of Audits has the responsibility of assuring that public money is expended for the purposes for which appropriated. The Constitution and statutes require the Controller to determine the legality and validity of all payments from the State Treasury.

The division passes upon the legality and propriety of State expenditures before disbursement from the Treasury. It approves the payment of expenditures found to be correct and valid and refuses to allow any withdrawals which are contrary to law or public purpose. Under various statutes which establish subvention programs for assistance to local jurisdictions by the State and by the Federal Government through the State, funds are advanced to such local agencies by the Controller. Claims presented often contain only information necessary to authorize an advance. The division makes post audits of the accounts of local agencies in order to determine that accountability has been established for the funds advanced and that expenditures were legal and proper.

Program and Performance

Bureau of Claim Audits:

During the 1961-62 fiscal year this bureau will audit 2,332,000 claims and will audit 27,200 contracts and contract changes and will verify 231,000 contract claims. During the 6-year period from 1956-57 through 1961-62 the bureau will have raised the average number of claims audited annually per auditor position from 94,861 to 145,794, an increase of 50,933 claims per auditor of 53 percent through improvement of techniques and procedures. With the increased claim load anticipated and contemplating no increase in staff this bureau will be processing 47 percent more claims with 41 percent less staff than it had in 1952-53.

Management Survey No. 1084 of the Department of Finance regarding the pre-audit of claims in the State Controller's office set forth the mutual understanding of the Department of Finance and the State Controller's office as to the claim audit function of the Controller, the manner in which that function should be performed and the staff required to perform that function on a workload basis. The report recommended that the staff of the Claim Audit Bureau be reduced by 9 positions. This reduction and the other agreed upon recommendations were put into effect February 1, 1960.

As claims audited is the basic indicator of workload in the audit of claims and estimates are that there will be a 5 percent increase in claims audited for the 1961-62 fiscal year over the 1960-61 fiscal year, it is evident that the expected growth will have an effect on ability to meet the load in the budget year. However, due to the marked increase shown for claims audited in the 1959-60 fiscal year over prior years and due to the short period of experience under the new procedures effective February 1, 1960, additional positions are not requested at this time.

Bureau of Field Audits:

A new subvention program, State Aid for Local Water Projects, which was authorized by the Legislature at the 1959 General Session will reach the stage where field audits are required during 1961-62. It is estimated by engineering staff of the Department of Water Resources that 24 local projects will be completed during that year and be available for audit. This will increase staff requirements by 1 position. However, completion of the audits under the flood relief programs of 1958 and 1960 during 1960-61 will decrease staff requirements by approximately 2 positions. Accordingly, budget estimates for 1961-62 will reflect a decrease of 1 position from 1960-61.

COUNTY BUDGETS AND REPORTS DIVISION

Objectives

This division administers the laws relating to county budgets; the reporting of city, county, and district financial transactions; provisions of the Collier-Burns Highway Act requiring local jurisdictions to report city and county street and road financial transactions, and prescribes uniform accounting procedures for counties.

Program and Performance

The staff of this division:

Collects, reviews, compiles and publishes information concerning financial transactions relating to streets and roads of cities and counties in California.

Collects, compiles and publishes information concerning the following:

All Financial Transactions of Cities and Counties of California.

All Financial Transactions of Special and Irrigation Districts of California.

All Financial Transactions of School Districts of California.

Assessed Valuations of Local Jurisdictions.

Certifies irrigation and water district bonds for the State Controller in accordance with statutory requirements.

Prescribes forms for the use of county auditors in compiling their budgets.

Makes semiannual settlement of financial accounts between the State and the counties.

Under the Collier-Burns Highway Act of 1947, the Controller is responsible for reviewing and reporting on the use of State gas tax funds apportioned to local government to insure an adequate accounting from the cities and counties.

Under Section 30200 of the Government Code, the Controller must devise and supervise the installation of Uniform Accounting Procedures for all counties.

Assisting the division is a 7-man "Advisory Committee to the State Controller on Financial Reports" and a 10-man "Controller's Committee on County Accounting Procedures." The members of these committees are all representatives of local government and serve without pay.

The workload of this division has exhibited a pattern of constant growth during the past few years and it is expected that this trend will continue during the budget year. This is partly due to normal growth in existing programs and partly due to the relatively recent county uniform accounting project. However, it is anticipated that as a result of more efficient operations due to the recent reorganization of this division no increase in staffing needs will be required during the budget year.

DISBURSEMENTS DIVISION

Objectives

This division issues the Controller's warrants drawn on the State Treasury and maintains the records of outstanding warrants; administers the Uniform State Payroll System including the United States Savings Bond deduction program; and provides electronic data processing service for the gas tax refund program, the unclaimed property program, and maintenance of the State's central control accounts and the treasury trust accounts.

Program and Performance

Staffing Needs: A total of 109 budgeted positions is requested for 1961-62. This is 57.3 positions less than the 166.3 budgeted positions required for the prior year and will result from the cutback in staff in all 3 disbursing offices following the conversion from the punched card methods, presently employed by the division, to electronic data processing in 1960-61. It should also be noted that for 1960-61, the difficult year of conversion, only 166.3 positions are requested as compared to 166.6 in the prior 1959-60 year, a slight reduction of 0.3 in the number of positions.

Electronic Data Processing: By a major work improvement effort, it has been determined that the Controller can obtain substantial economies and provide improved services to other departments by the adoption of electronic data processing in fund accounting, payroll accounting and writing, disbursing, and other division services.

The Controller's plan for adoption of EDP methods indicated that, after the Legislature approved an initial expenditure of approximately $300,000 during the 1959-60 and 1960-61 fiscal years combined, the improved methods would result in estimated average savings of more than $100,000 annually in the 4-year period of 1961-62 through 1964-65, and savings of approximately $350,000 annually beginning in 1965-66. Thus, the General Fund support of the Controller's operations, under this original plan, during the first 5 years of operation is expected to be at least $750,000 less than the cost which would have been incurred in the same period under former methods. Therefore, in the first 5 years following the year of conversion the fund will recover its initial outlay, will realize net savings of approximately $450,000 and, will save approximately $350,000 every year thereafter.

For the 1961-62 fiscal year, the division was committed to cut back its total cost of operation from the prior year cost which was expanded for the conversion to EDP. It was agreed with the Department of Finance that the cutback was to be $278,000. It is estimated that the savings will be $306,709 or $28,709 more than originally agreed. The division will require $24,744 more in the salaries and wages category for 1960-61, than was originally budgeted, but related offsetting reductions in costs of equipment and operating expenses will exceed the total of these one-time personnel costs of conversion.

INHERITANCE AND GIFT TAX DIVISION

Objectives

This division administers the state inheritance and gift tax laws.

Program and Performance

The staff in this division works out of offices in Sacramento, San Francisco and Los Angeles. Their basic functions are to represent the State's interests at the local level and, through centralized supervision, to control the flow of inheritance and gift tax moneys into the State Treasury. This division affords the taxpayer an opportunity to have his case heard at home in the local courts.

WORKLOAD DATA

	Actual 1957-58	1958-59	1959-60	Estimated 1960-61	1961-62
Gift tax returns	5,319	5,710	6,408	6,857	7,337
Inheritance tax returns (taxable)	20,790	21,817	22,811	24,317	25,993

There is a continuous increase in the workload of this division. In 1959-60, the last completed fiscal year, the inheritance tax revenues for the State were $44,804,124 (plus $8,075,653 which was not accounted as received from counties by the State Treasurer until July 1, 1960 of the following fiscal year) and gift tax revenues for the State were $3,537,362 with the combined total being $48,341,486 (exclusive of the $8,075,653).

In 1961-62 an additional 5 clerical and 1 legal positions are provided to handle increased workload. Three of the clerical positions were authorized in temporary help during 1960-61 to relieve a portion of the increased number of returns. Improved administrative procedures were installed in the Los Angeles office during 1960-61 enabling that office to absorb greater clerical workload, thus, reducing the need for additional clerical positions in that office.

TAX COLLECTION AND REFUND DIVISION

Objectives

This division enforces the collection provisions of the Motor Vehicle Transportation License Tax Act, the Motor Vehicle Fuel License Tax Act, the tax on insurance companies, the petroleum and gas production assessments and the Subsidence Act; and administers the refund of motor vehicle fuel license taxes to nonhighway users, collecting, in the process, state and county sales and use taxes on the purchases subject to such taxes.

Program and Performance

Through this division with offices in Sacramento, Los Angeles, Fresno, and San Francisco the Controller carries out 2 major functions:

1. Refunding fuel taxes paid for off-highway use of fuel. This unit audits claims and carries on a program of education and enforcement. In processing such refunds the amount of state and county sales taxes on the net cost of the gasoline involved is computed and deducted therefrom on behalf of the Board of Equalization.

   All claims receive an office audit for legality and required documentation. The claimant's computations are checked by electronic computer. Selected claims are referred to the field for audit of claimant's records and operations to verify the legality and correct amount of refund to be paid.

2. Collecting 5 major classes of revenue to the State which are assessed by other agencies—the motor vehicle fuel license tax, the motor vehicle transportation license tax, and the insurance premium tax, assessed by the State Board of Equalization; petroleum and gas assessments, levied by the Department of Natural Resources; and the subsidence abatement assessments levied by the Department of Natural Resources. Under these tax laws, the division enforces the collection provision, keeping an account with each individual taxpayer. The motor vehicle fuel license tax is the 6 cents per gallon gasoline tax imposed on distributors. This revenue is earmarked for construction of state highways and roads.

In 1960-61 abolishment of 3.2 temporary help positions in the total amount of $11,340 is provided. This abolishment of temporary help consists of (1) 2.6 temporary positions eliminated by improvements and economies in the issuance of refunds with a reduction of about one-fourth in the average processing time and (2) abolishment of 0.6 of a temporary help position in anticipation of a reduction in tax collection and gas tax refund workload resulting from a change in the basis of taxing liquid petroleum gas from taxation on the basis of distribution under the Motor Vehicle Fuel License Tax Law to taxation on the basis of use under the Use Fuel Tax Law.

STATE CONTROLLER—Continued

TAX-DEEDED LANDS DIVISION

Objectives

This division administers the general procedures for tax sales, tax deeds, and redemptions of lands sold or deeded to the State for nonpayment of taxes; administers property tax deeded to the State; advises county officials regarding the levying and collection of taxes on property, and renders services to the counties relative to delinquent tax accounting.

Program and Performance

This division has offices in Sacramento, Los Angeles, Riverside, Fresno, Oakland, Eureka, and Santa Barbara. The workload of this division will continue at about the present level through 1961-62. One assistant district manager position in Sacramento has been abolished as of July 1, 1960, since the position was unfilled throughout the entire 1959-60 fiscal year and the work of the division can be successfully performed without it.

GENERAL ANALYSIS

Objectives

The State Board of Equalization is composed of 4 members elected from areas of the State known as equalization districts and a fifth, ex officio member, the State Controller, who is elected at large.

The Board administers the following General Fund revenue sources: the sales and use taxes, the cigarette tax, the alcoholic beverage excise taxes, and the private car tax. It participates in the administration of the insurance company taxes. It administers 3 Highway Users Tax Fund revenues—the motor vehicle fuel (gasoline) license tax and the motor vehicle transportation license tax with assistance from the Controller, and the third, the use fuel (diesel) tax in its entirety. It licenses and regulates itinerant merchants. It hears appeals from actions of the Franchise Tax Board on personal income and bank and corporation taxes.

In addition, it administers or assists in administration of the major local government revenues—the property tax and sales and use taxes. Its local property tax responsibilities include the assessment of state-assessed properties, supervision of the assessment of all locally taxable properties, and equalization of the average assessment levels in the counties.

Program and Performance

The Board's administration of state taxes involves the licensing of 324,584 sellers of tangible personal property operating at 346,706 outlets, and of 40,705 highway-users and members of the petroleum products industry and 286 licensed cigarette distributors. Tax return forms are distributed to, and tax remittances are received from, these licensees and from 1,707 licensed manufacturers and wholesalers of alcoholic beverages. Forty-two thousand three hundred six taxpayers are audited each year, and collections are enforced when not voluntarily tendered (with assistance from the Controller in the case of the motor vehicle fuel license and motor vehicle transportation license taxes). The Board appraises the railroad rolling stock of 93 car lines and other nonrailroad owners of cars, assesses this property, computes the tax rate that is applied to it, and collects the tax. It receives recommendations from the Insurance Commissioner for assessment of taxes on the State's 699 admitted insurance companies, makes the official assessments, and hears appeals from its actions. These state taxes yielded in excess of a billion dollars in the last completed fiscal year.

The board handles 125 appeals a year from actions of the Franchise Tax Board.

In the local tax field, the Board is now administering for 56 counties and 358 cities sales and use taxes that are yielding $225,000,000 a year; it assesses property that produces property taxes and ad valorem special assessments amounting to $270,000,000 a year; and it assists county assessors who are responsible for the distribution among property owners of an additional $2,150,000,000 of taxes and ad valorem special assessments. It also makes some 6,000 appraisals of secured and unsecured property holdings each year, involving over 5,000 parcels of real property and 3,000 personal properties, to test the assessment levels of approximately one-third of the counties and estimates the assessment levels of the remaining counties by reference to the results of prior year appraisals.

Increased recruitment efforts are planned to reduce the number of vacant sales tax auditor positions in the more critical areas. Sixteen positions are eliminated in cigarette taxes and 1 auditor position is proposed to be reclassified to an information officer position.

BOARD OF EQUALIZATION—Continued

ADMINISTRATION

Objectives

This division includes the Board with its staff and in addition, the administrative, legal, and service functions of the agency.

Program and Performance

The budget, accounting and cost analysis functions have been integrated into one fiscal unit in the current year. Co-ordination of these functions aimed at strengthening the fiscal activities of the Board will also promote more skill in planning and will facilitate workload of the line accounting unit.

Particular emphasis in streamlining and updating the tabulating processes will be accomplished with the installation of new electronic data processing equipment in January 1962. This new system will provide the board with more capacity and flexibility to handle current workload and to assimilate future increases. The staff of procedure writers is now being brought to the authorized level in preparation for the changeover and to provide new and improved procedures for handling current workload.

An auditor position is being reclassified to provide an Information Officer to fill the need for communication to the Board staff and to the affected public, and for general information and changes in tax laws and responsibilities. This position will co-ordinate work now being performed by various units of the board and should promote efficiency and effectiveness in the area of communication and information.

Rental cost is the major operating expense increase and reflects full year rental costs in the new state buildings in Oakland and Fresno.

BUSINESS TAXES

Objectives

Business Taxes administers the Sales and Use Tax Law, the Bradley-Burns Uniform Local Sales and Use Tax Law, the Cigarette Tax Law, the licensing and assessment provisions of the Motor Vehicle Transportation License Tax Law and the Motor Vehicle Fuel License Tax Law, the licensing, assessment, and collection of the Use Fuel Tax and the licensing of itinerant merchants.

Program and Performance

The reorganization of Business Taxes has generally been accomplished and the previous 3 separate divisions of Sales Tax, Highway Taxes, and Tax Assessment are now under the supervision of an assistant executive secretary.

As the result of re-evaluating procedures, 16 of the remaining 27 positions provided for cigarette tax administration have been eliminated.

A pilot cigarette tax audit program will be inaugurated in the current year, from time made available by reducing beverage tax audits. This will help to determine the extent of future cigarette tax audits required.

The board plans to emphasize their recruitment program during the 1961-62 fiscal year in order to decrease the number of vacant auditor positions throughout the State. Working in conjunction with the State Personnel Board, plans have been laid for increasing the number of examinations and publicity regarding the benefits of state work in those critical areas where auditors are needed.

The board plans to use "spot examinations" for the San Jose and Los Angeles areas and increase contacts with universities and colleges in order to insure better coverage of the best resources for potential auditors.

PROPERTY TAXES

Objectives

Property Taxes is comprised of 3 divisions. The Division of Assessment Standards assists, advises, and directs county assessors in the development of efficient and acceptable assessment procedures, and promotes uniformity in the ratio of assessed value to market value of all locally assessable properties within a county (intracounty equalization). The Division of Intercounty Equalization makes annual estimates of the ratio of total assessed value to total market value of locally assessable property in each county for the board's use in performance of its intercounty equalization duties. The Valuation Division provides the board with the data required for the assessment of state-assessed property and administers the Private Car Tax Law.

Program and Performance

Property Taxes, under the direction of an assistant executive secretary, continues to assume a major role in the assessing of property within the State. New laws have increased the workload in the last few years and also the need for an increased degree of accuracy in the findings. In the Assessment Standards Division, a pool of trained timber appraisers has been made available on a reimbursable basis to those counties whose workload does not warrant employment of a full-time professional timber appraiser. This program, which should reach its full growth during the current year, and the County Contract Mapping program are both on a fully reimbursable basis. The counties voluntarily contract for these services and pay the State's full costs. This is in accordance with Government Code Section 15624.

GENERAL ANALYSIS

Objectives

The Department of Finance has general supervision over all matters concerning the financial and business policies of the State. In addition, numerous services are performed centrally for the various other departments, offices, boards, and commissions.

The director is immediately responsible to the Governor, acts as his adviser on fiscal matters, assists in the formulation of administrative policies, and is charged with responsibility for the execution of the State Budget. In addition, the department performs services for other state agencies, such as centralized purchasing, real property acquisition, automotive management, printing, and office building maintenance.

The Director of Finance is a member of 19 boards and commissions. By law he is Chairman of the State Board of Control, and serves as chairman of many other boards on an elective basis.

Program and Performance

Under the executive office of the director, the department is organized into 12 major divisions plus the Economic Development Agency. Four of these—Audits, Budget, Fairs and Expositions, and Local Allocations—supervise the expenditure of state funds, acting as staff agencies for the Director of Finance in the discharge of his responsibilities in the execution of the Governor's fiscal policies. Eight divisions—Administrative Service Office, Buildings and Grounds, Communications, Organization and Cost Control, Planning, Printing, Property Acquisition and Purchasing—are essentially service units assisting other state agencies in such matters as procurement of property, equipment and supplies; building management and space utilization; organization and operating procedures; and other management matters.

The budget for the Printing Division appears in the Appendix.

The Economic Development Agency within the Department of Finance promotes and encourages the development of business, industry and commerce in California.

A summary of the new positions and amounts proposed are shown below:

Executive Office	1	$7,728
Administrative Service Office	11	46,372
Audits Division	2	13,344
Budget Division	1	5,496
Buildings and Grounds Division	4	18,900
Communications Division	1	11,400
Local Allocations Division	1	4,512
Organization and Cost Control Division	1	4,092
Property Acquisition Division	2	13,788
Purchasing Division	3	16,512
Totals	27	$142,144

Installation of improved equipment results in the proposed abolishment of 6 positions in the Buildings and Grounds Division. One additional position in this division is being abolished as having been determined surplus to existing needs.

---

[a] Expenditures from bond funds are not included in overall budget totals.

DEPARTMENT OF FINANCE—Continued

EXECUTIVE OFFICE

Objectives

This office provides a number of specialized advisory services to other divisions of the department and agencies of state and local government.

Program and Performance

The director, and, as delegated by him, the 3 deputy directors and 2 assistant directors, assign and co-ordinate the work of the department.

Under the law, the Director of Finance is responsible for approval and execution of many types of contracts, property transactions, and other legal documents. An administrative adviser assists with this function, and provides advice in legal matters involving the department.

The director is also charged by law with responsibility for investment of certain funds and for approval of transactions in securities by designated state agencies. The investment officer and his staff were transferred to the State Employees' Retirement System on October 1, 1960, as the work of this unit pertained mainly to investment problems of the retirement funds.

The Director of Finance assumes responsibility for the conduct of the State's insurance program. This involves the procurement of insurance and public official bonds for the State's protection. He is assisted in this function by an insurance officer.

One additional professional position is provided for the Legal Section to meet increased workload primarily involving contract work with the Water Department.

ADMINISTRATIVE SERVICE OFFICE

Objectives

This division is the departmental service division including departmental accounting, budgeting, library, personnel, and procurement. It is also responsible for management of Devonshire Downs property.

Program and Performance

One additional clerical position is proposed for the increased workload in the central library. Ten positions are provided for the tabualting section, 5 of which were established in the 1960-61 fiscal year on a reimbursable basis to do the accounting for the printing plant by punch card methods as recommended by the Legislature. Savings are anticipated in accounting costs in addition to the 10 positions being eliminated in the Printing Division and 1 position in the Automotive Pool of the Purchasing Revolving Fund, as a result of the revised system. The other 5 positions have been included to cover the workload of new procedures being developed by the Organization and Cost Control Division.

The new procedures being studied to adapt tabulating methods to existing clerical operations of the department are: (1) Purchasing Division to place certain purchase order procedures on such equipment; (2) place equipment records of department on tabulating; (3) place the property and lease records on tabulating; and (4) mechanization of certain accounting and clerical operations of the Local Allocation Division.

AUDITS DIVISION

Objectives

This division examines and verifies the accounts of every state agency as well as all district and county fairs, after transactions are completed. The purpose is to discover and report any unauthorized, illegal, or irregular expenditures; any financial practices that are unsound; and whether the agencies have faithfully discharged their responsibilities.

In addition, the division supervises the examination of the records of all school districts, and makes special audits at the request of the Legislature, the Director of Finance, or other state officials. It also authorizes destruction of records and occasionally renders expert accounting assistance to state agencies on a contract basis. There is continuing co-ordination between the Audits Division and the Auditor General in order to avoid duplication.

Program and Performance

Two additional professional auditing positions are requested to meet the workload resulting from the creation of new agencies primarily within the Department of Education. Audit time of 3,280 hours has been budgeted for this coverage. One clerical position has been abolished as having been continuously vacant.

---

[b] Includes 5 positions temporarily established during 1960-61 to service State Printing Plant accounting system on a reimbursable basis.

[c] This section added during 1959-60 on a reimbursable basis to manage Devonshire Downs property assigned by legislation in 1959 Session.

BUDGET DIVISION

Objectives

The service and control functions affecting budgetary activities in all state agencies are performed by this division through its preparation and administration of the annual budget. Each state agency prepares detailed estimates of proposed expenditures and anticipated revenues for the coming fiscal year which are analyzed by the division staff in terms of policies set by the Governor and the Director of Finance. After legislative action on the budget, this division continuously reviews and approves each agency's financial operations. The budgetary process and the operations of the division receive continuing management review from a policy viewpoint by a procedures unit established within the Budget Operations Section.

One unit of the division conducts economic and population research, prepares the budget estimates of revenue from major taxes and licenses, and provides the basic data on population and income essential for long-term financial planning.

Program and Performance

Beginning in July 1958, a new service was extended to local governments under the provisions of Section 194.2 of the Streets and Highways Code. In lieu of special censuses, cities may request the Department of Finance to prepare estimates of population and pay the minor expenses incidental to this work. The resulting population estimates are certified to the State Controller and used as a basis for future distribution of motor vehicle fuel and vehicle license fee revenue.

One additional junior research technician on a reimbursable basis is provided to assist in city population estimating.

BUILDINGS AND GROUNDS DIVISION

Objectives

This division is responsible for maintaining and operating all state-owned buildings under the jurisdiction of the Department of Finance, in addition to other privately owned buildings in which the State has rented office space for the several agencies in connection with the various operations involved. Currently it is responsible for maintaining and operating 53 buildings with a total floor space of approximately 6,599,549 square feet, including some 60 acres of grounds in Sacramento, Oakland, San Francisco, Fresno, and Los Angeles. In addition, there are a number of other locations both state-owned and leased where the division is called upon from time to time to perform miscellaneous services. This division also operates maintenance shops covering all phases of building maintenance and operation in San Francisco, Los Angeles, and Sacramento—the main shops being located in the City of Sacramento.

Program and Performance

A professional staff in the Space Utilization Section of this division analyzes and determines space requirements including types, amounts, and special facilities; studies space requirements for state agencies for long-range building programs and prepares programs for design and construction of state office buildings; co-ordinates space needs, allocates and assigns space to state agencies occupying state buildings; prepares lease exhibit plans and specifications for construction of new leased facilities and also for alteration and improvement of existing leased office areas.

Effective August 1, 1960 the leasing function of the Property Acquisition Division was transferred to this division to better co-ordinate the leasing and assignment of space.

There is also provided through this division a California State Police service which provides protective service in the various locations set forth above. Additional police service is provided upon request.

The division provides an inter-departmental mail service, maintenance of the Governor's Mansion, and the telephone exchanges in state buildings in Sacramento, San Francisco, Oakland, Los Angeles, and Fresno.

One telephone operator in Sacramento and 1 intermediate clerk in San Francisco are provided for increased workload in telephone operations. A janitor and building engineer are proposed to staff the leased quarters for the Military Department and the Department of Water Resources in Sacramento.

A total of 7 positions are to be abolished which includes 1 chief engineer in Los Angeles and 6 elevator operators when elevators in the Public Works Building are converted to automatic control.

COMMUNICATIONS DIVISION

Objectives

This unit provides technical assistance relative to the coordination and operation of communications systems used jointly by public agencies in the State, as well as those systems operated by individual state agencies. Arrangement for adequate representation of these agencies before the Federal Communications Commission in matters affecting them is a further responsibility of the division.

An important part of the division's work is to assist in solving engineering and technical problems relating to installation and operation of publicly owned radio, telephone, and teletype systems. The findings and recommendations of the staff are made available both to the board and to the public agencies concerned.

Program and Performance

The division provides, on a reimbursable basis, centralized maintenance service for most state agencies utilizing radio equipment. The budget for this activity appears in the appendix under the Purchasing Revolving Fund. The position of assistant chief of the Communications Division is proposed to assist in handling the increased administrative workload of this division.

ECONOMIC DEVELOPMENT AGENCY

Objectives

To provide industrial and commercial expansion and fuller employment for California's growing population through vigorous promotion of business within the State.

Program and Performance

This agency investigates, studies and undertakes ways and means of promoting and encouraging the prosperous development of business, industry and commerce within and without the

DEPARTMENT OF FINANCE—Continued

ECONOMIC DEVELOPMENT AGENCY—Continued

State. The agency, headed by a commissioner appointed by the Governor, promotes and encourages the expansion of markets for California products, and the development of new business in the State. It studies conditions affecting California business, industry and commerce, plans and develops an effective business information service, encourages and develops commerce with other states and foreign countries, and makes periodic reports and recommendations to the Governor and the Legislature for improvement of conditions affecting the development of business, industry and commerce.

This relatively new activity has undergone an initial shakedown period of operations and adjusted back to a total of 9 professional and 6 clerical positions as compared to the 21 positions originally budgeted. Much of the professional work is being handled on a contract basis.

FAIRS AND EXPOSITIONS DIVISION

Objectives

This division provides general fiscal supervision of 50 district, 24 county, and 2 citrus fairs throughout the State; prepares a master premium list and approves the operating budgets and premium lists of the individual fairs; prepares claims for distribution of appropriated funds; and advises the Director of Finance and the State Public Works Board as to allocations of money from the Fair and Exposition Fund to fairs for Capital Outlay purposes. The division also assists local fairs with construction problems.

Program and Performance

Beginning with the 1960-61 fiscal year, allocations to district, county, and citrus fairs are based on need rather than fixed formula as in prior years. This division provides the necessary field and staff work and prepares recommendations required to implement the new allocation process.

LOCAL ALLOCATIONS DIVISION

Objectives

This division serves as the technical staff to the Director of Finance and the State Allocation Board in the administration of several programs of state aid to local government agencies. The major programs are: To review and analyze applications for state aid and related documents to determine that eligibility requirements have been met; prepare reports and make recommendations to the Director of Finance and to the State Allocation Board in respect to these programs; maintain records of official actions of the Director of Finance and the State Allocation Board; administratively approves construction contracts and release of funds in accordance with the rules of the State Allocation Board, and performs other functions authorized by the Director of Finance.

Program and Performance

A senior account clerk position is provided to handle the increased workload resulting from the addition of furniture and equipment to the School Building Aid Program.

ORGANIZATION AND COST CONTROL DIVISION

Objectives

This division provides consultation services on management problems and makes studies of organization, procedures, administrative policy, records management, and accounting systems, as requested by any state agency or as determined by the director.

Program and Performance

Results of surveys are usually submitted to the requesting agency as a written report with recommendations for improvements. Over 100 surveys are made annually to find better ways to do the government's work.

DEPARTMENT OF FINANCE—Continued

ORGANIZATION AND COST CONTROL DIVISION—Continued

Program and Performance—Continued

In the field of accounting, the division prescribes the State's uniform accounting system based on studies of methods and procedures ranging from relatively simple accounting systems applications to large and complex automated data processing systems.

The division prepares and maintains the *State Administrative Manual* which serves as a reference source for policies, procedures, regulations, and information on management responsibilities.

It exercises the approval powers of the Department of Finance to fix and adjust salaries and establish class titles for certain positions exempt from the Civil Service System.

Some of its staff are assigned full time under contract to other state agencies to provide them management research and advisory services.

The staff of the Merit Award Board is also a part of this division. Employees' suggestions received by the board are processed for evaluation. Awards are given to employees for suggestions that are adopted.

One additional clerical position is provided to clear the backlog of work improvement suggestions and handle the increased number of merit award suggestions.

PLANNING OFFICE

Objectives

This office is responsible for the administration of Chapter 1.5, Title 7 of the Government Code which provides that the office will prepare, maintain and periodically revise a comprehensive state development plan; co-ordinate the public works programs undertaken by state, federal and local agencies; give planning assistance to local, district, and regional planning agencies and to other public agencies upon request; and undertake such other physical planning and co-ordination studies and activities as will implement the policies and intent of the Legislature.

Program and Performance

The State Development Plan is to be based on studies of physical, social, economic, and governmental factors, conditions and trends, and aimed at the co-ordinated physical development of the State. It will embody state policy regarding the State's physical growth and development and will include by discussion and agreement between the agencies involved, the projects and other improvement proposals of the departments and divisions of the State Government, the projects and improvements proposed by the Federal Government, and the major aspects of master or general plans of regional and local agencies of government. Upon approval by the Director of Finance and the Governor, the plan is to be transmitted to the Legislature for adoption in principle. A biennial report to the Legislature on the status of the plan is required.

The office is to ascertain from each state department, board or agency, from each local jurisdiction, and where possible, from federal agencies all proposed public improvements or projects which are, in its opinion, of statewide concern. The office is to encourage conferences between state and federal agencies contemplating projects within the State and the local planning agencies having jurisdiction over the territory in which such projects will be located. Whenever conflicts in proposed public works projects are determined to exist, the office is to notify the agencies concerned and recommend appropriate action to eliminate such conflicts.

The provision of local planning assistance is broad but in practice is largely confined to the administration of urban planning assistance grants made possible by Section 701 of the Federal Housing Act. Other assistance in terms of planning information from the library and procedural advice is provided local planning agencies.

The office encourages regional planning and, in accordance with the recommendations of the State Planning Advisory Committee, divides the State into regional planning districts.

DEPARTMENT OF FINANCE—Continued

PLANNING OFFICE—Continued

Program and Performance—Continued

The office also maintains a file of all plans and reports pertaining to the physical growth and development of the State and prepares an annual report on planning for distribution to state and local agencies.

The State Planning Advisory Committee provides advice and guidance to the office in the planning function. This committee is appointed by and serves at the pleasure of the Governor; however, appointments must be made from the ranks of local legislative, planning, and school officials.

A study commission on metropolitan area problems will make recommendations on proposed solutions to annexations and other matters resulting from rapid urban area population expansion.

PROPERTY ACQUISITION DIVISION

Objectives

The division is responsible for various real estate procurement, management, and disposal activities of the Department of Finance. It also functions as the overall secretariat of the Public Works Board of which the Director of Finance is chairman.

Program and Performance

Properties acquired by the State in anticipation of later building activity are managed by the division. When such property is needed for a construction project, the unit arranges for termination of tenancies and for the sale by bid or auction of improvements on the site.

Since the leasing operation was transferred from this division to Buildings and Grounds Division effective July 1, 1960, the primary duties now remaining involve land acquisition and disposal. Beginning July 1, 1960, this activity is to be financed on a reimbursable basis from the funds appropriated for acquisition. In this manner management can keep closer control over expenditures in relation to income. Workload standards are being developed in this area to assist in future projection of needs.

State-owned properties no longer needed are reported to the Legislature, and when authority to sell them has been obtained, the division supervises their sale and return to local tax rolls.

One clerical position and 1 land agent position are proposed to handle the sale of surplus real property on a reimburseable basis. Both positions were temporarily established for 1960-61.

PURCHASING DIVISION

Objectives

The State Purchasing Agent has sole authority to contract for the purchase of supplies for every state department, commission, board, institution, and official, with the exception of the State University. He is also responsible for efficient movement of state freight and the automotive management function.

Program and Performance

Bids are requested from dealers, jobbers, and manufacturers who are engaged in the various lines of business, and award is made to the lowest responsible bidder meeting minimum specifications, taking into consideration price, quality and fitness.

A program of quality control and standardization has been developed for materials purchased by the State which has permitted negotiation of contracts for many commodities purchased in quantity. Service to the many departments and institutions has been further improved by delegating authority to place direct orders for limited amounts, noncompetitive items, and emergency supplies, in addition to contract items.

Specifications are prepared and deliveries are carefully checked on all foodstuffs purchased for the patients at the state hospitals. Items purchased for the state agencies under standard specifications are checked at the Testing and Research Laboratory of the Division of Highways at Sacramento.

Stores are maintained in Sacramento, San Francisco, and Los Angeles, from which supplies are shipped to the various agencies of the State. These supplies are purchased in large quantities at advantageous times, thus assuring prompt deliveries of stocks when needed, and also giving the department the benefit of large wholesale purchases.

Control is exercised over type and number of automobiles purchased, and the use of state garage and parking facilities. Reports are received to assure state automobiles are used only for official business purposes. Permits to use privately owned automobiles on state business are issued by the division.

A traffic management office is established in this division to develop and conduct a central traffic management program to effect economies and efficiencies in the movement of state freight.

Two clerical positions are provided to bring the ratio of buyers to clerks up to the standard of 1 buyer to 2 clerks. A parking administrator position is provided to study and administer the parking problems of state employees.

The budget for the Purchasing Revolving Fund is shown in the Appendix.

GENERAL ANALYSIS

Objectives

This agency conducts the annual State Fair and Exposition and during the interim period makes full utilization of the grounds for other activities.

Program and Performance

The Agricultural Code directs that the State Fair Board, subject to the approval of the Department of Finance, shall "Provide for and manage an annual fair or exposition at Sacramento of the industry and industrial products of this State and of the commercial products exported and imported through the ports of this State." There is a 12-day fair held for this purpose in the latter part of August and the first part of September each year.

In addition, a Spring Festival will be held for 9 days in April under the combined auspices of the State Fair and the 52d District Agricultural Association. This Spring Festival will provide some exhibitors a much better opportunity to present their products for public inspection and will provide more entries for the horse show due to its less competitive timing in the spring. It is anticipated that this activity will be more than self-supporting due to the additional revenue derived from the use of the available facilities and personnel which constitute certain fixed charges in this budget.

Since the inception of the State Fair in 1854 there has been continuous growth. Economic interests represented include livestock, poultry, rabbits, dairy, and other agricultural products, floriculture, forestry and lumber, textiles, minerals and mining, the arts, home economics, junior division, horse show, rodeo, fashions, wines, horseracing, and many others. This fair portrays California as a whole and shows its economic, governmental, and social life and its relationship with the world.

The use of the fairgrounds for nonfair activities is growing and conventions, dances, roller rink, auto racing, cattle sales, winter quartering of racehorses, and storage use contribute to the fair's revenues and helps affect the maintenance and upkeep cost of the fairgrounds.

Admission revenues are estimated slightly higher for 1961-62 based upon increased adult attendance due to free admission for children through age 15.

Obsolete electrical and plumbing equipment will be replaced in addition to weather-damaged roofing and painting projects.

Paid advertising is restored to the level provided for the 1958 fair.

GENERAL ANALYSIS

Objectives

The Sixth District Agricultural Association is administered by a board of 9 directors appointed by the Governor. The association administers, maintains and operates facilities located in Exposition Park, including the California Museum of Science and Industry, the park land and roads adjacent thereto; the parking lots for the Los Angeles Memorial Coliseum Commission and the Los Angeles Memorial Sports Arena; and shares in the management of the 2 sports stadiums. The association was formed under the provisions of Chapter 69, Statutes of 1880.

Program and Performance

The California Museum of Science and Industry contains permanent exhibits and temporary special displays of the natural industries and industrial enterprises of the State. During the 1960-61 fiscal year, there will be approximately 22 temporary exhibits ranging in tenure from 5 days to 8 weeks. Commitments to date indicate that the temporary special exhibit program for the 1961-62 budget year will be equal or greater in scope. These temporary exhibits are sponsored jointly by state and private sources. The California Museum of Science and Industry has become the second largest museum of its kind in the nation. Using the concept of audience-participation educational exhibits, the museum has grown in popularity as demonstrated by the 830,032 visitors recorded during the 1959-60 fiscal year.

This represents an increase of 14 percent over the previous year. One million visitors are expected in 1961 of which over one-half will be school-age children.

A survey performed by the museum management revealed that 30.5 percent of the visitors come from the City of Los Angeles and 69.5 percent came from outside the city. Of the latter amount 47 percent are Californians, 35 percent are from other states and 18 percent are foreign visitors.

To keep abreast of the public demand for increased facilities, the museum has embarked upon a large-scale development program in accordance with the Exposition Park Master Plan. In late 1959 as the first step in this development program a 14,000 square foot outdoor exhibit courtyard was completed and placed into immediate use for the annual Christmas exhibit.

In the summer of 1960 a new science wing was completed adding 26,000 square feet of exhibit space. It will feature exhibits on physics, mathematics, electronics, health, chemistry and the mechanical arts. The first exhibit "Magic of Numbers," the story of mathematics, sponsored entirely by private industry was completed in late 1960 to officially dedicate the new wing. This wing provides much needed lecture classrooms to permit the museum to carry out its newly organized science education program. This program is sponsored jointly by the State and the California Museum Foundation, its non-profit auxiliary. Qualified guides conduct tours through exhibit halls for school and youth groups.

Plans are progressing rapidly on the Aviation Exhibit financed one-half by the industry and one-half by the State. Construction is expected to begin in the early part of 1961.

A new industry-sponsored exhibit is the "giant egg brooder," which is a 9 foot, 1,800 pound structure, containing a hatcher-brooder capable of hatching 140 eggs a day. This exhibit salutes the animal husbandry industry of California and is indicative of private industry's interest in the development of the museum.

In 1960 the association in conjunction with private industry began preliminary planning for the Space Age Museum. This branch of the Museum of Science and Industry is to be housed in the existing National Guard Armory, which is owned by the association. Private industry is providing the funds necessary for the planning and will assist in the development of suitable items for display.

The California Museum of Science and Industry was selected by the Atomic Energy Commission as the site for the first major permanent exhibit on the peaceful public uses of atomic energy to be financed by the Federal Government. The State will construct a building to house the exhibit in 1961.

Exposition Park, consisting of 104 acres owned by the association, is partly under lease to the Coliseum Commission (Los Angeles Coliseum and Sports Arena), the County of Los Angeles (Museum of Art, History and Science) and the City of Los Angeles (Swimming Stadium and Rose Garden); the remainder being under the immediate control and juridiction of the association. Each tenant shares in the cost of maintaining the grounds.

The association owns approximately 26 acres surrounding Exposition Park, which are operated as parking lots for patrons of the Coliseum, Sports Arena, Swimming Stadium and the museums. The lots were acquired and developed from funds advanced by the General Fund and the State Beach and Park Fund. These loans are being repaid with interest from receipts from the use of the parking lots. With the added facilities and the increase in use of the parking lots by patrons of the Sports Arena, there was a substantial increase in revenue during the 1959-60 fiscal year. Continued increase in revenue is expected during the 1960-61 fiscal year as a result of the advent of a new professional football team in the Coliseum, accelerated use of the Sports Arena and the savings to the State resulting from the association assuming the complete operation of the parking lots in lieu of the former arrangements with a concessionaire.

One exhibit designer position is proposed to keep up with the increased workload resulting from the expansion of the museum.

Three positions, temporarily established in 1960-61, are requested to handle the workload generated by the expansion of the association's parking operations.

GENERAL ANALYSIS

Regional agricultural societies first received financial assistance from the State in 1861. After the adoption of the new Constitution of 1879, the regional agricultural societies were succeeded by district agricultural associations authorized by the Legislature of 1880 as state agencies. Section 80 of the Agricultural Code fixes the boundaries of 51 agricultural districts. There are 50 districts organized and holding fairs in addition to the Sixth District which maintains a permanent exhibit in Los Angeles.

The 51st Agricultural District was abolished effective January 1, 1960 by Chapter 1733, Statutes of 1959. The remaining assets of the association were transferred to the Department of Finance for liquidation.

Each of the district agricultural associations is a state institution administered by a board of 9 directors appointed by the Governor. The organization and operation of district agricultural associations are governed by Sections 80 to 97 of the Agricultural Code. District agricultural associations are subject to the laws and administrative regulations which apply to state agencies generally and to specific rules and regulations which apply only to district agricultural associations or to district and county fairs. District fairs are conducted under budgets approved by the Department of Finance and the Audits Division of the Department of Finance audits the premium awards made at the fairs and makes post-audits as well.

Revenues received by the Sixth District Agricultural Association, Los Angeles, are deposited in a special fund in the State Treasury and this association operates out of this special fund under appropriations by the Legislature. This district does not receive an allocation under the provisions of Section 92 of the Agricultural Code.

The 1-A District Agricultural Association, San Francisco, receives an annual appropriation of $250,000 and the 48th District Agricultural Association, Los Angeles, receives an annual appropriation of $125,000 under the provisions of Section 19622 of the Business and Professions Code. Neither of these associations receives an allocation under the provisions of Section 92 of the Agricultural Code.

The remaining 48 district agricultural associations receive annual allocations on the basis of premiums paid at their respective fairs.

GENERAL ANALYSIS

Objectives

Administers policies established by the State Lands Commission in managing the public lands belonging to the State, consisting of school land; swamp and overflowed land; salt, marsh, tide and submerged lands; and other sovereign lands comprising approximately 3,500,000 acres. Principal revenue-producing function is the leasing of the public lands for the extraction of oil, gas, and other minerals.

The commission is composed of the Director of Finance, the Lieutenant Governor, and the Controller.

Program and Performance

The administration of state lands has increased in scope and value from the original activity of selling and leasing proprietary lands to the present expanded duties, which include oil, gas, mineral, grazing, agricultural, commercial and recreational leasing and leases for use and occupancy of swamp, overflowed, and tide and submerged lands.

Division 6 of the Public Resources Code authorizes the leasing of the State's tide and submerged lands for oil and gas production. Of 5 leases let during 1958 in Santa Barbara County, 1 has now been proven as the result of a productive well, slant-drilled from an upland site. Offshore drilling structures are in place or programed on 2 other leases. Active wells on production, located on leased tide and submerged lands in Orange, Ventura and Santa Barbara Counties, total 760, an increase of 42 during the past year. Revenues from this source averaged approximately $800,000 per month for the past fiscal year. Additional parcels are to be offered for lease during the 1960-61 and 1961-62 fiscal years.

Under the provisions of Chapter 29, Statutes of 1956, First Extraordinary Session, the commission accounts for the State's share of oil and gas revenues derived from tide and submerged lands granted to the City of Long Beach. This is a major program involving complex engineering, auditing, and legal problems. Revenues from this source for the past year totaled $5,093,818, a decrease of $3,595,720 as compared with the previous year. The decline in revenues is accounted for by the diversion of funds to pay the costs of an intensive program of water repressurization, designed to improve petroleum production and alleviate subsidence. Revenues from this source during the current and budget year are anticipated to remain constant.

Pursuant to Chapter 2000, Statutes of 1957, the commission directed the initiation of litigation against the City of Long Beach to fix the location of the boundaries of tide and submerged lands granted previously by the Legislature. An answer by the city is to be filed during 1960.

Sales of public lands (school and federal) reached an all-time high of $1,533,000 during 1959-60. Applications to purchase lands were received at the rate of 1 per day for every day in the year. A commission "withdrawal" (May 1960) placed a moratorium on further sales of these lands, pending applications excepted, until a study has been made respecting the possible use of the lands by other state agencies. A report to the commission on this subject is to be made during the current year. Land rental revenues of $185,000 were equivalent to those received during the previous year. The backlog of transactions for authorization of the use and occupancy of tide and submerged lands was 184 as of July 1, 1960.

The commission has an active caseload of 141 litigatory actions, 4 of which are major, and involve millions of dollars. Two of these are now quiescent. The Board of Supervisors of Orange County is presently exploring continuance of an action to obtain title to all offshore lands within the county. The lands involved contain the major portion of the oil and gas leases producing state oil revenues. Likewise, a federal action, *United States* vs. *Anchor Oil*, in which the United States is suing the City of Long Beach, the State, and numerous oil producers for claimed irreparable damages in the amount of $70 million to the Long Beach Naval Shipyard, is currently inactive, due to a federal request to take the case off calendar. Both of these cases may be revived in the near future. As has been reported, the State has entered an action against the City of Long Beach to settle the problem of the boundary of the city's granted tidelands. An appeal has been filed by the Attorney General in the case *People* vs. *City of Long Beach.* This action relates to the mineral rights in certain tide and submerged lands at Alamitos Bay quitclaimed to the State by the city.

One additional attorney position was authorized in the 1960-61 Governor's Budget and a second attorney together with a stenographic position are proposed in this budget for performing more of the noncourt legal work which can be done outside the Attorney General's Office. Reductions in pro rata charges for Attorney Generals' services during 1960-61 and 1961-62 more than offset the increased costs.

GENERAL ANALYSIS

Objectives

The Franchise Tax Board is composed of the State Controller, the Director of Finance, and the Chairman of the State Board of Equalization. It guides and reviews the overall operations of the department through an executive officer. The board receives all personal income, and bank and corporation franchise taxes, audits and assesses additional taxes where deficiencies occur, and collects delinquent taxes in accordance with the Bank and Corporation Tax Law and the Personal Income Tax Law.

Program and Performance

This budget anticipates a continuing upward trend in the number of returns filed and the overall workload of the department as indicated above. The large increase from 1958-59 to 1959-60 was due in a large part to changes in the law in 1959 and future increases are expected to be of more modest proportions. In addition to increases arising from the normal growth of the population and economy, the above estimates account for an estimated increase in delinquent filings due to the effect of a yearly Federal Comparison Project. The impact of increased filings is experienced in the Accounting Section of the Administration Division in the fiscal year of receipt, while such effect is not experienced in the Operations Division until the following fiscal year.

For the year 1960 a revised tab card short form return is being designed which will enable individuals to itemize their deductions on such form. It is anticipated that the revision will result in wide use of the form and lower handling costs.

As pointed out in the 1960-61 budget, the Federal Comparison Project is now on an annual basis. The revenues from the first annual program are currently being received and the program will obviously be a very profitable one.

The board presently is engaged in two data processing activities: The Operations Division's Ogden project, started in 1959, creates copies of federal punched cards at Ogden, Utah, for comparison with state returns, provides mailing lists, and enables mechanical addressing of return blanks.

The Administration Division computes the rate of tax applicable to banks and financial corporations.

In 1960-61, the use of data processing equipment is being extended to the accounting of personal income taxes receivable.

The addition of 11.2 man-years of temporary help will provide for handling the increase in filing and the increase in workload in the Information-at-Source Program and Federal Comparison Project.

FRANCHISE TAX BOARD—Continued

ADMINISTRATION DIVISION

Objectives

This division performs the cashiering and accounting, the statistical analysis, bank tax computation, legal functions, hearings on appeals by taxpayers from staff decisions, and special investigations as well as overall supervision of the activities of the board.

Program and Performance

The Accounting Section keeps the fiscal records for the agency, performs the cashiering function, maintains the corporate and individual taxes receivable ledgers, and performs the service and supply function. A total of 2.9 man-years of temporary help are proposed to handle the expected increase in workload.

The Statistical Section is responsible for computing annually the rate of tax applicable to banks and financial corporations.

In January of 1961, accounting of the personal income taxes receivable ledgers (615,000 accounts in 1959) is being converted to mechanized accounting on data processing machines. When conversion is completed it has been estimated that a savings of approximately $52,000 annually will result from this conversion. Six specialized positions are proposed and 28 existing positions will be abolished under this new procedure.

[a] Two positions approved on a temporary basis for 1960-61 for conversion to data processing.

FRANCHISE TAX BOARD—Continued

OPERATIONS DIVISION

Objectives

This division performs the line functions relative to the responsibilities of the board, including the clerical processing of tax returns and related reports, desk and field auditing of such returns, the administration of compliance programs to insure filing by those having a liability to do so, and the collection of delinquent taxes.

Program and Performance

The handling of returns includes review by the Preliminary Examination Unit of all corporation returns and selected portions of personal income tax returns. The review at this stage is primarily for the purpose of correcting errors in computation. Net assessments from this activity totaled $905,385 during 1959-60 of which $313,064 was from personal income tax work and $592,321 from bank and corporation tax work. In relation to cost the personal income tax recovery was $1.79 per dollar and the bank and corporation tax work was $8.90 per dollar.

The audit program includes both desk and field audit of returns, the type of audit work depending upon the needs of the particular situation. During 1959-60 personal income tax auditing produced $3.93 in net assessments for each dollar of cost, while bank and corporation tax auditing produced $15.52 for each dollar of cost.

Included in the bank and corporation tax audit program is out-of-state auditing performed by a staff of 28 auditors of which 14 are stationed in New York and 14 in Chicago. Each of these offices handles work within a radius of 1,000 miles of the offices. The program involves field auditing of larger corporate returns with primary emphasis upon proper application of the allocation formula to the corporate tax base. During 1959-60 these offices produced $2,724,126 in net revenue which was $9.20 for each dollar of cost.

Total net revenue from the audit program for 1959-60 was $23,862,099, of which $6,708,870 was from personal income tax auditing and $17,153,229 from bank and corporation tax auditing.

The personal income tax compliance program is carried out by the 599 Unit and the regional offices. The programs involve the comparison of reports of income payments with state filings. Where returns are not found, appropriate action is taken to obtain returns or issue assessments. The same procedure is followed in respect to the Federal Comparison Project. These programs produced net assessments of $3,446,797 during 1959-60 or $2.43 in assessments per dollar of cost. Costs were high in relation to revenues as to the Federal Comparison Project in this period as little of the revenue was received while a large portion of the cost was incurred in this particular year. Revenues will be high from the program in 1960-61.

The bank and corporation tax compliance program produced $151,601 during the year, recovering $10.19 for each dollar of cost.

A total of 8.3 man-years of temporary help is proposed for the headquarters office to keep pace with workload increases. The workload is based primarily on the number of returns received and number of information at source reports and Federal Comparison Project information documents received.

In addition to the headquarters office in Sacramento, the division maintains regional offices in Los Angeles and San Francisco and branch offices in the larger cities throughout the State. The branch offices are grouped under the regional offices.

GENERAL ANALYSIS

Objectives

The State Treasurer is charged with the responsibility for the custody of all money and securities belonging to or held in trust by the State; investment of surplus General Fund moneys, other designated surplus funds together with funds of the State and public agencies deposited in court under condemnation proceedings; administration of the sale of state bonds, their redemption, and interest payments; and pays warrants and checks drawn by the State Controller and state agencies.

Program and Performance

The Pooled Money Investment Program is administered by the State Treasurer under the broad policies set out by the Pooled Money Investment Board. Members of the board are the State Treasurer as chairman, the State Controller and the Director of Finance.

Earnings on pooled money investments for the fiscal year 1959-60 were $19,830,000. This increase of $3,459,000 over the 1958-59 fiscal year is the result of higher interest rates on short term government securities and the availability of additional funds from new tax measures.

Redemptions of warrants and checks issued by the State Controller and state agencies is estimated to increase from 3,903,204 in 1959-60 to 4,122,465 in 1960-61 and 4,305,695 in the 1961-62 fiscal year.

The Treasury Vault Staff is engaged in the trust activity of safeguarding those securities owned by the State, those deposited by banks to secure bank deposits, and those deposited as other pledges. Approximately $3,442,000,000 in securities were held for safekeeping during the 1959-60 fiscal year. This amount will increase to an estimated $3,722,000,000 in 1960-61 and $4,002,000,000 in the 1961-62 fiscal year.

Bond and coupon redemption is increasing to the point where additional staff is essential. The 3,517,638 bonds and coupons redeemed in 1959-60 is expected to increase to 4,050,560 in 1960-61 and 4,665,772 in 1961-62. To cope with this continuing expansion in volume, it is considered advisable to enlarge the Bond Servicing Section by establishing a branch in Los Angeles which would serve the dual purpose of servicing bond holders in this area as well as relieving the existing bond servicing staff. This service to bond holders, in answer to many appeals for assistance in reducing the rising cost of redeeming bonds and coupons could improve the State's position in the bond market. The advantage offered tax-wise to the prospective purchasers of state bonds can be materially affected by excessive costs of bond and coupon redemption. One assistant bond officer and 1 stenographer-clerk will be needed to staff this new office.

Increased workload of the administrative staff and the bond market research specialist will require 1 stenographer-clerk.

Negotiation of a new contract with the fiscal agent is in process. It can reasonably be assumed a new contract will be in force by February 1, 1961 which will result in an annual savings of approximately $44,000 per year based on the volume anticipated in 1961-62.

Sale of state bond issues will total $388,000,000 in 1960-61 and $392,000,000 in 1961-62. The cost of preparing and advertising these bonds for sale will total $172,000 in the current year and $161,000 in the budget year.

SCHEDULE OF BOND SALES

(Millions of Dollars)

Issue	*1959-60*	*1960-61*	*1961-62*

GENERAL ANALYSIS

Objectives

The California Highway Patrol is charged with the responsibility of providing adequate patrol of the highways at all times of the day and night for the prevention of accidents, control of traffic, and all laws regulating the operation of vehicles and the use of the highways.

Program and Performance

The department is headquartered in Sacramento and has 1 or more field offices in all but 3 of the State's 58 counties. Traffic in the 3 counties where no office is maintained is patrolled by resident officers. A fleet of approximately 1,600 mobile units operate in excess of 59,000,000 miles annually for patrol, enforcement of weight, height, length, brakes, lights of commercial vehicles, school bus inspection, school crossing guard supervision, removal of abandoned vehicles, supervision, service, administration, and training.

The Field Operations Division is responsible for attaining the objectives of the department and is supported by the Administration, Technical Services, and Training Divisions, all operating within policy established by the commissioner.

The Administration Division discharges the business affairs of the department; prepares the departmental budget; conducts studies to develop cost data; administers the personnel program; provides general file, messenger, and reproducing services; leases real property and co-ordinates capital outlay and maintenance projects; prepares specifications for and develops prototype mobile equipment; records data relative to mobile equipment operations; tests accessories and tires used on mobile equipment; maintains an inventory of all equipment; supplies all materials used from a central stores system; and supervises radio and wire communications.

The Technical Services Division determines the distribution of budgeted uniformed strength; co-ordinates disaster planning with the disaster office; prepares statistical data; develops and distributes radio and television programs, traffic safety information, and news releases; controls permits for emergency equipment; issues light and brake station licenses; tests accessories for compliance with state law; issues orders and bulletins, and analyzes new techniques.

A total of 24.8 positions are proposed for the 1961-62 fiscal year as follows: In the Division of Administration 1 budget analyst and 1 administrative analyst are included to strengthen budgetary and administrative procedures; 2 clerical positions, 1 automotive equipment installer, and 1 laborer are included on a workload basis; and 2 laborers are needed to provide manpower for the proper maintenance of the communications network.

The Division of Field Operations requires supporting staff totaling 11.8 positions for clerical, dispatch, and janitorial workload. An amount of $84,448 has been included for continued participation in the development of the State's microwave radio communications system.

Increases in the number of accidents and citations require 4 additional clerks in the Division of Technical Services.

The recently completed garage on the Academy grounds requires the services of 1 additional janitor.

GENERAL ANALYSIS

Objectives

It is the objective of this department to promote and develop the welfare of the wage earners of the State, improve their working conditions, and advance their opportunities for profitable employment.

Program and Performance

The department through its 8 line divisions, negotiates with parties in disputes when a work stoppage is threatened; adjudicates claims under the Workmen's Compensation Law; establishes, enforces and promotes standards of safety for all phases of industrial activity; enforces labor laws and issues and enforces orders relating to men, women and minors; promotes opportunities for apprentices; enforces laws relating to housing; and promotes fair employment practices. The Divisions of Administration and Labor Statistics and Research service the line divisions.

The downward trend in work injuries since 1956 was reversed in 1959 when disabling injuries increased 13.8 percent over 1958. Total employment increased 4.2 percent over 1958.

These injury and labor force trends account for an estimated 14 percent workload increase for the Industrial Accident Commission during the current and budget years.

Complaints regarding wages, hours, and employment conditions affecting industrial welfare and labor law enforcement workload is anticipated to increase over 7 percent over 1959-60 for the current and budget years.

The 1961-62 Budget provides for the following increases in personnel:

	Positions
1. Conciliation services	1
2. Industrial accident referee teams and related staff	18
3. Industrial safety inspections	8
4. Welfare and labor law complaint services	14.5
5. Fair employment complaint services	11
Total	52.5

DIVISION OF ADMINISTRATION

Objectives

To carry out the administration's policy and provide effective economical administration of the laws affecting this department.

Program and Performance

This division performs policy making, housing, procurement, accounting, personnel and duplicating functions of the department.

The efforts of the operating divisions are guided through formulation and administration of the budget.

Provision is made for increases in rent at locations where renewal of existing leases must be negotiated at higher rates or additional personnel in field offices necessitates additional space.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF CONCILIATION

Objectives

To promote sound union-management relationships.

Program and Performance

The Conciliation Service adjusts labor-management disputes through conciliation, mediation and arbitration procedures; referees the conduct of representation elections; prevents critical disputes and work stoppages through investigation; aids in the solution of labor problems which threaten curtailment of production or services; and also administers arbitration, election and grievance provisions of the Los Angeles Metropolitan Transit Authority Act and the Alameda-Contra Costa Transit District.

One conciliator position is included for the Fresno area to partially relieve the serious overload burden in this office, which serves labor disputes in the San Joaquin Valley. At present there is 1 conciliator stationed in Fresno. In 1959 there were 151 dispute cases closed in the San Joaquin Valley. This figure is more than double the average number of actual cases closed per conciliator, statewide. This caseload will continue to grow as a result of the resurgence of labor disputes in agriculture.

DIVISION OF INDUSTRIAL ACCIDENTS

Objectives

To obtain for the injured workman and his dependents with the least possible delay all the benefits they are entitled to by law.

Program and Performance

The Industrial Accident Commission in its judicial function is a court of limited jurisdiction to adjust litigated cases arising under the workmen's compensation laws. A staff of 70 referees assists the commission in deciding cases brought before it. Original decisions are made by the referees, except for a few special types of cases. If a party is dissatisfied with the referee's decision, he may then petition the commission or one of its panels for a reconsideration, or the commission itself, on its own motion, may grant a reconsideration. Following are the anticipated number of cases to be filed, disposed of, and pending:

Fiscal Year	Filings	Dispositions: Number of Referees	Dispositions: Rate of Disposition	Dispositions: Number Disposed	Cases Pending
Actual:					
1957-58	44,320	52	775		
		10	400	44,384	9,849
1958-59	49,436	52	800		
		10	650		
		5	450	50,458	8,827
1959-60	53,028	62	780		
		5	650	51,610	10,393

Fiscal Year	Filings	Dispositions: Number of Referees	Dispositions: Rate of Disposition	Dispositions: Number Disposed	Cases Pending
Estimated:					
1960-61	56,740	67	850		
		3	450	58,300	8,833
1961-62	60,712	67	850		
		3	650		
		4[a]	450	60,700	8,845

[a] Proposed new referees.

After considering a 7 percent estimated increase in filings for each of the current and budget years, expected annual production of the 70 authorized referee units and extent of anticipated pending and backlog figures, 4 additional referee units have been included in the 1961-62 fiscal year.

The rate of production per referee unit is expected to continue to improve primarily due to the pretrial method of handling selected cases and the decentralization of personnel and workload, resulting in reduced travel time for referees and hearing reporters.

DIVISION OF INDUSTRIAL SAFETY

Objectives

The primary purpose of this division is to reduce work injuries in employment and places of employment.

Program and Performance

The Division has jurisdiction over all employments—except for household domestics, federal employees, operating employees of interstate railroads, and seamen—and it covers some 400,000 places of employment in such industries as agriculture, construction, mineral extraction, manufacturing, trades, services, transportation, and utilities. The Division promulgates, after public hearings, standards of safety for all employments and conducts educational programs, including the preparation and distribution of educational materials. Additional Safety Orders for the control of ionizing radiation, and new Safety Orders for noise control are now in process.

Because legislation passed in 1959 required this Division to accelerate its program in radiation safety, additional programs were developed for the purpose of reducing injuries in those industries where there is exposure to ionizing radiation. The Division now has three District Engineers giving full time to this program.

After several years of gradual reductions, the work injury rate in California dropped from 32.4 per 100,000 in 1957 to 32 in 1958. However, in 1959 total disabling injuries increased from 144,366 to 164,243, an increase in work injury rate of 6 percent, or 34 per 1,000 workers.

Employment during 1959 was up 4.2 percent over the previous year. During the first 8 months of 1960 injuries were down 1.5 percent or a total of 107,485 as compared with 109,126 for the same period in 1959. Employment during the first 8 months of 1960 increased 4.1 percent over 1959.

For the 1961-62 fiscal year the addition of 4 Safety Engineers and 3 intermediate typist positions are proposed for the increased safety engineering workload on major construction projects and the inspection of pressure vessels as required by law. One additional Industrial Hygiene Engineer for the Southern California area is included as a result of the increased use of industrial chemicals including agricultural pesticides.

DIVISION OF INDUSTRIAL WELFARE

Objectives

Administration and enforcement of the minimum wage and labor standards for women and minors.

Program and Performance

Jurisdiction of the Division of Industrial Welfare extends to the administration and enforcement of all laws and regulations for women and minors which control their minimum wage, maximum hours, and standard conditions of labor as prescribed by the Labor Code and the administrative regulations adopted by the Industrial Welfare Commission. With the adoption of an Industrial Welfare Commission order for agricultural occupations in 1961 all employments of women and minors will be covered except domestic service. Thirty-eight thousand commercial farm employers will be added to the division's workload with the adoption of the agricultural occupations order.

The division is directed by statute to adjust minimum wage underpayments for all women and minors in addition to the individual complainant. The hours regulations require payment of premium rates for overtime based on the regular rate of pay which must be adjusted for all women employees where a violation is found. In addition to enforcing the many provisions which regulate all working conditions, the division must license and regulate industrial homework; license and regulate the employment of handicapped women and minors at special wage rates; process defense production permits and enforce the terms of these permits; issue special exemptions from the Industrial Welfare Commission regulations and enforce the equal pay law for women.

During the 1959-60 fiscal year the division adjusted 9,149 complaints, whereas 9,575 complaints were registered. The backlog now totals 6,283 complaints. One hundred seventy-seven thousand seven hundred ninety-three dollars was collected, representing minimum wage underpayments and penalty overtime pay. One hundred sixty-nine homework licenses were issued to employers and 906 permits to individual homeworkers. One thousand nine hundred ninety-nine special minimum wage permits and 115 exemption permits were processed and issued.

In the 1959-60 fiscal year complaint cases were opened against .015 percent of the total number of employers with 2.1 complaints registered against each establishment. Application of this percentage to the 38,000 commercial farm employers to be covered in 1961 results in an estimate of 1,197 additional complaints.

To meet workload increases, the 1961-62 budget provides for the addition of 2 industrial welfare agents, 1 senior stenographer clerk and 2 intermediate stenographer-clerks.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF LABOR LAW ENFORCEMENT

Objectives

To protect the rights of the employee under provisions of the Labor Code.

Program and Performance

This division has the responsibility for administering and enforcing all labor laws not specifically delegated to any other agency. The greater part of its work consists of the enforcement of wage payment laws, including collection of unpaid wages; child labor laws; laws relating to employer contributions to health and welfare funds; laws providing for payment of prevailing wages and overtime on public works; the compulsory workmen's compensation insurance law; bonding of employers in certain industries and laws restricting the hours of work in special occupations. Also comprising a major portion of the division's workload are duties relative to the licensing and regulating of private employment agencies, labor contractors and artists' managers; of farm labor contractors and of unloaders of farm produce in urban centers.

Complaints and controversies received by the division in the 1959-60 fiscal year reflected an increase of 10 percent over the previous year. Wage complaints in 1959-60 increased 13 percent over the year before, while the amount of wages recovered for California workers rose to a new high of $2,399,300.

It should be pointed out that over the past 2 decades, new legislation and new patterns in employer-employee relationships have made the work of the division more complex and time-consuming. Attorneys, personnel specialists, or labor relations experts now frequently attend hearings held by the division, and trends in labor-management relations indicate that this will be more and more the case. There are more and more claims from white-collared workers, who seldom bring to the division simple problems. With this, there has been a change in the type of issue and the type of representation. A large number of claims are for "fringe benefits," such as vacation pay, severance pay, and health and welfare claims. A great many claims involve payment of commissions and bonuses. Such cases are more complicated than those dealing with disputes over hourly and daily wages; and they involve more subtle issues. These changes in the composition of the work forces and in the character of industrial relations have been reflected in the workload of the deputy labor commissioners.

The workload is rising at an accelerated rate with the continuing population growth of California, aggravated by economic shifts. The area where there has been a drop in employment brings greater activity to the division because of the increased difficulties of meeting payrolls, while those areas in which the economy burgeons bring the problems inherent in change and growth. Projecting the workload conservatively, the division anticipates an average increase of 8 percent for the next 2 fiscal years.

On this basis, the caseload anticipated by the division is estimated at 47,951 for the 1960-61 fiscal year and 51,787 for 1961-62. The statewide average caseload for 1958-59 was 838 per deputy and 986 for 1959-60. To provide for increased workload, 3 deputy labor commissioners, 2 special investigators, and 4.5 clerical positions have been included in the 1961-62 Budget.

DIVISION OF APPRENTICESHIP STANDARDS

Objectives

Promotion and development of apprentice training and administration of the Apprentice Labor Standards Act.

Program and Performance

The division provides consultative services to employers and employees in the development and maintenance of apprentice training programs, advising and assisting management and labor in drawing up written apprenticeship standards and agreements for approval under the regulations of the California Apprenticeship Council.

Since the training of apprentices in California is voluntary on the part of employers and employees and their organizations, it is the division's function and responsibility to assist these groups in promoting and improving apprenticeship programs to meet the urgent needs of the State's growing industries for skilled craftsmen and to expand the apprenticeship opportunities for the increasing number of youth seeking careers in the skilled trades.

DIVISION OF HOUSING

Objectives

Administration and enforcement of state housing laws and related regulations.

Program and Performance

In addition to its enforcement responsibilities, the division furnishes consultative assistance to local officials, architects, builders, and interested groups in the enactment and enforcement of local building codes, investigation of substandard housing conditions, and organization of local housing rehabilitation and urban renewal programs.

The 1961-62 program provides for: inspection and reinspection coverage of approximately 8,000 labor camps of record, construction supervision under provisions of the Earthquake Protection Law and State Housing Act in counties having no local enforcement agency, and construction supervision and minimum maintenance inspections of auto courts, motels, and trailer parks.

Additional effort will be directed toward enforcement of plumbing, electrical, and heating standards and issuance of insignia of approval, applicable to all trailer coaches sold in California manufactured after September 1, 1958, in accordance with Section 18370, Health and Safety Code. Costs of this program are reimbursed by fees charged manufacturers and sales agencies for services.

There will also be increased efforts toward adoption and enforcement of city and county building codes and trailer park ordinances. As of January 1959, 30 of the 58 counties have building codes and 18 cities and 3 counties have adopted comparable trailer park ordinances.

DIVISION OF LABOR STATISTICS AND RESEARCH

Objectives

The Division of Labor Statistics and Research has legal responsibility for compiling labor statistics for the State of California and administrative statistics for the department.

Program and Performance

The division compiles and publishes monthly statistics of employment, earnings, and hours, by industry, for California and 9 major metropolitan areas and, in co-operation with the Department of Employment, prepares monthly estimates of civilian employment and unemployment in the state. Employment, earnings, and hours statistics for nonagricultural industries are collected under a co-operative program with the United States Department of Labor, Bureau of Labor Statistics. The division compiles statistics of work injuries to provide information for use in accident prevention work—to make known how, where, and why accidents occur. It makes studies and investigations in the field of industrial relations; also studies of wages and hours in industries employing women for minimum wage determination. In connection with the legal responsibility of the Department of Industrial Relations to monitor the payment of prevailing wages on public works, the division has responsibility for maintaining a file of current wage rates for all building trades occupations in all counties in the State. Administrative statistics are compiled regularly for the department.

Increases in the population and labor force of California have substantially increased the workload of the division. Furthermore, as the volume of work of the department increases, the workload of this division increases in connection with the compiling of their administrative statistics and the performing of operating services. Much of this additional load has been carried on through greater utilization of punchcard and tabulating machine techniques.

DIVISION OF FAIR EMPLOYMENT PRACTICES

Objectives

To protect, safeguard, and promote the right and opportunity of all persons to seek, obtain, hold, and advance in employment without discrimination or abridgment on account of race, religious creed, color, national origin, or ancestry.

Program and Performance

The Fair Employment Practice Commission, created effective September 1959, consists of 5 members appointed by the Governor for 4-year terms. The commission's program includes education, conciliation, and enforcement activities. The commission formulates broad policy and program; sits as a hearing panel for cases of alleged job discrimination in which remedies are not effected through conference and conciliation; issues orders; and seeks enforcement thereof when necessary. The commission is generally charged with responsibility for studying problems of discrimination, fostering good will and co-operation among the State's various ethnic, religious, and other population groups, and seeking through educational means to minimize discrimination because of color, creed, or ancestry.

The division staff, located in San Francisco and Los Angeles—with provision for small field offices in Fresno and San Diego effective July 1, 1961—provides essential services to carry out the commission's general program and assists individual commissioners in the investigation, conciliation, and settlement of specific complaints of violations of the act. Seven consultants are provided to help meet the agency's minimum statutory obligation with respect to caseload. Four clerical positions are provided to service this caseload and sharply increased general administrative and information demands.

The indicated staff increase is required for service to all areas of the State irrespective of the establishment of the field offices provided for herein. This is the second full year of the division's operation.

GENERAL ANALYSIS

Objectives

The principal function of the State Fire Marshal is fire prevention and protection.

Program and Performance

A co-ordinated program for administering state fire safety laws, rules and regulations has been established between the office of the State Fire Marshal and local city, county, and district fire officials. This co-ordinated program was made possible by the creation of the State Fire Advisory Board in 1945. The State Fire Marshal, with the assistance of this board, develops fire safety standards and administers and enforces these standards. Through the board, it has been possible to develop uniform statewide standards of fire safety and provide for their administration and enforcement without creating overlapping authority and duplication of effort, and at the same time preserve local autonomy. It is the general policy of the Fire Marshal to administer laws and regulations on a consultative basis rather than by direct enforcement.

The Fire Marshal's program includes: general fire prevention work; inspection of hospitals, schools, public assemblies, fairs, and state institutions; and enforcement of laws pertaining to fireworks, flammable materials, explosives, and transportation of radioactive materials.

Fire prevention and inspection work covers such matters as the height, area, and fire resistiveness of buildings for different types of occupancy; adequacy of exits; fire alarm and fire extinguishing equipment; availability of water supply for fire control; and fire hazards related to different types of occupancy. Reports are issued listing corrections, alterations, and additional protection needed to meet minimum standards. The Fire Marshal also operates a laboratory to test various materials in order to set fire safety standards.

The 1961-62 program anticipates concentration of effort in those areas of enforcement where the greatest potential hazards to life exist.

GENERAL ANALYSIS

Objectives

The Department of Justice, under the direction of the Attorney General, is the senior law office of the State. The department is responsible for interpreting laws, rendering opinions, and representing the State in civil and criminal proceedings. To assist in law enforcement, the department maintains a fingerprint file for identification purposes, compiles statistics pertaining to crime, assists peace officers in civil and criminal investigations, and participates in direct enforcement in use, possession, and sale of narcotics.

Program and Performance

Under the direction of the Attorney General, the Department of Justice provides legal advice and assistance to the various state departments, boards and commissions. The department passes on the constitutionality of each law passed by the Legislature for the final consideration of the Governor, and represents the State on all criminal matters before the Appellate and Supreme Courts. Another important function is the identification of criminals through current fingerprint and criminal record files, and by related technical aid and assistance to local agencies. Closely allied with this service is the co-ordination of requests from local enforcement agencies, and assistance in the location of deserting parents.

The State Narcotcis Act is enforced through offices located in San Francisco, Fresno, Sacramento, Los Angeles, and San Diego. Agents operating from these offices investigate known and suspected persons for illegal possession, use, and sale of narcotics. Prosecution of violators is accomplished through the district attorney in each county.

During the budget year, new positions include 12 legal positions and 8 stenographers to provide adequate representation on civil and criminal cases, and an additional 2 attorneys, 1 agent and 1 stenographer are proposed to intensify state efforts to eliminate illegal trade practices. One law indexer is included for the Division of Civil Law to compile and co-ordinate all opinions issued at the local and state level. Two clerks are extended through June 30, 1962, in the Bureau of Criminal Statistics for the development of narcotic addiction statistics, and 1 clerk is included for the development of criminal career information.

Also 3 investigators, 2 criminologists and 1 clerk are provided for the Bureau of Criminal Identification and Investigation as a result of increased requests for specialized crime detection assistance to local jurisdictions. The criminologist positions will be fully reimbursable as a result of the establishment of a schedule of fees.

Provision is made in the 1960-61 and 1961-62 fiscal years for the relocation of the Bureau of Criminal Identification and Investigation and the headquarters of the Bureau of Narcotic Enforcement in Sacramento. Continued increases in all aspects of criminal records have made the present location of the Bureau of Criminal Identification and Investigation unsuitable. This is an interim measure pending completion of the new Department of Motor Vehicles headquarters building at which time this bureau will occupy 1 floor of the present motor vehicle headquarters structure.

DIVISION OF GENERAL ADMINISTRATION

Objectives

This division carries out the administrative responsibilities of the Attorney General, maintains the general services necessary to the operating divisions of the department and operates the State Teletype System.

Program and Performance

Through the Accounting Office, the Division of General Administration maintains fiscal control and internal management, budget preparation, purchasing, and personnel administration. The State Teletype System is a communication service primarily for police offices with secondary use by government agencies. Departmental control centers are located in Sacramento, Los Angeles and San Francisco.

A total of 9 additional stenographers are included to provide clerical service for the 14 additional attorneys provided elsewhere in the budget.

DIVISION OF CIVIL LAW

Objectives

This division is responsible for handling the civil and administrative legal problems of state departments, boards and commissions.

Program and Performance

Attorneys operating out of San Francisco, Los Angeles, and Sacramento, represent the State of California in federal and state courts at all levels and represent officers, boards and commissions before administrative tribunals.

Nine additional deputies attorney general are provided to sustain the level of service experienced in the 1959-60 fiscal year. Civil cases showed a marked increase in 1959-60 and similar increases are expected in the budget year. One law indexer is included to compile and co-ordinate all opinions issued at the local and state level.

DIVISION OF CRIMINAL LAW AND ENFORCEMENT

Objectives

This division insures criminal justice in California through periodic meetings with local law enforcement agencies. Prosecution is assumed when local enforcement is negated.

Program and Performance

The legal staff of this division represents the State on all criminal proceedings when appealed from trial courts, prepares documents for extradition of fugitives, and processes forfeiture of vehicles for violation of State Narcotics Act. The compilation of crime statistics is a responsibility of this division. This is accomplished by the Bureau of Criminal Statistics located in Sacramento which maintains detailed statistics of all crimes committed in California, records of turnover rate of prisoners, and juvenile delinquency figures. A new program was instituted during 1959-60 to include a reporting system for narcotic violations.

This division functions as a clearing house for information concerning criminals and as a source of technical aid and assistance in the investigation of crime and the apprehension of criminals. Fingerprint files are maintained on a 24-hour basis to provide maximum service to local police jurisdictions. A laboratory and a staff of qualified technicians including specialists in the operation of the polygraph provide assistance to local agencies and other state agencies when requested.

Special training is given local law enforcement personnel in the aspects of narcotic enforcement. Specially trained inspectors, operating under cover, contact known informers and purchase evidence or information leading to the arrest of narcotic users and suppliers. Pharmacist inspectors insure the legitimate use of drugs by professional people.

For the budget year in the Bureau of Criminal Law, 3 attorneys are proposed to provide proper staffing for the increased workload of the division and 2 attorneys and 1 agent are included to assist in the elimination of illegal trade practices. Two clerks are extended through June 30, 1962, in the Bureau of Criminal Statistics for the development of narcotics addiction data. These positions are currently financed from the appropriation made by Chapter 2129, Statutes of 1959. One clerk is included for the development of criminal career information.

Also, 3 investigators, 2 criminologists and 1 clerk are provided for the Bureau of Criminal Identification and Investigation to meet increased workload in the area of specialized crime detection with the cost of the criminologists being fully reimbursable from state and local jurisdictions. Provision is also made for the relocation of the Bureau of Criminal Identification and Investigation and the headquarters of the Bureau of Narcotic Enforcement.

SERVICES RENDERED COLORADO RIVER BOARD

Legal action in the suit, Arizona v. California before the United States Supreme Court has required intensive legal service and engineering studies and research since the initial step in the long legal process was taken by the State of Arizona in August 1952.

The report of the Special Master appointed by the Supreme Court to adjudicate the dispute has been filed and its recommendations to that body are unfavorable to the State of California. This budget contemplates a continuation of appeal procedures, diminishing in the budget year.

This suit has involved both the Department of Justice and the Colorado River Board.

A more detailed statement of the related program is shown in the budget of the Colorado River Board.

FEES TO SPECIAL COUNSEL EMPLOYED PURSUANT TO SECTION 12520, GOVERNMENT CODE

These special counsels provide for making investigations for discovery and recovery of property to which the State may be entitled by escheat and to conduct criminal prosecutions in counties where the district attorney is disqualified to conduct the prosecution.

No change is anticipated from the current year.

FEDERAL POWER COMMISSION PROCEEDINGS

Actual past year expenditures are related to participation by the Department of Justice in natural gas rate proceedings before the Federal Power Commission on behalf of the California consumer. In the current and budget years, full responsibility for this program rests with the Public Utilities Commission and its expanded staff of engineers and attorneys.

COMMISSION ON PEACE OFFICERS' STANDARDS AND TRAINING—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	

GENERAL ANALYSIS

Objectives

The Commission on Peace Officers' Standards and Training is charged with the responsibility of raising and maintaining the level of competence of local law enforcement officers.

Program and Performance

This commission was established in the 1959-60 fiscal year in accordance with the provisions of Chapter 1823, Statutes of 1959. The commission is composed of 9 members appointed by the Governor for 3-year terms. Five are either sheriffs or chiefs of police or peace officers nominated by their respective sheriffs or chiefs of police, 2 are elected officers or chief administrative officers of cities in this State, 2 are elected officers or chief administrative officers of counties of this State, and the Attorney General, who serves as an ex officio member of the commission.

This commission adopts rules establishing minimum standards relating to physical, mental, and moral fitness, which govern the recruitment of any city or county police officers for any city or county which receives state aid through the provisions of Chapter 1823, Statutes of 1959. It also establishes rules governing the training of police officers with the same conditions prevailing. An assistant executive secretary is proposed to relieve the executive secretary of much of the travel required of his position so that he might devote more time to his administrative responsibilities.

PART I—CONTINUING OPERATIONS

Objectives

The objectives of the Department of Mental Hygiene are to care for, treat and rehabilitate mentally ill, mentally retarded, and emotionally maladjusted patients so that they may return to society as productive citizens, and to prevent mental illness through an active program to foster mental health.

Program and Performance

The present Department of Mental Hygiene was established as a separate entity in 1945, and since then has developed a diversified program of care and treatment, research and training, and mental health education. The program that today provides treatment specifically designed for the clinic patient, the mentally retarded patient, and the mentally ill patient is one that has been a gradual development in which the old custodial concept has been abandoned.

Two institutes are operated by the department in conjunction with the University of California as teaching and research centers for both the university and the department and provide care and treatment for patients with early curable types of mental disorders. To carry out such a program, they care for and treat a limited number of inpatients and operate a large outpatient program as part of the teaching and research programs.

In the 4 hospitals for the mentally retarded, the program is based on the knowledge that mental retardation alone does not produce a socially unacceptable person, and that many of the mentally handicapped can be integrated into society. With treatment, habit and character training in this controlled environment, the patient develops to the fullest his intellectual capacities, and many are capable of returning to their homes and communities as self-supporting, or partially self-supporting citizens.

The treatment programs in the 10 hospitals for the mentally ill show a marked emphasis on active therapy, bringing more treatment to more patients. In modern treatment units, newly admitted acutely ill patients are provided the intensive treatment most effective during the onset of mental illness. Increasingly, active therapy has reached all wards.

Juvenile units at Camarillo and Napa State Hospitals provide the special type of care needed by children suffering from mental disease or severe behavior disorders. They also operate as facilities for observation and treatment requested by the State's juvenile courts or Youth Authority.

Special treatment and facilities for tuberculous patients, as well as special treatment for alcoholics and drug addicts are also provided in the hospitals. Patton State Hospital has been designated as the special tuberculosis center for Southern California, and Napa for Northern California. Alcoholics and narcotics addicts are provided special treatment throughout the hospitals for the mentally ill. Great care is taken to correctly diagnose both these types of patients since their difficulty is frequently symptomatic of some more deep-seated disorder.

Special treatment for the rehabilitation of sexual psychopaths is provided at Atascadero State Hospital. Persons diagnosed as criminally insane are also committed to this maximum security hospital. Some of the patients at Atascadero are commited for observation by the courts.

The department's new continuous research program has developed rapidly. Thus far, state appropriations have amounted to $2,504,000 and these have been supplemented by more than $2,000,000 in federal funds granted by the National Institute of Mental Health. The state allocation for research, recognized as part of the "efficient start" originally recommended to the Legislature, is being divided equally between hospital level and project support phases to insure a comprehensive program that includes both applied and basic research. A research team at each of the hospitals is the ultimate goal with 8 teams having been formed thus far. All hospital research teams carry out their own research projects in the hospital and assist other staff members with their investigations. The balance of the funds are used to support research investigations undertaken by departmental, hospital, and clinic staff personnel.

The beneficial results of the department's public information program continued to be apparent in growing public interest in the field of mental health. The educational program uses almost every communication medium: newspapers, television, speakers, films, public meetings and forums, exhibits, pamphlets, magazine articles, publications, and reports. The section also acts in an advisory capacity to community groups when requested.

One of the most important recent developments in the mental health program is the establishing of 19 programs of community mental health services under the provisions of the Short-Doyle Act. Under the act, cities and counties can set up local programs with practical assistance from the state that includes reimbursement on a matching basis for local money expended. Ultimately, these local mental health services are expected to prevent large numbers of citizens from ever having to leave their home communities because of mental illness or handicap.

The financial soundness of these philosophies and programs was illustrated when the number of mentally ill patients treated and released increased to a point of balance with admissions. The end of fiscal 1957 saw the first small but significant drop in patient population in the hospitals for the mentally ill. This occurred despite the increasing rate of general population in the state, and increasing admissions to the hospitals, and this same balance between admissions and releases has been estimated to continue in the 1960-61 and 1961-62 fiscal years. The admissions and release factors are a measure of the total performance of the department and are set forth in tabular form as follows:

DEPARTMENT OF MENTAL HYGIENE—Continued

PART I—CONTINUING OPERATIONS—Continued

MENTALLY ILL HOSPITAL POPULATION MOVEMENTS BY FISCAL YEAR

	1953-1954	1954-55	1955-56	1956-57	1957-58	1958-59	1959-60	Estimated 1960-61	Estimated 1961-62

Net resident increase	808	750	—246	162	—22	474	—763	127	[c] —556

The all-out modern attack on mental illness is made on 4 basic fronts—treatment, training, research and prevention. By far the greater part of past increases in the department budget, that is, increases other than those necessary just to keep up with state population growth, have of necessity gone into improving the treatment program, essentially by providing additional numbers of physicians, therapists, social workers, nurses, technicians and psychologists, food personnel and others. In the 1958-59 fiscal year the financial position of the State indicated that available moneys could be more wisely expended on the other 3 methods of attacking the problem—research, training, and community development of mental hygiene resources. These 3 areas were again emphasized in the 1959-60 and 1960-61 Budgets. The 1961-62 Budget proposes to continue the emphasis in these areas through the department's 4-Point Program:

1. Sharing the load of increased services through stimulation and consultation to nongovernmental agencies
2. Increasing the efficiency of current operations
3. Expanding pre- and post-hospital services
4. Sharpening the tools through more training for personnel, greater advancement of scientific knowledge, by research, and a more adequate physical plant through construction and remodeling.

PART II—PROGRAM AUGMENTATIONS AND COSTS

The supplemental program of the Department of Mental Hygiene for 1961-62 envisions the further development of community oriented activities in an attempt to lower the number of admissions to the state mental hospitals and to lower the rate of returns to state hospitals by previously hospitalized individuals. To implement this continued development, the Department is programming for 2 additional day treatment centers to be located in Los Angeles and San Francisco, for the primary purpose of reducing admissions to mental hospitals. Fifteen convalescent leave psychiatrists will be stationed at the field offices of the Bureau of Social Work, and under the supervisory direction of the hospital after-care services, to provide psychiatric direction to the 11,400 patients on convalescent leave from the hospitals. Two after-care clinics, to be located at the Agnews and Napa State Hospitals, will continue the growth of this program which is provided for the purpose of giving relatively intensive psychiatric care and treatment to convalescent leave patients who live within commuting distance to the hospital clinic. This program will allow for the release of patients who would otherwise have to remain in the hospital, and will prevent the readmission of many patients who otherwise have to return to the hospital because of the severity of their illness.

The research program will add sociological research and study the social and environmental factors in the development of mental illness, the need for hospitalization and the significant social factors in rehabilitation. The training program will continue the development of psychiatric residency training at the neuropsychiatric institutes and the state hospitals approved for such training. This year sees the introduction of the career residency program for certain selected staff physicians who have indicated a desire to make a career of state medicine and who demonstrate the ability and potential for psychiatric specialization. They will be given the opportunity for formal training under a plan which requires them to remain with the State for a minimum period of eight years.

Increasing assistance to various local agencies and municipalities to develop psychiatric services and to identify and evaluate for disposition various psychiatric disorders will be offered through the addition of four community service workers.

A more effective program can be developed through increasing the quality of personnel with the assistance of advanced training programs, increased knowledge through research, competitive salaries, and other progressive personnel practices. Some administrative strengthening for the purpose of tightening existing operations and directing new and expanded programs will assist in increasing the efficiency of the operation.

Special Services for Mentally Retarded

There are at present approximately 1,600 patients on the waiting list for admission to a state hospital for the retarded. The waiting list for admissions to a state hospital represents a need by retarded children and their families for immediate assistance with a critical problem. It cannot be ignored or allowed to continue. To do so is to increase the stresses and disorganizing effects on families less able to grapple with additional problems. In addition, such pressure is also directed toward the construction of more and more hospital beds.

During the last 10 years several promising, less expensive, and more therapeutic alternatives for reducing the waiting list and avoiding hospitalization have been developed and tried out. This fact plus the fact that many parents prefer to keep their children at home if they can obtain some help from State and local agencies make imperative the use and further development of these alternatives for the economy of the State and the health and welfare of its citizens. These alternatives are:

1. The use of private medical facilities for immediate reduction of waiting list
2. Family care home placements for patients to reduce need for hospital beds and to maximize physical and mental development of patients
3. Increased staff of professional community organization specialists to promote and develop increased local services for families, thereby encouraging increased use of community services and decreased pressure for hospital beds
4. Enriched educational program to promote greater vocational and educational competency and independence on the part of many retarded children now in state hospitals
5. Extension of some form of the Short-Doyle Act to the retarded
6. Expansion of the Point 2 Program of the Department of Education
7. Day care centers through the Department of Education
8. Sheltered workshops
9. A research and training institute in the field of mental retardation.

The record shows that the improved and increased services in the above-mentioned categories can do much to reduce the waiting list and the pressure to continue to build large state facilities for the retarded. Therefore, in this budget, the department is proposing the use of private institutions, an expanded family care program, an extension of the informational center program, and more teachers in the hospitals for the retarded.

DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—PROGRAM AUGMENTATIONS AND COSTS—Continued

Recapitulation

The kind of program that is developed profoundly affects the projected building construction. Since 1950 the rate of hospitalization for the mentally ill has declined from 303 per one hundred thousand to 232 per one hundred thousand as a result of program strengthening. With vision, foresight and strategic placement of energies the necessity for additional beds for the mentally ill can be avoided in spite of the rapidly increasing population. Through continuing substantial strengthening of the support program, it is believed that by 1968 the hospitalization rate for the mentally ill will decline to 180 per one hundred thousand. If this is achieved, there will be no need for the construction of another hospital bed for the mentally ill before 1968. It will be necessary, however, to remodel or replace some existing facilities and provide for some additional service facilities. On the other hand, if the program is not permitted to develop and the hospitalization rate for the mentally ill remains at 232 per hundred thousand, 11,000 additional beds will be required by 1968, at a cost of $148 million or $13,500 (Porterville cost) or more per bed. This will mean an additional $30 million in support. If a moderate policy is followed, allowing for only slight increases of service here and there, the probability is that several thousand additional beds will be required.

This supplemental program is consolidated in the following 8 categories.

I	Administrative Strengthening	$192,016
II	Research	105,000
III	Training	221,330
IV	Pre-hospital Services	353,645
V	Post-hospital Services	504,208
VI	Hospital Services	2,072,632
VII	Special Services for Mentally Retarded	551,550
VIII	Salary Increases—psychiatric technicians	2,231,000
	Total	$6,231,381
	Estimated salary savings	*—215,000*
	Contributions to State Employees' Retirement Fund	395,010
	Total Expenditures	$6,411,391

In addition to the above mental hygiene program, the 1961-62 Budget for the Department of Education proposes $110,000 for a new program to provide vocational rehabilitation services to patients under the care of the Department of Mental Hygiene. This will provide for 7 new vocational rehabilitation counselors and 5 clerical positions.

SUMMARY OF PROGRAM AUGMENTATIONS AND COSTS

Additional personnel for workload changes (51)	$417,675
Additional personnel for diagnosis and treatment to improve level of service (30)	181,846
Special services for mentally retarded (37.5)	451,550
Expansion of family care services (excludes mentally retarded)	85,220
Payment for patient care in private facilities	100,000
Additional personnel for training program (47)	221,330
Additional personnel for administrative strengthening (7)	76,725
Additional after-care facilities (16)	140,067
Expansion of convalescent leave program (15)	207,000
Additional day treatment centers	300,000
Increase in research program	105,000
Additional personnel for improved services for central office and out-patient clinics (27)	197,336
Additional personnel for improved hospital services (67)	356,501
Additional personnel for ward reclassifications (583)	913,132
Additional personnel to improve surgery, clinic, and supply services (99)	216,999
Increased medical care (cancer treatment)	30,000
Salary increase for psychiatric technician series of positions	2,231,000
TOTAL	$6,231,381
Less Estimated Salary Savings	*—215,000*
Contributions to State Employees' Retirement Fund	395,010
TOTAL	$6,411,391

DETAIL OF PROPOSED PROGRAM

1 Biostatistician $15,000
1 Senior stenographer-clerk $4,626

A biostatistician and related clerical assistance are proposed for consultation, supervision and guidance of the Statistical Research Bureau programs as well as the ongoing and proposed operational research within the department's various facilities.

1 Assistant to deputy director, administrative services $11,976

A business services officer is proposed to relieve the Deputy Director, Administrative Services, of administrative detail and of supervision of the various functions of headquarters office. This relief is required in order that the Deputy Director can devote more time to overall planning and direction of the business affairs of the Department of Mental Hygiene, including consultation and professional assistance to the management of the various hospitals and facilities.

1 Regional chief, department of mental hygiene $17,400
1 Senior stenographer-clerk $4,626

This position represents the initial step necessary to integrate on a regional basis the varied services provided by the Department of Mental Hygiene. This has become necessary for: (1) the increasing complexity of the State mental health services accompanying pre- and post-hospital and Short-Doyle programs and the need to co-ordinate them with hospital inpatient, clinic outpatient, and other existing field services, and (2) the con-

DEPARTMENT OF MENTAL HYGIENE—Continued

I. ADMINISTRATIVE STRENGTHENING—Continued

DETAIL OF PROPOSED PROGRAM—Continued

tinuing rapid growth in the California population making it increasingly difficult to provide adequate local service without regional co-ordination.

The proposed Regional Chief would be located in Southern California and would be directly responsible to the Director and Chief Deputy. Among the duties to be assigned would be the supervision and co-ordination of all Department of Mental Hygiene activities in that region, including Hospitals, Outpatient Clinics, Day Treatment Centers, Short-Doyle activities, extramural social work, and others.

A senior stenographer-clerk will be required to provide secretarial assistance to the Regional Chief.

1 Chief psychological services $13,000
1 Senior stenographer-clerk $4,626

A chief of psychological services and related clerical assistance are proposed to establish a psychology services section in the Sacramento office. The psychology services unit will give overall department co-ordination to and consultation for this particular discipline. This unit will be responsible for the formulation and implementation of a program of psychology services encompassing approximately 180 clinical psychologists throughout all facilities in the Department of Mental Hygiene.

1 Information officer I $7,728

An information officer is proposed to augment the existing staff in order to meet the increasing workload in the public information area. The demands for service and the opportunities for increasing understanding of the department's function and program have increased substantially in the past several years. Also the addition of new programs and the growth of the department in size alone adds a burden to the public information function. There has been no increase in this function since the addition to the department of the Short-Doyle, research, expanded professional training and many other expanded programs. In the future, expanded liaison, community services, day hospital and other programs are coming into effect. All of these add heavily to the duties of an adequate public information program.

1 Graphic artist $5,232

A graphic artist is proposed to provide the department with full-time services for this function. Graphic artist services have been obtained in the past on a contractual basis. This has proven unsatisfactory due to the necessity of having to use individuals who are available only on weekends or evenings. Because these people are not familiar with the intricacies of departmental operations, it is necessary that close supervision be provided which adds to the present overhead expense. The services of a graphic artist will be utilized by the statistical research bureau, the personnel and training officers, nursing services, rehabilitation therapies, bureau of patients' accounts, and other units of the Sacramento office.

1 Senior psychiatric social worker $6,360

An additional senior psychiatric social worker is proposed at the Riverside State Mental Hygiene Clinic to assist the professional personnel in handling the current heavy load of cases at the clinic. This position would (1) make possible more flexibility in processing current applications and establishing priorities in scheduling initial appointments with patients; (2) provide more social work time for social histories; and (3) increase staff time for treatment of patients, particularly for expansion of the group psycho-therapy program through which a larger number of patients may be served after admission to the clinic.

1 General accountant II $6,672

One additional accounting position is proposed in the departmental administrative office to handle the additional work created by the Short-Doyle program with an estimated expenditure of over $2,500,000 per year; a research program with an estimated expenditure program of over $1,000,000 per year plus federal funds of over $2,000,000 in projects: National Institute of Mental Health funds of over $400,000 per year. The fiscal accounting section has not been able to properly handle and supply financial operating data to the sections involved in the manner required and within reasonable time limits. The position will permit us to reorganize and set up accounting sections for these special programs.

4	Patients' estates and accounts specialist	$24,240	
3	Intermediate typist-clerk	12,582	
7	Total		$36,822

These 7 positions are proposed to meet the increasing caseloads which the field offices of the bureau of patients accounts are experiencing. Caseloads are now far beyond the point where they can be handled expeditiously. A caseload of 160 cases per field specialist has been cited as a reasonable workload for a specialist to process. The caseloads for the 3 field offices with the presently authorized 12 specialists are as follows: July 1, 1957, 2,045 cases, 170 cases per man; July 1, 1960, 2,519 cases, 210 cases per man; July 1, 1961, estimate 3,264 cases, 272 cases per man. July 1, 1962 estimated 4,469 cases, 372 cases per man. The addition of the proposed 4 specialist positions will permit holding the caseload to 180 cases per man. The 7 new positions would be assigned as follows: Los Angeles regional office—3 patients' estates and accounts specialist, 2 intermediate typist-clerks; San Francisco regional office—1 patients' estates and accounts specialist, 1 intermediate typist-clerk.

1 Intermediate typist-clerk $4,194

One additional intermediate typist-clerk is proposed for the Nursing Services Section to provide a ratio of 2 clerks to 3 professional and technical positions. An increase in the professional staff from one position to three positions has occurred during the past several years. No additional clerical help has been provided. The 1 clerk authorized has been unable to adequately service the needs of this section.

Statistical Research Section

1.5	Intermediate typist-clerk	$6,240	
2	Tabulation machine operator	8,808	
1	Senior typist-clerk	4,626	
1	Intermediate stenographer-clerk	4,194	
1	Assistant research technician	6,672	
6.5	Total		$30,540

The 6½ positions are proposed to cover workload increases in the statistical programs carried on by the statistical research section. These positions would be assigned as follows: 1 intermediate typist-clerk and 1 tabulating machine operator is for the reporting unit; 0.5 tabulating machine operator for the I.B.M. service operation for the bureau of patients' accounts; 1 senior typist, 0.5 intermediate typist-clerk and 0.5 tabulating machine operator, for the data analysis unit; 1 assistant research technician and 1 intermediate stenographer-clerk for the data analysis unit, hospitals for general psychiatry.

1 Intermediate typist-clerk $4,194

One additional intermediate typist-clerk is proposed for the Deportation and Transfer Section to assist with the processing of records for the purpose of return of patients to their home state. This will permit an earlier determination of the patients' status with a corresponding reduction in the cost to the state hospitals.

1 Intermediate clerk $3,996

One additional clerk position is proposed in the mail and duplicating section to handle the increase in volume of mail and duplicating services. The professional staff of the Sacramento office has materially increased in the last 2 years thereby increasing the workload in this service unit.

II. RESEARCH

DETAIL OF PROPOSED PROGRAM

Research Program $105,000

An additional $105,000 is proposed for the 1961-62 research program to enable research to be extended into the field of sociology. Five sociologist positions are proposed; 4 for field re-

DEPARTMENT OF MENTAL HYGIENE—Continued

II. RESEARCH—Continued

DETAIL OF PROPOSED PROGRAM—Continued

search teams and 1 for the Departmental Research Section. The objective of returning as many patients as possible to the community has highlighted the sociological factors involved in the acceptability of the patient in the community and his ability to remain successfully in the community.

III. TRAINING

	Number Positions	Total
Psychiatric residents	24	$17,040
Career residents	9	107,784
Librarian III	3	17,316
Training assistants	5	33,360
Interhospital training travel expenses	–	5,000
Central office training travel expenses	–	10,000
Training officer I	1	$8,112
Intermediate typist-clerk	1	4,194
Student professional assistant	4	13,824
Office equipment	–	2,600
Operating expenses	–	2,100
Totals	47	$221,330

DETAIL OF PROPOSED PROGRAM

24 Psychiatric resident II (Effective June 1, 1962) $17,040

These 24 positions are proposed to provide required staff expansions which are consistent with the normal development of the psychiatric residency programs as presently authorized at the hospitals and institutes. The establishment of the positions is proposed effective June 1, 1962, since it is necessary to make resident appointment commitments nearly a year in advance. Included are 4 positions for Neuropsychiatric Institute at University of California at Los Angeles and 5 at Agnews, 3 for Mendocino, 4 for Napa, 5 for Patton, 1 for Stockton and 2 for Sonoma.

9 Career psychiatric resident $107,784

The above positions are proposed for the purpose of training physicians who are now working in state hospitals but have had no training or previous experience in psychiatry. This program is required as the present supply of trained psychiatrists is inadequate. It is proposed to place 1 career psychiatric resident each at Agnews, Camarillo, Mendocino, Metropolitan, Napa, Patton, Stockton, Pacific and Sonoma.

3 Librarian III $17,316

One Librarian III position is proposed for each of 3 additional hospitals in order to provide effective use of the professional libraries. At present 6 hospitals are provided with staffing for professional library supervision, ordering, cataloguing, circulating, etc. With the increasing research and training programs at the hospitals, and the greater use of resources by the staff, maintenance and use of the medical library becomes an important activity. It is proposed to establish 1 position each at Agnews, Mendocino and Patton.

5 Training assistant I $33,360

These positions are to provide in 5 of the remaining hospitals additional technical assistance in the personnel training function similar to that provided at 8 hospitals in the 1960-61 Budget. It is proposed to establish 1 position each at DeWitt, Mendocino, Porterville, Modesto and Fairview.

Travel—interhospital training $5,000

The sum of $5,000 is proposed to cover travel costs incident to an interfacility training program. This program is important in disseminating advanced techniques, skills, and ideas among the hospitals through the media of staff visits, training conferences, and seminars conducted by highly qualified persons from within the department.

Travel—central office training $10,000

It is proposed to expand the training program to include the assignment of hospital medical and nonmedical personnel to the central office. This program is designed to help develop administrative personnel able to assume key positions of responsibility as vacancies occur as well as giving field administrators a better understanding of policies and practices in central departmental and staff agencies. To cover expenses of personnel while on travel status, $10,000 is required.

1 Training officer I $8,112
1 Intermediate typist-clerk 4,194

Rapid progress and increased activity in the development of the approved departmental training program has extensively increased the workload of the training division. One additional training officer I, and related clerical position are required to develop procedures and establish guidelines for the new programs and to aid in maintenance, co-ordination and evaluation of training in progress.

4 Student professional assistant $13,824

One position is proposed at each hospital to provide increased opportunities for paid field experience in hospital facilities and to increase recruitment advantages in the fields of rehabilitation services, psychology, social services, nursing services and food service. Ten such positions were approved in the 1960-61 Budget. It is now proposed to furnish each of the 4 remaining hospitals, Atascadero, DeWitt, Modesto and Fairview, with 1 position each.

IV. PRE-HOSPITAL SERVICES

	Number Positions	Total
Day treatment centers (2 units)	(34)	$300,000
Community organization specialist	4	35,760
Intermediate typist-clerk	2.5	10,485
Office equipment	–	2,900
Operating expenses	–	4,500
Totals	6.5	$353,645

DETAIL OF PROPOSED PROGRAM

2 Day treatment centers $300,000

Two additional day treatment centers are proposed to be established on the same basis as the facility which is now authorized and operating in San Diego. Increasing services to those patients who do not require 24-hour care but who would be hospitalized if no intermediate care were available will accrue financial benefits to the State and further relieve pressures to expand regular hospital capacities.

4	Community organization specialist	$35,760	
2.5	Intermediate typist-clerk	10,485	
	Equipment	2,900	
	Operating expense	4,500	
	Total		$53,645

Four additional community organization specialists with clerical assistance are proposed to promote the development of community resources and are intended to help reduce demands on the State's direct services to patients. These workers would help develop local services for screening, evaluation and referral. They would promote the development of family service counseling agencies, visiting nurse facilities, vocational guidance and vocational rehabilitation services, nursing homes, halfway houses, sheltered workshops, and recreational facilities. They would also be responsible for providing information and for coordinating services in order to assure a greater effectiveness of both new and already established resources.

V. POST-HOSPITAL SERVICES

	Number Positions	Total
After-care facilities (2 units)	16	$135,500
Staff psychiatrist	15	198,000
Senior psychiatric social worker	5	31,800
Intermediate typist-clerk	2	8,388
Additional office space	–	26,000
Additional family care home placement	–	85,220
Office equipment	–	7,300
Operating expense	–	12,000
Totals	38	$504,208

DEPARTMENT OF MENTAL HYGIENE—Continued

V. POST-HOSPITAL SERVICES—Continued

DETAIL OF PROPOSED PROGRAM

After-care facilities:

2	Senior psychiatrist	$27,360
4	Staff psychiatrist	52,800
2	Clinical psychologist II	15,456
2	Senior psychiatric social worker	12,720
6	Intermediate stenographer-clerk	25,164
16	Total, Salaries and Wages	$133,500
	Operating expenses	2,000
	Total	$135,500

The above 16 positions will provide for the establishment of two additional after-care facilities to be located at Agnews and Napa State Hospitals. As an adjunct to the regular hospital treatment program a substantial number of patients can be placed in the after-care program. They would be able to receive the necessary psychiatric, medical and other types of treatment during the day and return home at night. These programs will permit the utilization of existing bed space and facilities by patients who are in need of constant care and treatment rather than by those who may be placed on leave and receive the benefit of treatment at an after-care facility.

This request will bring the total number of after-care facilities to eight hospitals. Present facilities are located at Metropolitan, Stockton, Pacific, Camarillo, Modesto, and Patton.

15	Staff psychiatrist	$198,000

These positions are proposed to augment the convalescent leave program by providing psychiatric and medical treatment services to leave patients. Such services result in fewer patients returned from leave to the hospitals. Based on a ratio of 1 psychiatrist per 500 leave cases, 20 psychiatrists distributed among the hospitals are required for this service. Five such positions are now authorized. It is proposed to establish 2 positions each at Agnews, Camarillo and Napa and 1 position each at DeWitt, Mendocino, Metropolitan, Patton, Stockton, Fairview, Pacific, Porterville and Sonoma.

5	Senior psychiatric social worker	$31,800
2	Intermediate typist-clerk	8,388
7	Total	$40,188

The above 5 senior psychatric social worker positions and 2 intermediate typist-clerk positions reflect adjustments necessary to maintain the presently authorized level of service in the field services in accordance with existing workload standards.

Additional office space—Bureau of Social Work	$26,000

The Bureau of Social Work has assigned social workers to geographical areas in order to render service to patients on leave with the minimum amount of travel time. This plan requires the rental of space in a number of cities. Additional funds must be provided to cover the expansion of new social work services and the increased cost of lease renewals.

Family care home payments	$78,720

Current estimates indicate that a total of 1,570 fully financed and 185 partially financed cases will be eligible for this program as of June 30, 1962. This represents an average increase of 60 fully financed and 8 partially financed over the estimated 1960-61 year-end number. To finance this increase it is necessary to augment the funds available for the program by $78,720.

It is anticipated that Section 6726, Welfare and Institutions Code will be amended by the 1961 Session of the Legislature to increase the maximum payment to caretakers.

Additional family care leave allowances	$6,500

Increased family care placements, as proposed above, will require an increase in funds to provide leave allowances. This request is based on standard allowances for the estimated increases in family care cases.

VI. HOSPITAL SERVICES

	Number Positions	Total
A. Workload for Increased Admissions		
Staff psychiatrist	13	$171,600
Clinical psychologist	9	69,552
Senior psychiatric social worker	10	63,600
Supervising psychiatric social worker	1	7,008
Intermediate typist-clerk	11	46,134
B. Strengthening Hospital Services		
Assistant superintendent, children's unit	2	30,576
Intermediate stenographer-clerk	2	8,388
Supervising psychiatric nurse/technician	5	26,160
Intermediate typist-clerk	14	58,716
Food service assistant	5	16,470
Security officer	40	166,140
Group leader (psychiatric technicians)	7	26,670
Assistant superintendent, psychiatric	1	15,288
Supervising psychiatric technician	5	26,160
Assistant supervisor rehabilitation services	2	12,120
Telephone operator	1	3,810
Intermediate file clerk	2	7,992
Assistant seamstress	1	3,456
Physical therapist	3	16,902
Laboratory assistant	5	19,050
Psychiatric technician	583	902,732
Surgical nurse, technician, clerk	99	208,199
Neuropathology technician	1	5,772
Senior account clerk	1	4,626
Reclassification of psychiatric technicians to senior psychiatric technician I	–	74,511
Cancer treatment	–	30,000
Related expenses	–	51,000
Totals	823	$2,072,632

DETAIL OF PROPOSED PROGRAM

A. WORKLOAD FOR INCREASED ADMISSIONS

13	Staff psychiatrist	$171,600	
9	Clinical psychologist II	69,552	
1	Supervising psychiatric social worker I	7,008	
10	Senior psychiatric social worker	63,600	
11	Intermediate typist-clerk	46,134	
44	Total		$357,894

In the basic treatment phases of the departmental program, specific workload standards have been developed and utilized for a number of years in developing a progressive and effective program for the care and treatment of the mentally ill and mentally retarded. The groups of positions listed above are within this category.

In accordance with the workload standards adjusted to the estimated resident population and admissions for the 1961-62 fiscal year the positions shown above are required to maintain the same level authorized in the current basis. Application of uniform standards to each hospital requires a distribution of positions as follows:

	Staff	Clinical	Social Work		Intermediate
	Psychiatrist	Psychologist	Supervisor	Senior	Typist
Agnews	4	1	–	3	3
Atascadero	1	–	–	–	–
Camarillo	–	2	–	1	1
DeWitt	1	–	–	–	–
Mendocino	1	–	1	2	1
Metropolitan	–	2	–	–	1
Modesto	–	–	–	–	–
Napa	3	2	–	2	3
Patton	–	–	–	–	–
Stockton	3	2	–	2	2
Fairview	–	–	–	–	–
Pacific	–	–	–	–	–
Porterville	–	–	–	–	–
Sonoma	–	–	–	–	–
Totals	13	9	1	10	11

On the basis of the approved standard of 1 professional clerical pool position for each 3 professional positions utilizing pool services, 11

VI. HOSPITAL SERVICES—Continued

DETAIL OF PROPOSED PROGRAM—Continued

additional intermediate typist-clerk positions are required to provide the necessary clerical services for the professional positions included in our proposal for increased workload factors.

B. STRENGTHENING HOSPITAL SERVICES

2	Assistant superintendent, children's services	$30,576
2	Intermediate typist-clerk	8,388
4	Total	$38,964

These positions are proposed to provide medical administrative supervision over the children's unit at Napa and Camarillo. These units are operated separately from the main hospital with special problems including school classes and recreational activities, and require strong administrative leadership in conducting services for children. A position of intermediate typist-clerk will be necessary to provide secretarial assistance to each assistant superintendent, children's unit.

5	Supervising psychiatric nurse—technician	$26,160
1	Intermediate typist-clerk	4,194
6	Total	$30,354

These positions are proposed to establish a third nursing area at Fairview in order to provide supervision of the ward nursing program at a level consistent with other state hospitals. The size of nursing areas varies according to the size of the hospital, the treatment types of patients in residence and geographical distribution of wards, but average approximately 600. The resident population of Fairview is scheduled to increase to 2,000 patients by June 30, 1962. Standard staffing provides each nursing area office the clerical assistance of 1 intermediate typist-clerk.

5	Food service assistant	$16,470

Five food service assistant positions are proposed for the new food cart delivery room now under construction in the main kitchen at Napa. This arrangement allows food to be delivered to the several central dining rooms by food carts rather than the present system of carrying the food in aluminum stock pots. Five positions are required to cover 2 shifts per day on a post assignment basis.

10	Security officer II	$46,260
30	Security officer I	119,880
40	Total	$166,140

Forty additional security officer positions are proposed to enable the hospitals to establish this service on a 7-day week basis. A hospital security force is defined as patient protection, protection of state property and traffic control.

	Positions Now Authorized	Proposed New Positions	
		Security Officer II	Security Officer I
Agnews	–	1	4
Camarillo	–	1	4
DeWitt	2	1	2
Mendocino	–	1	4
Metropolitan	1	1	3
Modesto	2	1	2
Napa	1	1	3
Patton	5	–	–
Stockton	6	–	–
Fairview	–	1	4
Pacific	1	1	3
Porterville	3	1	1
Sonoma	5	–	–
Totals	26	10	30

7	Psychiatric technician (group leader)	$26,670

An additional 7 positions of psychiatric technician (group leader) are proposed for the purpose of augmenting present staffs of various hospitals to supervise carefully selected patient groups in off ward activities of a type not requiring the services of trained specialists. One position is proposed for Camarillo and 2 each for Stockton, Fairview and Porterville.

1	Assistant superintendent, psychiatric	$15,288
1	Intermediate typist-clerk	4,194
2	Total	$19,482

An additional position of an assistant superintendent, psychiatric services, is proposed for Agnews. This hospital is a divided hospital with approximately 2,000 patients in each section. The budget now provides for 3 assistant superintendent psychiatric services making it difficult to arrange the distribution of supervision. It is proposed that each section be provided with 2 assistant superintendent, psychiatric services positions. This arrangement would permit the east area and the west area to be divided into 2 operating units each under the general direction of the associate superintendent.

5	Supervising psychiatric technician	$26,160
1	Intermediate typist-clerk	4,194
6	Total	$30,354

An additional nursing area is proposed at Atascadero to provide more intensive supervision over the ward nursing activities. This proposal will permit the hospital to split the ward nursing supervision into 3 units.

The intermediate typist-clerk is required to furnish clerical assistance to the nursing unit.

2	Assistant supervisor of rehabilitation services	$12,120

Two assistant supervisor of rehabilitation services positions are proposed for Fairview to complete the organizational structure of this treatment area. No assistants are presently authorized, however, the hospital has now reached the size that it is necessary to secure these additional supervisory positions.

1	Telephone operator	$3,810

One additional position is required at Agnews. In accordance with standard staffing of telephone operators a 3-position board requires a staff of 8 positions for its operation. Agnews now has 7 authorized positions, therefore, 1 additional position is proposed at this time.

2	Intermediate file clerk	$7,992

One position each is proposed for DeWitt and Metropolitan to provide filing clerical assistance for the increase in admissions in accordance with staffing formula.

1	Assistant seamstress	$3,456

An additional position of assistant seamstress is needed at Mendocino for the purpose of staffing the mending room operation. This includes not only the mending of patients' clothing, but equally important from a dollar investment standpoint, the repair and salvaging of sheets, pillowcases, laundry bags and aprons. Patient help in this area has been decreasing over the past years with the advancement of the treatment program and the resultant working force has been unable to maintain the patient wearing apparel and household items in a satisfactory state of repair.

3	Physical therapist I	$16,902

Two physical therapists are proposed for Agnews and 1 for Fairview for furnishing physical therapy treatment to patients for orthopedic, surgical, neurological, vascular and other medical functional disabilities. Such treatment is essential in mental hospitals for bedridden and other wise immobile geriatric patients.

5	Laboratory assistant	$19,050

One position each is proposed for Atascadero, DeWitt, Mendocino, Modesto and Fairview in order to meet the increased workload caused by increased medical and surgical activities and the use of special drug treatments. This places the pharmacy staffing level at the 5 smaller hospitals at 1 pharmacist and 1 laboratory assistant. This is comparable for their size to the 9 larger hospitals which have 2 pharmacists each.

583	Nursing personnel (psychiatric technician)	$902,732

These positions are proposed to enable the hospitals listed below to attain the previously authorized level of nursing services equivalent to 91.5% of the 1952 departmental staffing stand-

DEPARTMENT OF MENTAL HYGIENE—Continued

VI. HOSPITAL SERVICES—Continued

DETAIL OF PROPOSED PROGRAM—Continued

ards. Nursing levels have dropped through the past two years to the strength shown as now authorized in the table below through deactivation of wards and realignment of patients in different wards and through reclassification of wards. Wards have been reclassified and reorganized to reflect transfers of patients who are progressing and benefit from increased treatment and attention standards. More wards are changed to intensive treatment units as patients progress to that point.

The distribution of positions is as follows:

	91½%	Now Authorized	Proposed New
Atascadero	408	319	89
Camarillo	1,407	1,197	210
DeWitt	587	532	55
Mendocino	517	503	14
Metropolitan	849	824	25
Modesto	615	598	17
Fairview	719	625	94
Pacific	962	940	22
Porterville	833	776	57
Total			583

Due to recruiting and training problems it is planned to stagger the effective dates as follows:

200 positions effective November 1, 1961	$434,000	
200 positions effective January 1, 1962	321,600	
184 positions effective April 1, 1962	147,132	
Total		$902,732

99 Surgical nurse, technician and clerk:

7	Surgical nurse I	$26,145	
11	Graduate nurse	26,070	
67	Psychiatric technician	97,268	
14	Intermediate typist-clerk	58,716	
99	Total		$208,199

A departmental committee reviewed hospital requirements in the areas described and made the following recommendations by hospital:

Hospital	Total required	Intermediate typist-clerk	Surgical nurse I	Graduate nurse	Psychiatric technician trainee
Agnews	10	1	1	1	7
Atascadero	6	1	1	1	3
Camarillo	9	1	–	–	8
DeWitt	6	1	1	1	3
Mendocino	5	1	–	1	3
Metropolitan	8	1	–	1	6
Modesto	6	1	1	1	3
Napa	7	1	–	–	6
Patton	10	1	1	1	7
Stockton	6	1	–	–	5
Fairview	6	1	1	1	3
Pacific	6	1	–	1	4
Porterville	6	1	1	1	3
Sonoma	8	1	–	1	6
Total	99	14	7	11	67

These positions are proposed to provide augmentation to meet the needs of hospitals for nursing functions other than ward duties including surgery, central supply, specialty clinics, immunization programs, skin testing programs, and recovery rooms.

Due to recruiting lag, it is planned to stagger effective dates as follows:

14	Intermediate typist-clerk effective July 1, 1961	($58,716)
7	Surgical nurse I effective October 1, 1961	(26,145)
11	Graduate nurse effective January 1, 1962	(26,070)
20	Psychiatric technician effective October 1, 1961	(43,400)
20	Psychiatric technician effective January 1, 1962	(32,160)
27	Psychiatric technician effective April 1, 1962	(21,708)
	Total	($208,199)

1 Neuropathology technician $5,772

This proposed position for Agnews is in accordance with accepted staffing standards for newly completed receiving and treatment buildings in the state hospitals. With the completion of new pathology facilities, Agnews will be able to assume a larger pathology program through utilization of this proposed position.

8 Intermediate typist-clerk $33,552

Clerical positions have been established for the X-ray departments of 6 hospitals. This request is for 1 clerical position at each of the 8 hospitals where such service is not now provided under current staffing authorization. Currently, the professional staff in the X-ray department is required to perform many time-consuming clerical functions thereby reducing their effective professional production time. The need for clerical assistance at this level was recognized and provided for in the 6 larger hospitals in previous budgets. The request for 1 intermediate typist-clerk in each of the remaining 8 hospitals is based on the good results demonstrated in operating under this system. It should be pointed out that the remaining hospitals are smaller only by comparison and each actually constitutes a large operating unit.

Hospital	Positions Now Authorized	Additional Positions Proposed
Agnews	–	1
Atascadero	–	1
Camarillo	1	–
DeWitt	–	1
Mendocino	1	–
Metropolitan	1	–
Modesto	–	1
Napa (Second position for TB)	2	–
Patton (Second position for TB)	2	–
Stockton	1	–
Fairview	–	1
Pacific	–	1
Porterville	–	1
Sonoma	–	1
Total	8	8

2 Intermediate typist-clerk $8,388

These positions are requested to meet the increased workload in the trust office at DeWitt and Modesto. The workload has resulted from continuing increase in social welfare benefits available to patients through more liberal social security type benefits and veterans programs as well as the increase in insurance coverages. The addition of these positions will pay for themselves many times in increased revenue to the State.

1 Senior account clerk $4,624

This position is requested for Camarillo. There has been a tremendous increase in the accounting section's workload in the last 7 or 8 years due to expanded programs, yet there has been no increase in the hospital's accounting staff during this time. In order for this section to stay abreast of the current workload it is essential that 1 senior account clerk be added to their staff.

1 Intermediate typist-clerk $4,194

This clerical position is proposed at Atascadero to maintain the current workload involved in processing and recording patient movements. The processing of these movements on a daily basis is essential in any hospital activity and current staffing is inadequate to accomplish this level of service. The additional position is in accordance with departmental staffing standards.

Senior psychiatric technician I (reclassification of 487 authorized psychiatric technician positions) $74,511

The proposed reclassification of authorized positions is to provide additional second level nursing supervision on nonacute hospital wards sufficient for a psychiatric technician I on each shift on each nonacute ward.

DEPARTMENT OF MENTAL HYGIENE—Continued

VI. HOSPITAL SERVICES—Continued

DETAIL OF PROPOSED PROGRAM—Continued

Hospital	*Proposed Reclassification*
Agnews	52
Atascadero	25
Camarillo	43
DeWitt	31
Mendocino	16
Metropolitan	43
Modesto	32
Napa	50
Patton	44
Stockton	42
Fairview	18
Pacific	32
Porterville	34
Sonoma	25
	487

Cancer treatment expenses $30,000

Napa and Camarillo have been designated by the department to be the 2 centers for handling and treating cancer patients. Upon diagnosis, patients from the other hospitals are transferred in the north to Napa and in the south to Camarillo. After careful review it has been estimated that it costs on an average approximately $100 additional for medical supplies and drugs for each cancer patient treated. Approximately 150 patients per year are treated at each hospital. It is proposed, therefore, that an allowance of $15,000 each for Napa and Camarillo be authorized for the special treatment purpose.

VII. SPECIAL SERVICES FOR MENTALLY RETARDED

	Number Positions	*Total*
Subsidy to private medical facilities	–	$100,000
Additional family care home placements	–	205,200
Supervising psychiatric social worker	1	7,008
Senior psychiatric social worker	7.5	47,700
Intermediate typist-clerk	6	25,164
Community organization specialist	4	35,760
Teacher	19	109,668
Related expenses	–	21,050
Total	37.5	$551,550

DETAIL OF PROPOSED PROGRAM

Subsidy to private medical facilities $100,000

This proposal provides for subsidies to private medical facilities for the care of mentally retarded who are on waiting lists for placement in state hospitals. The use of private facilities will serve to reduce pressures for additional capital outlay and provide relief for families with children and youth on waiting lists. The amount requested would provide for the placement of 40 patients at $2,500 each per year. This amount is based on prevailing costs of treatment at state hospitals. Statutory authorization of this subsidy program is anticipated at the 1961 Legislative Session.

Additional family care home payments $180,000

Approximately 10 to 33 percent of the population presently in facilities for the retarded could be cared for in family care homes if sufficient homes were available for these placements. Such placements would serve to free hospital beds for patients whose only treatment resource is hospitalization and reduce the waiting list and waiting period for families in dire need. Experience has shown that patients placed in family care homes show improved physical and mental development and are often able to attend school and/or work. Based on realistic limits of expansion during the year, it is estimated that 300 patients could be placed by the end of 1961-62—or an average of 150 patients at $1,200 each per year for a total cost of $180,000.

It is anticipated that Section 6726 of the Welfare and Institutions Code will be amended by the 1961 session of the Legislature to increase the maximum payment to caretakers.

Additional Social Work Staff for Family Care Home Placements:

1	Supervising psychiatric social worker	$7,008	
7.5	Senior psychiatric social worker	47,700	
4	Intermediate typist-clerk	16,776	
	Operating expenses	9,000	
	Office equipment	5,150	
12.5	Total		$85,634

It has been found that 1 social worker can effectively produce 40 year-end patient placements. Increased placements in family care homes is a necessary measure to help offset the anticipated increase in the number of new admissions. These homes can only be developed and maintained through planned professional assistance. This cannot be done without additional social work staff. The supervisory and clerical positions are requested in the established ratios. Operating expenses and office equipment are based on standard rates.

Additional family care home leave allowances $16,200

Additional family care home clothing allowances $9,000

Increased placements created by the proposed increase in the family care home program will increase the funds required for incidental personal expenses and clothing for family care patients. This request is based on standard allowances for an estimated 300 year-end placements—or a yearly average of 150 patients.

4	Community organization specialists	$35,760	
2	Intermediate typist-clerks	8,388	
	Operating expenses	4,500	
	Office equipment	2,400	
6	Total		$51,048

Four additional community organization specialist positions are proposed to extend the present services of the Information Centers for the mentally retarded. The centers have been of direct benefit to the mentally retarded in communities by assisting local development in meeting the needs of this group. The proposed positions will permit a more economical distribution of staff as the existing 2 positions must each cover half of the State. Additional personnel can more effectively promote local services which will in turn contribute to a reduction in the need for state hospital care for the mentally retarded. Two clerical positions are required for clerical assistance to the professional positions.

19 Additional teachers for mentally retarded $109,668

The present ratio of one teacher for 10 full-time equivalent retarded students, applied to the estimated number of patients who could benefit by attending school in the hospitals for the retarded, requires the 19 additional teachers requested. The education of retarded children many times makes the difference between an independent worker with limited but sufficient skill and an incompetent patient for whom the State is responsible.

The proposed distribution of these positions is Fairview 7, Pacific 3, Porterville 4, and Sonoma 5.

VIII. SALARY INCREASE—PSYCHIATRIC TECHNICIANS

Salary increases $2,231,000

To provide a 1 step salary increase for employees in the psychiatric technician series of positions.

ADMINISTRATION

GENERAL ANALYSIS

The Department of Mental Hygiene is organized in three primary functions: Administration, Bureau of Patients Accounts and Bureau of Social Services.

Departmental Administration of the Department of Mental Hygiene performs the primary functions of policy formulation, co-ordination and direction of the overall activities of the department including its hospitals, clinics, and other facilities. Services are provided in the following areas: research, community mental health activities, public information, business and fiscal management, co-ordination of the nursing and rehabilitation service programs, personnel management and training, food administration, statistics, engineering, guardianships, deportation and institution transfers, and inspection and licensing of private institutions. Also, the department is responsible for the administration of National Mental Health Act funds for California, and the outpatient clinic program.

Further expansion of community services authorized by the Short-Doyle Act is programed in 1961-62. It is estimated that 32 local jurisdictions will qualify for aid as compared to 19 in 1960-61 and 12 in 1959-60. The department reimburses the participating jurisdictions for 50 percent of the cost of their approved program. Research projects at the various hospitals have been approved and this program is explained in detail under the budget request for research funds. The entire departmental cost of the specialized training program is provided for in this budget.

BUREAU OF PATIENTS ACCOUNTS

GENERAL ANALYSIS

The Bureau of Patients Accounts assesses and collects charges for the care and treatment of the mentally ill patients within the ability of the patients or their responsible relatives to pay. In addition, reviews are made for the purpose of determining possible benefits to which patients are entitled. The effectiveness of the bureau's program is indicated in the following table of annual collections for patients' care and treatment:

Actual 1957-58	Actual 1958-59	Actual 1959-60	Estimated 1960-61	Estimated 1961-62
$9,467,833	$10,622,565	$11,716,788	$12,506,580	$13,217,832

BUREAU OF SOCIAL SERVICE

GENERAL ANALYSIS

The Bureau of Social Service conducts preleave investigations, arranges placements to permit hospital leaves for mentally ill and mentally retarded patients, and assists in reestablishing patients as responsible members of the community. Determining and arranging for employment opportunties and living accommodations, developing the most healthful family relationships, and frequent patient contacts to effect a firm and lasting adjustment are all important elements of the overall leave program of the department. In this regard, the department arranges home leaves, industrial leaves, and family care home leaves.

FAMILY CARE

This appropriation provides an average of 1,450 cases fully financed by the State and 170 cases partially financed by the State to be placed on leave of absence to family home care. The program includes provision for the maximum rate at $100 per month effective July 1, 1960. This rate is within the allowance which was authorized by the Legislature in 1957, however, legislation will be proposed to increase this maximum rate.

DAY TREATMENT CENTER

This appropriation provides for a new program whereby mentally ill patients may receive institutional type treatment during the day at state operated facilities and return to the family situation in the evening. The first center was established at San Diego in December 1960.

GENERAL ANALYSIS

Objectives

The outpatient mental hygiene clinics provide for the prevention, early diagnosis and treatment of mental illness, retardation, or disorder, and are established to assist persons not requiring hospitalization.

Program and Performance

The programs provided by the 6 state-supported clinics and the 1 federally supported clinic at Berkeley operate in metropolitan and rural areas. The Department of Mental Hygiene acts as administrator of National Mental Health Act funds for California and is responsible for allocation of such funds to other agencies as well as setting and maintaining required levels of service. In addition to the general services, the Berkeley Clinic conducts a training program for social workers, psychologists and psychiatrists.

The total performance of the clinics is indicated by the following schedule which shows the number of hours spent by professional employees in interviews with patients (on either an individual or a group basis) and in preventive services to communities. The hours spent by patients in individual and group therapy are also shown. Of the professional time allocated to all services, 87.5 percent was directed toward treatment of clinic outpatients and 12.5 percent toward preventive work in the community in the 1959-60 fiscal year. It is estimated that the percentages will remain the same for both the 1960-61 and the 1961-62 fiscal years.

The chief factors responsible for the variation in cost per service hour from clinic to clinic are: (1) the duration of normally occurring vacancies (e.g., in areas remote from metropolitan centers, recruiting is more difficult); (2) the proportion between children and adults in the caseload of patients (e.g., a child's case takes 2 to 3 times more staff time than does an adult case); (3) the ratio between group psychotherapy and individual psychotherapy offered in a given clinic (e.g., 10 hours of professional staff time may produce 100 patient-hours in group therapy but only 10 patient-hours in individual treatment interviews); and (4) other extraneous factors.

GENERAL ANALYSIS

Objectives

The Langley Porter Neuropsychiatric Institute is a teaching and research center for the University of California and the Department of Mental Hygiene and provides care and treatment for patients appropriate to the overall teaching and research program.

Program and Performance

The statistics presented in the following summary are indicative of the performance of this institute as reflected by inpatient and outpatient caseloads.

Caseload:	1959-60	1960-61	1961-62	Change
Hospital inpatient days	30,948	34,440	34,440	–
Outpatient annual interviews [b]	21,060	26,000	26,000	–
Allocation of Costs: [c]				
Inpatient department	$1,308,559	$1,546,570	$1,592,675	$46,105
Outpatient department	436,187	515,523	530,892	15,369

Average Cost Per Patient:	1959-60	1960-61	1961-62	Change
Inpatient (daily)	$42.28	$44.91	$46.24	$1.33 (2.9%)
Outpatient (per interview)	20.71	19.83	20.42	0.59 (2.9%)

The current program of the institute includes training programs for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians and fellows in psychiatry. Clinical and basic research projects of various kinds are under way. The facilities include an outpatient department, a 104-bed inpatient service, plus 13 day/night program beds which accommodate 26 patients.

An expanded training program in community mental health services has been undertaken as an ongoing activity during the current fiscal year. In addition an increased number of medical school students will receive training in psychiatry. In order to meet the demands of this training, it is expected that the outpatient program will be increased by about 5,000 annual interviews in both the current and the budget years over the past year workload of 21,060.

GENERAL ANALYSIS

Objectives

The Neuropsychiatric Institute at the University of California, Los Angeles, is a teaching and research center, and provides care and treatment for patients with early curable types of mental disorders as a part of the overall teaching and research programs of the University and the Department of Mental Hygiene.

Program and Performance

The Neuropsychiatric Institute is built as a part of the Medical School of UCLA and was completed during November 1960, with the actual opening on December 1, 1960.

In the 1956-57 fiscal year a limited program was initiated which included an outpatient clinic. In 1957-58 the institute was authorized to assume full support of an expanded outpatient clinic program to meet the teaching needs of the University of California medical school. With the opening of the new institute in December 1960, the program will be expanded to include training for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians, and fellows in psychiatry. Also included in the program will be clinical and basic research projects, a day hospital program, a somatotherapy room, and a 188-bed inpatient service.

---

[a] Composed of savings in salaries and wages, $48,653; operating expenses, $85,065; equipment, $5,067; and loss in reimbursements, $29,990.

[b] Composed of savings in salaries and wages, $18,758; and loss in reimbursements, $350.

[c] Represents average count Monday through Friday divided by 261 days and excludes weekend visits.

[d] Average for 7 months' operation.

GENERAL ANALYSIS

Objectives

Agnews State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts and epileptics without mental retardation, and primarily serves the Counties of Santa Clara, San Mateo, Santa Cruz, San Francisco, Alameda, San Benito and Monterey.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1957-58	1958-59	1959-60
Total admissions	3,657	3,873	3,980

GENERAL ANALYSIS

Objectives

Atascadero State Hospital provides care and treatment for sex psychopaths, and for mentally ill male patients requiring maximum security. This hospital serves all counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department. While the facilities are designed for maximum security, the program emphasis is on treatment.

An appropriation of $200,000 provided by Budget Act of 1960, Item 146.5 is included in the 1960-61 expenditure program and provides additional positions, supplies and alterations required for increased security program. The costs for positions and supplies are extended into the 1961-62 fiscal year.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1957-58	1958-59	1959-60
Total admissions	1,469	1,612	1,577
Total net releases	1,458	1,384	1,568

GENERAL ANALYSIS

Objectives

Camarillo State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, and minors and juvenile court observation cases committed under Section 740.5 of the Penal Code. It serves primarily the Counties of Los Angeles, Ventura, Santa Barbara and San Luis Obispo.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. A juvenile unit is located on the hospital grounds where a specialized treatment program is conducted for minors. An after-care facility is operated by the hospital, which extends psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1957-58	1958-59	1959-60
Total admissions	4,190	3,719	3,974
Total net releases	4,141	3,860	4,031
Net transfers from other hospitals	—16	—61	—155

GENERAL ANALYSIS

Objectives

DeWitt State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and a limited number of mentally retarded patients. It serves primarily the Counties of El Dorado, Yolo, Sutter, Yuba, Placer, Nevada, Sierra, Butte, and Plumas.

Program and Performance

It is planned that the average population at this institution will consist of 2,286 mentally ill and 550 mentally retarded patients during the 1961-62 fiscal year. The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1957-58	1958-59	1959-60
Mentally Ill:			
Total admissions	816	950	946
Total net releases	901	938	1,047
Net transfers from other hospitals	—24	28	—7
Mentally Retarded:			
Total admissions	–	–	–
Total net releases	18	8	10
Net transfers from other hospitals	23	—41	1

METROPOLITAN STATE HOSPITAL—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	

GENERAL ANALYSIS

Objectives

Metropolitan State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and serves primarily the Counties of Los Angeles and Orange.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1957-58	1958-59	1959-60
Total admissions	1,992	2,650	2,440
Total net releases	1,763	2,286	2,689
Net transfers from other hospitals	290	800	40

GENERAL ANALYSIS

Objectives

Napa State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, minors and juvenile court observation cases committed under Section 740.5 of the Penal Code and serves primarily the Counties of Marin, Solano, Contra Costa, San Francisco, Alameda, Sonoma, and Napa.

Program and Performance

The level of care and treatment techniques utilized at the hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department and emphasize treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill patients in the northern part of the State suffering with this disease; a juvenile unit is located on the grounds where a specialized program is conducted; and a special program for the treatment of alcoholics is available.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1957-58	1958-59	1959-60
Total admissions	3,625	3,813	3,999
Total net releases	3,558	3,838	4,214
Net transfers from other hospitals	—26	—90	—24

GENERAL ANALYSIS

Objectives

Patton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and primarily serves the Counties of Inyo, San Bernardino, Los Angeles, Riverside, San Diego, and Imperial.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill patients in the southern part of the State afflicted with this disease. An after-care facility is operated by this hospital, which extends psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1957-58	1958-59	1959-60
Total admissions	2,954	2,905	2,896
Total net releases	2,861	2,811	2,975
Net transfers from other hospitals	—218	—26	531

GENERAL ANALYSIS

Objectives

Fairview State Hospital serves the southern counties of the State by providing care and treatment for mentally retarded patients in that area.

Program and Performance

The level of care and treatment techniques utilized at this relatively new hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

This hospital was activated in the 1958-59 fiscal year, with the first patients being admitted during January 1959. Additional facilities, providing a total of 1,190 beds, were added during the 1959-60 fiscal year which increased the hospital's rated capacity to 1,946 as of June 30, 1960. A total of 676 additional beds already funded will be activated during the 1963-64 fiscal year.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows. As this is a new institution, actual statistics are available for 1958-59 and 1959-60 only.

	1957-58	1958-59	1959-60
Total admissions	–	150	375
Total net releases	–	13	148
Net transfers from other hospitals	–	446	693

GENERAL ANALYSIS

Objectives

Pacific State Hospital provides care and treatment for mentally retarded patients principally from the southern counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1957-58	1958-59	1959-60

GENERAL ANALYSIS

Objectives

Porterville State Hospital provides care and treatment for mentally retarded patients primarily from the central and southern counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1957-58	1958-59	1959-60
Total admissions	226	220	315
Total net releases	197	167	98
Net transfers from other hospitals	13	—71	—145

---

[a] Composed of savings in salaries and wages, $47,745; operating expenses, $32,150; equipment, $834; and increase in reimbursements, $261.

[b] Composed of savings in salaries and wages, $218,641; operating expenses, $45,439; and increase in reimbursements, $1,371.

Support—Adjutant General, National Guard and Reserve *(General Fund)*	$2,500,564	$2,812,319	$2,793,598	—$18,721 (—0.7%)
Personnel man-years	372.4	383.4	364.6	—18.8

GENERAL ANALYSIS

Objectives

The Military Department includes: the California National Guard, to help guarantee internal security of the State and provide an organization prepared in an emergency to become a part of the active federal military forces; and the California National Guard Reserve, to provide for defense and security of California while the California National Guard is in active federal service.

Program and Performance

The primary programs of the Military Department are the operation of the California Army National Guard and the California Air National Guard. Within these programs the State provides a personnel procurement program which enters the field of selection and appointment of officers and warrant officers and recruitment of enlisted personnel; maintains records of the military history of individuals, recording personnel actions, verification of service or deeds, and qualifications for federal retirement; publishes orders and directives on policies and procedures affecting the military; determines locations of organizations and units allocated to the State; provides for training, in conformance with the discipline prescribed by the Department of the Army and Department of the Air Force; operates army officer candidate schools at Glendale and Stockton; prepares plans for use of National Guard as state military forces and uses such forces as required for emergency situations, such as flood duty and fire fighting; participates in the air defense program of the United States both in missiles and aircraft; maintains and operates armories, airfields, rifle ranges, supply points, repair and other facilities; establishes priorities for the use and distribution of federal funds, equipment, and supplies; and administers federal funds in excess of $20,000,000 allocated to California covering pay, schools, uniforms, equipment, material and supplies.

The California National Guard Reserve program encompasses all the activities of the California Army National Guard except for the officer candidate schools and those activities financed from federal funds. All activities are conducted at a reduced level compared to the National Guard operation, due to the cadre nature of the organization.

Funds for the operation of the California Cadet Corps have been included for the 1960-61 fiscal year only.

The following tables show personnel strength, units, and installations of the state military forces:

	Actual 1959-60	Estimated 1960-61	Estimated 1961-62
National Guard:			
Ground Forces:			
Personnel	19,900	20,162	20,262
Units	259	260	260
Air Force:			
Personnel	4,468	4,605	4,728
Units	40	40	40
Reserve Forces:			
Personnel	515	526	545
Units	33	33	33
Installations:			
Grounds Forces:			
State-owned	100	101	105
Leased	26	25	22
Air Force:			
Flying bases	4	4	4
Other bases	3	3	3

This budget reflects a reorganization resulting in the transfer of 1 position to provide full-time inspector general services, and the addition of an assistant adjutant general as authorized by Military and Veterans Code Section 161. Included in the budget are 2 additional positions for water sewage plant operation at Camp San Luis Obispo. Expanded operation of the water sewage plant is to service the new prison which will be completed in Camp San Luis Obispo. The cost of the 2 positions is reimbursed by the Department of Corrections. One additional custodian for the air installation at North Highlands is required to maintain a new food service building, an addition to the administration building and additional grounds around the added facilities.

An overall reduction of 18.8 positions in the 1961-62 fiscal year is anticipated based upon the federal government's assuming the direct cost of 18 security guards rather than reimbursing the State for the expenditure.

GENERAL ANALYSIS

Objectives

This regulatory and tax collection agency is responsible for issuing the license which is required for each motor vehicle operated in California, issuing the license to the qualified individual to operate motor vehicles on public roads, and ascertaining the financial responsibility of individuals involved in motor vehicle accidents.

Program and Performance

The department operates through 4 divisions headquartered in Sacramento. Branch offices are maintained in principal cities of the State and part-time service is provided to many communities by traveling crews. Through these media the department's basic functions are: the registration and titling of vehicles; the examination of applicants for and the issuance of drivers' licenses; the collection of fees; the maintenance of records in accordance with the laws; the administration of the driver improvement program; the administration of the Financial Responsibility Law; the licensing and control of driving schools and driving instructor services; the licensing of motor vehicle dealers, salesmen, wreckers, manufacturers and transporters; and the investigation and enforcement of laws pertaining to the registration of vehicles and of driver licensing.

In conformance with the department's economy program, no additional positions are proposed for the 1961-62 fiscal year. Increases for operating expenses are proposed only for uncontrollable items of expense. The following are the major workload factors for this department:

	Actual 1959-60	Estimated 1960-61	Estimated 1961-62	
Registrations	8,538,000	8,952,000	9,286,000	334,000 (3.7%)
Drivers' licenses	2,626,492	3,224,441	2,399,800	—824,641 (—25.6%)

DEPARTMENTAL ADMINISTRATION

Objectives

The director is responsible for the administration of all sections of the California Vehicle Code not delegated to the Department of the California Highway Patrol. He establishes departmental policy and directs the work of the 4 divisions.

The Division of Administration is responsible for planning, organizing and directing the administrative sections of the department.

Program and Performance

The Division of Administration provides the director with information on fiscal expenditures; develops budget plans for current and long-range fiscal requirements; projects workload estimates for the divisions; accounts for all revenues derived from the department's fee collection activities, and accounts for all property owned by the department. Department-wide service activities consist of assisting the director and the division chiefs in personnel matters, including in-service training. Real property rentals are located, negotiated, and executed for the department. Supplies, including license plates and tabs, are purchased, stored, and distributed. Departmental programs and procedures are analyzed toward effecting more efficient and economical administration. Departmental communication and information request services are co-ordinated among the divisions both in Sacramento headquarters and field offices.

DIVISION OF REGISTRATION

Objectives

This division is responsible for the administration of the provisions of the Vehicle Code relating to the following: issuance, suspension, and revocation of vehicle registrations; issuance of certificates of ownership for all vehicles and small boats; licensing and suspension of automobile truck and trailer manufacturers, transporters, dealers and wreckers; assessment of vehicles and collection of vehicle license fees.

Program and Performance

This division will register approximately 9,286,000 vehicles and 120,000 small boats in the State during the 1961-62 fiscal year. Accomplished through the processing and service units, registration affords a system of ready identification and control, provides a means of establishing ownership, and provides the mechanism for collecting fees. This division has in its Sacramento files a history of every motor vehicle registered in California. The records are maintained under the registered owner's name in alphabetical order, under the license number in numerical sequence, and by engine or identification number in numerical sequence. The Automation Section of this division employs punched cards to record all data concerning all registered vehicles. As the fees are changed from year to year, the mechanical equipment is used to rerate the vehicles, and prepare potential registration cards which are mailed in advance of the renewal period.

The investigation of automobile dealers and wreckers is accomplished by this division through the use of trained investigators. They also serve briefs for the department, collect fees in the event of improper or inadequate payments, and perform other allied investigative functions, among them being the licensing and regulation of salesmen and the enforcement of the registration compliance program.

DIVISION OF DRIVERS LICENSES

Objectives

This division is responsible for the issuance of all original drivers' licenses, the renewal of expiring licenses, the maintaining of driving histories of all drivers, the direction of the driver improvement program, and the administration of the State's financial responsibility laws.

Program and Performance

This division licenses and maintains a post licensing control of approximately 8,400,000 drivers. It is estimated that approximately 2,399,800 original and renewal licenses will be issued in 1961-62 fiscal year. The drivers license file contains more than 31,000,000 driver record documents. The licensing function is accomplished primarily by clerical forces in handling applications as received from the field offices. An expanded use of driver records, which is of recent growth, is the Information Request Service in which the division furnishes driver record transcripts at the current rate of over 15,000 per day. This activity is completely reimbursed since statute provides that this information be furnished upon payment of at least the cost of producing the information report.

Driver improvement includes the general function of post licensing control of drivers with problems that cause their records to show that they are a hazard to themselves or the general public. The mandatory actions are those spelled out in the law requiring automatic action after certain specific convictions, such as drunken driving and certain other offenses including felonies. Discretionary actions are provided for habitual violators. The discretionary provision is extended to physical or mental disabilities which would result in danger to the individuals themselves or to the general public. To carry out these functions the division uses re-examination, interviews, investigations, warnings and hearings before a referee. Under this discretionary program the division endeavors to improve poor driving habits and attitudes.

The division is also responsible for the administration of the financial responsibility laws. It is the purpose of this function to provide reasonable assurance that persons suffering bodily injury or property damage in motor vehicle accidents are compensated by those responsible for such injury or damage. Drivers who fail to meet their financial obligations by insurance or otherwise, are deprived of the privilege of operating a motor vehicle, and their vehicle registration may be suspended for the same cause.

Provision is made for the continuation of the photographs on drivers' licenses program.

DIVISION OF FIELD OFFICE OPERATIONS

Objectives

This division provides a statewide network of field offices responsible for examining applicants for drivers' licenses; issuing vehicle licenses; receiving, processing and accounting for applications and fees for both vehicle registration and driver license, as well as for dealers and vehicle salesmen; providing information on financial responsibility laws, brief service and driving school licensing.

Program and Performance

This division maintains 137 permanent full-time offices and 29 travel crews serving smaller and isolated communities. Complete vehicle registration and driver licensing services are provided in the permanent offices. Trained examiners are used in the travel crews to provide driver licensing service. Applicants for driver licenses are required to submit to a written test of their knowledge of the Vehicle Code, a vision screening test, an actual demonstration of their ability to operate a vehicle, and their ability to read simple English. A $3 application fee entitles the applicant to 3 tests within 6 months. Complete registration service is available in all permanent branch offices located in all principal cities of the State. In addition, during the annual registration renewal period service on potential registration cards is offered at approximately 150 banks. Certain registration services are also rendered by automobile clubs. This service is reviewed and audited by field offices. Traveling registration crews visit many other points for stated periods as a convenience to the public. Many field offices serve as headquarters for the motor vehicle investigators and driver improvement analysts.

---

[a] Sixteen junior clerk positions established to process increased information requests. Fifteen junior clerk positions established to purge driver record files expire June 30, 1961. These positions are financed by reimbursements.

GENERAL ANALYSIS

Objectives

Fundamental objectives of the department are the protection, propagation, preservation, and investigation of the State's fish and game resources, including ocean fisheries and marine products, for the utilization of and general benefit and recreation of the people of California.

Program and Performance

The director, under general policies established by the Fish and Game Commission and as prescribed by statute, administers the department and its program. Included in the department are the Wildlife Conservation Board and the Marine Research Committee.

For purposes of administration and operation the department is organized into several functions corresponding to its major activities. General policy direction is provided by the Fish and Game Commission. The commission is composed of 5 members appointed by the Governor. In addition to establishing general policy they regulate the taking of fish and game by promulgation of regulations establishing open and closed seasons; bag and possession limits; and areas for the taking of fish and game. The commission also regulates commercial fishing to insure the taking and delivery of fish in a wholesome and sanitary condition and to prevent deterioration and waste of fish.

The 1960-61 fiscal year budget authorized increased emphasis in several areas of departmental responsibility most notably in water project and pollution work. This added emphasis is continued in the 1961-62 fiscal year proposal.

There are no major augmentations proposed in the 1961-62 program. A reduction in the game management pheasant production program is planned. Another change in game management practices is the decrease in farming operation on waterfowl management areas.

These changes reduce by 34 the number of authorized permanent positions and reduce by 11 the number of temporary help positions. Six of these permanent positions are related to the closure of Region 5 Game Farms; 1 located in Imperial County and 1 located in San Diego County. The department is consolidating Southern California pheasant production at the Chino Game Farm. In addition the department is purchasing 9,000 pheasants from private producers in lieu of the former production of the closed Region 5 Game Farms. The result of this consolidation of state production is anticipated to reflect a net savings in overall cost of the pheasant production and supply program.

Included in the above are 26 permanent and 11 temporary positions abolished in the Federal Aid to Game Management program due to the loss in federal aid funds caused by the expiration of the distribution period for reserve tax funds authorized by the Federal Bible Bill. Recent improved techniques for managing the state waterfowl marshes will make this personnel reduction possible without undue loss to waterfowl habitat, hunter services or depredation control. These federal tax funds accumulated in past years were allocated to the various states for a 5-year period which ended June 30, 1961.

A reduction of 2 positions results from the integration of Sequoia Hatchery trout production with the San Joaquin Hatchery and consequent closure of the Sequoia Hatchery in the 1960-61 fiscal year.
